Even if he is sick, doesn’t wake up anyone. He says, “I am sick but why bother other people, he goes and makes his own tea and takes his own medicine”. But when others are sick he leaves no stone unturned.

Does not say anything when he gets angry but he gets sick because of anger. His knees and shoulders ache, he is unable to bend his knees. He is even unable to wear clothes. But says noting.

He is not:
Avarice (Insatiable desire for wealth)
Greedy
Fear of poverty (he is content)
Delusion injured of being
Praying, Religious etc.

Coculus Indicus Child

Plays even in fever, if fever is high he lies quietly. If his parents have time to sit with him he won’t bother them. If somebody is playing TV or radio but he does not like it he will not say anything. (Why ruin their joy). When fever is gone he gets up from bed and starts playing.

**"Coccus Cacti"**

COCCUS CACTI
Cochineal

The clinical application of the symptoms of this remedy, place it among the medicines for spasmodic and whooping coughs, and catarrhal conditions of the bladder; spasmodic pains in kidneys, with visceral tenesmus. Anuria, anasarca, ascites.

Mind.--Early morning or afternoon sadness.

Head.--Suboccipital soreness; worse after sleep and exertion. Headache, worse from lying on back, better with the head high. Dull pain over right eye in morning. Sensation of a foreign body between upper lid and eyeball. Distress from cinders lodged in eye.

Respiratory.--Constant hawking from enlarged uvula; coryza, with inflamed fauces; accumulation of thick viscid mucus, which is expectorated with great difficulty. Tickling in larynx. Sensation of a crumb behind larynx, must swallow continually; brushing

Juglans Regia

Feb 5th - Mar 5th

teeth causes cough. Fauces very sensitive. Suffocative cough; worse, first waking, with tough, white mucus, which strangles. Spasmodic morning cough. Whooping cough attacks end with vomiting of this tough mucus. Chronic bronchitis complicated with gravel; large quantities of albuminous, tenacious mucus, are expectorated. Walking against wind takes breath away.

Heart.--Sensation as if everything were pressed toward the heart.

Urinary.--Urging to urinate; brick-red sediment. Urinary calculi, hæmaturia, urates, and uric acid; lancinating pains from kidney to bladder. Deep-colored, thick urine. Dysuria.

Female.--Menses too early, profuse, black and thick; dark clots, with dysuria. Intermittent menstruation; flow only in evening and at night. Large clots escape when passing water. Labia inflamed.

Modalities.--Worse, left side, after sleep, touch, pressure of clothing, brushing teeth, slightest exertion. Better, walking.

Relationship.--Compare: Canth; Cact; Sars.

Dose.--Lower triturations.

COCHLEARIA ARMORACIA
Horse-radish
(ARMORACIA SATIVA)

Frontal bone and sinus, antrum and salivary glands are specifically affected by this drug. Bloated sensation. Raises vital forces. Used as a gargle in scorbutic gums and sore throat. Hoarseness and in relaxed conditions of the fauces. Internally in gonorrhœa. Useful as a condiment in enfeebled states of the stomach. An infusion of the root in cider, for dropsy, causes copious diuresis. Locally cures dandruff.

Head.--Thinking is difficult. Anxiety, driven to despair by pain. Pressing, boring pain as if frontal bone would fall out. Violent headache with vomiting. Impaired hearing.

Eyes.--Sore and scrofulous; traumatic inflammation of eyes, blearedness and cataract. Copious running from eyes.

Stomach.--Pain towards back; worse, pressure on dorsal vertebræ. Belching and cramps. Colic with backache. Violent cramp from stomach through both sides around to back. Griping around navel.

Back.--Pain in back as from incarcerated flatulence from abdomen through to back and down into sacrum.

Respiratory.--Dry, hacking, laryngeal cough, also post-influenzal cough, dry or loose, worse lying down. Chest painful to touch. Coryza, with hoarseness. Mucous asthma. Œdema of lungs. Throat feels rough and hoarse.

Urinary.--Burning and cutting at glans penis before, during, and after urination. Frequent urination.

Modalities.--Worse evening and at night.

Relationship.--Compare: Cannab; Sinapis; Caps.

Dose.--First to third attenuation.

# COFFEA CRUDA
## Unroasted Coffee

Stimulates the functional activity of all organs, increasing the nervous and vascular activity. The drinking of coffee by the aged is likely to increase production of uric acid, causing irritation of kidneys; muscle and joint pains, and with the increased susceptibility of old people to the stimulating action of coffee and tea, their use should be curtailed or carefully watched. Great nervous agitation and restlessness. Extreme sensitiveness characterizes this remedy. Neuralgia in various parts; always with great nervous excitability and intolerance of pain, driving to despair. Unusual activity of mind and body. Bad effects of sudden emotions, surprises, joy, etc. Nervous palpitation. Coffea is specially suited to tall, lean, stooping persons with dark complexions, temperament choleric and sanguine. Skin hypersensitive.

Mind.--Gaiety, easy comprehension, irritability, excited; senses acute. Impressionable, especially to pleasurable impressions.

Mercurialis Perennis

Picture of this second

43,725 Pageviews
Feb 5th - Mar 5th
+
−

Full of ideas, quick to act. Tossing about in anguish (Acon).

Head.--Tight pain, worse from noise, smell, narcotics. Seems as if brain were torn to pieces, as if nail were driven in head. Worse in open air. Sensitive hearing.

Face.--Dry heat, with red cheeks. Prosopalgia extending to molar teeth, ears, forehead, and scalp.

Mouth.--Toothache; temporarily relieved by holding ice-water in the mouth (Mangan opposite). Hasty eating and drinking. Delicate taste.

Stomach.--Excessive hunger. Intolerance of tight clothing. After wine and liquor.

Female.--Menses too early and long lasting. Dysmenorrhœa, large clots of black blood. Hypersensitive vulva and vagina. Voluptuous itching.

Sleep.--Wakeful; on a constant move. Sleeps till 3 am, after which only dozing. Wakes with a start, sleep disturbed by dreams. Sleepless, on account mental activity; flow of ideas, with nervous excitability. Disturbed by itching of anus.

Respiratory.--Short, dry cough of measles in nervous, delicate children.

Heart.--Violent irregular palpitation especially after excessive joy or surprise. Rapid high tension pulse and urinary suppression.

Extremities.--Crural neuralgia; worse, motion, afternoon and night; better, by pressure.

Modalities.--Worse, excessive emotions (joy), narcotics, strong odors, noise, open air, cold, night. Better, warmth, from lying down; holding ice in mouth.

Relationship.--Incompatible: Camph; Coccul. Complementary:

Acon.

Compare: Coffea tosta (Roasting develops certain vitamin-like substances (P. T. Mattei). Pigeons which have developed "deficiency" neuritis and paralysis on diet of polished rice lost their disabilities on the addition of 8 cc to a 5 % infusion of coffee to their food. Unroasted coffee was useless). Caffeine.--(A crystalline alkaloid-is a direct heart stimulant and diuretic. Dropsy depending on cardiac insufficiency. Myocardial degeneration. Cardiac insufficiency in pneumonia and other infectious diseases. Raises the blood pressure, increases pulse rate and stimulates the heart muscle; hence, a support in extreme feebleness or threatened failure. Stimulates the respiratory center, nerve centers and increases diuresis. One of the best stimulants of the vaso-motor centers. Acute pulmonary œdema. Brachialgia and other neuralgias characterized by nocturnal exacerbations. Jousset uses equal parts of caffeine and sachar lac. 3 grains taken in divided doses every other day. Hypodermically, 1/4 grain. Excruciating facial neuralgia from decayed teeth); Acon; Cham; Nux; Cyp; Caffeine and plants containing it, as Kola, Thea, etc.

Strong black coffee, drunk as hot as possible, is indispensable as an antidote in a large number of poisons, especially narcotics. Hot coffee by rectum in cases of extreme collapse.

Antidotes: Nux; Tabac.

Colchicum autumnale
Mo Fayyaz

COLCHICUM AUTUMNALE
Meadow Saffron
(COLCHICUM)

Affects markedly the muscular tissues, periosteum, and synovial membranes of joints. Has specific power of relieving the gouty paroxysms. It seems to be more beneficial in chronic affections of these parts. The parts are red, hot, swollen. Tearing pains; worse, in the evening and at night and from touch; stubbing the toes hurts exceedingly. There is always great prostration, internal coldness, and tendency to collapse. Effects of night watching and hard study. Shocks as from electricity through one half of body. Bad effects from suppressed sweat. Dreams of mice.

Head.--Headache chiefly frontal and temporal, but also occipital and in nape of neck, worse afternoon and evening.

Eyes.--Pupils unequal; left pupil contracted. Variations in visual acuity. Lachrymation worse in open air; violent tearing pain in eyes. Dim vision after reading. Spots before eyes.

Ears.--Itching in ears; sharp, shooting pains below right tragus.

Face.--Pain in facial muscles, moving about. Tingling and œdematous swelling; cheeks red, hot, sweaty. Very irritable with the pains (Cham). Pain behind angle of right lower jaw.

Stomach.--Dry mouth, tongue burns, gums and teeth pain. Thirst; pain in stomach and flatulence. The smell of food causes nausea even to fainting, especially fish. Profuse salivary secretion. Vomiting of mucus, bile and food; worse, any motion; great coldness in stomach. Craving for various things, but is averse to then when smelling them, seized them with nausea. Gouty gastralgia. Burning or icy coldness in stomach and abdomen. Thirst for effervescent, alcoholic beverages. Pain in transverse colon.

Abdomen.--Distention of abdomen, with gas, inability to stretch out legs. Borborygmi. Pain over liver. Cæcum and ascending colon much distended. Fullness and continuous rumbling. Ascites.

Stool.--Painful, scanty, transparent, jelly-like mucus; pain, as if anus were torn open, with prolapse. Autumnal dysentery; stools contain while shreddy particles in large quantities. Ineffectual pressing; feels feces in rectum, but cannot expel them.

Female.--Pruritus of genitals. Cold feeling in thigh after period. Sensation of swelling in vulva and clitoris.

Urine.--Dark, scanty or suppressed; bloody, brown, black, inky; contains clots of putrid decomposed blood, albumin, sugar.

Heart.--Anxiety in region of heart. Impulse not felt. Pericarditis, with severe pain, oppression and dyspnœa, pulse threadlike. Sound of heart become weaker, pulse of low tension.

Extremities.--Sharp pain down left arm. Tearing in limbs during warm weather, stinging during cold. Pins and needles in hands and wrists, fingertips numb. Pain in front of thigh. Right plantar reflex abolished. Limbs, lame, weak, tingling. Pain worse in evening and warm weather. Joints stiff and feverish; shifting rheumatism; pains worse at night. Inflammation of great toe, gout in heel, cannot bear to have it touched or moved. Tingling in the finger nails. Knees strike together, can hardly walk. Œdematous swelling and coldness of legs and feet.

Back.--Aching in lumbar and lumbo-sacral region. Dull pain across loins. Backache, better, rest and pressure.

Skin.--Blotchy papular rash on face. Pink spots on back, chest and abdomen. Urticaria.

Modalities.--Worse, sundown to sunrise; motion, loss of sleep, smell of food in evening, mental exertion. Better, stooping.

Relationship.--Antidotes: Thuja; Camph; Coccul; Nux; Puls.

Compare: Colchicine (intestinal catarrh with shreddy membranes; convulsive jerkings of right hand; rheumatic fever, gout, endo and pericarditis, pleurisy, arthritis, deformans in early stages; intense pain of rheumatism 3x trit). Also, Carbo; Arnica; Lilium; Arsen; Verat.

Dose.--Third to thirtieth attenuation.

Jayashree Kanoi

COLLINSONIA CANADENSIS
Stone-Root

Pelvic and portal congestion, resulting hæmorrhoids and constipation, especially in females. Depressed arterial tension, general atony of muscular fiber. Chronic nasal, gastric, and pharyngeal catarrh, due to portal obstruction. Dropsy from cardiac disease. Pruritus in pregnancy, with piles. Constipation of children from intestinal atony. Said to be of special value when given before operations, for rectal diseases. Sense of weight and constriction. Venous engorgement.

Head.--Dull frontal headache; from suppressed hæmorrhoids. Chronic catarrh. Yellow-coated tongue. Bitter taste (Colocy; Bry).

Rectum.--Sensation of sharp sticks in rectum. Sense of constriction. Vascular engorgement of rectum. Dry feces. Most obstinate constipation, with protruding hæmorrhoids. Aching in anus and hypogastrium. Constipation during pregnancy; with membranous dysmenorrhœa, following labor (Nux). Painful bleeding piles. Dysentery, with tenesmus. Alternate constipation and diarrhœa, and great flatulence. Itching of anus (Teucrium; Ratanh).

Female.--Dysmenorrhœa; pruritus of vulva; prolapse of womb; swelling and dark redness of genitals; pain on sitting down. Membranous dysmenorrhœa, with constipation. Pruritus. Cold feeling in thighs after menstruation. Sensation of swelling of labia and of clitoris.

Respiratory.--Cough from excessive use of voice; "minister's sore throat"; sharp pain in larynx. Hoarseness. Harassing, dry cough.

Heart.--Palpitation; rapid but weak. Dropsy. After heart symptoms relieved, piles or menses return. Chest-pains alternate with hæmorrhoids. Oppression, faintness, and dyspnœa (Acon ferox).

Modalities.--Worse, from the slightest mental emotion or excitement; cold. Better, heat.

Relationship.--Antidote: Nux.

Compare: Aescul; Aloes; Hamam; Lycopus; Negundo; Sulph; Nux.

Dose.--Tincture, to third attenuation. Higher potencies where there is organic heart affection.

STONE ROOT Herbal

What is it? Stone Root is an herbal medicine used to treat kidney and bladder stones and to increase (make more) urine flow. It may also help you lose water that has caused ankle or hand swelling. Stone Root may be used to treat irritable bowels and colitis (inflammation of the colon) if taken by mouth. It may help sores, bruises, and cuts if put on the skin.

Other names for Stone Root include: Collinsonia canadensis, Heal-All, Rich Weed, Horse Balm, and Knob Root.

Shopping For Short Prom Dresses - 2010
Prom is a special occasion in the life of every girl. This is probably the first occasion of proper socializing and no girl wants to be left behind in terms of looks, style or the glamour quotient. Short prom dresses 2010 are quite fashionable and the trend has been encouraged by many brand new models in the spring collection of so many designers. Girls can choose from a variety of knee length models in various colors and textures of cloth that will suit their height, skin and color.
There are many online sites too that one can explore for ideas. Promgirl.net, for example, features quite a few models of Short prom dresses 2010 season. A good example is the Tony Bowls, knee length strapless dress, which is tulle pink, heavily sequined beauty. It is an A-line that has a satin ribbon and bow along with attachable straps. Another excellent model amongst short prom dresses 2010 collection is the Clarisse which comes in flamboyant colors like mint, yellow and coral. It has a floral appliqu body embellishment and comes with a tulle pick up skirt. The knee length dress will be an absolute hit with girls in the 2010 prom. Both these models cost around 200 dollars which is quite a decent price for a top quality prom dress.
The elegant chiffon with sparkle and some beading with a bust of ruche sweetheart could be sensational to. This prom dress

could also double up as a cocktail dress with its elegance and sensuous look. One can look for slightly cheaper models for short prom dresses 2010 collection as well. A bright red, lovely strapless dress which is made of satin and mesh, giving complete expression of your flawless skin, costs just about $125 - 140 on sites like promdresses2010.com. A slightly richer looking Satin Umbrae Organza fabric is also used for short prom dresses 2010 collection. Aqua and coral colors with sequin edges, scoop neck, and zipper back, embroidered and lace trimmed dress models from PromGownDress.com cost around 200 dollars and could make you look stunning. http://www.sexybackdresses.com/Zipper-Back-Dress

**Colloidal Silver**
**Started by: lew at October 3 2006**

**Replies: 13 & Views: 13424** Font Bottom Of Page **Page 1 of 1** Reply

| **Colloidal Silver** | By: lew<br>Malaysia | October 3 2006 |
|---|---|---|

Click picture for many more pictures

Greetings,

Colloidal Silver

Silver stands close to copper chemically and pharmacologically. The so-called oligopdynamic actions were first observed by Naegeli with these two metals. The contraction of the bands of chlorophyll in the plasma membrane of the alga, spirogyra, was the indicator of these actions. From many investigations which have since been concerned with this problem, it proceeds with certainty that the metallic silver in distilled water such as conductivity water goes into solution, and indeed in an amount which corresponds to the D5 potency. The oligodynamic action of apparently higher dilutions is explained in all probability that metal particles are absorbed by the glass walls and are slowly given off again into water so that after repeated rinsing of the vessel there is still a dilution of the metal in the D6 - D7 . This shows distinctly the depressing and lethal effects on bacteria.

At the time of Hahnemann, only silver nitrate , AgNO3, was employed and it appears quite remarkable that at that time Hahnemann should have seen metallic silver effects in organism. Because the general view is expressed by Sachs when he states: " Metallic silver is insoluble in the animal organism and therefore cannot serve as a medicament." A single observation such as that of White,in which a patient who accidentally swallowed a silver coin which was carried for 18 months was cured of epilepsy also cannot awaken such confidence on the effectiveness of metallic silver. The certainty with which Hahnemann introduced metallic silver into the drug treasury is all the more remarkable. He has obtained splendid confirmation in this respect by recent investigations.

Excerpt : Silver - page 800-801 from

TEXTBOOK OF HOMEOPATHIC MATERIA MEDICA
( Reprint 1989 )

Inorganic Medicinal Substances
by Otto Leeser, PH D., MD

Translated from the german by

Linn J. Boyd, MD

Colloidal Silver seems to only attack the unfriendly pathogens or anaerobic ones and does no harm to the friendly or aerobic ones. How does it differentiate? For the most part, friendly bacteria are aerobic (needing oxygen) while unfriendly bacteria are anaerobic. The silver does not attack bacteria directly, but rather decomposes certain enzymes the anaerobic bacteria, viruses, yeast and molds require. The silver acts as a catalyst and is not consumed in the process. The reason that microbes do not develop resistance to silver, as they do to antibiotics, is because silver does not attack them directly, but rather destroys the enzymes they depend on. Many forms of bacteria, fungi, and viruses utilize a specific enzyme for their metabolism. The presence of colloidal silver near a virus, fungus, bacterium or any other single elled pathogen disables its oxygen metabolism enzyme, its Chemical Lung, so to say. Within a few minutes, the pathogen suffocates and dies, and is cleared out of the body by the immune, lymphatic and elimination systems. Unlike pharmaceutical antibiotics, which destroy beneficial enzymes, colloidal silver leaves these tissue-cell enzymes intact, as they are radically different from the enzymes of primitive single-celled life. Thus colloidal silver is safe for humans, reptiles, plants and all multi-celled living matter. Silver acts as a catalyst, effectively disabling the enzyme. It is toxic to all species tested of fungi, bacteria, protozoa, parasites, and many viruses. To primitive life forms, silver is toxic as the most powerful chemical disinfectants. Based on laboratory tests, destructive bacteria, virus, and fungus organisms are killed within minutes of contact.

With regards
Lew

Doctors are Nature's Assistants: Only Mother Nature does the Healing.

|---|---|---|
| **Re: Colloidal Silver** | By: girilal<br>New Jersey USA | October 3 2006 |

I have resolved many die hard cases of infections with colloidal silver

How to make it at home.

Need two silver wires, place them in rain or mineral water about 3 inches apart.

You need a 30 volts AC or DC voltage adopter and pass current in the wire.

Even 12 Volt cordless phone adopter would work but in that case place silver wires very clost and make sure they don't touch each other or you would burn out your adopter by short circuitting.

As you see some ions buildup around the wires, your colloidal solution is ready.

Take a spoon twice a day just like any homeopathy medicine.

girilal

| **Re: Colloidal Silver** | By: lew<br>Malaysia | October 4 2006 |
|---|---|---|

Thanks, Kuldeep; very kind of you for inserting the simple home-made Colloidal Silver generator. I love home-made items. Home-cooked meals for instance. When I was in the Punjab, my Punjabi friends often brought me to their home and their parents fed me excellent home-made food.

Seventy years ago, Colloidal Silver was a proven germ fighter and widely used. It was the mainstay of antibiotic treatment. In 1914 the medical journal, "Lancet", reported phenomenal results from its' use. Dr. Henry Crooks showed Colloidal Silver to be absolutely harmless, and non-toxic to humans, and highly germicidal. Colloidal Silver has proven itself useful against all species of fungi, parasites, bacteria, protozoa, and certain viruses. For centuries we've known the properties of silver. The ancients stored their water in silver vessels to prevent bacteria from growing. American settlers would put a silver dollar in their milk containers to hinder it's spoilage. Australian Colonials would suspend a silver fork or spoon in their water containers to prevent contamination. Soldiers in the American Civil War swallowed whole silver dollars to ward off disease. Thankfully there is no information on how they re-cycled them?) Communion goblets used in church were made of silver, because it was known that one couldn't catch any disease if the cup was made of silver. In certain European countries a silver teaspoon/fork was placed in the pot when cooking mussels. Prior to 1940 articles regarding benefits of colloidal silver were frequently seen in medical journals. During the 1930s silver was used both externally and internally for a variety of medical conditions. Because of the price of silver, (then US$200.00 an ounce) and the inception of penicillin and other antibiotics, which was relatively inexpensive, use of Colloidal Silver fell by the wayside .

Yes, there are many ways where you can make relatively clean water for individual or household consumption. Years ago. I learnt from experienced brewers of Colloidal Silver in a Silver forum list. I purchased colloidal silver generators ( Robey ) and Zappers from the states. In my clinical setup, I used these two items to fight many anti-viral battles which included the Japanese encephalitis rogue variant( Nipah Virus, which was isolated in Malaysia ), and SARS. The Malaysian doctors , the majority, are not interested in these devices. But I received feedback from patients' attendants that some of the colloidal silver ( 5ppm) I personally generated, was smuggled by them into the hospital wards as drinking water.

Argyria is the bluish - graying of the skin and is the result of ingesting high doses of CHEMICALLY produced colloidal silver. There has never been a case of Argyria caused by ELECTRICALLY produced colloidal silver.

Electrically produced silver colloid does not cause Argyria. In fact, hundreds of thousands of people around the world have been taking electrically produced colloidal silver for decades. The concern is with silver salts, NOT colloidal silver. Silver salts are created in the chemical process of making colloidal silver, or colloidal silver containing additives, proteins, or other bonding materials. Brewers of Colloidal Silver are routinely advised not to add anything in the generating process.

I have always included Selenium in my daily intake of Colloidal minerals. It helps in the excretion of silver impurities in this instance. For the more affluent folks, I would suggest Germanium.

girilal, how long does it take to make the colloidal silver medicine?

Do you think it can be made by using cigarrette lighter plugs used on travel coffee mugs in the automobile?

What's a reliable source of the silver wire?

| **Re: Colloidal Silver** | By: MAX VARMA<br>New Delhi and Vancouver | December 16 2006 |
|---|---|---|

Very good information.

Lew

Apparently, Germanium comes is powder, tablets, capsules and in homeopathic remedies. It also comes in pure germanium

What do you recommend?

Thank you

| **Re: Colloidal Silver** | By: lew<br>Malaysia | December 18 2006 |
|---|---|---|

To BarneyandBetty

I took for my self and prescribed for my patients Germanium tablets. Then, there was the disquietening
news that ingestion of germanium caused kidney and liver complications from Japan. The inorganic type of germanium was reported to be the cause, not the organic type. Please make sure that it is organic germanium you are buying.

Seasonal greetings to you and your family.

Girilal

Is 24 or 30 guage silver wire ok? I do not know the difference between one gauge and the other. I am concerned about the ability of the wire to stay in the water if the wire is too thin. The pictures shows a wire that is straight down in the water.

| | | |
|---|---|---|
| **Re: Colloidal Silver** | By: Pat2006M | February 3 2007 |

if it's too thin, I will just wrap it to make it thicker/heavier

Colocynthis
Pains: The principal feature of Colocynth is its severe, tearing, neuralgic pains; so severe that the patient is unable to keep still. Sometimes they are > by motion - at least it appears that they are worse during rest- > by pressure and sometimes > by heat. Pains occur in the face, abdomen, along the course of the nerves.
These pains are often due to a very singular cause, namely, anger with indignation. Hence persons who are haughty and easily offended or chagrined have Colocynth complaints. Anger will be followed by violent neuralgia in the head, eyes, down the spine and in the intestines.
In spite of extreme restlessness there is great weakness with the pains. It patient suffering with chronic diarrhoea, with severe colic, will sometimes become so weak that he can hardly speak. A feeling of faintness, or even fainting, is by no means an unusual concomitant of the pains. Griping occurs along the course of nerves, and in some cases numbness, pricking and tingling, like the crawling of ants in the part affected.

With many doctors Colocynth is a routine remedy for sciatica; and only when it fails to do they take the symptoms of the case in order to find the remedy that is indicated. There is no excuse for such practice. Where the pain is better from hard pressure and from heat, where it is worse during repose and drives the patient to despair, Colocynth will generally cure.

But it is not indicated in all cases. Some remedies select the muscles and tendons, some the bones and periosteum, while others select the great nerve trunks in which to manifest their symptoms. The pains of Colocynth appear, as a rule, in the larger nerves.

The mental symptoms are not very striking. As soon as the prover of Colocynth begins to have pains a long the course of nerves he becomes irritable; everything vexes him; he is worse from vexation.

Screams with the pains. Walks about the room and becomes increasingly anxious as the pain goes on. Disinclined to talk or to answer, or to see friends. His friends irritate him and he wants to be alone. He has all he can do to stand those terrible pains.

Vomiting and diarrhea frequently come with the pains, especially if they are in the abdomen.

Colic comes on in paroxysms that grow in intensity. The patient becomes increasingly nauseated until finally he vomits and he continues to retch after the stomach is empty.

Colocynth produces a state in the nervous system like that found in individuals who have for years been laboring under annoyances and vexations. A man whose business affairs have been going wrong becomes irritable and nervous exhaustion follows.

A woman who must watch her unfaithful husband night and day to keep him away from other women gradually assumes a sensitive irritable state of mind and is upset by the least provocation. This is the state of the Colocynth prover.

You will seldom find this medicine indicated in strong, vigorous, healthy people who have suddenly become sick. It is more likely to be in the constitution just described, and those who are in the habit of overeating.

We find tearing pains in the scalp, brought on by anger; exhaustion, pains that are better from pressure and heat, and worse when not in motion. Constant, gnawing pains in the head.

Head: Painful, tearing, digging through the whole brain, becoming unbearable when moving the eyelids. Intense pain through the whole head; worse from moving the eyes. Severe, pressing, tearing headache, causing her to cry out.
Intermittent headache in those of a rheumatic, gouty or nervous diathesis. Pain tearing and screwing together. Violent periodical or intermittent headache.
Such are some of the expressions in the text. But the particular character of the pain is not as important as the circumstances that are likely to cause it and the conditions in which the patient has been living.
Eyes: Knowing the life of a patient affords much knowledge of the patient himself. The same violent neuralgic pains are found in the eye. Rheumatic iritis, worse in the evening and night. Severe, burning, cutting and sticking pains in the eye. Burning is more characteristic of the pains of the eyes than of other parts of the head and face. Sharp, cutting- stabs; pressing pains.
Face: The faceache is especially important, because Colocynth is one of the most frequently indicated remedies for neuralgia of this region.
There are some remedies which are indicated in faceache more often than any others, Belladonna, Magnesia phosphorica and Colocynth.
The Belladonna pains are as violent as any, and are accompanied by red face, flashing eyes, hot head, and great sensitiveness of the part to touch.
In Colocynth the pains come in waves, are better from heat, from pressure, worse if anything during rest, and are brought on by excitement or vexation.
They are generally on the left side; while those of Belladonna are on the right, and are caused by cold.
Magnesia phosphorica has tearing and pains that shoot like lightning along the nerves and are relieved by heat and pressure.
The expression of the Colocynth face is one of anxiety from the

severity of the suffering. No matter where the pain is the face is distorted. Finally, it becomes pale and the cheeks become blue. Tearing pains in the cheek-bones, or more correctly, in the infra orbital nerve where it emerges from the foramen. Sometimes this pain feels like a hot wire, sometimes like a cold nail, and sometimes it is tearing, burning or stinging.

Frequently it spreads over the face, following the ramifications of the small branches of the nerve, usually on the left side. The patient cries out and is very restless. Tearing or burning pain extending to the ear and head.

All pains are better from pressure, but this is in the beginning. After the pain has been going for several days with increasing severity, the part becomes very sensitive and pressure cannot be endured.

Stomach: Aversion to food. Violent thirst. Colic brought on from drinking while overheated; from eating indigestible things, from high living; colic from eating potatoes.

Potatoes and starchy foods disagree with the Colocynth patient like Alumina. The vomiting of Colocynth is different from that of most other remedies .

Nausea does not appear at first, but when the pain becomes sufficiently intense nausea and vomiting begin, the contents of the stomach are ejected and the patient continues to retch until the severity of the suffering decreases.

The stomach pains are clutching, cramping and digging; as if grasped by the fingers.

Abdomen: Similar pains occur lower down in the abdomen, but they are still better from hard pressure, and from doubling up which amounts to pressure, come on in paroxysms of increasing severity, until the patient is nauseated and vomits, and are associated with great restlessness and faint, sinking feeling at the pit of the stomach.

The victim, bends down over the back of a chair, or over the foot-board if unable to get out of bed.

In the Guiding Symptoms we find several pages of repetitions, showing how extensively this medicine is applicable in abdominal complaints where these symptoms are present. It would be well to read them.

The pains in the lower part of the abdomen are relieved by

drawing up the limbs and pressing with the fists. In the violent ovarian neuralgias of Colocynth, the woman will flex the limb of the painful side hard against the abdomen and hold it there.
The physician asks:
"What has happened to give you these pains?
Her answer is likely to be:
"My servant spilled some dirty water on a handsome rug, we had some words over it, and this is the result. "
Colic from anger with indignation; better from bending double and worse in the upright position, while standing or bending backwards.
Colic of infants when they are relieved by lying on the stomach as soon as the position is changed they begin to scream again,
The same symptoms accompanying the diarrhoea and dysentery, The stools consists of white mucus, are thick, ropy and jelly-like; at times bloody.
At first they may be copious, strong smelling, pappy, and later watery, yellow, scanty and almost inodorous.
Diarrhoea and dysentery from anger with indignation; the most awful tenesmus during stool; urging to stool with colic. Eating ever so little, rings on the colic, urging and stool. Watery stools after eating. Many of these cases, find relief from heat and the warmth of the bed.

is it a medicine for pain in left arm with frozen shoulder.
sen

| | | |
|---|---|---|
| **Re: Colocynthis** | By: Joe De Livera<br>Sri Lanka | August 17 2013 |

Colocynthis is not the remedy for Cervical Spondylosis or Frozen shoulder.

I shall copy below my default therapy for this disease below:

Rhus Tox 30c in the Wet dose is the remedy to treat Cervical Spondylosis or Frozen Shoulder and must be taken twice daily.
You may like to know that even I have often being surprised when chronic cases of this disease which were unsuccessfully treated in hospital for months with Physiotherapy, Steroids and Analgesics, responded to my therapy in under 48 hours when a distinct reduction of pain was felt.

Please note that the instructions below are followed carefully to make the Wet dose as the success of my therapy depends on your doing so.

The Wet dose of any Homeopathic remedy is made as follows:

Order the remedy in the Ethanol pack also referred to as Liquid Dilution in a bottle preferably with a dropper arrangement.
Get a 500ml bottle of Spring Water from the nearest supermarket.
Pour out about 3cm of water from the bottle to leave some airspace.
Insert 3 drops of the remedy into the bottle and shake the bottle hard before you sip a capfull of the bottle or a large teaspoonful which is the dose.
Shaking the bottle hard is homeopathic succussion and this shaking must be done at least 6 times before sipping a capful of the bottle as prescribed.

Please follow the following restrictions which are essential to ensure that the remedy prescribed is not antidoted:

Do not use Coffee, Cola beverages, preserved foods like sausages, ham and bacon as they contain Saltpeter.

You will not use any drugs or other medicine when you start on my therapy.

COMOCLADIA DENTATA
Guao

Important eye and skin symptoms. Affections of antrum. Sacro-iliac and abdominal pain. Throbbing pains worse by heat. Pain in joints and ankles.

Eyes.--Ciliary neuralgia with eyes feeling large and protruded, especially right. Worse, near warm stove; feels as if pressed outward. Sees only glimmer of light with left eye. Glaucoma, sense of fullness; eyeball feels too large. Motion of eyes aggravates.

Face.--Swollen, with eyes projecting.

Skin.--Itches, red and pimples. Redness all over, like scarlatina. Erysipelas. Deep ulcers, with hard edges. Leprosy. Red stripes on skin (Euphorb). Eczema (papular) of the trunk and extremities; also pustular type.

Chest.--Acute pain in left mammary gland. Pain from right side of chest down arm to fingers. Cough with pain under left breast, going through to left scapula.

Modalities.--Better, open air, scratching; by motion. Worse, touch, warmth, rest; night.

Relationship.--Compare: Rhus; Anacard; Euphorb.

Dose.--First to thirtieth potency.

Jayashree Kanoi

| **CONIUM MACULATUM.** | By: Jayashree<br>Calcutta, India | October 1 2006 |
|---|---|---|

Click picture for many more pictures

CONIUM MACULATUM.
Vertigo, especially < on turning the head, or looking around sidewise, or turning in bed.
Swelling and induration of glands, after contusions or bruises.
Cancerous and scrofulous persons with enlarged glands.
Urine flows, stops and flows again intermittently, prostatic or uterine affections.
Breasts sore, hard and painful during menstrual period.

* * * * *

This is another of the so-called spinal remedies. Quote from what authorities say from a pathological standpoint. All seem to agree that it paralyzes from below upwards, and the poisoning of Socrates with it is adduced in illustration. It ought to be a remedy for locomotor ataxia The strongest characteristic, from a homœopathic standpoint, it its peculiar vertigo, which is much aggravated by turning the head sidewise. (Coloc., turning head to left). Turning over in bed is the same. Some say lying down in bed and turning over. It is not so much the lying down as it is the turning of the head sidewise, whether in an upright or horizontal posture.

Once a case of what seemed to be locomotor ataxia was treated with this remedy.

The patient had been slowly losing the use of his legs; could not stand at the dark; and when he walked along the street would make his wife walk either ahead of him, or behind him, for the act of looking sidewise at her or in the least turning head or eyes that way would cause him to stagger or fall.

Conium cured him. It would always aggravate at first, but he would greatly improve after stopping the remedy. The aggravation was just as invariable after taking a dose of Fincke's c. m. potency as from anything lower, but the improvement lasted longer after it.

Taking an occasional dose from a week to four weeks apart completely cured him in about a year. It was a bad case, of years' standing.

It has often been verified in the vertigo of old people, where it is most frequently found; but it also often accompanies various affections in all ages, and especially is found in ovarian and uterine affections. No remedy has this symptom so strongly.

There is a form of ophthalmia in strumous subjects which calls for Conium in preference to any other remedy, and the peculiar, prominent and uncommon (as Hahnemann says, Organon, § 153) symptom is, photophobia, intense, out of all proportion to the objective signs of inflammation in the eye. The pains are worse at night and terribly aggravated by the least ray of light, relieved in dark room and by pressure.

There may or may not be ulcers on the cornea. Conium is also one of our best remedies for falling of the eyelids, as are three other remedies, viz: Gelsemium, Causticum and Sepia.

"Swelling and induration of glands, with tingling and stitches after contusions or bruises." Many cases of lumps or swellings in the breasts (for which Conium seems to have a particular affinity) have disappeared under the action of this remedy. Even cancerous affections of breasts (Asterias rubens), uterus and stomach have been helped or cured, especially if the trouble seems to have originated in a blow or injury to the part. It is perhaps the first remedy to be thought of in all cases of tumors, scirrhous or otherwise, coming on after contusions, especially if they are of stony hardness and heavy feeling. Conium and Silicea both have hardness of mammæ, Conium right, Silicea left nodules (Carbo animalis, Conium, Silicea); acute lancinating pains. (Asterias). Again it is to be especially considered if at every menstrual period the breasts become large, sore and painful, aggravated by the least jar or walking.

In all the scirrhous affections of the breast, womb or other parts the pains of Conium are burning, stinging, or darting, and may make one think of Apis mellifica. The other symptoms must then decide between them.

Conium has marked action upon the sexual organs. In the male there is great weakness of the organs. He has intense desire and amorous thoughts, but is unable to perform. He has emissions at the very thought or presence of a woman. The erections are insufficient, last only a short time, or "go back" on him in the act of embrace, and he suffers with weakness and chagrin afterwards. This affects the mind and hypochondriasis of the bluest blue takes possession of him.

This condition of mind may obtain in both sexes; as a result of too free, and also especially too infrequent indulgence; or, excessive abstemiousness. Hence Conium becomes a good remedy for old bachelors and old maids. If the vertigo is also present in such cases Conium is sure to be of great benefit.

Intermittent flow of urine is very characteristic (Clematis). One might think that this was owing to a paralytic condition of the bladder. The symptom often occurs in the hypertrophy of the prostate gland incident to old age and Conium helps. "Sweats day or night; as soon as one sleeps or even when closing the eyes," is a characteristic found under no other remedy that I know of. (Reverse Sambucus).

Dr. Adolph Lippe once made a splendid cure of complete one-sided paralysis in a man 80 years of age with this remedy, and was guided to it by this symptom. It would be rather a difficult task to give a correct pathological explanation of such a symptom; but there is a reason, and whether we can give it or not we can cure it if we have a corresponding one appearing under a remedy; where a cure is at all possible.

It is interesting to follow out the connections of symptoms.
Take for instance the single prominent symptom of Conium, vertigo.
Vertigo on turning the head, Con., Calc. ost., Kali c.
Vertigo on moving the head, Bry., Calc. ost., Con.
Vertigo on looking up, Puls., Silic.
Vertigo on looking down, Phos., Spig., Sulph.
Vertigo from odor of flowers, Nux v., Phos.
Vertigo on watching, or loss of sleep, Cocc., Nux vom.
Vertigo on the least noise, Therid.
Vertigo while walking, Nat. m., Nux v., Phos., Puls.
Vertigo while studying, Nat. m.
Vertigo while or after eating, Grat., Nux v., Puls.
Vertigo as if whirling, Bry. Con., Cyclam., Puls.
Vertigo as if the bed turned, Con.
Vertigo with fainting, Nux vom.
Vertigo with staggering, Arg. nit., Gels., Nux v., Phos.
Vertigo with eyes closed, or in dark, Arg. n., Stram., Therid.
Vertigo with dimness of sight, Cyclam., Gels., Nux v.
Vertigo when rising from seat, Bry., Phos.
Vertigo when rising from stooping, Bellad.
Vertigo when rising from bed., Bry., Chel., Cocc.
Vertigo when stooping, Bell., Nux, Puls., Sulph.
Vertigo when ascending, Calc. ost.
Vertigo when descending, Borax, Ferrum.
Vertigo when lying, Con.
Vertigo must lie down, Bry., Cocc., Phos., Puls.
Vertigo occipital, Gels., Sil., Petrol.
Vertigo after sleep, Lach.
Vertigo after suppressed menses, Cyclam., Puls.
A good understanding of such connection often starts the prescriber in the "short cut" route to the remedy in a case.
This medicine is a deep, long acting antipsoric, establishing a state of disorder in the economy that is so far reaching and so long lasting that it disturbs almost all the tissues of the body.
Glands: The complaints are brought on from taking cold, and the glands become affected all over the body. From every little cold the glands become hard and. sore. Infiltration in deep-seated diseases in the region of ulcers and in the region of inflamed

parts; in the glands along the course of the lymphatics, so we get a chain like knots.

The glands under the arm inflame and ulcerate. The glands in the neck, in the groin and abdomen become enlarged. Ulcerated parts indurate. An abscess of the breast becomes surrounded by lumps and nodules. Nodules in the breast even where milk has not yet formed; lumps and nodules, indurations and enlarged glands form under the skin all over the body.

Conium has been used extensively for malignant affections of glands, because it takes hold of glands from the beginning and infiltrates, and they gradually grows a stony hardness, like scirrhus.

Now, another grand feature running through this remedy is the action upon the nerves.

Trembling, jerking of the muscles and twitching from the weakness of the nerves. Inability to stand any physical effort without great exhaustion.

Gradually growing paralytic weakness, somewhat as was described in Cocculus. Exhaustion of body and mind, that is a general slowing down of all the activities of the body. The liver becomes indurated, sluggish, enlarged. The bladder is weak, can expel only a part of the urine. Or sometimes there is a paralytic condition and no expulsive power. This shows that the remedy increases toward a paralytic weakness.

Mind: Hysteria. Hypochondriacal state of mind, with the nervousness, trembling and weakness of the muscles. He gets tired in the earlier stages, but finally this goes on until the limbs are paralytic.

A great many of the complaints are painless. The ulcers and the paralytic conditions are painless. Great physical and mental debility; great prostration of the muscular system; exhaustion, tremulous weakness.

Paralysis of the legs and hip. Mental symptoms, nervous symptoms, trembling, in widows and widowers who have suddenly been deprived of their sexual relations.

When in a state of considerable vigor, if suddenly deprived, the woman or the man takes on a state of trembling weakness, inability to stand any mental effort, and inability to put the attention upon things said by others.

Not so marked or not so common in the woman as in the man. When this state comes on in a woman who is of unusual sexual vigor there may be severe congestion of the uterus and ovaries, Apis is more likely to fit her symptoms than Conium. But with hysteria and excitability Conium is often the remedy. Many of its symptoms come about from such a cause.

Conium has such a deep action that it gradually brings about a state of imbecility. The mind gives out. The mind at first becomes tired like the muscles of the body. Unable to sustain any mental effort. The memory is weak.

The mind will not concentrate, it will not force itself to attention; it cannot meditate, and then comes imbecility. Inability to stand any mental effort or to rivet the attention upon anything are some of the most important symptoms in this medicine.

Insanity of a periodical type. Imbecility, though, is far more frequent than insanity. When you come to examine the mental states you will see symptoms that will make you think the patient is delirious, but that is not quite it.

It is a slow-forming weakness of mind; not that rapid, active state, such as accompanies a fever; it is a delirium without a fever, so to speak, which is not constant. Forms of insanity that are passive. He thinks slowly, and he continues in this stage for weeks and months, if he recovers at all.

Those excitable cases that have more or less violence and activity in mental states are such as will correspond to Bell., Stram. and Ars.

You see nothing of that in this medicine. This state of the mind has come on so gradually that the family has not observed it. The mind is full of strange things that have come little by little, and when the family look over the many things that he has done and said they begin to wonder if he is not becoming insane, but he is traveling toward a state of imbecility.

Conium is of a slow, passive character. Complete indifference; takes no interest in anything, particularly when walking in the open air.

"He is averse to being near people and to talking of those passing him; is inclined to seize hold of and abuse them."

That, of course is an insane act.

"Sad and gloomy.

Great unhappiness of mind, recurring every fourteen days," showing a two weeks periodicity. The Conium patient will sit and mope in the corner in a state of sadness and depression, giving no reason only that he is so sad.

A hypochondriacal subject going around with whims and notions that people attempt to reason him out of, and the more they attempt to reason with him, the more sad he is. Morose, peevish, vexed.

Every thing vexes and disturbs him. Cannot endure any kind of excitement, it brings on physical and mental distress, brings on weakness and sadness. Sometimes Conium symptoms will be found in persons who have suffered from grief; they become broken in memory. This is likely to come first.

They forge, never can recall things just as they want them. And so they grow weaker and weaker until they become imbeciles. If it is decidedly mental, imbecility results; if it is taking physical course the ending is paralysis, and it is not uncommon for general paralytic weakness to come on, so that body and mind progress toward weakness together until some decided manifestation is made, and then it will be seen to be going toward paralysis, or some decided manifestation is made which will send it toward imbecility, and then the body will seem to remain stationary.

There comes a time in these cases where there is a sort of division between the body and the mind. Whenever under homoeopathic treatment the physical, improves and the mental grows worse, that patient will never be cured. There are such cases. I never like to see the physical grow better and the mental grow worse in any degree.

That does not mean the aggravation caused by the remedy. If the mental does not improve it means that the patient is growing worse. There is no better evidence of the good action of a remedy than mental improvement.

Conium patients cannot endure even the slightest alcoholic drink.

Any wine or stimulating beverage will bring on trembling, excitement, weakness of mind and prostration. There are many headaches -in these patients. Patients going into decline will manifest headaches. Stitching, tearing pains in the head;

throbbing in the head. Signs precursory to a giving out of the brain. Neuralgia.

Pains: Weakness of muscles. Weakness of muscles on one side of the face. Paralysis of the upper lids. Tingling pains. These are only in keeping with the signs of a general breakdown. We would not think of giving Conium for those sudden, violent congestions of the brain, or sudden, violent attacks of pain in the head, face or eyes, but those that accompany a general progressive disease.

There are stitching, lancinating, knife-like pains along the course of nerves about face and eyes and head. Stitching in the top of the head. Burning on top of the head. Often the symptoms will lead the homoeopathic physician to make a physical examination. A great deal more important than the physical examination are, the symptoms that point out a remedy.

Excitement will bring on headaches. Numbness of the scalp is one of the common symptoms of Conium. It is a general; wherever there is trouble there will be numbness, numbness with pains, very often numbness with the weakness.

Paralytic conditions are attended with numbness. Sick headache with inability to urinate. Great giddiness. Everything in the room seems to go around. Confused feeling in the head. Often sits lost in thought.

Vertigo: Vertigo and pressure in the head with unaltered pulse. Vertigo, worse from stooping. The slightest spirituous drink intoxicates him. Vertigo when turning the head, like turning in a circle, when rising from a seat; worse when lying down, as though the bed were turning in a circle; when turning in bed or when looking around.

The vertigo most common in Conium is that which comes on while lying in bed rolling the eyes or turning the eyes. This is somewhat as it is in Cocculus, not as to vertigo alone, but the general slowed down condition of the muscles. The paresis, or weakness of the muscles all over the body is also present in the eyes.

There is a muscular weakness of all the muscles of the eye, so that the Conium patient is unable to watch moving objects without getting sick headaches, visual and mental disturbances. Riding on the cars, watching things in rapid motion and inability

to focus rapidly, slowness of the accommodation is what we must call it is the cause for many sicknesses.
Eyes: Inability to follow moving objects with sufficient rapidity and a headache comes on.
"Objects look red, rainbow colored, striped; confused spots; double vision; weakness of sight. Short sighted; cannot read long without letters running together."
All this is due to defective accommodation.
"Sluggish adaptation of the eye to varied range of vision.
Vision becomes blurred when he is irritable.
Weakness and dazzling of the eyes, together with dizziness.
Aversion to light without inflammation of the eyes."
The pupil will not accommodate itself to the changes between strong light and dim light, and he suffers from it. Severe photophobia and lachrymation. Photophobia without congestion of any tissue without or within the globe of the eye.
Sometimes the pupils are contracted and sometimes dilated.
Conium has cured ulcer of the cornea.
"Burning in the eyes when reading."
'Shooting smarting, burning pain in the eyes.
The lids indurate, thicken and are heavy and fall.
It is with, difficulty that he can lift them up.
So this paralysis extends all through the muscles of the body and affects the mind similarly. "
Could scarcely raise the eyelids, they seemed pressed down by a heavy weight.
Burning on entire surface of lids; Hordeola; paralysis of muscles of the eyes."
Glands: A marked condition is that of swelling of the glands about the face, ear and under the jaws. The parotids are swollen and, hard. The same gradually increasing hardness in the sub-maxillary and sublingual glands.
Enlargement of the glands of the side of the neck in cancerous affections. It has cured epithelioma of the lid, and of the nose and of the cheek. Ulcers about the lip with induration. Deep under the ulcer there will be hardness, and along all the vessels that send lymph towards that ulcer there will be a chain of knots.

Paresis extending to paralysis of the oesophagus; difficulty in swallowing; food goes down part way and stops. As food is about to pass the cardiac orifice it stops and enters with a great effort.

"Strange rising in the throat, with sense of stuffing, as if something were lodged there.

Sense of fullness in the throat as of a lump with involuntary attempts at swallowing.

Fullness in throat with suppressed eructations.

Pressure in oesophagus as if a round body were ascending from stomach."

That is a nervous affection found in nervous women and bas been called globus hystericus. When a woman feels as if she wanted to cry, and she swallows and chokes, she will have a similar lump in the throat.

Nervous, broken-down constitutions; tired of life; sees nothing in the future but sickness and sorrow and paralysis or imbecility. When they have their lucid moments they weep, become sad over their enlarged glands and weakness, and have a lump in the throat.

Stomach: There are many stomach troubles; ulceration of the stomach; cancer of the stomach. Conium is one of the greatest palliatives in symptoms of the stomach when all the symptoms agree.

It will palliate cancerous conditions for a while, then on comes the difficulty again, because when the symptoms have advanced sufficiently to indicate Conium many times there is no hope of cure.

Hardness of the abdomen, great sensitiveness of the abdomen. Pinching pains, stitching pains, colicky, cutting pains, cramping pains. Bearing down in the abdomen-in the woman as if the uterus would escape.

Often more common than diarrhoea is constipation with ineffectual urging, hard cool, paralysis of the rectum. Inability to strain at cool, inability to expel contents because of the paralytic weakness of all the muscles that take part in expulsion.

Pulsation and emptiness in the abdomen after a normal stool

The woman strains so much at stool that the uterus protrudes-from the vagina. After every stool tremulous weakness and palpitation.

Urines: The urine will stop and start. He strains to, expel the urine and gets tired and stops.
The stream of urine stops and without any pressure whatever it starts again and it does that two or three times during urination.
Irregular muscular actions while passing urine.
"Intermittent flow of urine, with cutting after micturition.
Urine turbid after standing."
Weakness of the sexual powers of the male; impotency.
Men: He may have most violent sexual desire yet he is impotent.

"Great sexual desire with partial or complete incapacity.
Emissions without dreams.
Painful emissions and painful ejaculations."
"There is a catarrhal state of the seminal vesicles attended with much soreness, so that when ejaculation takes place there is cutting like a knife, as if the semen were acrid.
Bad effects from suppressed sexual desire in widowers and those who have been accustomed to coition.
"Sexual weakness. Insufficient erection, lasting only a short time; weakness after embrace.
Swelling and induration of testicles."
Hardness and swelling of the testicles gradually comes on.
"Discharge of prostatic fluid on every change of emotion, without voluptuous thoughts, or while expelling faeces; with itching of the prepuce."
Hence we have a strange intermingling of increased irritability of the parts, the neck of the bladder, sexual organs, prostrate gland, with weakness, with impotency.
Women: In the male, remember, there is induration and enlargement of the testicles; in the woman induration and enlargement of the ovaries and uterus.
"Uterine spasms during too early and scanty menses."
Soreness in the abdomen in the early stages of gestation, motions of the child are painful. Burning, stinging, tearing pains in the neck of the uterus.
Great soreness of the breasts. This medicine has dwindling of the mammary glands as well as enlargement and induration.
Suppressed menstruation, painful menstruation, throbbing, tearing, burning pains in the uterus and in the ovaries, in the

pelvis.

It has cured fibroid tumors of the uterus. It has restrained cancerous growth of the cervix. One of the most distressing growths known to women is a cancerous growth of the cervix. It is the most difficult to check of all the cancerous affections known.

It will progress most rapidly, but Conium is one of those remedies that will slow down that inflammation and restrain somewhat the hemorrhages. Conium has produced induration and infiltration of the cervix.

Respiration and cough: Difficult breathing. Dry cough almost constantly, worse lying in bed. Cough when first lying down. Is obliged to sit up and cough is out.

Taking a deep breath causes cough. Such are the striking features of a Conium cough. In the chest, violent stitches. Painful swelling of the breasts. Rending, tearing pains in the chest.

Back: In the back, weakness is a most striking thing, with some dorsal pains, Lancinating pains are spoken of.

"Ill effects of bruises and shocks to the spine."

After injuries, especially in the lumbar region, pains and filling up of the veins of the lower limbs. Rheumatic pains; paralysis of the lower limbs; ulceration. And the sufferings and conditions are better by letting the limbs hang down.

Conium differs from a great many medicines. It is common for pains and aches to be relieved by putting the feet up on a chair; by putting them up in bed.

But the patient with the rheumatism, with the ulceration of the legs and the other strange sufferings of the legs, will lie down and permit his legs to hang over the bed up as far as the knee. That is something that somebody ought to undertake to account for, so we could have at least one thing we could prescribe for under pathology. But up to date we have no explanation.

Tottering gait in middle-aged men.

Another grand feature of the remedy; he sweats copiously during sleep, Sometimes the patient will say that if he merely closes the eyes he will sweat. It is certainly true on closing the eyes preparatory to going to sleep he will break out in a sweat. Owing to the fact that Conium produces such a marked induration and infiltration of tissues that have been inflamed, stenoses are apt to form where inflammation has been present. Stricture of the urethra and stenosis of the os uteri have been cured by Conium.

CONVALLARIA MAJALIS
Lily of the Valley

A heart remedy. Increases energy of hearts' action, renders it more regular. Of use when the ventricles are overdistended and dilatation begins, and when there is an absence of compensatory hypertrophy, and when venous stasis is marked. Dyspnœa, dropsy, aneuric tendency. Anasarca.

Mind and Head.--Dull intellect. Grieves easily. Dull headache; worse, ascending, hawking. Scalp sensitive. Irritability. Hysterical manifestations.

Face.--Hydroa in nose and lips; raw and sore. Epistaxis. Sees imaginary gray spot about three inches square.

Mouth.--Grating of teeth in the morning. Coppery taste. Tongue feels sore and scalded; broad and thick with heavy, dirty coating.

Solanum Nigrum

Photo© Jorma Jalasto

Feb 5th - Mar 5th
+
-

Throat.--Raw feeling in back of throat when inspiring.

Abdomen.--Sensitive. Clothes feel too tight. Gurgling and pain on taking deep breath. Movement in abdomen like fist of a child. Colicky pains.

Urinary Organs.--Aching in bladder; feels distended. Frequent urination; offensive; scanty urine.

Female.--Great soreness in uterine region, with sympathetic palpitation of heart. Pain in sacro-iliac joints, running down leg. Itching at urinary meatus and vaginal orifice.

Respiratory.--Pulmonary congestion. Orthopnea. Dyspnœa while walking. Hot feeling in throat.

Heart.--Feeling as if heart beat throughout the chest. Endocarditis, with extreme orthopnea. Sensation as if heart ceased beating, then starting very suddenly. Palpitation from the least exertion. Tobacco heart, especially when due to cigarettes. Angina pectoris. Extremely rapid and irregular pulse.

Back and Extremities.--Pain and aching in lumbar region; aching of legs; in big toe. Trembling of hands. Aching in wrists and ankles.

Fever.--Chilly in back and down spine, followed by fever, little sweat. Thirst and headache during chill. Dyspnœa during fever.

Relationship.--Compare: Digit; Crataeg; Lilium; Adonis (feeble heart action due only to functional disturbance).

Modalities.--Better, in open air. Worse, in warm room.

Dose.--Third attenuation, and for symptoms of heart failure, tincture, one to fifteen drops.

COPAIVA OFFICINALIS
Balsam of Copaiva
(COPAIVA)

Acts powerfully on mucous membranes, especially that of the urinary tract, the respiratory organs, and the skin, here producing a well-marked nettle-rash. Cold and catarrhs.

Head.--Excessive sensitiveness; pain in occiput. Dull, frontal headache, passes to occiput and back again, with throbbing, worse right side and motion. Scalp sensitive. Sensitive to sharp sounds.

Nose.--Rawness and soreness of nostrils with stopped-up feeling; dryness of posterior nares. Profuse, thick, fetid discharge from nasal passages, running down throat at night. Burning and dryness, crusts on turbinated bones. Marked catarrhal condition in upper respiratory tract.

Stomach.--Food seems too salty. Gastric troubles during menstruation or following urticaria. Gas and intestinal flatulence, urging to stool and difficult passage with pain.

Urinary.--Burning pressure; painful micturition by drops. Retention, with pain in bladder, anus, and rectum. Catarrh of bladder; dysuria. Swelling of orifice. Constant desire to urinate. Urine smells of violets. Greenish, turbid color; peculiar pungent odor.

Rectum.--Mucous Colitis. Stools covered with mucus, with colic and chilliness. Burning and itching of anus, caused by piles.

Male.--Testicles sensitive and swollen.

Female.--Itching of vulva and anus, with bloody purulent discharge. Profuse, strong-smelling menstrual discharge, with pains radiating to hip bones, with nausea.

Respiratory.--Cough, with profuse, gray, purulent expectoration. Tickling in larynx, trachea, and bronchi. Bronchial catarrh, with profuse greenish, offensive discharge.

Skin.--Hives, with fever and constipation. Roseola. Erysipelatous inflammation, especially around abdomen. Circumscribed lenticular patches, with itching; mottled appearance. Chronic urticaria in children. Bullous eruptions.

Relationship.--Antidotes: Bell; Merc.

Compare: Santalum--(aching in kidneys); Cannab; Canth; Barosma; Cubeb; Apis; Vespa; Erig; Senecio; Sepia.

Dose.--First to third attenuation.

CORALLIUM RUBRUM
Red Coral
(CORALLIUM)

The provings of coral develop much coryza and epistaxis, and even ulceration within the nostrils. It is to be thought of for whooping and spasmodic coughs, especially when the attack comes on with a very rapid cough, and the attacks follow so closely as to almost run into each other. Often preceded by sensation of smothering, followed by exhaustion. Congestion of face after dinner. Patient becomes purple in face. Violence of paroxysm, even with expectoration of blood. Feeling as if cold air were streaming through skull and air-passages. One is too cold when uncovered and too hot when covered; relieved by artificial heat.

Head.--Feels very large; violent pain as if parietal bones were forced apart; worse stooping. Eyes hot and painful. Deep-seated frontal headache with severe pain back of eyeballs. Pain aggravated by breathing cold air through nose.

Nose.--Odors of smoke, onions, etc. Painful ulcer in nostrils. Post-nasal catarrh. Profuse secretion of mucus dropping through posterior nares; air feels cold. Dry coryza; nose stopped up and ulcerated. Epistaxis.

Mouth.--Food tastes like sawdust. Bread tastes like straw. Beer tastes sweet. Pain in articulation of left lower jaw. Craves salt.

Respiratory.--Hawking of profuse mucus. Throat very sensitive, especially to air. Profuse, nasal catarrh. Inspired air feels cold (Cistus). Profuse secretion of mucus dropping through posterior nares. Dry, spasmodic, suffocative cough; very rapid cough, short, barking. Cough with great sensitiveness of air-passages; feel cold on deep inspiration. Continuous hysterical cough. Feels suffocated and greatly exhausted after whooping-cough.

Male.--Ulcers on glans and inner prepuce, with yellow ichor. Emissions and weakened sexual power. Profuse perspiration of genitals.

Skin.--Red, flat ulcers. Coral-colored, then dark red spots, changing to copper-colored spots. Psoriasis of palms and soles.

Modalities.--Worse in open air, changing from a warm too cold room.

Relationship.--Complementary: Sulph.

Compare: Bellad; Droser; Mephit; Caust.

Dose.--Third to thirtieth attenuation.

CORNUS CIRCINATA
Round-leaved Dogwood

Chronic malaria, hepatitis, jaundice. Weakness in morning. Pain in pit of stomach, with distended abdomen. Vesicular eruption associated with chronic liver disease or aphthous stomatitis.

Mouth.--Ulceration of tongue, gums and mouth; aphthæ. Burning in mouth, throat and stomach.

Stool.--Loose, windy, dark stool, immediately after dinner. Burning in anus. Dark, bilious, offensive diarrhœa, with sallow complexion.

Skin.--Vesicular eczema of face in infants, with nursing sore mouth.

Relationship.--Compare: Cornus alternifolia-Swamp Walnut--(Weak and tired; disturbed sleep, fever, restlessness, eczema;

skin cracked; chest feels cold, as if full of ice); Cornus florida (chronic malaria; indigestion and distressing acid heartburn; general debility from loss of fluids and night sweats; neuralgic pains in arms, chest, and trunk, and sensation as if broken in two; intermittent fever, with drowsiness; feels cold, but is warm to touch; great exhaustion in intervals; general clammy sweat. Chill is preceded by drowsiness, heat is associated with drowsiness. Headache after quinine).

Dose.--Tincture to sixth attenuation.

**Corriander [Herb]**
**Started by: Jayashree at January 7 2008**

**Replies: 3 & Views: 8547** Font | Bottom Of Page | **Page 1 of 1** | Reply

| **Corriander [Herb]** | By: Jayashree<br>Calcutta, India | January 7 2008 |
|---|---|---|

Click picture for many more pictures

Coriander

This herb is also known as CILANTRO and CHINESE PARSLEY. Its folklore includes being put into love potions, and spells, and when added to wine-it was thought of as being a great lust potion. It was thought that when an expecting lady eats coriander, the child to be will be a genius.
Coriander has lacy-fern-like leaves with little white flowers. When starting coriander, remember that it doesn't like to be transplanted. It grows to be about 24" tall with spindly stems. It is a good herb to grow with other plants around it to help hold it up in the winds. It is an easy to grow annual, that likes lots of water. All parts of the plants are used for culinary purposes. The seeds are used in flavoring many dishes, the leaves are added to salads, and the roots are cooked like a vegetable. Coriander is one of the most common herbs in the Middle East,India and also in Mexico, for all the flavored dishes served there. The plant and flowers have an awful scent to them until they are dried. Then the seeds have a lemon-scented smell with seeds that

look like peppercorns. It is a plant that needs full sun, moist soil and needs a little fertilization when planted.
The plant itself is quite interesting for as it grows, there are wide leaflets on the bottom and then smaller ferny leaves towards the top of the stem. The seeds are used in making teas used as a digestive aid, and it also has a sedative effect on some. The oil from the seeds is used to disguise the flavors of other medicines and the oil is also used in ointments for painful rheumatic joints and muscles.
Note:In India no cooking is complete without the dried coriander powder. It is used in all types of curry. The leaves are also ground with lime, salt and cumin to make a delicious chutney. One tsp of this will give the body all the vitamins it needs for a day. It may be mixed with mint leaves, onion, gooseberry (amla), garlic or even raw mango for that flavour.

| **Re: Corriander [Herb]** | By: Dr Hasmukh Shah | January 9 2008 |

Yummy yummy. It also wakes up. Anytime children are sleepy but they need to attend the studies, give them some soup with coriander.

| | | |
|---|---|---|
| **Re: Corriander [Herb]** | By: garcot<br>Bangalore | June 28 2008 |

Coriander has been shown to chelate toxic metals from the body in a relatively short time.
Taken in the raw form, it has anti-bacterial properties and in the tea form, it helps in relieving Gas, improves digestion and removes nausea. It is also anti-inflammatory.
A facepack with a combination of Coriander(fresh leaves) juice and Turmeric (high grade) can get rid of black spots, pimples and roughness on the face in a couple of weeks time when used daily once.
Generously spreading the chopped leaves over salads, pasta, indian sambar, rasam etc... can help to improve acceleration in digestion and bdoy heat balance.

Garcot

"wisdom in your body is deeper than your deepest philosophy" (Nietszche)

**Crab Apple [Bach Flower Remedy]**
**Started by: girilal at October 17 2006**

| | | |
|---|---|---|
| **Crab Apple [Bach Flower Remedy]** | By: girilal<br>New Jersey USA | October 17 2006 |

Click picture for many more pictures

Crab Apple

...is known as the cleansing remedy, and as such is the added 'sixth ingredient' in Rescue Cream. Its main use is to help people who feel that they have something unclean or poisonous about them, or who dislike some aspect of their appearance or personality.

Sometimes there might be very real things wrong with someone in this state, but they will disregard the big problems and concentrate obsessively on the one thing that they have fixed on. This is why Crab Apple is sometimes given to people to cleanse obsessive, repetitive behaviour such as hand-washing, re-checking that appliances are unplugged, and so on..

Dr Bach's description
This is the remedy of cleansing. For those who feel as if they had something not quite clean about themselves. Often it is something of apparently little importance: in others there may be

more serious disease which is almost disregarded compared to the one thing on which they concentrate. In both types they are anxious to be free from the one particular thing which is greatest in their minds and which seems so essential to them that it should be cured. They become despondent if treatment fails. Being a cleanser, this remedy purifies wounds if the patient has reason to believe that some poison has entered which must be drawn out.

girilal

Crataegus oxyacanthoides (Thuill.)
Related species: Crataegus monogyna (Jacq.)
Synonyms and Common names: Crataegus oxyacanthoides Thuill.), Mayflower, May tree, Quickset, Whitethorn, Maybush, Mayblossom, Haw, Halves, Hagthorn, Ladies' Meat, Bread and Cheese tree
French = Aubepine, German = Hagedorn, Spanish = Espina blanca, Italian = Marruca bianco
Order: Rosaceae
Description: Crataegus is a deciduous shrubby tree with smooth thorny shoots and three-lobed stipulate leaves. Small white or pink five-petalled flowers with short triangular sepals are arranged in corymbs and on long stalks, each with prominent stamens around the nectary and carpels. The berry is red with white mealy flesh and a large stone. Crataegus grows in hedgerows and copses throughout Britain and all temperate regions of the northern hemisphere.
Parts used: Flowering tops, dried ripe fruits, leaves

Collection: The flowering tops are harvested in late spring and early summer, the berries in September and October.
Constituents: Fruit: saponins, glycosides, flavonoids, cardioactive glycosides, ascorbic acid, condensed tannins.
Flowers: cardiotonic amines
Actions: Cardiotonic, coronary and peripheral vasodilator, has a bradycardiac effect on the myocardium, vascular tonic, hypotensive, reputed to dissolve deposits in thickened and sclerotic arteries, relaxant, diuretic, astringent
Indications: Cardiac failure or earlier myocardial weakness, hypertension, arteriosclerosis, Buerger's disease, paroxysmal tachycardia. Specifically indicated in hypertension with myocardial weakness, angina pectoris.
Therapeutics and Pharmacology: Crataegus is one of the tonics for the heart and circulation, acting upon the heart by either stimulating or depressing its activity depending upon the need. The precise mode of action which results in the dilating of the coronary blood supply and the tendency to slow down or stabilise the contractility of the heart muscle is not yet fully understood, but it is safe to use as a long-term treatment for a weak or failing heart, and has a beneficial effect on cardiac arrhythmias, especially extrasystoles and paroxysmal tachycardia. Crataegus is also a useful diuretic. A clinical study of 80 patients in Japan showed statistically significant improvement in cardiac function, oedema and dyspnoea in those treated with a preparation made from the fruits and leaves. Other clinical observations included a reduction in elevated blood levels of pyruvic and lactic acid, normalisation of prolonged systole and prevention of ECG changes due to hypoxia. As a tonic for the circulatory system Crataegus finds its primary use in the treatment of hypertension, atherosclerosis and angina pectoris. It is also applicable to peripheral circulatory conditions, such as intermittent claudication and Raynaud's disease.
The flavonoids in Crataegus are vasodilatory, as is the condensed tannin phlobaphene. These dilate the peripheral blood vessels and have a specific action on the coronary

circulation. The cyanogenic glycosides are sedative and increase the parasympathetic (vagal) tone of the heart, thus slowing it down. Trimethylamine stimulates the pulse rate slightly, and has a peripheral vasoconstrictor effect. The combination of these actions helps to explain the paradoxical effect of exerting a sympathetic action on the coronary circulation and a parasympathetic action on the myocardium. The sedative effects of the cyanogenic glycosides combine with the vasodilatory effects to lower high blood pressure, but the cardiotonic activity actually helps to raise low blood pressure. Crataegus does not contain digitalis-like substances, but is a gentle remedy requiring extended use. It is of benefit in the treatment of middle-aged patients showing the first signs of coronary artery disease, and also in older patients with 'senile' heart. It should also be used in the follow-up therapy of myocardial infarction.

Both the flowers and the berries are astringent and a decoction of these will help ease sore throats.

Combinations: Combined with Ginkgo, Crataegus can enhance poor memory by improving the cerebral circulation and thereby increasing the amount of oxygen to the brain.

Caution: Should only be used under qualified supervision. Crataegus may increase the effect of other cardioactive drugs taken simultaneously.

Preparation and Dosage: (thrice daily)

Regulatory Status P

Fruit: Dried fruits: 0.3-1g or by infusion

Liquid Extract: 1:1 in 25% alcohol, 0.5-1ml

Tincture: 1:5 in 45% alcohol, 1-2ml

Additional Comments: The botanical name of hawthorn is derived from the Greek kratos meaning hardness (of the wood), oxus (sharp), and acantha (a thorn). The German name of hagedorn means hedgethorn; haw is also an old word for hedge.

Hawthorn was traditionally used in Europe for kidney and bladder stones and as a diuretic. In China, the berries of Crataegus pinnatifida, known as shan zha, are mainly taken for symptoms of 'food stagnation', which can include abdominal bloating, indigestion, flatulence and diarrhoea. They are believed to 'move' the blood, and are used to relieve stagnation in dysmenorrhoea and after childbirth. Ayurvedic medicine recommends hawthorn for heart and circulatory complaints. Hawthorn flowers are reputed to have magical properties, and are believed to bring about a death in the family if they are taken into the home. This may have something to do with the trimethlamine present in the flowers - this substance is one of the first products formed when body tissue starts to decay. Until recently, corpses were kept in the house prior to burial, and people would have been familiar with the odour of death and decay. Hawthorn is said to have been the source of Christ's crown of thorns. During the First World War, the young leaves were used as a substitute for tea and tobacco, and the seeds were ground in place of coffee. The Hawthorn is the badge of the Ogilvie clan.

| **Re: Crataegus oxyacanthoides (Thuill.)** | By: girilal<br>New Jersey USA | September 10 2006 |

Two days ago my neighhbour was about to cut this tree and I told him that it is good for his heart. I gave him a lecutre on hawthorn berries. Unfortunately the berry season has passed. He was mostly annoyed by the litter of no-good-berries. Luckily the tree is saved for the time being.

He is a fat man with heart problems, he says he will wait for the next berry season and try the juice.

Berries are somewhat between bitter and sour.

At all big Chinese stores, dried Crataegus berries available. Jelly is also sold. Many snacks with crataegus jelly are sold.

In Korea a wine is made from Crataegus "sansachun" considered a heart tonic.

CROCUS SATIVUS
Saffron
(CROCUS SATIA)

Is a remedy often useful in hæmorrhages that are black and stringy. Tingling in various parts. Chorea and hysterical affections. Frequent and extreme changes in sensations and mental conditions. Anger with violence followed by repentance, Laughing mania. Drowsiness and lassitude; better by literary labor.

Mind.--Vacillating; pleasant mania; sings and laughs. Happy and affectionate; then angry. Sudden changes from hilarity to melancholy. Vivid recollection from music heard (Lyc).

Head.--Throbs, pulsates, during climacteric; worse during menses.

Hornbeam [bach Flower Remedy]

+
−

Eyes.--Appearance as of electric sparks. Must wipe eyes as if mucus or water were in them. Feeling in eyes as after violent weeping. Sensation as if she had been looking through too sharp spectacles. Eyes feel as if in smoke. Pupils enlarged and react slowly. Lids heavy. Ciliary neuralgia, pain from eyes to top of head. Sensation as if cold air was rushing through eye (Fluor ac; Syph). Asthenopia with extreme photophobia. Threatened glaucoma; embolism of arteria centralis retinal.

Nose.--Epistaxis. Dark, stringy, clotted. Strings of dark blood hanging down the nose.

Abdomen.--Obstinate constipation due to portal stagnation. Constipation in infants. Crawling and stitches in anus. Sensation of something alive in abdomen, stomach, etc., especially on left side (Calend). Abdomen swollen, feeling of something heavy.

Female.--Threatened abortion, especially when hæmorrhage is dark and stringy. Urging of blood to genitals. Menses dark, viscid, too frequent and copious, black and slimy. Uterine hæmorrhage; clots with long strings; worse from least movement. Jerking pain in interior of left breast, as if drawn toward back by means of thread (Crot tig). A bounding feeling, as if something alive in right breast.

Respiratory.--Wheezy cough, with frothy expectoration, containing threads like fine twine; worse, lying down. Breath has offensive, sickly smell. Feeling as if the uvula is elongated in hysterical patients.

Back.--Sudden feeling of coldness in back as if cold water were thrown over him; icy-cold extremities.

Extremities.--Spasmodic contractions and twitchings of single set of muscles. Chorea and hysteria, with great alterations of feeling. Whole upper extremity fall asleep. Cracking in hip-joint and knees. Weakness in knees and legs. Pain in ankles and soles.

Modalities.--Worse, lying down, hot weather, warm room, in morning, fasting, before breakfast, looking fixedly at an object. Better, in open air.

Relationship.--Antidote: Opium; Bell.

Compare: Ipec; Trillium; Plat; China; Sabina.

Dose.--Tincture, to thirtieth attenuation.

Crocus Sativa (Saffron)
(Cheerful from music)

Many cases solved with just one dose of Crocus-30.
1. Music ameliorates (loves).
2. Music aggravates.
3. Memories active from music.
4. Singing involuntarily on just listening one note.
5. Laughing alternate with anger
6. Quarrelsome alternate with singing.
7. Yielding disposition.
8. Whistling
9. Kissing everybody

Sulphur Gets nervous with music (palpitations) + Soon regrets after getting angry

Crocus Sativa Cheerful from music + immediately regrets after getting angry

Natrum Mur. Music makes him/her better + late repentance after getting angry

Ignatia Weeps from music + late repentance after getting angry

Aconite Cannot stand music, everything frightens him.

Pulsatilla Enjoys music

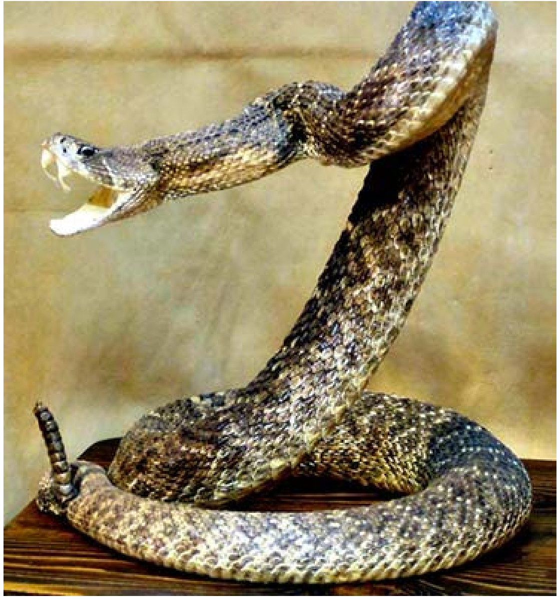
Click picture for many more pictures



## Crotalus Horridus (Rattlesnake)

Snake poisons are supposed to be chemically Cyan hydrates of Soda and other salts. Alcohol is the natural solvent of these salts and is an antidote. Has a profound trophic action. Old age nutritional troubles.

Low septic states. General disorganization of the blood, hæmorrhages and jaundice. A crotalin injection decreases the rate of coagulation of the blood. In epilepsy the average rate is far greater than in normal conditions. Blood decomposition, hæmorrhages (dark fluid that forms no clots), tendency to carbuncles, malignant scarlatina, yellow fever, the plague, cholera, give opportunity to use this remedy. Hæmorrhagic diathesis. Acts as a sedative. Sleeps into his symptoms. More right-sided in its action.

Aspect: The first impression would be to rebel against the use of such substances as Crotalus, Lachesis, Apis and other animal poisons, and it is true that the lay mind must look with something like horror upon their administration; but when they are properly used and when we consider the dreadfulness of the necessity demanding them, and also when we have ascertained that there can be no substitute when demanded, and again that they are potentized and changed until they are perfectly pure, because reduced to a state of simple substance, the horror passes away from the mind.

It is true that the diseases that call for the use of such substances as Crotalus are very grave. When at the bedside of a Crotalus patient one feels that death is very near, the subject is horrible to look upon.

The other snake poisons form the nearest resemblance, but this one is the most dreadful of all, excepting perhaps, the Ancistrodon contortrix (Copperhead).

In the case of snake bites we get the most dire effects; we see death itself, we see the ending after a very rapid course, the very highest type of zymosis. These snake poisons are supposed to be cyanhydrates of soda and other salts.

It is known that alcohol is the natural solvent of the cyanhydrates, and because of this alcohol has been used in great quantities in snake bites, and it has frequently prolonged and even saved life. If he lives through the violent attack he goes on forever manifesting the chronic effects, and from these we have collected symptoms.

Dogs that have been bitten manifested the chronic effects of rattlesnake bite, and in them a peculiar periodicity has been manifested, viz., every spring as the cold weather subsides and the warm days begin

Another marked general feature in Crotalus, as in most of the other Ophidians, is that the patient sleeps into the aggravation.

The poison of the Crotalus horridus, in its earliest manifestations, is like unto the zymotic changes that we find in scarlet fever, in diphtheria, in typhoid and low forms of blood poisoning, those cases that come on with great rapidity, breaking down of the blood, relaxation of the blood vessels, bleeding from all of the orifices of the body, rapidly increasing unconsciousness like one intoxicated and besotted in appearance.

Prostration: A mental and physical prostration that is almost

paralytic in character. Scarlet fever when it becomes putrid; typhoid when it becomes putrid, diphtheria with much bleeding and putridity. The body appears mottled, blue intermingled with yellow jaundice comes on with astonishing quickness, and the eyes become yellow, and the skin becomes yellow and mottled. Black and blue spots as if bruised, intermingled with yellow.
After hemorrhages the skin becomes extremely anemic.
It is yellow, pale, bloodless. The body looks like wax.
Hemorrhage from the ears, eyes, nose, lungs, from the mucous membranes everywhere, from the bowels, from the uterus, A haemorrhagic constitution.
Crotalus is indicated in disease of the very lowest, the most putrid type, coming on with unusual rapidity, reaching that putrid state in an unusually short time. One who has been poisoned rapidly sinks into, this besotted, benumbed, putrid, semi-conscious state. There is a feeling as if death were coming over him. As the blood oozes out it becomes black, It is sometimes fluid.
An awful state of nervousness prevails. Trembling of the limbs, tremulous weakness. On protruding the tongue it comes out quivering. Tired by the slightest exertion. Sudden prostration of the vital powers. A paralytic weakness prevails throughout.
Mind: The mental symptoms are well worth examining. The low form of delirium, muttering, talking to himself is a peculiar form of loquacity. It differs somewhat from Lachesis. Both have loquacity. Weeping mood; clouded perception and memory; impatient. Loquacious, with desire to escape. Sadness.
Delusions of cerebral decay.
"Excessive sensitiveness.
Moved to tears by reading.
Melancholy with timidity, fear.
Anxious and pale, with cold sweat.
Irritable, cross, infuriated by least annoyance."
On motion there is vertigo, dizziness. On keeping still there is pain. On going to sleep there is pain, and he is roused by violent pain. The longer he sleeps the more severe that pain in the head.
Sleep: He sleeps into his symptoms. All the snake poisons more or less sleep into troubles. The head troubles come on after

sleep. He sleeps into headache. The longer he sleeps the harder are the headaches.

Head: The headache is so hard in the back of the head that it is almost impossible to raise it from the pillow. The muscles become so tired he has to take hold of it with his hands. This belongs also to Lach. A congestive headache with waxy face, yellow, purple, mottled face, as if there had been bruises.

"Headache extending into the eyes.

Bilious headache every few days."

Severe sick headache, together with dizziness, throbbing in the top of the head. Dull, pulsating headaches. Dull, heavy, throbbing, occipital headaches or the whole head is in a state of congestion. He is confused and dazed. Head feels too large. Head feels full, feels as if it would burst. Headaches that come on in waves as if they came up the back, a surging of blood upwards, an orgasm described as if the blood rushed upwards. Headache with surging in waves and excited by motion or jar, by turning over in bed, by rising up in bed, or by lying down. Change of position will cause this surging

Eyes: Very sensitive to light, especially lamp light. Yellow color of eyes. Illusions; blue colors. Ciliary neuralgia; tearing, boring pain, as if a cut had been made around eye. For absorption of intra-ocular hæmorrhages, into the vitreous, but particularly for non-inflammatory retinal hæmorrhages. Diplobia.

Pressure in the eyes as if the eyes would be pushed out from the head. Paralysis of the upper lids. Inflammation of the mucous membrane of the lids.

Ears: Surging in the ears.

"Sensitive to noises."

Dull aching and throbbing in the ears. Foetid, copious, yellow, offensive, bloody discharges from the ears. Blood oozing from the ears in drops in zymotic diseases, low forms of scarlet fever, or of diphtheria where there is oozing from the eyes and ears, and copious bleeding from the nose.

Nose: The nose is the most common organ to bleed in zymotic diseases. The rush of blood seems to get relief from bleeding from the nose. In this medicine the congestion to the head is violent with bleeding from the nose. It has cured all forms of foetid discharge. Horrible, foetid, putrid discharges from the nose.

Inflammation of the parotid gland. Blueness and discoloration of the face. Yellow appearance of the face, a marked condition of jaundice. In girls who appear waxy or anemic, yellowish green, have for a long time missed the menstrual period and break out in pustules and pimples.

Mouth: Tongue red and small, but feels swollen. Tongue fiery red, dry in center, smooth and polished. Moldy smell of breath. Fills up with saliva. Tongue when protruding, goes to right. Spasmodic grinding of teeth at night. Cancer of tongue with hæmorrhage.

This patient often wakes up during the night grinding the teeth. The taste is bad, putrid. Inflammation of the gums. Bleeding from the mouth. Inflammation of the throat with bleeding of the throat. Burning in the throat and mouth, Trembling, quivering and swollen tongue. Trembling of the tongue when it is put out. Trembling of the hands when they are moved.

Those cases of diphtheria that ooze blood from the nose and mouth are very low types, and are sure to die without a well-selected remedy. The throat will be filled up under such circumstances with a diphtheritic membrane that looks dark. There is bleeding all around it. Sore mouth with bleeding. Ulcers in the mouth. Bleeding ulcers in the mouth. Difficult swallowing. Malignant diphtheria.

Cannot lie on the right side or back without instantly producing black, bilious vomiting. This is a wonderfully bilious remedy, sick headaches, vomiting of bile in great quantities.

Throat: Dry, swollen, dark red. Spasm of œsophagus; cannot swallow any solid substance. Tight constriction. Gangrenous, with much swelling.

Respiratory: Cough, with bloody expectoration. Tickling from a dry spot in larynx.

Stomach: Intolerance of clothing around stomach. Unable to retain anything; violent vomiting of food; bilious vomiting, vomiting of blood. Constant nausea and vomiting every month, after menstruation. Cannot lie on right side, without vomiting dark-green matter. Black or coffee-grounds vomiting. Cancer of stomach with vomiting of bloody, slimy mucus. Trembling, fluttering feeling below the epigastrium. Intolerance of clothing about epigastrium. Faintness and sinking at stomach. Ulceration of the stomach. Atonic dyspepsia. Gastritis in chronic alcoholism. Hungry, craves stimulants, sugar; averse to meat. Crotalus has cured ulceration of the stomach. It has greatly restrained the growth of carcinoma when there is much vomiting of bile and blood. Vomiting in many instances where the blood has no tendency to coagulate.

Abdomen: The abdomen is greatly distended like the tympanitic abdomen of typhoid and the low zymotic diseases. Ulceration of the bowels, hemorrhage from the bowels. Much pain and soreness in the abdomen with numbness.

"Stool black, thin, like coffee grounds.

Dysentery of septic origin from foul water, food, etc.

Diarrhoea from noxious effluvia."

Women: Prolonged menses. Dysmenorrhœa; pain extends down thighs, with aching in region of heart. Uterine hæmorrhage with faintness at stomach. Puerperal fever; offensive lochia. Phlegmasia alba dolens. Sensation as though uterus would drop out. Painful drawing in uterine ligaments. Cannot keep legs still. Hemorrhages, Either dark clots or blood that has no tendency to coagulate and keeps on flowing. There is great trouble at the climacteric period. Hot flashes. Jaundice. Hemorrhage from the uterus or from other parts.

Cancer of the uterus with much bleeding. Great offensiveness. Patient becomes yellow, jaundiced, great exhaustion, mottled appearance of the skin, swelling of the face, of the leg, especially along the course of the veins. Worse from the slightest touch. Worse from jar, from motion.

Inflammation of the ovaries and of the uterus. Low form of putrid fever.

Urinary: Dark, bloody urine. Casts. Inflamed kidney. Albuminous, dark, scanty (Merc cor).

Skin: Boils, carbuncles and eruptions are surrounded by a purplish condition of the skin, a mottled, blue, splotched or marbled state. It produces boils, abscesses and a condition somewhat resembling a carbuncle, with burning and violent pains, but the peculiar feature is the doughy centre. Swelling and discoloration, skin tense and shows every tint of color, with excruciating pain. Vesication. Sallow. Yellow color of the whole body. Great sensitiveness of skin of right half of body. Purpura hæmorrhagica. Hæmorrhage from every part of body. Bloody sweat. Chilblains, felons. Dissecting wounds. Pustular eruptions. Insect stings. Post-vaccination eruptions. Bad effects of vaccination. Lymphangitis and septicæmia. Boils, carbuncles, and eruptions are surrounded by purplish, mottled skin and œdema. Anthrax. Sore sensation relieved by pressure.

In puerperal fever there is a continued oozing of black offensive blood that will not coagulate; bleeding from every orifice of the body as well as from the uterus. Imagine a woman who is pregnant suffering from typhoid fever.

She aborts and a low zymotic state comes on with the symptoms and with all the appearances as if she would bleed to death after the abortion. The blood will not coagulate and the flow continues. Or in a woman during a typhoid fever menstruation comes on. It is not a true menstrual flow, that is, it does not resemble the ordinary flow, because it is copious, dark and liquid, a continuous oozing with all the grave symptoms described, and especially the besotted countenance, the comatose state, the appearance as if she were intoxicated, lying as one dead. When aroused every muscle trembles; if the tongue is protruded it trembles, and there is inability to articulate.

Crotalus may save her life. Would it be possible to think of graver states of sickness than such as are produced by the ophidia?

When a physician sees these symptoms coming on he immediately thinks of a class of remedies that can cover such a state, remedies like Baptisia, Arsenicum, Secale and the Ophidia, and sometimes Arnica, Phosphorus and Pyrogen.

Sleep: In the more chronic conditions the individual manifests a terrible state as to his sleep. He rises from sleep as in a fright; has horrible dreams of murder, of death, of dead bodies and dead people, of associating with the dead and with corpses, of being in graveyards; even the smell of the cadaver is dreamed of. Starting in sleep. Yawning. Smothering sensation when awaking.

While he is awake he is tired, he is stupid, he cannot add figures, he makes mistakes in writing, he transposes sentences, and in words he transposes letters. He is unable to take care of his own accounts, for he cannot add up things that are at all particular. Sleep alternates with long and tedious periods of wakefulness.

He is disturbed by any change to warm weather. Great irritability, sensitive to spheres, easily disturbed by his surroundings, and easily wrought up into a pitch of excitement are also features of this remedy.

There is every reason to believe that in fat, robust, besotted drunkards it may, if properly used, be a remedy deep enough to remove the appetite for strong drink.

Modalities: Worse, right side; open air; evening and morning; in spring, coming on of warm weather; yearly; on awaking; damp and wet; jar.

Relationship: Compare: Bothrops; Naja (more nervous phenomena); Lachesis (more markedly worse on left side); Elaps (preferable in otorrhœa and affections of right lung); Crotalus cascavella (thoughts and dreams of death. Paralysis of articulation, embarrassed stertorous breathing and semi-consciousness. A magnetic state is produced; cutting sensation all around eyeball). Bungarus-Krait--(poliomyelitis).

Antidote: Lach; Alcohol. Radiant heat; camphor.

Dose: Third to sixth potency.

CROTON TIGLIUM
Croton-oil Seed

Is a valuable remedy in diarrhœa, summer complaint, and skin affections. These may alternate with each other. Feels tight all over. It is one of the antidotes to Rhus poisoning, as is evident from its wide and intense action upon skin and mucous surface, causing both irritation and inflammation, with formation of vesicles and mucous discharges. Has elective affinity for skin of face and external genitals. Burning in the œsophagus.

Head.--Pressing pain in forehead, especially orbits.

Eyes.--Granular lids; pustules of cornea. Red and raw appearance. Feel drawn backward. Eruptions around eyes.

Tensive pain above right orbit.

Stool.--Copious watery stools, with much urging; always forcibly shot out, with gurgling in intestines; worse, drinking the least quantity, or even while eating. Constant urging to stool, followed by sudden evacuation. Swashing sensation in intestines.

Urine.--Night urine foaming; dark orange color; turbid on standing; greasy particles floating on top. Day urine is pale, with white sediment.

Chest.--Drawing-pain through the left chest into the back. Asthma, with cough; cannot expand the chest. Nursing women; every suck the child gives produces pain from nipple back. Inflamed breasts. Cough; as soon as he touches the pillow must get up. Sensitive to deep breathing.

Skin.--Feels hide-bound. Intense itching; but scratching is painful. Pustular eruption, especially on face and genitals, with fearful itching, followed by painful burning. Vesicles; confluent oozing. Vesicular erysipelas, itching exceedingly. Herpes zoster; stinging, smarting pains of the eruption.

Modalities.--Worse, least food or drink; during summer; touch, night and morning, washing.

Relationship.--Compare: Momordica charantia-Hairy Mordica--(has marked drastic properties, producing colic, nausea, vomiting, cholera-like symptoms, abdomen seems full of fluid discharged explosively, thin, watery, yellow. Great thirst). Rhus; Anagallis; Anacard; Sepia.

Antidote: Ant tart.

Dose.--Sixth to thirtieth potency.

Jayashree Kanoi

CUBEBA OFFICINALIS
Cubebs
(CUBEBA)

Mucous membranes generally, but especially that of the urinary tract, are chiefly affected by this remedy. Frequent urination of a nervous origin. Leucorrhœa in little girls.

Urine.--Urethritis, with much mucus, especially in women. Cutting after urination, with constriction. Hæmaturia. Prostatitis, with thick yellow discharge. Cystitis.

Respiratory.--Catarrh of nose and throat, with fetid odor and expectoration. Mucus trickles from posterior nares. Rawness of throat and hoarseness.

Relationship.--Compare: Cucurbita; Copaiva; Piper meth; Sandal.

Dose.--Second and third attenuation.

Alfalfa.

CUCURBITA PEPO
Pumpkin Seed

Intense nausea immediately after eating. Vomiting of pregnancy. Seasickness. One of the most efficient and least harmful of teniafuges.

Relationship.--Compare: Filix; Cuprum oxid nig.

Dose.--Tincture. The seeds are a valuable remedy for tapeworm. Scald the seeds and peel off the outer skins when softened, the green inner pulp being the part used. Dose: two ounces of seed, yielding one of pulp. May be mixed with cream and taken like porridge. Take-in morning after twelve hours' fasting, and follow in two hours by castor oil.

CUCURBITA. Cucurbita citrullus.

Synonym—Watermelon.

CONSTITUENTS—

Fixed oil, mucilage, sugar.
PREPARATION—

Fluid Extract of Watermelon Seed. Dose, one dram.

Therapy—The juice of the fruit is a diuretic with many individuals, producing a cooling sense of relief from heat or aching across the kidneys, or throughout the urinary apparatus. The seeds in the form of an infusion act promptly with children, relieving pain in the passage of urine and stimulating the flow of water. When male infants cry with every urination and the diaper is stained yellow, this remedy will correct the condition promptly. In those conditions accompanied with a general sense of constriction, or backache from the passage of urates and phosphatic gravel, this remedy exercises a direct soothing influence, not only upon the renal organs, but upon the bladder, especially when the irritation persists, warding off subsequent inflammation. It is also very useful during the active stage of cystitis.

CUPRUM ACETICUM
Acetate of Copper

Hay-fever, with burning excoriation, paroxysmal cough; tough, tenacious mucus, and fear of suffocation. Protracted labor. Chronic psoriasis and lepra.

Head.--Violent throbbing and lancinating pains in forehead. Left-sided brow ague. Brain seems void. Inclined to gape and cry. Loses consciousness; head reels when in high-ceiled room. Constant protrusion and retraction of tongue (Laches). Neuralgia with heaviness of head, burning, stinging and stitching in temples and forehead.

Face.--Collapsed, hippocratic. Facial neuralgia in cheek-bone, upper jaw, and behind right ear. Better by chewing, pressure, and external warmth.

Stomach.--Violent spasmodic pains in stomach and abdomen. Vomiting. Slimy brown diarrhœa. Violent tenesmus. Cholera.

Respiratory.--Attacks of angina pectoris coming on when excited. Violent spasmodic cough. Short, difficult respiration. Spasmodic constriction of chest. Dyspnœa.

Skin.--Leprous-like eruption, without itching, over whole body, in spots of various sizes.

Modalities.--Worse, mental emotions, touch. Better, chewing, pressure, night, lying on affected side, and warmth.

Relationship.--Acts similarly to Cuprum met but is more violent in action.

Dose.--Third to sixth trituration.

girilal

| **Re: CUPRUM ACETICUM** | By: girilal<br>New Jersey USA | September 19 2006 |

Fats %DV
Total Fat 13.81 mg 21%
Saturated Fat 2.237 mg 11%
Monounsaturated Fat 5.551 mg ~
Polyunsaturated Fat 2.557 mg ~

As we can see it has a wonderful balance of many minerals which are vital for Living. Yes, we cannot eat 100 gm in a day as it has managanese and iron in excess. Thus it becomes a wonderful supplement of for people who are anemic. But Curry Leaves alongwith Coriander leaves and a few fruits and Leafy vegetables will take care of our body like a mother taking care of a baby.

Please drop in your comments and experiences with curry leaves powder, which is famous in India for its aroma and taste when eaten alongwith boiled rice and ghee or sesame oil.

|---|---|---|
| **Re: Fresh Curry Leaves/powder - Nutritional Power House** | By: garcot<br>Bangalore | April 15 2008 |

Dear All,

Curry leaves improve functioning of the stomach and small intestine and promote their action. They improve the quality of digestive juices secreted during digestion. Their action starts with intake. Their smell, taste and visual impression initiates salivary secretion and initiates the peristaltic wave, which is the first step in good digestion. They are mildly laxative and thus can tackle multiple digestive problems caused by food intake. They are directly added to food or an extract in the form of juice is added to buttermilk and consumed at the end of lunch/dinner. In case of a digestive upset, buttermilk enriched with the paste of curry leaves, common salt and cumin seed powder is recommended. This combination is also useful in problems such as loss of appetite, tastelessness of mouth as in case of fever etc. where food intake is a problem. Curry leaves are one of the important ingredients of herbal tonics and are parallel to digestive enzymatic tonics in allopathy.

A paste of these leaves with limejuice and honey/sugar/crystal sugar powder is a time-tested medicine in the treatment of hyperemesis graviderum. Nausea, dry vomiting, vomiting and food intolerance are few other conditions where this paste is used as a remedy. Curry leaves have some role in the treatment of diarrhea, dysentery and idiopathic loose motions though they are not antidiarrheal in the true sense. Fresh juice/ a paste of fresh leaves/a teaspoonful of powdered dried leaves /a mixture of curry leaves, coriander, mint leaves, etc. is a commonly known home made remedy.

Certain ayurvedic research says that curry leaves have some role in controlling non-insulin dependent diabetes mellitus. People with DM due to obesity or heredity should try this treatment. A paste of about 8 to 10 fresh, fully-grown curry leaves is to be taken on an empty stomach in the morning for a minimum of 3 months for desired results. Many people have also reported weight loss, which is an additional benefit in diabetic people.

Garcot

"wisdom in your body is deeper than your deepest philosophy" (Nietszche)

| **Re: Fresh Curry Leaves/powder - Nutritional Power House** | By: udaya kumar<br>-- | April 15 2008 |
|---|---|---|

Dear Garcot,

"Yes, we cannot eat 100 gm in a day as it has managanese and iron in excess."

here is a recipe:

1. Curry Patta leaves : 100 gms
2. Onion -1
3. Grated fresh coconut - 10 gms
4. Chilli - 2 Nos.
5. Turmeric - To taste
6. Salt - to Taste.
7. Cooking oil - one tablespoon.
8. Mustard - one pinch.
9. Coriander leaves - to taste

Mix cleaned and carefully cut curry patta
leaves with cut chilies, cut onion , turmeric, and grated cococunt and keep it separate.
In a fry pan on medium flame, put oil. When oil becomes hot put the mustard. After mustard has made all those sounds, add the mixture of curry patta in the pan, keep it cooking/frying for three four minutes while occasionally using a spoon to mix it.Add coriander to taste and supplement. You have a delicious, daily eatable subji for your chappatis and rice. It has all those elements intact and the Iron and Manganese will not disturb you. I hope you enjoy it, as I always does. with best wishes.

--

| **Re: Fresh Curry Leaves/powder - Nutritional Power** | By: garcot<br>Bangalore | April 17 2008 |
|---|---|---|

| **House** | | |
|---|---|---|

Here is an update:

I have tried potentising curry Leaves upto 6c yesterday and administered a couple of doses on my body system. It has been found to help the body, feel very relaxed, calm and improves the quality of sleep. As a bonus, I had a lingering cough, which seems to have also almost gone.

My recommendation: It can be used as a great tonic, at about 2X to 3X potencies to rejunevate ourselves and higher potencies for better food absorption, and so better digestion and hence helping prevent many diseases which starts with poor assimilation.

Girilal's Protocol for making remedies at home is adopted and juice of the leaves was used itself as the tincture without alcohol.

Rgds

| **Re: Fresh Curry Leaves/powder - Nutritional Power House** | By: Joe De Livera<br>Sri Lanka | April 17 2008 |
|---|---|---|

I am glad to note that you have experimented with Curry Leaves and discovered that it helps you to feel relaxed and also improves sleep.

Please keep experimenting with other subjects for other ailments and it would be interesting to get their response to this experimental use which I hope you will report on this Forum.

| **Re: Fresh Curry Leaves/powder - Nutritional Power House** | By: garcot<br>Bangalore | April 17 2008 |
|---|---|---|

Dear Joe,

Thanks for your encouragement. I believe, more like minded people should come forward to try such experiments. After all, at potencies of 1X or 2X we are not going to experience severe aggravations. Ofcourse, I aggravate even with Ferrum Phos 6X, but that is just an exception. Ofcourse 1X or 2X works differently from 6X.

You won't believe, When started eating excess cashews, I started proving the symptoms of Cuprum Met. But quickly when nutrition data on cashew was checked, it is very very rich in copper! so potentised Cashew once to about 6c and noticed all the symptoms disappearing after the 1st dose itself.

Rgds
Garcot

CYCLAMEN EUROPAEUM
Sow-bread
(CYCLAMEN)

Large doses produce violent purging and vomiting; disturbed digestion with very salty saliva. Anæmic and chlorotic conditions. Affections of uterus. Gastro-intestinal and genito-urinary tracts affected, inducing secondary anæmia and various reflexes. Sleepiness, moroseness, and lassitude. Cough at night while asleep without waking, especially in children (Cham; Nitr ac).

Head.--Terrors of conscience. Grieves over duty neglected. Depression, with weeping desire to be alone. Aching in morning, with flickering before eyes; sneezing with itching in ear. Vertigo; things turn in a circle; better in the room; worse, open air. One-sided headache. Frequent sneezing with itching in ears.

Eyes.--Dim vision, worse on waking, with spots before eyes. Flickering of various colors. Convergent strabismus. Sees countless stars. Diplopia. Disturbance of vision, associated with gastric disturbances.

Stomach.--Salty taste; hiccough-like eructation worse, fat food. Diarrhœa after every cup of coffee; hiccough. Satiety after a few mouthfuls. Disgust for meat, especially pork. Desire for lemonade. No thirst all day.

Rectum.--Pain about anus and perineum, as if a spot were suppurating, when walking or sitting.

Female.--Menses profuse, black, membranous, clotted, too early, with labor-like pains from back to pubes. Flow less when moving about. Menstrual irregularities with megrim and blindness, or fiery spots before eyes. Hiccough during pregnancy. Post-partum hæmorrhage, with colicky bearing-down pains, with relief after gush of blood. After menses, swelling of breasts, with milky secretion.

Extremities.--Pains in parts where bones lie near surface. Burning, sore pain in heels. Cramp-like contraction of right thumb and index finger. Pains in periosteum. Chilblains.

Skin.--Acne in young women, pruritus better scratching and appearance of menses.

Modalities.--Worse, open air, evenings, sitting, standing, and cold water. Better, during menstrual flow, by moving about, rubbing parts; in warm room, lemonade.

Relationship.--Compare: Ambra; Pulsat; Cinchona; Fer cit et Chin.

Dose.--Third attenuation.

Jayashree Kanoi

By: Riberbfreerie

| **Re: CYCLAMEN EUROPAEUM** | Canada | November 16 2007 |
|---|---|---|

ction, Medical Uses, and Dosage.—The root or tuber of cyclamen, in its recent state, is a drastic cathartic, for which purpose it has been long in use among the peasantry of some parts of Europe. Its effects, however, are frequently very severe, as violent emesis, hypercatharsis, intestinal inflammation, cold sweats, tinnitus aurium, spasmodic movements, etc., which sometimes result in death. This severity of action is lessened by drying the tubers. In the dried state, 8 or 10 grains of the powder, rubbed up with an equal quantity of starch or gum, will have a purgative effect. Formerly, an ointment was prepared from the fresh tubers, "ointment of arthanita," which was rubbed upon and around the umbilicus of children, for the expulsion of worms, upon the abdomen of adults to cause emesis, and upon the region over the bladder to increase the urinary discharge. The fresh tubers, bruised and formed into a cataplasm, have been employed as a local stimulating application to indolent scrofulous swellings, abscesses, etc.

Prof. Scudder (Spec. Med.) states that the tincture is prepared from the tuber in early spring, or during the period of rest of the plant. He suggests a tincture to be made from the tubers of hot-house plants The special uses to be made of this tincture are to arrest severe emesis, particularly that depending upon brain disease, vertigo, tendency to fainting, inability to walk straight, and diarrhoea, with tormina and tenesmus. Tincture of cyclamen (  viii to alcohol Oj) gtt. v to aqua fl  iv; teaspoonful every hour. Dose of powder, 5 grains, of decoction (  i to  iii, in aqua Oj), 1 to 4 fluid drachms.

CYPRIPEDIUM PUBESCENS
Yellow Lady's Slipper
(CYPRIPEDIUM)

The skin symptoms correspond to those of poisoning by Rhus, for which it has been found an efficient antidote. Nervousness in children; from teething and intestinal troubles. Debility after gout. Hydrocephaloid symptoms, result of long, exhausting diarrhœa. Sleeplessness. Cerebral hyperasthesia in young children often the result of overstimulation of brain.

Head.--Child cries out at night; is wakeful and begins to laugh and play. Headaches of elderly people and during climacteric.

Relationship.--Compare: Ambra; Kali brom; Scutellar; Valerian; Ignat. Skin relatives: Grindelia; Anacard.

Dose.--Tincture, to sixth attenuation. For Poison Oak, 5 drops of tincture per dose, also locally.

CYTISUS LABURNUM
Laburnum
(LABURNUM)

All parts of this shrub are poisonous, producing inflammation of stomach and intestines, with vomiting, diarrhœa, headache, paleness of face and cold skin. Widespread anæsthesia, and convulsions are some of the chief effects of this drug. Cerebrospinal meningitis. Great prostration, sense of constriction in throat, stiffness of nape, tearing from nape into occiput, lusterless eyes.

Head.--Stupefaction; indifference (Phos ac). Unequally dilated pupils; giddiness; twitching of facial muscles (Agaric). Hydrocephalus. Constant vertigo, intense sleepiness.

Stomach.--Excessive thirst. Constant nausea, vomiting; burning pain in epigastrium.

Tenesmus and erections. Grass-green urine.

Extremities.--Numbness and pain in hands. Difficulty in moving them.

Compare: Nux; Gels. Cystine (produces motor paralysis resembling that of curare and death through respiratory paralysis).

Dose.--Third potency.

DAPHNE INDICA
Spurge Laurel

Acts on lower tissues, muscles, bones and skin. Sudden, lightning jerks in different parts of the body. Craving for tobacco. Burning in stomach. Parts of the body feel separated (Bapt). Fetid breath, urine, sweat.

Head.--Feels as if skull would burst; as if head were separated from body. Heat in head, especially in vertex. Tongue coated on one side only (Rhus). Foul-smelling, ptyalism hot.

Urine.--Thick, turbid, yellowish, like rotten eggs.

Extremities.--Right toe swollen, painful. Pain shoots upward into abdomen and heart. Rheumatic pains in thighs and knees. Cold feeling on buttocks. Shooting pains, shift rapidly worse, cold air.

Sleep.--Entire inability to sleep; sometimes caused by aching in bones. Dreams, with nightmare. Dreams of cats, black cats. Starting on falling to sleep with chilliness and clamminess.

Relationship.--Antidotes: Bry; Rhus.

Compare.-- Fluor ac; Aur; Mez; Staph.

Dose.--First to sixth attenuation.

Jayashree Kanoi

DIGITALIS PURPUREA
Foxglove(DIGITALIS)

Comes into play in all diseases where the heart is primarily involved, where the pulse is weak, irregular, intermittent, abnormally slow, and dropsy of external and internal parts. Weakness and dilatation of the myocardium. Its greatest indication is in failure of compensation and especially when auricular fibrillation has set in. Slow pulse in recumbent posture, but irregular and dicrotic on sitting up. Auricular flutter and fibrillation especially when subsequent to rheumatic fever. Heart block, very slow pulse. Other symptoms of organic heart disease, such as great weakness and sinking of strength, faintness, coldness of skin, and irregular respiration; cardiac irritability and ocular troubles after tobacco; jaundice from induration and hypertrophy of the liver, frequently call for Digitalis. Jaundice with heart disease. Faint, as if dying. Bluish appearance of face. Cardiac muscular failure when asystole is present. Stimulates the heart's muscles, increases force of systole, increases length. Prostration from slight exertion. Collapse.

Mind.--Despondency; fearful; anxious about the future. Dullness of sense. Every shock strikes in epigastrium. Melancholia, dull lethargic with slow pulse.

Head.--Vertigo, when walking and on rising, in cardiac and hepatic affections. Sharp, shooting frontal pain, extending into nose, after drinking cold water or eating ice-cream. Heaviness of head, with sensation as if it would fall backward. Face bluish. Confusion, fullness and noise in head. Cracking sounds during a nap. Blue tongue and lips.

Eyes.--Blueness of eyelids. Dark bodies, like flies, before eyes. Change in acuteness of perception of shades of green. Objects, appear green and yellow. Mydriasis; lid margins red, swollen, agglutinated in morning. Detachment of retina. Dim vision, irregular pupils, diplopia.

Stomach.--Sweet taste with constant ptyalism. Excessive nausea, not relieved by vomiting. Faintness, great weakness in stomach. Burning in stomach extending to œsophagus. After cold water or ice-cream, sharp pain in forehead, extending to nose. Faintness and vomiting from motion. Discomfort, even after a small quantity of food, or from mere sight or smell. Tenderness of epigastrium. Copious salivation. Neuralgic pain in stomach, unconnected with taking food.

Abdomen.--Pain in left side apparently in descending colon and under false ribs. Severe abdominal pains, pulsation in abdominal aorta, and epigastric constriction. Enlarged, sore, painful liver.

Stool.--White, chalk-like, ashy, pasty stools. Diarrhœa during jaundice.

Urine.--Continued urging, in drops, dark, hot, burning, with sharp cutting or throbbing pain at neck of bladder, as if a straw was being thrust back and forth; worse at night. Suppressed. Ammoniacal, and turbid. Urethritis, phimosis, strangury. Full feeling after urination. Constriction and burning, as if urethra was too small. Brick-dust sediment.

Female.--Labor-like pains in abdomen and back before menses. Uterine hæmorrhage.

Male.--Nightly emission (Digitalin), with great weakness of genitals after coitus. Hydrocele; scrotum enlarged like a bladder. Gonorrhœa, balanitis (Merc), with œdema of prepuce. Dropsical swelling of genitals (Sulph). Enlarged prostate.

Respiratory.--Desire to take a deep breath. Breathing irregular, difficult; deep sighing. Cough, with raw, sore feeling in chest. Expectoration sweetish. Senile pneumonia. Great weakness in chest. Dyspnœa, constant desire to breathe deeply, lungs feel compressed. Chronic bronchitis; passive congestion of the lungs, giving bloody sputum due to failing myocardium. Cannot bear to talk. Hæmoptysis with weak heart.

Heart.--The least movement causes violent palpitation, and sensation as if it would cease beating, if he moves (Opposite; Gels). Frequent stitches in heart. Irregular heart especially of mitral disease. Very slow pulse. Intermits; weak. Cyanosis. Inequality of pulse; it varies. Sudden sensation as if heart stood still. Pulse weak, and quickened by least movement. Pericarditis, copious serous exudation. Dilated heart, tired, irregular, with slow and feeble pulse. Hypertrophy with dilatation. Cardiac failure following fevers. Cardiac dropsy.

Extremities.--Swelling of the feet. Fingers go to sleep easily. Coldness of hands and feet. Rheumatic pain in joints. Shining, white swelling of joints. Muscular debility. Nocturnal swelling of fingers. Sensation in legs as if a red hot wire suddenly darted through them (Dudgeon).

Sleep.--Starts from sleep in alarm that he is falling from a height. Continuous sleepiness.

Fever.--Sudden flushes of heat, followed by great nervous weakness.

Skin.--Erythema, deep red, worse on back, like measles. Blue distended veins on lids, ears, lips and tongue. Dropsical. Itching and jaundiced.

Modalities.--Worse, when sitting erect, after meals and music. Better, when stomach is empty; in open air.

Relationship.--Antidotes: Camph; Serpentaria. Incompatible: China. Compare: Nerium odorum (resembles in heart effects Digitalis, but also has an action like Strychnia on spinal cord. Spasms appear more in upper part of body. Palpitation; weak heart will be strengthened by it. Lock-jaw). Adonia; Cratægus (a true heat tonic); Kalmia; Spigel; Liatris; Compare also; Digitoxinum (Digitalis dissolved in Chloroform; which has yellow vision very marked, and distressing nausea, aggravated by champagne and aerated waters). Nitri spir dulc increases action of Digit. Ichthyotoxin. Eel Serum (Experiments show great analogy between the serum and the venom of vipera. Indicated whenever the systole of the heart is insufficient, decompensated valvular disease, irregular pulse due to fibrillation of the auricle. Assytole, feeble, frequent, irregular pulse, dyspnœa and scanty urine. Liver enlarged, dyspnœa, albuminuria. No œdema). Convallaria (heart disease with vertigo and digestive disturbances). Quinidin-Isomeric methoxyl compound.--(Restores normal rhythm in auricular fibrillation, often supplements the action of Digitalis. Two doses of 3 grains each, three hours apart-if no symptoms of cinchonism develop, 4 doses 6 grs each daily (C. Harlan Wells). Paroxysmal tachycardia. Establishes normal heart rhythm at least temporarily, less in valvular lesions).

Dose.--The third to thirtieth attenuation will bring about reaction when the drug is homeopathically indicated; but for palliative purposes the physiological dosage is required. For this purpose, the tincture made from the fresh plant, in doses of five to twenty drops, when the cardiac stimulation is desired, or the infusion of 1 1/2 per cent. Dose, one-half to one ounce if the diuretic action is wanted. The tincture may be given on sugar or bread, and nothing liquid be taken for twenty minutes before or after its administration. Of the powdered leaves, 1/2 to 2 grains in capsules. Digitoxin 1-250 grain. No matter what form of digitalis is given the dose should be reduced as soon as the pulse rate has been lowered to 80 beats a minute and the normal rhythm has been partially or completely restored. Under such conditions a good rule is to cut the dose in half and still more if there be a sudden falling off of the urinary output.

DIOSCOREA VILLOSA
Wild Yam

As a remedy for many kinds of pain, especially colic, and in severe, painful affections of abdominal and pelvic viscera; it ranks with the polychrests of the Materia Medica. Persons of feeble digestive powers; tea-drinkers, with much flatulence. Gall stone colic.

Mind.--Calls things by the wrong name.

Head.--Dull pain in both temples; better pressure, but worse afterwards. Buzzing in head.

Stomach.--Mouth dry and bitter in morning, tongue coated, no thirst. Belching of large quantities of offensive gas. Neuralgia of stomach. Sinking at the pit of the stomach; pyrosis. Pain along sternum and extending into arms. Eructations of sour, bitter wind, with hiccough. Sharp pain in epigastrium, relieved by standing erect.

Abdomen.--Pains suddenly shift to different parts; appear in remote localities, as fingers and toes. Rumbling, with emission of much flatus. Griping, cutting in hypogastric region, with intermittent cutting in stomach and small intestines. Colic; better walking about; pains radiate from abdomen, to back, chest, arms; worse, bending forwards and while lying. Sharp pains from liver, shooting upward to right nipple. Pain from gall-bladder to chest, back, and arms. Renal colic, with pain in extremities. Hurried desire for stool.

Heart.--Angina pectoris; pain back of sternum into arms; labored breathing; feeble action of heart. Especially with flatulence and pain through chest and tightness across.

Rectum.--Hæmorrhoids, with darting pains to liver; look like bunches or grapes or red cherries; protrude after stool, with pain in anus. Diarrhœa (worse in morning), yellowish, followed by exhaustion, as if flatus and feces were hot.

Male.--Relaxation and coldness of organs. Pains shoot into testicles from region of kidneys. Strong-smelling sweat on scrotum and pubes. Emissions in sleep, or from sexual atony, with weak knees.

Female.--Uterine colic; pains radiate from uterus. Vivid dreams.

Respiratory.--Tight feeling all along sternum. Chest does not seem to expand on breathing. Short-winded.

Extremities.--Lameness in back; worse, stooping. Aching and stiffness in joints. Sciatica; pains shoot down thigh; worse, right side; better, when perfectly still. Felons in beginning, when pricking is first felt. Nails brittle. Cramps in flexors of fingers and toes.

Modalities.--Worse, evening and night, lying down, and doubling up. Better, standing erect, motion in open air; pressure.

Relationship.--Antidotes: Chamom; Camph.

Compare: Colocy (differs in modalities); Nux; Cham; Bry.

Dose.--Tincture, to third potency.

DIOSMA LINCARIS
Buku-from Cape of Good Hope

Pathogenically it produces: Somnolence; nervous insomnia; night sweats. Erratic pains, with bad humor, desire to weep or fear of sickness. Violent vertigo. Cephalalgia, chiefly frontal, radiating to the occiput. Eyes brilliant, with lachrymation or itching, the conditions accompanied by a species of stupefaction, with hardness of hearing or noises from aural pressure. Earthy face with disseminated rosaceous eruption. Nausea, fetid breath, with sensation of emptiness. Sensation of meteorism, with stinging pains in the spleen. Painful sensation in the abdomen, with pubic pressure-the pressure of the clothing becomes insupportable, with emission of high-colored, bloody urine. Frequent yellow diarrhœa, worse at night. Catamenia abundant, anticipating, sometimes metrorrhagic in type; crampy pains on ingesting food. Sensation of heat or of cold in the hands, with convulsive movements of the fingers. Weakness of the legs, aggravated by sitting down.

Clinically, this pathogeny should be useful in cerebral affections with dullness or stupefaction; in convulsive or epileptiform attacks; in hysteria; in hepatitis (cirrhosis or atrophy); in hæmaturia with ovarian or uterine lesions.

In splenitis, where it should surpass Ceanothus. Mental disorders in nervous or ascetic individuals, particularly where there is constant fear of death, or erotic or maniacal attacks. Gastralgia. Gastro-enteritis. Sudden fright, with trembling and weakness of the legs (Dr. C. Leal La Rota).

DIPHTHERINUM
Potentized Diphtheritic Virus

Adapted to patients prone to catarrhal affections of respiratory organs, scrofulous individuals. Diphtheria, laryngeal diphtheria, post-diphtheritic paralysis. Malignancy from the start. Glands swollen; tongue red, swollen; breath and discharge very offensive. Diphtheritic; membrane thick, dark. Epistaxis; profound prostration. Swallows without pain, but fluids are vomited or returned by the nose.

Relationship.--Compare: Diphtherotoxin (Cahis) (Chronic bronchitis with rales. Cartier suggests it in the vago-paralytic forms of Bronchitis of the aged or in toxic bronchitis after grip).

Dose.--Thirtieth, two hundredth or C. M potency. Must not be

What about the superstition about wearing Pearls?
Wedding jewellery incorporates everything from the engagement ring, wedding rings and of course the necklace, bracelet and earrings that bride will wear with her dress.
There are two theories on this. One states that the Greeks believed the pearl would promote marital harmony and prevent newlywed brides from crying. The other states the exact opposite - that it will cause tears within the marriage.
Take into Account Healing Time
Getting a tattoo on the back is rather fun given that you can be as daring or as discreet as you would like. An oxymoron? Not really. A back tattoo is something that could be quickly covered for work and readily uncovered in the evening with an open-back dress or top or whenever out on holiday with a swimming suit. Truly, the back is one full canvas for you to work with and be as artistic as you would like.
There is no limit as to what you can have for a back tattoo. This place of the body is larger than other parts. Consequently, you could have a full scenery inked on the whole area of your back or you could pick to have a tattoo on a particular spot of the back. An example would be the area of the shoulder blades or spine in which your tattoo could benefit from the contour and motion of that area and make it look like it is shifting along with the body.
Where you put your tattoo matters very much since it will not only have an impact on the general look of the design but it would likewise determine how and when the tattoo will be uncovered.For instance, a lower back tattoo can be noticed if you wear a hip hugging jeans and bend over and an upper back tattoo may be viewed if you have on a bathing suit or tank top.
If you are contemplating about back tattoos, take into consideration the area you would like inked. Because the back is quite a large area, it would be an ideal area to get a big tattoo without automatically drawing interest to it on a daily basis. One

good tattoo for the back is a landscape tattoo. Back tattoos are commonly conceptual. If you are going to have a smaller tattoo done, you might want to consider going with a different part of the body.

Even though a tattoo is not a surgery, it would still need a bit of recovery period. If you work in a job wherein you sit down for hours on end, think about this prior to getting a back tattoo. Consider having the tattoo done a piece at a time, like having the outline done first and then followed by the colouring on another session. This will minimize the amount of soreness and bleeding you have to endure. It would also be a good idea to take some time away from work to give your back time to mend so that it will be hassle-free for you to look after your new tattoo in the comfort of your home.

Stanislav Gomboc

DORYPHORA DECEMLINEATA
Colorado Potato-bug
(DORYPHORA)

The center of this drug's action seems to be in the urinary organs, and hence its employment in gonorrhœa and gleet. Urethritis in children from local irritation and gleet. Great trembling in extremities. Prostration. Swelling of body. Burning sensation.

Urinary.--Difficult micturition. Urethra inflamed, with excruciating pain when urinating. Pain in back and loins. Severe trembling in limbs.

Relationship.--Antidote: Stram.

Compare: Agar; Apis; Canth; Lach; Coccion.

Dose.--Sixth to thirtieth potency.

Jayashree Kanoi

| **Re:DORYPHORA DECEMLINEATA** | By: garcot<br>Bangalore | March 12 2010 |
|---|---|---|

Potato beetle, Potato bug.

(a) A beetle (Doryphora decemlineata) which feeds, both in the larval and adult stages, upon the leaves of the potato, often doing great damage. Called also Colorado potato beetle, and Doryphora. See Colorado beetle.
(b) The Lema trilineata, a smaller and more slender striped beetle which feeds upon the potato plant, but does less injury than the preceding species.

Antidotes: Stram., vinegar, Vegetable-acids, earth, which absorbs and neutralises the poison
Collaterals: Agar., Apis., Canth., Cocc-s

Reasons Men Wear xxxx Underwear
If you think that women are the only ones who enjoy wearing xxxx underwear, think again. Men's underwear designers are thrilled that more men are taking the cue from their European counterparts and hopping on the skimpy train. If you think that thin strips are only sold at fast food chicken chains, you need to get out more. Yes your lawyer, banker or even your pastor could be rocking it in some sweet leopard thongs despite their seemingly conservative demeanor. Let your imagination run wild as objections are made to your honor (the judge), your figures are grimly assessed and glory is sang on high by these scantily clad men.
This leads us to five reasons why men are now opting for xxxx underwear.
-It gives them a kick out of doing something completely contrary to their public image. So while you are letting your imagination roam they are smiling at their skimpy little secret. So both of you can now enjoy your little joke. But wait; in order to fully enjoy the sense of mischief can one really keep it hidden? I suspect these men will come out of closet eventually. Seen any in the locker room lately?
-It gives their girlfriends or wife a kick. For many years thongs have been thought of as something guys like their women to wear, but what they didn't realize was that some women are actually aroused by seeing their hot guy in a thong. Some men even claim that it has improved their sex life. Nothing like pleasing your partner. Hey let's wear his and hers thongs today.
http://ladydressreview.com/how-to-purchase-xxxx-underwear/

DROSERA ROTUNDIFOLIA
Sundew
(DROSERA)

Generalities: The use of this medicine has been mostly limited to whooping cough, but it has a more extensive use.

When we examine its spasmodic nature, its exhaustion, its cramps, which extend through a large number of complaints, we must realize that it is a more extensive remedy. Epileptiform spasms, prolonged sleeplessness, copious sweat on waking from sleep, restlessness and anxiety. imagines that he is constantly persecuted. Flashes of heat, dread of the night. Many complaints come on in the night. Anxiety, sleeplessness, and fear of ghosts. Spasmodic cough. Fear of being alone and suspicious of his most intimate friends.

Confusion of mind and much dizziness. Lancinating pains in various parts of the body, especially in the head, and must support the head with the hands.

Must support the chest when coughing. Must press upon the

Agrimony - [bach Flower Remedy]

abdomen. Pressive, congestive headaches. Corrosive itching in various parts of the body with measles -like eruptions. The eyeballs become prominent and congested from coughing during measles and in convulsions. Stitching pain in the eyes. Noises in the ears, roaring, bumming and drumming. Earache in children. Stitching in the ears. Bleeding from various orifices, especially from the nose, throat, larynx, and chest when coughing, in connection with the spasmodic coughs.
Face: Ordinarily the face is pale and sunken with beat of the face and he has cold extremities, except when coughing, at which time the face becomes red, congested, and purple like Bell. and Cupr. Stitching pains will be found in many complaints.

Putrid taste in the mouth is a common symptom when it is found in phtisical conditions of the lungs, larynx, and also in whooping cough. Bloody saliva and hemorrhage from the mouth. Difficulty in swallowing solid foods.
Constriction of the throat and of the larynx and constriction of the oesophagus preventing swallowing. Cramping constriction runs all through the remedy. Cramping of the hands upon undertaking to hold on to something. When grasping the broom handle.
In the throat there is burning and scraping. Stitching pains in the throat. The throat is dark red or purple. I believe that Drosera has a clinical symptom of great value. Scraping hi the larynx and cough after eating. In its proving it has cough after drinking. It has especially cough after eating and drinking cold things. This cough comes from tickling in the larynx and constrictions in the larynx. Nausea and vomiting. Vomiting of blood and bile in the morning and vomiting of mucus, and food when coughing. Coughing until he retches and vomits.
Constricting pains in the pit of the stomach. Constricting pains in the sides of the abdomen. Colic after sour food. Perhaps the most troublesome irritation found in this remedy is in the larynx, where there will be found clutching, cramping, constricting, and burning.
Larynx: Hoarseness and continued irritation causing coughing and continued irritation and scraping of the larynx. Accumulation of mucus in the larynx, dryness in the larynx, spasms of the

epiglottis. Violent spasmodic cough from tickling in the larynx. Violent tickling in the larynx brings on cough, rousing him from sleep, coming on every few hours with increasing intensity making the remedy resemble whooping cough, in which it has been very useful. Sensation in the larynx like a feather. Spasms of the larynx. Spasms of the extremities when coughing. The cough is brought on from tickling, from accumulation of mucus in the larynx. These conditions are found in phthisis of the larynx, in whooping cough, in laryngitis, and in catarrh of the larynx. Spasmodic difficulties of the chest and larynx cause difficult breathing and suffocation. Sensation as of something in the chest preventing breathing when talking or coughing. Difficult breathing and cough coming after midnight.

Difficult breathing especially on waking. Not able to utter a sound. Difficult breathing and suffocating sensation. The face becomes purple from spasms in the larynx. Compression of the chest. These attacks of suffocation come on with the cough or come upon lying down.

Asthmatic breathing from talking and constriction in the larynx. Deep sounding, hoarse cough, rough scraping cough, loud whooping cough, spasmodic whooping cough. Violent constriction of the chest and muscles of the throat and larynx with whooping cough. Whooping cough coming in paroxysms of two or three hours, but violently worse after lying down at night and toward 3 o'clock in the morning. Most tormenting tickling in the larynx urging to cough.

Paroxysmal dry cough from tickling in the larynx. Spasmodic cough, sympathetic cough from spinal irritation. Violent spasmodic cough in young girls going into consumption. Cough with expectoration of bright red or black clotted blood. Bloody expectoration.

Cough: These spasmodic coughs come often during measles or after an attack of measles. An irritation in the larynx remains. It is one of the most frequently indicated remedies for measles. Like Carbo veg.

Severe attacks of stitching in the chest when sneezing or coughing. He must press on the chest with the hand for relief. Makes an effort to hold chest with the hand when coughing, the cough is so violent. Compression of the chest, burning sensation in the chest, stitching pains in the chest. It is a very useful remedy in chronic bronchitis with spasmodic cough. It is a great palliative for the spasmodic cough that occurs in consumption and all along the course of tuberculosis of the lungs. In these chest complaints, pains between the shoulders, pains in the back as if bruised from coughing.

Coldness in the bands and feet and blueness of the extremities. Cramps in the extremities with the cough. The cough becomes so violent that the patient goes into convulsions. Along with these spasmodic coughs especially in phtisical conditions there are febrile attacks. Chill and chilliness and one-sided chill. Chill and fever with whooping cough. Chill and fever with inflammation of the larynx. The heat as well as the cough is worse after midnight. Cold sweat on the forehead and on the extremities.

Sweat over the whole body following the fever. Copious sweat all over the whole body with the cough. The cough ends in great exhaustion. Whooping cough with fever.

Head: Vertigo when walking in open air, with inclination to fall to the left side. Coldness of left half of face, with stinging pains and dry heat of right half.

Stomach:Nausea. Aversion to and bad effects from acids.

Respiratory Organs:Spasmodic, dry irritative cough, like whooping-cough, the paroxysms following each other very rapidly; can scarcely breathe; chokes. Cough very deep and hoarse; worse, after midnight; yellow expectoration, with bleeding from nose and mouth; retching. Deep, hoarse voice; hoarseness; laryngitis. Rough, scraping sensation deep in the fauces and soft palate. Sensation as if crumbs were in the throat, of feather in larynx. Laryngeal phthisis, with rapid emaciation. Harassing and titillating cough in children-not at all through the day, but commences as soon as the head touches the pillow at night. Clergyman's sore throat, with rough, scraping, dry sensation deep in the fauces; voice hoarse, deep, toneless, cracked, requires exertion to speak. Asthma when talking, with contraction of the throat at every word uttered.

Extremities:Paralytic pains in the coxo-femoral joint and thighs. Stiffness in joints of feet. All limbs feel lame. Bed feels too hard.

Fever:Internal chilliness; shivering, with hot face, cold hands, no

thirst. Is always too cold, even in bed.
Modalities:Worse, after midnight, lying down, on getting warm in bed, drinking, singing, laughing.
Relationship:Antidote: Camph.
Compare: Fluoroform (2 per cent watery solution, 2-4 drops, after paroxysms, considered specific for whooping-cough). Ouabain from leaves of Carissa schimperi-arrow poison (Respiratory spasm-Whooping cough is cut short in first stage and reduced in frequency of attacks and hastens convalescence). Chelid; Corall; Cupr; Castanea; Argent; Menyanth.
Dose:First to twelfth attenuation.

DUBOISIA MYOPOROIDES
Corkwood Elm
(DUBOISIA)

Acts chiefly on the nervous system, eyes, upper respiratory tract. Recommended in pharyngitis sicca, with black, stringy mucus. It dilates the pupil, dries the mouth, checks perspiration, causes headache and drowsiness. On the eye it acts more promptly than Atropia, much stronger as a mydriatic. Red spots floats in the field of vision. Sensation as if stepping on empty space. Vertigo with pale face; not gastric in origin. Scarlet fever; locomotor ataxia. Palliative in exophthalmic goitre.

Mind.--Absent-minded, incoherent, silly and nonsensical, memory impaired.

Head.--Impossible to stand with eyes shut, tendency to fall backwards.

Eyes.--Conjunctivitis, acute and chronic. Mydriasis. Paralysis of accommodation. Hyperæmia of retina with weakness of accommodation, fundus red, blood-vessels full and tortuous; pupils dilated, with dim vision. Pain over eye, between it and brow.

Respiratory.--Larynx dry, voice hoarse, phonation difficult. Dry cough with oppressed breathing.

Extremities.--Loss of power in limbs, staggers; feels as if he stepped on empty space. Trembling, numbness and weakness.

Relationship.--It antagonizes Muscarine. Duboisin sulphate 1-100 gr sedative in mania. 2-4 milligrams a day. Hystero-epilepsy. Motor restlessness of insane (Has been used as a substitute for Atropia in doses of 1-20 of a grain hypodermically). Antidotes: Morphia; Pilocarp. Compare: Bellad; Stram; Hyos.

Dose.--Third to twelfth potency.

Jayashree Kanoi

| **Re: DUBOISIA MYOPOROIDES** | By: girilal<br>New Jersey USA | October 17 2006 |
|---|---|---|

Duboisia (commonly called Corkwood Tree) is a genus of small perennial shrubs to trees about 14 m tall, with extremely light wood and a thick corky bark.

They are native to Australia and New Caledonia.

The alternate, glabrous leaves are narrow and elliptical. The inflorescence is an open cymose panicle of apically small white flowers, sometimes with a purple or mauve striped tube. They flower profusely in spring. The fruit is a small, globular, black, juicy berry.

The leaves of Duboisia leichhardtii and Duboisia myoporoides contain the pharmaceutical important ingredients scopolamine and hyoscyamine and some other accompanying minor alkaloids. A derivative of scopolamine is the main active ingredient of the drug buscopan, a potent spasmolytic and analgesic. These trees are commercially grown for the pharmaceutical industry.

Australian aborigines chew the nicotine-containing dried leaves of Duboisia hopwoodii, mixed with ash from Acacia species. They call this pituri. The paleontologist, Dr Gavin Young, named the fossil agnathan Pituriaspis doylei after pituri, as he thought he may have been hallucinating upon viewing the fossil fish's bizarre form.

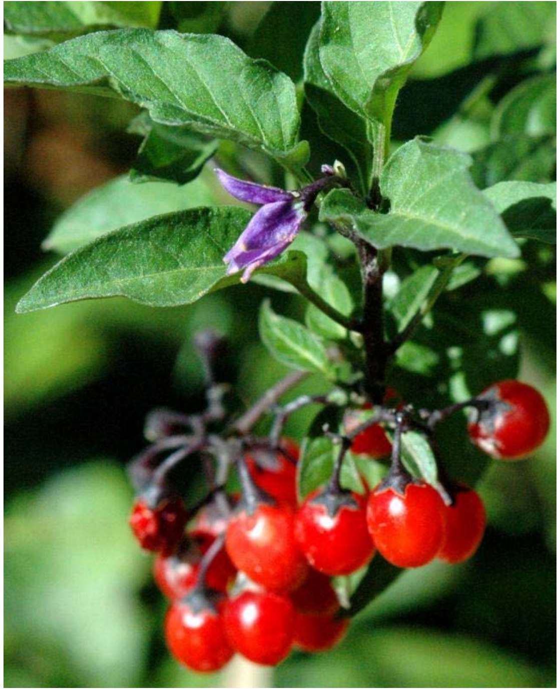
**Dulcamara**
**Started by: Jayashree at October 5 2006**

**Replies: 2 & Views: 7899** **Font** **Bottom Of Page** **Page 1 of 1** **Reply**

| **Dulcamara** | By: Jayashree<br>Calcutta, India | October 5 2006 |
|---|---|---|

Click picture for many more pictures



Dulcamara - Bitter Sweet
This medicine seems especially to affect the mucous membranes. It appears to have a tendency to establish or ultimate discharges, both acute and chronic.
Affections caused by taking cold when the air changes suddenly from dry and warm to wet and cold.
Modalities: The Dulcamara patient is disturbed by every change in the weather, from warm to cold, from dry to moist, and from suddenly cooling the body while perspiring. He is ameliorated in dry, even weather; cold and damp aggravate all the conditions. He is worse evening and night and during rest.
Diarrhea: Dulcamara produces catarrh of the stomach, intestines, nose, eyes, cars, and inflammatory conditions of the skin with eruptions. If you go through any of these in detail, you will be astonished to find how disturbed is the constitutional

state of this patient by weather changes.

It is a medicine wonderfully useful in diarrhoea, at the close of the summer, hot days and cold nights, with changeable stool; diarrhoea of infants. There seems to be no digestion; yellow, slimy stool; yellow-green stool, with undigested stool; frequent stool, blood in the stool and quite a mass of slime, showing a marked catarrhal state.

This gets better and worse; this gets better under ordinary remedies; it will often get better from Pulsatilla, because Pulsatilla symptoms seem to predominate, and sometimes it is relieved by Arnica; but every time the child takes cold, it comes back again, and soon the physician will realize that he has not struck the remedy belonging to all the symptoms. It is very often an annoying condition, because the symptoms are not recognized until two or three attacks have come. It is not easy to discover that the attacks come on from cold.

Babies: Every year women bring their babies back from the mountains, at the end of the season, and then we get some Dulcamara cases. One needs to be in the mountains at the close of the summer season to know what the condition is.

If you go into the mountains at such a time, either in the North or West, you will notice that the sun's rays beat down during the day with great force, but along towards sunset if you walk out a draft of cold air comes down that will chill you to the bone.

This will make the baby sick; it is too warm to take the child out in the middle of the day, and so he is taken out in his carriage in the evening; he has been overheated in the house during the day, and then catches this draft in the evening.

Dulcamara is suitable for conditions that would arise from just such a state. So with an adult who has been out in the beat of the sun and catches the cold draft by night, which means hot days and cold nights, such as occur in the fall of the year, at the close of the summer and coming in of the winter; this intermingling of hot air and cold drafts.

You go up towards the foot of the hills after a hot day, you will walk through a stratum of air that will make you perspire and the next minute a cold air that will make you want your overcoat on, and then again a stratum of hot air and so on.

Such a state will bring out a sweat and then suppress it. The symptoms that come from Dulcamara seem to be like symptoms that arise from just such causes. And we are free, then, to infer from such an experience that Dulcamara cures these cases. Babies have to be hurried home at times, because of the diarrheas that cannot be cured in the mountains, but a dose of Dulcamara will enable them to stay there and live right in that same climate. Chronic recurrent dysentery from cold. If they have a dose of Dulcamara it fortifies them against the continual taking of cold.

Diarrhea: There are people in a certain kind of business that really constitute a Dulcamara state. Suppose we look at our ice-cream men and our ice handlers and cold storage men; in a cold room they are handling ice; the summer weather is hot, they must go out and take some of the heat, and then they go back into their cold rooms and handle the ice. These men are subject at times to bowel troubles, and other catarrhal affections, but generally to diarrheic affections.

Their business cannot stop because it is their means of living. Dulcamara cures such chronic diarrheas when the symptoms agree. Arsenicum is a medicine that would be suitable for such patients if the symptoms agreed, but the symptoms at times agree with Dulcamara, for that is the nature of the remedy, to take cold from cold, damp place flora suppressing a sweat, from going out of a hot atmosphere into an ice house, into icy rooms; into cold rooms; in this climate such complaints as come on from overexertion, overheating, and then throwing off the clothing and becoming chilled, suppressing the sweat; fevers may come on, aching in the bones, trembling with the aching, trembling in the muscles, and as the fever goes on, he is in a distressed state, cannot remember, forgets what he was about to speak of, forgets the word that would naturally express his idea, and he enters into a dazed state, a state of confusion.

It suits these colds that have this sluggish circulation of the brain, with trembling and chilliness, coldness as if in the bones.

Rheumatism: Dulcamara is full of rheumatism, full of rheumatic pains and aches, sore and bruised all over, the joints are inflamed, become red, sensitive to touch and are swollen. It is suitable, in cases of inflammatory rheumatism, due to suppressed perspiration, induced by changing from a high to low temperature, or from cold wet weather. Worse evening and night and during rest.

Eyes: Now, it has many chronic complaints. A catarrhal condition of the eyes, purulent discharges, thick, yellow discharges, granular lids; eyes become red every time he takes cold;

"every time he takes cold it settles in the eyes," is a common expression of the patient. The patient will often ask the question,

"Why is it, doctor, that every time I take cold it settles in my eyes? If I get into a cold atmosphere, or take off my coat after being heated, I have to look out."

If it becomes cold in the night and he has thrown the clothes off, he takes cold, or, if a cold rain comes on, he takes cold and then has sore eyes.

Such eyes are very often effectually cured by Dulcamara. As to the eye itself, it is only an ordinary catarrhal state, but the manner in which it comes on is the important thing. That is the nature of the patient to have sore eyes whenever he takes cold; it belongs to some other remedies as well, but this one particularly.

Nose: Dulcamara has also catarrhal discharges from the nose, with bloody crusts; blowing out thick, yellow mucus all the time. In infants and children who have sniffles, they are always worse in cold, damp weather. When the patient says:

"Doctor, in cold, damp weather I cannot breathe through my nose; my nose stuffs up;"

Dulcamara is a very useful remedy to know in catarrhal cases that always stuff up when there is a cold rain.

It is markedly an autumnal remedy. The Dulcamara patients go through the summer very comfortably; their catarrhal conditions to a great extent pass away; the warm days and warm nights, because of the even temperature seem to agree with them, but as soon as the cold nights come on and the cold rains come, all their difficulties return; there is an increase of the rheumatism and of the catarrhal discharges.

This medicine has been used a long time by our mothers. They used to make ointments out of Dulcamara. You will find that the old lady, in almost any rural district in which Dulcamara grows, gather it and make it into a salve for ulcers. Well, it is astonishing how soothing it is when applied externally to smarting wounds, whether in solution or salve or any other way. But it is a better medicine, of course, when indicated by symptoms of the constitutional state; it is a better medicine if used internally.

Ulcers: It produces ulcers and a tendency to ulceration of the mucous membranes and this condition will become phagedenic. Sometimes it starts as nothing more than a herpetic eruption, but it spreads and finally yellow pus forms and then the granulations that should come, do not come; an eating condition appears and the surface does not heal.

Especially along the shin bone there will be raw places, which even extend to the periosteum, to the bone, producing necrosis and caries; so we have affections of the mucous membranes or skin, first becoming vesiculated and then breaking open and eating.

It is especially related to very sensitive, bleeding ulcers with false granulations, phagedenic ulcers. This is not generally known; it is a matter of experience with those that have watched this medicine; and again, strange to say, Arsenicum, which I have already mentioned once or twice, has this state. Arsenicum leads all other medicines for ulcers that eat, phagedenic ulcers. Arsenicum is a typical remedy for spreading sores, for spreading ulcers, and especially those that come from a bubo that has opened and will not heal.

Skin: Another feature of this medicine is its tendency to throw out eruptions over the body. It is a wonderfully eruptive medicine, producing vesicles, crusts, dry, brown crusts, humid crusts, herpes. Dulcamara produces eruptions so nearly like impetigo that it has been found a useful remedy in that condition. i.e., multiple little boil-like eruptions; it produces little boils, and the boils spread.

Enlargement and hard ness of the glands. Eruptions upon the scalp that look so much like crusta lactea that Dulcamara has been found a very useful medicine. Extreme soreness, itching, and the itching is not I relieved by scratching, and the scratching goes on, until bleeding - and rawness take place.

Eruptions that come out upon the face, upon the forehead, all over the nose, but especially on the cheeks, which become completely covered with these crusts; eczema of infants. Children only a few weeks old break out with these scalp eruptions, and Dulcamara is one of the medicines that you will need to know.

"Catarrhal and rheumatic headaches in cold, damp weather."

Headache: When the headache is the main trouble, the catarrh takes a different course from what it does when the catarrh is the principal ailment. There are two ways in which that conducts itself. In some Dulcamara patients, whenever he takes cold from the cold, damp weather, he commences to sneeze, and to get a coryza, and soon comes a copious, thick, yellow flow from the nose.

On the other hand, Dulcamara has a dry catarrh in its first stage, and a fluid catarrh only in the second stage.

One who is subject to Dulcamara headaches, has the dry catarrh; whenever he takes cold instead of the usual catarrhal flow with it, he at first sneezes and then feels a dryness in the air passages, a slacking up of the usual discharge, which would give him relief, and then he knows that he must look out, for along will come the neuralgic pains, pains in the occiput, and finally over the whole head. Congestive headaches, with neuralgic pains and dry nose.

The Dulcamara headache is very severe, is accompanied by tremendous pains, and he may go to the doctor with the idea of getting rid of the headache, but it is a catarrhal state that is suppressed, that has slackened up, and the nose becomes dry. As soon as the flow starts up his headache is relieved. Then headache of this catarrhal kind that comes on from every cold, damp spell, or from getting overheated, from getting into a cold draft after being overheated, or get ting overheated with too much clothing, and then throwing the coat off, will also belong to the Dulcamara state.

A form of eruption that is very likely to be a Dulcamara eruption is the ringworm, herpes circinatus. It comes sometimes upon the face and scalp. Children sometimes have ringworms in the hair. Dulcamara will nearly always cure these ringworms in the hair.

Ear: The Dulcamara child is very susceptible to earache.

"Coryza dry, relieved by motion, worse during rest, and renewed by the slightest exposure, and worse in cold air."

In Dulcamara it is more fluent in the house, in the warmth, and less fluent in the cold air in a cold room. With the Dulcamara coryza, if the patient should go into a cold room pain will commence in the nasal bones and he will begin to sneeze, and water will be discharged from the nose. That very state would relieve a Nux vomica patient. Allium cepa is made worse in a warm room; like Nux vomica, is better in cold, open air. Commences to sneeze as soon as he gets into a warm room. So that we see the meaning of such things, the necessity of going into particulars and examining every case.

Here is a state that you will often find in the fall of the year, somewhere about August 20th. They sometimes call it hay fever. Every year as the nights become cold, and there is cold, damp weather and fall rains, he has a stuffing up of the nose with constant sneezing and wants the nose kept warm.

These cases at times sit in a warm room with cloths, wrung out of hot water, over the face and nose to relieve the distress, the catarrhal state of the eyes and the stuffing up of the nose. Heat relieves the stuffing up of the nose.

These patients can sometimes breathe with these hot cloths over the nose, but if they go out into the night air, or a cold place, and especially if there is a damp, fall rain, they suffer much. Other cases of hay fever suffer during the day, and they go to as cold a place as they can find, and are even driven to the mountains for a cool place.

"Profuse discharge of water from the nose and eyes, worse in the open air," "better in a closed room, on awakening in the morning, " etc.

The Dulcamara patient is so sensitive to newly mown grass and drying weeds, that he is obliged to absent himself from the country where they are found.

Hay-fever: For hay fever we have especially to look up such remedies as have complaints worse in the fall of the year. There are other conditions that are just as much hay fever, for instance, "rose cold" that comes on in June.

The Dulcamara patient often becomes a sickly patient, with threatening of the catarrhal discharges to centre in the bronchial tubes, i.e., in the mucous membrane of the breathing apparatus.

Many adults die of acute phthisis that might have been cured by Dulcamara, and you will find very commonly among this class of patients those that are worse from every cold, damp spell of weather. Such enter right into the Dulcamara sphere. They are better by going South where there is a continuously warm climate. The Dulcamara patient is a sickly patient, threatened with acute phthisis; pallid face, sickly yellow and sallow. This shows that it goes deeply into the life, creating such disorders as are found in very sick patients, i.e., those chronically sick, in persons whose vital economy is so much disordered that it cannot keep the body in repair.

Throat: The throat comes in for its share of trouble. Persons who in every cold damp spell have a sore throat, from getting overheated, throwing off the wraps, getting into a cold place. On comes the sore throat; it fills with mucus, with yellow slime; the tonsils become inflamed; even quinsy comes on.

Or it may affect the throat uniformly; it may become red and inflamed and dry at times, and at other times filled with mucus, and at night the throat fills with thick, yellow, tough mucus, which is hawked up in great quantities. These colds that settle first in the nose and throat, post-nasal catarrh, of the very worst sort, gradually creep on until the whole respiratory apparatus is in a state of catarrhal Inflammation.

Every cold aggravates his catarrh wherever that may be. If it be in the nose, then the nose is aggravated; if in the chest, then those parts are aggravated. A continual rousing up. Every experienced physician must have met with many cases where for a time he felt unable to cope with the case because of his inability to reach the constitutional state that underlies this continual taking cold.

Bright's disease: There is a form of acute Bright's disease that Dulcamara cures. You can probably now surmise from what we have said of the nature of the remedy, that in cases of Bright's disease following scarlet fever, or from malaria, or in any acute disease that has ended badly, i.e., the patient has been exposed to the cold too soon, and has taken "cold," or from sudden change of weather, damp and cold, the feet commence to swell, there is albumin in the urine, the limbs are waxy, the face becomes waxy and sallow, and there is constant urging to urinate. Dulcamara, with other constitutional symptoms, will be suitable.

In bladder catarrh, where there is a copious discharge of mucus, or muco-pus in the urine; when the urine stands, a thick, purulent sediment, yellowish-white, and a constant urging to urinate; every time he takes a little cold, the urine becomes bloody, the frequency of urination is increased, the urine becomes irritating, the catarrh of the bladder rouses up like a flame, all the symptoms are worse in cold, damp weather, and from getting chilled; better from becoming warm. So whether it is a catarrh of the kidney or a catarrhal state of the bladder, or an attack of dysentery, or an attack of sudden diarrhea, every cold spell of the weather brings on an increase of the trouble.

There is another Dulcamara symptom which will often be expressed suddenly in the midst of a lot of other symptoms. After you have been hunting for a long time, the patient will say: "Doctor, if I get chilled, I must hurry to urinate; if I get into a cold place, I have to go to stool, or to urinate."

So we see that the symptoms come on when the patient is cold, and are better when he is warm. Any catarrhal trouble of the bladder that is better in the summer and worse in the winter.

"Rash comes out upon the face before the menses."

The patients are subject to "cold" sores upon the lips and upon the genitals.

Every time he takes "cold," herpes labialis, herpes preputialis.

"Catarrhal ailments in cold, damp weather."

"Mammae engorged, hard, sore and painful."

"Mammary glands swollen, inactive, painless, itching, in consequence of a 'cold' which seems to have settled in them."

"Cough, from damp, cold, atmosphere, or from getting wet."

"Cough, dry, hoarse and rough, or loose, with copious expectoration of mucus and dull hearing; catarrhal ~fever."

The cough is worse lying and in a warm room and better in the open air.

Rheumatic lameness and stiffness in the back from taking cold better by motion. Drawing pain in the lumber region extending to the lower limbs during rest. Stiff neck from every exposure to cold.

Stitching, tearing, rheumatic pains in limbs after exposure to

cold, better by motion, worse at night or in the evening, with some fever. Sore, bruised feeling all over the body.
Warts on hands, fingers and face.

| **Re: Dulcamara** | By: Bellkeys | May 10 2008 |
|---|---|---|

Would this be a recommended remedy for someone with al over pains, tiredness, headaches, joint pains, dizzy, how is it used, what potency?

Bellkeys

| **Re:Dulcamara** | By: Guatis<br>Netherlands | June 8 2015 |
|---|---|---|

Gentlemen:

I have pain in my knees, tight feeling in my fingers, pain in my toes as if there is poor circulation, pain on my shoulders & lower back, always feeling sleepy everytime I wake up, has respiratory allergies to fumes, smoke, strong scents of any kind, and even to some food like chicken & seafood. I was also diagnosed to have sleep apnea so I use CPAP. I am also overweight by easily 25 lbs. Will Dulcamara cure all these symptoms or would you recommend another homeopathic remedy?

Thank you so much!

Echinacea angustifolia
By Jayashree Kanoi

Synonyms: Brauneria pallida (Nutt.), B. angustifolia, purple coneflower, black sampson, Kansas snakeroot, Kansas niggerhead, rudbeckia, American narrow-leaved coneflower, spider flower
Order: Compositae
Description: Echinacea is a perennial herb, up to a metre in height, with simple rough stems, hollow near the base and thickening slightly close to the flowerhead. The leaves are elongated, slightly elliptical with entire margins and covered with coarse hairs and protuberances. The purple flower is in the form of a high cone surrounded by rough hairy bracts, downturned purple ray florets and greenish tubular florets. The tapering root is greyish-brown flecked with white. Echinacea is a native of the prairies of the Western USA and is cultivated in Europe.
Tests show that Echinacea stimulates immune system cells into action. When these cells are activated, white blood cells are more ready to wrap themselves around illness-causing invaders

and to move viruses or bacteria out of your system, prevent them from reproducing themselves, or simply stop their activity. It is used extensively to prevent and treat the common cold as well as many other viruses and bacterial infections. Many people ingest it commonly throughout the cold and flu seasons in order to have an herbal shield against rampaging germs.
Echinacea helps the body's natural ability to fight invaders through a natural antibiotic which it contains called echinacoside, which has been compared to penicillin. It has successfully treated Rheumatoid Arthritis in Germany (where herbs are much more readily available for medicinal usage).
Apply Echinacea to burns and wounds on the skin to promote quicker tissue recovery and healing. It also helps to stimulate the body's cells to produce a chemical which is naturally produced by the white blood cells while fighting infection. This chemical is called interferon. Echinacea, in combination with antifungal cream also helps to stop recurring vaginal yeast infections when taken orally 43% better than anti-fungal cream alone. Echinacea kills a variety of disease-causing viruses, fungi and bacteria.
Make sure, when purchasing Echinacea that you purchase Augustifolia for maximum effect. Other types including the popular Purple Coneflower are a much weaker version and will probably have little to no beneficial medicinal affects. The medicinal part of the plant is the rootstock.
Parts used: Root and rhizome
Collection: The roots are unearthed in the autumn after flowering. The fresh extract is more effective than the dried root.
Constituents: volatile oil (including humulene and caryophylene), glycoside (echinacoside), polysaccharides, polyacetylenes, isobutylalkamines, echinaceine, phenolics, inulin, betain, resins, sesquiterpene
Actions: immunostimulant, anti-inflammatory, antibacterial, antiviral, vulnerary, antiseptic, peripheral vasodilator, anti-microbial, antibiotic, anti-allergenic, lymphatic tonic, warming alterative, anti-infective, stimulating, inhibits hyaluronidase activity and reduces eosinophil levels.
May help: Low immunity, celiac disease, diverticulitis, chronic fatigue syndrome, colds and flu, genital herpes, bronchitis, ear

infections, laryngitis, and cystitis.

Special instructions: Use at the first signs of a cold or other infection, not as a long-term preventive.

Origin: Native to the Great Plains and southern United States; currently scarce in the wild but cultivated in the United States and Europe.

Cautions and possible side effects: Not recommended for people with autoimmune diseases such as lupus, rheumatoid arthritis, or multiple sclerosis. Do not use if you are allergic to plants in the daisy family, such as chamomile and marigold. Consult your doctor before using for longer than eight weeks.

Echinacea has antiviral, antifungal, anti-inflammatory, and antibacterial properties. Although taken internally, it can also be used topically on wounds or inflamed skin. It has been used to treat candida, a maddening yeast infection, and in some cases used as a mouthwash to treat gingivitis.

Indications: boils, septicaemia, naso-pharyngeal catarrh, pyorrhoea, tonsillitis

Therapeutics and Pharmacology: Echinacea, having both an antibacterial and antiviral action, is one of the best remedies for helping the body rid itself of microbial infections. It may be used in the treatment of boils, abscesses, carbuncles, septicaemia and other such infections and, combines with other appropriate herbs, it may be used for any infection anywhere in the body. It has been shown to improve the body's resistance to infections such as colds and influenza; it stimulates the lymphatic vascular system and the fibroblasts. It should be taken in small, frequent doses as soon as flu-like symptoms appear. It is of particular value in laryngitis, tonsillitis, and catarrhal conditions of the nose and sinus. The tincture or decoction may be used as a mouthwash in the treatment of pyorrhoea and gingivitis.

Echinacea may also be applied as a lotion to infected sores and wounds, and it promotes the healing of old wounds and ulcers.

A wash of Echinacea can help relieve the itching of urticaria and this treatment is also useful for stings and bites.

Research has demonstrated that Echinacea stimulates the production of white blood cells to fight infection. The polysaccharide component has an anti-viral action, reducing the ability of pathogens to penetrate tissues. In Germany,

echinacein is most often administered intravenously because polysaccharides are rapidly broken down in digestion.
Echinacea is of value in the treatment of glandular fever and post-viral fatigue syndrome (myalgic encephalomyelitis), and has most recently been employed in AIDS therapy. There is evidence to show that whole plant preparations are helpful in allergies.
Combinations: Echinacea may be combined with Achillea or Arctostaphylos for cystitis; with Arctium root or Iris for boils; and with Baptisia and Commiphora resin for pharyngitis or tonsillitis.
Caution: High doses can occasionally cause nausea and dizziness.
Preparation and Dosage: (thrice daily)
Regulatory Status: GSL
Dried herb: 1g or by infusion or decoction
Liquid Extract: 1:5 in 45% alcohol: 0.5-1ml
Tincture: 1:5 in 45% alcohol: 1-2ml
Additional Comments: Three species are used medicinally: E angustifolia, E. pallida (Nutt.) and E. purpurea (L.). Scientific research has now confirmed its stimulatory effects on the white blood cells that fight infection, and it is being studied in California as a possible treatment for AIDS.
The revved-up effect, however, is short-lived. Research suggests that Echinacea loses its effectiveness with continuous use. Consequently, you will want to use it only when you feel a cold coming on or when your immune system is weakened by stress.
It’s not a good idea to take this on a daily basis. If everyone in your office is sick, however, and you have no doubt that you’re going to get sick, you can take it as a prophylactic. Just remember that it’s most potent in those first few days that you take it.
If you have an autoimmune disease such as lupus or rheumatoid arthritis, you should be cautious. These diseases are partly due to an already overactive immune system. Anything that stimulates the immune system may, in theory, be harmful. You may be able to use Echinacea really short-term, but I’d consider other choices, such as zinc.
Skin/Wounds: Evidence to date indicates that Echinacea is

useful when applied externally to cuts, abrasions, bites, and stings to help promote healing, regenerate healthy cells, reduce inflammation, and maintain the structure of connective tissue. In an uncontrolled clinical study of 4,598 patients with various skin conditions, a topical E. purpurea ointment was found effective in treating 85.5% of patients with wounds, burns, eczema, inflammations, herpes simplex, and varicose ulcers.

General Immunity: The immune-stimulating effects of Echinacea were first reported in 1914. By the 1930's German researchers had initiated studies (400-plus to date) exploring Echinacea's immune effects. These include some clinical studies, but primarily research in animals and test tube cell cultures. A few tests on humans have shown Echinacea to exhibit clinically significant activation of macrophage and granulocyte (immune cell) activity with an increase of phagocytosis (ingestion of microbes and foreign bodies by immune cells). Clinical evidence further indicates Echinacea may help fight bacterial and viral infections in the ears, vagina, urinary tract, and other sites, lower fever, and calm allergic reactions.

Efficacy: One German study indicates that Echinacea's immune-stimulating effects begin to subside after 5 days. As a general immune stimulant, most herbalists recommend that you stop taking Echinacea for a week after six or eight weeks of continuous use.

Pediatric

• Adjust the recommended adult dose to account for the child's weight. Most herbal dosages for adults are calculated on the basis of a 150 lb (70 kg) adult. Therefore, if the child weighs 50 lb (20-25 kg), the appropriate dose of Echinacea for this child would be 1/3 of the adult dosage.

• Use alcohol-free preparations for children.

Adult

For general immune system stimulation, during colds, flu, upper respiratory tract infections, or bladder infections, choose from the following forms and take three times a day:

For arthritis, take 15 drops daily of a standardized extract. For slow-healing wounds, apply creams or ointments as needed.

Precautions

It's safe as long as you use it as recommended by your health care provider or as instructed on the product label. In Germany, continual use of Echinacea is restricted to eight weeks.

Echinacea is a member of the Compositae family and as such may rarely cause an allergic reaction. When you take Echinacea orally, you will notice a strong numbing and tingling sensation on your tongue. This is normal and goes away quickly.

Some cases of skin rash and itching have been reported, but these are rare. Do not use Echinacea if you have tuberculosis, leukoses, diabetes, collagenosis, multiple sclerosis, AIDS, HIV infection, or an autoimmune disease.

The revved-up effect, however, is short-lived. Research suggests that Echinacea loses its effectiveness with continuous use. Consequently, you will want to use it only when you feel a cold coming on or when your immune system is weakened by stress, says Dr. Brett.

"It's not a good idea to take this on a daily basis. If everyone in your office is sick, however, and you have no doubt that you're going to get sick, you can take it as a prophylactic," she says. "Just remember that it's most potent in those first few days that you take it."

If you have an autoimmune disease such as lupus or rheumatoid arthritis, you should be cautious, says Dr. Lee. "These diseases are partly due to an already overactive immune system. Anything that stimulates the immune system may, in theory, be harmful," she says. "You may be able to use Echinacea really short-term, but I'd consider other choices, such as zinc."

Possible Interactions

Two scientific studies have shown that the combination of Echinacea and cyclophosphamide, a type of chemotherapy, may support your immune system by negating the immunosuppressive effects associated with chemotherapy. However, you should consult with your health care provider before using Echinacea with cyclophosphamide.

Echinacea may also be useful in combination with econazole, an antifungal agent used to treat vaginal yeast infections and reduce recurrence of these infections. Consult your health care provider before adding Echinacea to your existing medication regimen.

ELAPS CORALLINUS
Coral-snake

Similar to snake-poisons generally. Has very marked black discharges. Cold things disagree. Desire for sweetened buttermilk. Nausea and vomiting. Prostrating diarrhœa of consumption. Acidity of stomach, with faint feeling. Sudden pain in stomach. Spasm of œsophagus; pharynx constricted; food and liquids suddenly arrested, and then fall heavily into stomach. Spasms followed by paresis. Cold feeling in stomach. Fruits and ice-water lie very cold. Right-sided paralysis. Must have oscillatory motion. Rheumatic constitutions. Ear, nose and throat symptoms important.

Mind.--Depressed; imagines he hears someone talking; dreads to be left alone. Fear of rain. Can speak, but cannot understand speech. Fears apoplexy.

Head.--Violent headache, extending from forehead to occiput; first one eye, then the other. Pain in ears. Vertigo with tendency

Juglans Cinerea

Feb 5th - Mar 5th

to fall forward. Weight and pain in forehead. Fullness in head.

Eyes.--Aversion to light; letters run together when reading. Veil before eyes. Burning in lids. Bloated around the eyes in the morning. Large red fiery spot before eyes.

Ears.--Cerumen black and hard, with difficult hearing, or serous greenish discharge, offensive; buzzing, and illusion of hearing. Sudden attack of nightly deafness, with roaring and crackling in ears, cracking in ears on swallowing. Intolerable itching in ear.

Nose.--Chronic nasal catarrh, with fetid odor and greenish crusts. Ozæna; yellowish-green discharge. Mucous membrane wrinkled; nostrils plugged up with dry mucus. Pains from nose to ears on swallowing. Nostrils stopped up. Nasal bleeding. Pain at root of nose. Eruption about nose.

Throat.--Thick, very offensive, dry, greenish-yellow crusts upon the posterior pharyngeal wall and extremely foul breath. Spasmodic contraction of œsophagus; passage of fluids arrested.

Chest.--Coldness in chest after drinking. Hæmorrhage from lungs black as ink and watery; stitches in apex of right lung. Fainting caused by stooping. Oppression in going upstairs. Peeling off of skin from palms and fingers. Cough, with terrible pain through lungs. Worse right and expectoration of black blood. Sensation of a sponge in œsophagus.

Stomach.--Feels cold. Sensation as if food turned like a corkscrew on swallowing; desire for sweetened buttermilk. Acidity after every mouthful.

Female.--Dysmenorrhœa, with black blood. Discharge of black blood between menses. Itching of vulva and vagina.

Sleep.--Dreams about dead persons.

Skin.--Glands and skin of axillæ affected; itching with tetter. Tips of fingers peel off. Itching eruption in axillæ.

Extremities.--Icy cold feet. Vesicular eruptions on feet. Arms and hands swollen bluish. Knee-joints feel sprained. Pricking under the nails.

Fever.--Cold perspiration all over. Typhoid when ulcers have eaten into tissues, and black blood is discharged.

Modalities.--Worse eating fruit; cold drinks; wet weather.

Relationship.--Compare: Kino from Pterocarpus (Hæmoptysis and hæmorrhage from intestines). Eucalyptus rostrata (offensive dark discharge from right ear). Crotalus; Alumen; Carbo; Ars; Lach.

Dose.--

Jayashree Kanoi

ELATERIUM OFFICINARUM
Squirting Cucumber
(ELATERIUM - ECBALIUM)

This is an invaluable remedy in violent vomiting and purging, especially if the evacuations are copious and watery. It is a very efficient remedy in certain forms of dropsy. Much yawning and stretching. Beriberi; choleraic conditions; urticaria and mental disorders coming on as a consequence of suppressed malaria. Irresistible desire to wander from home at night. Effects of damp weather.

Stomach.--Nausea and vomiting, with great weakness. Griping pains in bowels.

Stool.--Watery, copious, forceful. Squirting diarrhœa; frothy, olive green, with cutting in abdomen.

Extremities.--Sharp pains in fingers and thumbs, knees, toes, and instep. Gouty pain in great toes. Pain extends down extremities; pain in hip-joints with diarrhœa. Arthritic nodules.

Skin.--Smarts, stings, and burns. Dropsical. Urticaria from suppressed intermittent. Skin, orange color.

Fever.--Chill comes on with much yawning and stretching, lasting all through chill. Pain in extremities, darting into fingers and toes. Chills and fever, with spurting diarrhœa.

Modalities.--Worse, from exposure on damp ground.

Relationship.--Compare: Bry; Croton; Gambogia.

Dose.--Third to thirtieth potency. As a hydragogue cathartic to produce free discharge in dropsies, Elaterin 1-20 of a grain. Palliative only.

Click picture for many more pictures

Elm

Elm is the remedy for people suffering a temporary loss of self-confidence due to the overwhelming amount of responsibility they have taken on. Genuine Elm types are people who are successful and carrying out work that they believe in, but at times feel the weight of the charge on them and become depressed and concerned that they will not be able to go on.

The remedy helps to dispel these feelings so that the Elm person can resume his or her life without thought of failure.

The Elm state can be usefully contrasted with the Larch state: whereas people in the former take up challenges willingly and then only later, and only occasionally, doubt their abilities, Larch people are convinced they are going to fail right from the start, and so they tend not to try things in the first place.

Dr Bach's description
Those who are doing good work, are following the calling of their life and who hope to do something of importance, and this often for the benefit of humanity. At times there may be periods of depression when they feel that the task they have undertaken is too difficult, and not within the power of a human being.

| EQUISETUM HYEMALE | By: girilal<br>New Jersey USA | October 19 2006 |
|---|---|---|

Click picture for many more pictures

EQUISETUM HYEMALE
Scouring-rush
(EQUISETUM)

Principal action on the bladder. A remedy for enuresis and dysuria.

Urinary.--Severe, dull pain and feeling of fullness in bladder, not relieved by urinating. Frequent urging with severe pain at the close of urination. Urine flows only drop by drop. Sharp, burning, cutting pain in urethra while urinating.

Incontinence in children, with dreams or night-mares when passing urine. Incontinence in old women, also with involuntary stools. Retention and dysuria during pregnancy and after delivery. Much mucus in urine. Albuminuria. Involuntary urination.

Kidney.--Deep pain in region of right kidney, extending to lower abdomen, with urgent desire to micturate. Right lumbar region painful.

Modalities.--Worse, right side; movement, pressure, touch, sitting down; better, in afternoon from lying down.

Relationship.--Compare: Hydrangea; Ferr phos; Apis; Canth; Linaria; Chimaph. Equisitum contains silica in appreciable quantity.

Dose.--Tincture, to sixth potency. A decoction, teaspoonful doses, or the tincture in hot water, is found useful to allay irritability of urinary tract, calculus, dysuria, etc; also for pleuritic effusion and dropsy.

| **Treatment for Urticaria (?)** | By: PSMNLR<br>VIJAYAWADA | November 30 2013 |

Attn: Mr. Udaya: Please help.
Sir,
I require help in treating itching and red rashes on skin for my daughter, particulars of which are as follows:
1. Age/Sex/Country/Climate:
22, Female, India, Moderate (Coastal Andhra Pradesh and Coastal Tamil Nadu)

2. Current complain - from how long:
About two years

3. Current medicine you are taking:
Used Urtica Urens 200 and Petroleum 200 - without lasting favourable action (found temporarily effective - for a day or two).

Presently using
Natrum Mur 200 (Once a month)
Antim Crude 30 (in hourly doses when problem aggrevates)
Both were not found effective.
Loratadine 10 mg. tablets are providing temporary relief.

4. Sign & Symptom of disease:
Itching all over body and red marks on scratching. Gets red marks on skin even on pressure (red marks on back due to pressure of chair and red marks on skin even if we hold the hand tightly). There is no itching in case of pressure red marks. Itching almost always follows shortage of sleep. She is an IT professional who has shift duties and hence frequently changes her sleep timings.

5. Breif medical history:
Tall and average build. (not sepia-build) Had pustules in head in early childhood which was diagnosed as miliaria and was successfully treated with mixture of Carbo.Veg. 6X and Antim Tart.6X used for prolonged period. Had worms problem and bed-wetting in childhood (even upto 10 yrs). Cina and Equisetum were effective.
Frequent headaches which generally responds to Bryonia 200. (otherwise acetaminophen, which generally works).

6. Family Back Ground:
No family history of diabetes on father's side. Mother's mother and mother's brother are diabetics.

7. Education and Nature of Profession of Patient:
IT sector - working as web administrator and hence is required to do shift hours which change on weekly basis. Thus sleep timings change on weekly basis. Works in AC atmosphere, stays in AC hostel and travels in AC car. Exposure to sunshine is very limited.

8. Desires and aversion of food:
Likes sweets and cold drinks (cold water). Prefers to stay in temperatures less than 25 degrees.

9. Mind-behavior, anger, irritability, hurry..etc.:
Fixed ideas, obstinate. Forms her own opinions which are difficult to change. Forms good or bad impressions about strangers and acts accordingly. Avoids public attention. But has high concentration levels which sometimes looks like

absentmindedness. Generally shy and avoids trouble but when in trouble, after a point she becomes hard and gritty. Almost impossible to make her cry when anybody is present. But cries later when alone.

10. What makes it worse and what makes it better:
Lack of sleep and scratching make it worse.

11. Thirst/Tongue/diabetic...:
Not diabetic. Tongue generally clean. No particular thirst but consumes fair quantity of water during the day. Neither sips nor drinks in large quantities at a time.

| **Re:EQUISETUM HYEMALE** | By: udaya kumar<br>-- | December 1 2013 |
|---|---|---|

Use Nux Vomica 30C three times a day for three days to remove 1. Side effects of histamine antagonist being used.including insomnia which is major side effect of Loratadine 2. Remove the ill effects of late sleeping or lack of sleep

Use Pulstilla 200C one dose a day for three days for the removing side effects of allopathic medicines used.and also Pruiritis if any......
Since Loratadine is used and benefitted, an allergic angle is there...it could be seaside(aqua marinahttp://abchomeopathy.com/r.php/Aqua ), it could be heat, it could be cold, it could be food(Puls/arsenic), it could be sea food(cuprum, iodium), it could humidity (natrum sulph) and suppression of sweats(natrumur), it could be sleep(nux vomica), it could be sun (cocculus) cycles and melatonin......The medicines to be checked are Rhus Tox, Apis Mel,
Fixed ideas is Thuja, stubbornness is Cina. High Concentration levels, generally shy cries when alone are all Natrum Mur. Thuja 30C and Natrum Mur 30C three dosea a day for three days will be a very good foundation to begin with........Use Chionanthus Q 5 drops in water three times a day for one week to remove the habit of headache or migraine...

ERIGERON CANADENSE
Fleabane
(ERIGERON - LEPTILON CANADENSE)

Hæmorrhages are caused and cured by this remedy. Persistent hæmorrhage from the bladder. Hæmorrhage from the uterus, with painful micturition. Profuse bright-red blood. Pain in left ovary and hip. Chronic gonorrhœa, with burning micturition; continual dribbling. Dysentery, with soreness and burning in bladder. Tympanites.

Female.--Metrorrhagia, with violent irritation of rectum and bladder, and prolapsus uteri. Bright-red flow. Menorrhagia; profuse leucorrhœa; bloody lochia returns after least motion, comes in gushes; between periods, leucorrhœa with urinary irritation; pregnant women with "weak uterus;" a bloody discharge on slight exertion. Bleeding hæmorrhoids; nosebleed instead of menses (Bry).

Modalities.--Worse, left side.

Relationship.--Terebinthina similar.

Dose.--Tincture, to third potency. Oil of Erigeron 1x internally for tympanites. An enema of one dram of the oil with the yolk of an egg and pint of milk will reduce the most enormous tympanites.

Vaginal Pimples - How To Treat And Tell If Your Vaginal Acne Is Herpes Or Genital Warts
Have you spotted or felt what seems like a vaginal pimple and shocked because you never believed there was such a thing; well there is and don't be shocked. Aside from the usual sweaty crotch and tight clothing being a couple of likely reasons for pimples, there are of course the more serious causes which is

Lilium Tigrinum (tiger Lilly)

Picture of this second

facebook join our group +

43,725 Pageviews
Feb 5th - Mar 5th
+
-

when a doctor will be needed.
To help prevent vaginal acne, the vagina and surrounding area must be allowed to breathe. Suffocating the Minnie will only encourage sweat, irritation and smell. A blemish that appears red, raised and with a white top is naturally classed a pimple, and why wouldn't it be, because isn't that what pimples look like, nevertheless it could be a symptom of another infection like genital warts, herpes, or an inflammation of the hair follicles. People tend to link pimples with the face only, making the vagina seem an odd place to get them, but, wherever you have pores pimples can come.
(Pimples are normally 1 to 3 millimetres in size filled with pus or sebasceous material - in the vagina they can be bigger and called 'inclusion cysts'. If tiny, copious and filled with clear fluid - they are called 'vesicles' and these could be HSV, (herpes) typically sore and sting but rarely itchy.)
If you think you have a vaginal pimple or two, or even three, not to worry they are not life threatening and treatable.

| **EUCALYPTUS GLOBULUS** | By: shyam<br>Indore India | October 19 2006 |
|---|---|---|

Click picture for many more pictures

EUCALYPTUS GLOBULUS
Blue Gum-tree

Eucalyptus is a powerful antiseptic and destructive to low forms of life, a stimulating expectorant and an efficient diaphoretic. Atonic dyspepsia, gastric and intestinal catarrh. A remedy with marked effects on catarrhal processes, malaria, and intestinal disturbance. Influenza. Fevers of a relapsing character. Produces diuresis and great increase of urea. Hæmorrhages internally and locally (Hamam). Typhoid. Symptoms of exhaustion and toxæmia. Conditions of the mucous surfaces of the air passages, genito-urinary organs and gastro-intestinal tract. A gastro-intestinal irritant with pain in stomach and upper intestines several hours after eating.

Head.--Exhilaration. Desire for exercise. Dull congestive headache. Coryza; sore throat. Eyes smart and burn.

Nose.--Stuffed-up sensation; thin, watery coryza; nose does not stop running; tightness across bridge. Chronic catarrhal, purulent and fetid discharge. Ethmoid and frontal sinus involved.

Throat.--Relaxed, aphthous condition of mouth and throat. Excessive secretion of saliva. Burns, feels full. Constant sensation of phlegm in throat. Enlarged, ulcerated tonsils and inflamed throat (Use tincture locally).

Stomach.--Slow digestion. Much fetid gas. Beating and goneness with pulsation in epigastric arteries. Spleen hard and contracted. Pain in epigastrium and upper abdomen ameliorated by food. Malignant disease of stomach with vomiting of blood and sour fluid.

Abdomen.--Acute diarrhœa. Aching pains in bowels with feeling of impending diarrhœa. Dysentery, with rectal heat; tenesmus; hæmorrhage. Diarrhœa; stools thin, watery, preceded by sharp pains. Typhoid diarrhœa.

Urinary.--Acute nephritis complicating influenza. Hæmaturia. Suppurative inflammation of kidneys. Urine contains pus and is deficient in urea. Bladder feels loss of expulsive force. Burning and tenesmus; catarrh of bladder; diuresis; urethral caruncle. Spasmodic stricture; gonorrhœa.

Respiratory.--Asthma, with great dyspnœa and palpitation. Moist asthma. Expectoration white, thick mucus. Bronchitis in the aged. Bronchorrhœa (Bals. Peru). Profuse expectoration of offensive muco-pus. Irritative cough. Whooping-cough in rachitic children. Fetid form of bronchitis, bronchial dilatation and emphysema.

Female.--Leucorrhœa, acrid, fetid. Ulcer around orifice of urethra.

Extremities.--Rheumatic pains; worse at night, walking or carrying anything. Stiff, weary sensation. Pricking sensation, followed by painful aching. Nodular swellings over metacarpal and metatarsal joints.

Skin.--Glandular enlargements and nodular swelling over joints. Foul and indolent ulcers. Herpetic eruptions.

Fever.--Elevation of temperature. Continued and typhoid fevers. Scarlet fever (protective and curative). Discharges show a tendency to foulness, high temperature, accelerated but not strong pulse. Use the tincture.

Relationship.--Compare: Oil of Eucalyptus.--(Produces remarkable bodily exhaustion, no desire for any motion, unable to do any real mental work, study, etc. The volatile oil possesses, in common with other terpenes, the property of converting water, in presence of air and sunlight, into hydrogen peroxide, or to convert oxygen into ozone, which is the explanation usually given of its deodorizing and antiseptic properties (Merrel). Locally, in catarrhal affections, especially when of a suppurating or putrid nature). Eucalyptus tereticoris (menstrual cough and prostration). Eucalyptol (depresses temperature of healthy body more than Quinine; acts on kidneys like Terebinth); Anacard; Hydrast; Kali sulph. Eucalyptus neutralizes ill effects of Strychnin. Angophora-Red Gum--(dysentery, pains, tenesmus; better lying flat on face; obstinate constipation). Eucalyptus rostrata; Kino.

Dose.--Tincture in one to 20 drop doses, and lower potencies. Also Oil of Eucalyptus in five-drop doses.

EUGENIA JAMBOS
Rose-apple
(JAMBOSA VULGARIS)

Eugenia produces a state of intoxication like alcohol. Everything appears beautiful and larger; excitement soon changing to depression. Acne, simple and indurated. The pimples are painful for some distance around. Acne rosacea. Nausea, better smoking. Comedones.

Head.--Headache as if a board were lying on right side. Talkative. Hot lachrymation.

Extremities.--Nightly cramp in soles of feet (Cupr; Zing). Skin cracks about toes. Fissures between toes. Skin recedes from the nails, forming pus.

Relationship.--Compare: Eugenia chekun-Myrtus chekan (chronic Bronchitis); Antim; Berb aquif.

Berberis Aquifolium

Berberis vulgaris L.

EUONYMUS ATROPURPUREA
Wahoo, Burning Bush

Brunettes more easily affected, producing headache, mental disturbances and much distress in hepatic and renal region; albuminuria. Migraine. Passive Congestion and torpor of liver; chronic catarrhal affections of stomach and intestines. Weak heart. Chronic rheumatism and gout.

Mind.--Mental confusion, despondent, irritable; loss of memory, unable to recall familiar names.

Head.--Heavy frontal headache. Sore, tired feeling; bruised feeling of scalp. Pain over right eye extending back through the head. Bilious headache; coated tongue, bad taste, constipation. Vertigo, obscure vision and gastric derangement, associated with albuminuria. Headache over eyebrows.

Stomach.--Mouth dry, pasty taste; thirsty, stomach full and uncomfortable.

Abdomen.--Flatus and pain. Anus very sore and burning. Constipation with hæmorrhoids and severe backache. Diarrhœa; stools variable and profuse, bloody. Pain about umbilical region.

Urinary.--Urine scanty, high-colored; acidity increased, poured out rapidly.

Back.--Dull pain between shoulders and about renal and splenic region; pain in lumbar region better lying down.

Extremities.--Aching in all joints, especially ankles. Feet feel swollen and tired.

Modalities.--Better cool draught, pressure. Worse evening.

Relationship.--Euonymus Europoea-Spindle-tree (Liver disorders, biliousness, lumbago, gastric derangements with albuminuria. Cutting pains in malar bones, tongue, penis up to bladder); Podophyl; Ammon pic; Chel; Euonymin 1x trit (albuminuria).

Dose.--Tincture and lower attenuations.

Click picture for many more pictures

Eupatorium Perfoliatum (Boneset)
History: Every time I take up one of these old domestic remedies I am astonished at the extended discoveries of medical properties in the household as seen in their domestic use.
All through the Eastern States, in the rural districts, among the first old -settlers, Boneset-tea was a medicine for colds. For every cold in the head, or running of the nose, every bone-ache or high fever, or headache from cold, the good old housewife had her Boneset-tea ready. Sure enough it did such things, and the provings sustain its use. The proving shows that Boneset produces upon healthy people symptoms like the colds the old farmers used to suffer from.
Winter colds: The common winter colds through the Eastern States and the North are attended with much sneezing and coryza, pain in the head, as if it would burst, which is aggravated from motion, chilliness with the desire to be warmly covered; the bones ache as if they would break; there is fever, thirst, and a general aggravation from motion. Such common everyday colds

correspond sometimes to Eupatorium and sometimes to Bryonia. These two remedies are very similar, but the aching in the bones is marked in Eupatorium.

If this state goes on for a few days the patient will become yellow, the cold will settle in the chest, a pneumonia may develop, or an inflammation of the liver, or an attack commonly called a bilious fever. Such fevers frequently call for Bryonia and Eupatorium, each fitting its own cases.

These remedies are especially useful throughout New England, New York, Ohio, the North and Canada. They do not have this kind of a cold very frequently in the warmer climates, but Eupatorium is often indicated in the warmer climates for fevers, yellow fever, bilious fever, break-bone fever and intermittent fever.

It seems to be useful in one kind of complaints in one climate and in another kind of complaints in another climate.

In the Southwest and the West, in the valleys of the great river Eupatorium. cures complaints beginning as if the back would break, great shivering from head to foot spreading from the back, great sensitiveness to cold, congestive headaches, flushed face, yellow ski and yellow eyes, pain in the abdomen, and in the region of the live inability to retain any food, nausea from the sight and smell of food the bones ache as if they would break, the fever runs high, the un is of a mahogany color, the tongue is heavily coated yellow, and there is nausea and vomiting of bile.

That gives the picture of Eupatorium in the Mississippi Valley, in the Ohio Valley, in Florida and Alabama and all through the Southern States. The most prominent symptom are the vomiting of bile, the aching of the bones as if they would break, the pains in the stomach after eating, and the nausea from the thought and smell of food.

The stomach is very irritable; the thought of food gags him. The patient desires to keep still, but the pain is so severe that he must move and so he appears restless. These are among the acute manifestations, and are things only very general then we must take up and apply to sick people.

Eupatorium has been a very useful remedy in intermittent fever when epidemic in the valleys. Among the first signs is nausea sometime before the attack, and there are sometimes spells of vomiting bile. About seven or nine o'clock in the forenoon, he commences to shudder, the shivering runs down the back and spreads from the back to the extremities; he has violent thirst, but the shiverings are made worse from drinking so that he dare not drink cold water. There is soreness and pulsation in the back of the head, violent pain in th occiput and back before and during the chill. During the chill he wants to cover up and the clothing needs to be piled on.

The thirst extends through all the stages. At the close of the chill there is vomiting; often it does not occur until the heat, but before the sweat fairly sets in, he vomits copiously, first the contents of the stomach and then bile. When the heat is on he seems to burn all over, sometime as though with electric sparks.

Intense heat, burning in the top the head, his feet burn and his skin burns. The burning is more intense than the heat would justify. It is characteristic of this remedy, for the sweat to be scanty; a violent chill, intense fever which passes off slowly, and very scanty sweat. The bones ache as if they would break.

During the chill his head aches as if it would burst, it throbs it tears, it stings, it burns; he describes the headache in terms expressive of violence, as if probably a congestive headache.

One would think after the fever subsides and he commences to sweat a little that he would get relief, which is true excepting the headache, which often gets worse clear through to the end of the attack, and. sometimes it will last all day and night; then he will have a whole day free from the headache, but on the third day at seven or nine o'clock on will come the same trouble with increasing violence.

At times these attacks are prolonged, the one will extend into the other, that is enter into a sort of remittent character with no intermission. The longer this runs the more the liver becomes engorged, and finally the urine is loaded with bile, the stool becomes whitish, the fever increases, the nausea increasing, the tongue becomes pointed and elongated, and is dry, the headache is extremely painful, and a state of masked fever comes on.

In those intermittent fevers that begin with violent shaking, and the headache continues without sweat, or, if with sweat the headache is made worse, thirst during all stages, vomiting of bile at the close of the heat or during the heat, with the awful bone aches, the Western men, who study their Materia Medica, know that they have a sure cure in Eupatorium.

The time for the administration of this dose is at the close of the paroxysm. You get the best effect when reaction is at the best, and that is when reaction is setting in, after a paroxysm has passed off. That is true of every paroxysmal disease, where it is possible to wait until the end. You cannot mitigate them very much during the attack, indeed, if the medicine is given then it very often increases the difficulty, but if you wait until the close of the paroxysm you get the full benefit of your medicine, and the next paroxysm will not develop, or will be lighter, or, if another attack is brought on immediately you may rest assured there will be no more.

It is not an uncommon thing in intermittent fever, when the remedy has been administered at the close of the paroxysm, for the next paroxysm to come within twenty-four hours after the administration of the medicine; these mixed cases are often in a state of disorder.

One who does not know this would immediately show the white feather, would be alarmed, would be afraid the patient was getting worse, but you have only to wait for the subsidence of the attack and you will see that you have broken its cycle and periodicity.

When this remedy has been apparently indicated by intermittents, and it has not proved of sufficient depth to root out the intermittent, there are two remedies, either of which is likely to follow it, and these are Natrum muriaticum and Sepia. These two remedies are very closely related to Eupatorium, and take up the work where it leaves off, when the symptoms agree.

Gout: This medicine has also a chronic constitutional state, viz.: its gouty nature. It is a very useful medicine in gout. It has gouty soreness and inflamed nodosities of the finger joints, of the elbow joint, pain and gouty swelling of the great toe, red tumefaction of the joint of the great toe. It establishes, in persons who are subject to chalk stone deposits around the finger joints. These gouty subjects take cold, the bones ache, the joints become inflamed, the patient will say he is chilly, the skin becomes yellow, the urine is charged with bile, the stool becomes whitish, and he becomes weak.

In many instances these patients have been for years resorting to Burgundy for relief of their gouty joints and the weakness. Some one of our homoeopathic remedies will relieve the suffering, but in those old gouty subjects who have been always drinking wine, you cannot take the wine away from them at once; you cannot do it while they are having the attack, because they have become so accustomed to it.

Burgundy is the kind of wine very commonly used by the gouty, but the Scotchman with his gout thinks he must always have a little Scotch whiskey and in the attack it is quite impossible to take it away from him. What has been his custom must be followed out for a while because he would grow weaker, but it is damaging him, and hence it is difficult to contend with gouty subjects who have been taking stimulants. You do not get the full benefit of Homoeopathy and you cannot stop his stimulants because weakness will follow. Persons who have not taken wine as a regular beverage can and should do without it, as it interferes with the action of the homoeopathic remedy.

These gouty patients have terrible sick headaches. Pain in the base of the brain and back of the head, associated with gouty joints. These are often referred to as arthritic headaches, that is, gouty headaches, headaches associated with painful joints. Or the headaches may alternate with pains in the joints. Congestive headaches, the pain being in the base of the brain, with more or less throbbing; the pain spreads up through the head and produces a general congestive attack.

Sometimes these headaches come on when the joints are feeling better, and the more headache he has the less pain he has in the extremities; and again, when the gout affects the extremities, then the headaches diminish. Headaches, having a third and seventh-day aggravation, coming with more or less periodicity.

With the headache there will be nausea and vomiting of bile, nausea at the thought and smell of food. This gouty individual is also subject to vertigo, and the sensation as if he would fall to the left is especially noted with the coming on of the headache. The vertigo comes on in the morning; when he gets up he feels as if he would sway to the left, and he has to guard himself in turning to the left. Sometimes in intermittent fever this symptom of swaying to the left and vertigo ending in nausea and vomiting, violent pain in the back of the head and pain in the bones, are the first threatenings.

We have in this remedy also other gouty manifestations: shooting through the temples, shooting from the left to the right side of the head; shooting all through the head; stitching, tearing pains in the limbs as well as the bone aches.

The headaches are so violent that they make him sick at the stomach. In gouty headaches, in intermittents at the close of the intense heat, in periodical headaches, the course is the same, the pain is so intense that nausea is soon brought on and then he vomits bile. Eupatorium has not been used on its symptoms in gouty states as often as it might have been. In intermittent fever it is well known; in headaches it is only occasionally used. Only occasionally does a man realize its great benefit in headaches and in remittent fevers. In gouty and rheumatic affections it may be suited to the symptoms and is more useful than is generally known. It is not the purpose of our talks to point out ultimates of disease. I do not look upon gout as a disease, but as a great class of symptoms of a rheumatic character that occur in the human family; a great mass of symptoms that may be called gouty, a tendency to enlargement of the joints and gouty deposits in the urine. The ordinary so-called lithaemia is a gouty constitution.

The gouty state of the economy is the superficial or apparent cause; the real cause rests in the miasm. So when I speak of gout I do not mean the name of a disease, but a class of manifestations that are met in large cities especially, less frequently in the country where the people live on farms and take plenty of exercise and have wholesome food and are not housed up. It is supposed to be due to wine drinking. Often when I say to patients that the symptoms arc somewhat gouty, they reply,

"I am not in the habit of drinking wine. I have not been a high liver."
Such conditions of course bring on a tendency to gout.
Painful soreness in the eyeballs like Bryonia and Gelsemium. The eyeballs are very sensitive to touch and sore to pressure; feel as if he had been struck a blow in the eye; sore, bruised, pain in the eye. Coryza with aching in every bone.
Stools: With the bilious attacks there often may be an ending in a diarrhoea; copious green discharges, green fluid or semi solid stools, but after the attack has lingered until there is one grand emptying out of the bowels, this symptom will disappear and the secondary state comes on in which there is constipation and a light-colored stool, or bileless stool.
Cough: Boneset has a dry, hacking, teasing cough, that seems to rack the whole frame, as if it would break him up, it is so sore, and he is so much disturbed by motion. A great amount of tribulation is found in the respiratory tract, in the bronchial tubes.

We find a cough in capillary bronchitis that shakes the whole frame, analogous to Bryonia and Phosphorus. The subject is extremely sensitive to the cold air, as much so as in Nux vomica. Nux vomica has aching in the bones as if they would break; he wants the room hot, and wants to be covered with clothing which relieves; often the slightest lifting of the covers increases the chilliness, which is true also of Eupatorium, so they run close together.
Mind: In Nux vomica we have the dreadful irritability of temper; in Eupatorium we have overwhelming sadness. The Nux vomica patient is not likely to say much about dying, he is too irritable to go into the next world; not so with Eupatorium, he is full of sadness.
There are other states that comes on secondarily in this medicine. After malarial attacks and in gouty affections, etc., there is bloating of the lower limbs, oedematous swelling. It is not an uncommon thing for a malarial fever that has lingered a long time to be attended with swelling of the lower limbs. Eupatorium very strongly competes with Natrum muriaticum, China, and Arsenicum in such lingering malaria.
Dropsy: When the symptoms have largely subsided and left only

this state of anaemia and dropsy of the lower extremities, in the badly treated case, it is very difficult to find what medicine to administer, and the course that the homoeopath must pursue is to go back and examine the patient to find the symptoms he had at the time of the intermittent fever, before he was meddled with. If now there is swelling of the extremities, and you get symptoms to show you that he needed Eupatorium in the beginning, Eupatorium will still cure the dropsy of the extremities.

It may bring back the chill, it may bring back an orderly state that you can prescribe on. If in the beginning he needed Arsenicum, that remedy will bring back the chill, turn it right end to and cure his symptoms. The trouble is that the symptoms were only suppressed, bad not been cured.

So the medicine he needed, but has never had for the chill, may be the medicine that he needs now. Then think of Eupatorium in dropsical swellings of the feet and ankles, and in gouty swellings also. The gouty swellings are all of an inflammatory character. Very commonly these are closely related to hydrarthrosis, and here Eupatorium. is to be compared with Arsenicum. Gouty inflammation of the knee. All the way through this remedy you read about bone-aches and bone pains.

It is peculiar that medicines come around on time with an exactitude. Diseases do the same thing, and we must see that it is also peculiar that they come with a regular cycle, a regular periodicity. We meet with headaches that come every seven days, headaches also, that come once in two weeks, and there are remedies that have seven-day aggravations and fourteen-day aggravations and three-day aggravations, remedies that bring out their symptoms just in this form.

Do not be surprised when your patient is perfectly under the influence of Aurum if he has a characteristic aggravation every twenty-one days.

There are quite a number of remedies having fourteen-day aggravations, e. g., China and Arsenicum. Again, there are autumnal aggravations, spring aggravations, winter aggravations, aggravations from cold weather and aggravations in the summer from heat.

Some remedies have both the latter.

| **Re:Eupatorium Perfoliatum (Boneset)** | By: garcot<br>Bangalore | March 7 2010 |

Observe the arrangement of leaves are very different and Unique.

Well known for its use in breakbone fevers like Chikungunya.

Signs and symptoms chikungunya

The incubation period of Chikungunya disease is from two to four days. Symptoms of the disease include a fever up to 40 °C (104 °F), a petechial or maculopapular rash of the trunk and occasionally the limbs, and arthralgia or arthritis affecting multiple joints.[4] Other nonspecific symptoms can include headache, conjunctival Injection, and slight photophobia. Typically, the fever lasts for two days and then ends abruptly. However, other symptoms—namely joint pain, intense headache, insomnia and an extreme degree of prostration—last for a variable period; usually for about 5 to 7 days.[4] Patients have complained of joint pains for much longer time periods depending on their age.[5][6]

More details can be found here:

| **Treatment of Dengue with Eupatorium Perf 200c** | By: Joe De Livera<br>Sri Lanka | September 1 2011 |

I have prescribed Eupatorium Perfoliatum 200c in the Wet dose extensively to treat Dengue which is a highly infectious disease vectored by the Aides Egyptii mosquito and is often prevalent in tropical countries.

My own experience with Eupatorium Perfoliatum 200c is that patients usually recover in about 4 hours after the first dose, when the patient who suffers from an excruciating headache, body ache, fever with chills and aversion to food, discovers in about an hour after the first dose, that the symptoms have left in a Miraculous manner. The patient is usually bathed in sweat and the fever subsides in another hour and in a total of 4 hours the patient is out of bed. This curative process must be seen to be believed and patients who have been treated with this remedy will testify to this Miracle Cure.

It is in the patient's interest to take this remedy as early as is possible after being infected. The patient usually presents Dengue with the symptoms listed above and if this remedy is given within the first 2 days after infection the recovery is very fast. However if the patient is treated after that period, the Platelet count of the blood can dip to alarming levels around 20000 or even less and this can impede the recovery process till the Blood count is again at least at 100000 when the patient can safely leave hospital. The juice of the Papaw or Papaya leaf has also proved to help in uplifting the count while the remedy must be used every 3 hours to help in the recovery process. It is important to use the remedy for at least a week after the patient is OK as I have had a few cases where the patient stopped using the remedy when it was thought that he was cured but this virus seems to have the uncanny ability of affecting the Blood count again if the remedy is not taken thrice daily for at least a week during which period the patient must be ordered complete rest.

The Wet dose of any Homeopathic remedy is made as follows:

Order the remedy in the Liquid pack in Alcohol, also referred to as Liquid Dilution in a bottle preferably with a dropper arrangement.
Get a 500ml bottle of Spring Water from the nearest supermarket.
Pour out about 3cm of water from the bottle to leave some airspace.

Insert 3 drops of the remedy into the bottle and shake the bottle hard at least 6 times before you sip a capfull of the bottle or a large teaspoonful which is the dose.
Shaking the bottle hard is homeopathic succussion and this enhances the effect of the remedy on the user.

EUPATORIUM PURPUREUM
Queen of the Meadow

Albuminuria, diabetes, strangury, irritable bladder, enlarged prostate are a special field for this remedy. Excellent in renal dropsy. Chills and pains run upwards. Impotency and sterility. Homesickness.

Head.--Left-sided headache with vertigo. Pain from left shoulder to occiput. Sick headache beginning in morning, worse afternoon and evening, worse in cold air.

Urinary.--Deep, dull pain in kidneys. Burning in bladder and urethra on urinating. Insufficient flow; milky. Strangury. Hæmaturia. Constant desire; bladder feels dull. Dysuria. Vesical irritability in women. Diabetes insipidus.

Back.--Weight and heaviness in loins and back.

Female.--Pain around left ovary. Threatened abortion. External genitals feel as though wet.

Fever.--No thirst during chill, but much frontal ache. Chill commences in back. Violent shaking, with comparatively little coldness. Bone-pains.

Relationship.--Compare: Senecio; Cannab sat; Helon; Phos ac; Triticum; Epigea.

Dose.--First potency.

This is normally the first medicine thought of in any sort of urinary infection.

EUPHORBIA LATHYRIS
Gopher-Plant, Caper Spurge

The fresh milky juice is exceedingly acrid when applied to the skin and the fruit is highly purgative and poisonous. The juice causes redness, itching, pimples, sometimes gangrene. The symptoms point to its use in erysipelas. Poison Oak, etc. Rheumatic pains during rest. Paralytic, weakness in joints.

Mind.--Delirium and hallucinations. Stupor, coma.

Eyes.--Almost closed from œdema of lids.

Nose.--End of nose very much inflamed externally. Very sensitive and œdematous mucous membranes with ulceration.

Face.--At first ruddy glow on cheeks, afterwards death-like pallor. Cold perspiration in beads on forehead. Red, puffed, and in spots suppurating. Erythema, beginning on face, gradually extending into the hair parts, and then spreading over whole body, taking eight days to do so; eruption glossy, rough œdematous, with burning and smarting; aggravated by touch and cold air; ameliorated by close room and sweet-oil applications. Fine bran-like desquamation. Sensation of cobwebs. Stinging, smarting, and burning of face when touched.

Mouth.--Tongue coated, slimy; acrid taste. Breath cold, musty odor.

Stomach.--Nausea and vomiting of copious clear water, intermingled with white, gelatinous lumps.

Stool.--Drastic purgation from large doses; mild laxative condition from smaller doses; followed several weeks afterwards by obstinate constipation. Stools of white, transparent, gelatinous mucus; later mingled with blood.

Urine.--Copious flow of urine.

Male.--Inflammation of scrotum resulting in deep acrid ulcers, with intense itching and burning; worse, touching the parts from washing.

Respiratory.--Labored breathing. Breath cold, musty odor. Cough; first, a hacking, as from inhalation of sulphur; later on, paroxysmal, like whooping-cough, in regular paroxysms, ending in diarrhœa and vomiting, with sleepiness between each paroxysm.

Heart.--Weak and fluttering heart-action. Pulse 120, full, bounding, somewhat irregular.

Sleep.--Restlessness at night. Sleep disturbed, anxious dreams.

Fever.--Temperature increased. Body bathed in profuse perspiration, standing out like beads on forehead; later, cold, clammy perspiration on forehead.

Skin.--Erythema, beginning on uncovered parts, on face, and spreading over whole body; glossy, rough, œdematous, with burning and smarting. Fine bran-like desquamation following in the wake of the erythema. Eruption rough, scaly, smarting, and burning; when scratched forms deep, ragged ulcers; skin where ulcerated remains red.

Modalities.--Worse, touch and cold air; better, close room and sweet-oil application.

Relationship.--Antidoted by Rhus tox (skin symptoms); Veratr alb (vomiting, purging, cough and coma).

Dose.--Third to thirtieth potency.

EUPHORBIA POLYCARPA (GOLONDRINA)

An antidote to snake-poison. Its use also renders the body immune to the influence of the snake venom, and thus as a prophylactic (Indigo).

Relationship.--Compare: The Euphorbias. Euphorbia Prostata--(Used by Indians as an infallible remedy against bites of poisonous insects and snakes, especially the rattle-snake). Plumeria cellinus Tincture internally and locally every 15 minutes for snake poisoning (Dr. Correa). Cedron. Micania guacho, a Brazilian snake cure. Selaginella--(Macerate in milk, locally and internally for bites of snakes and spiders). Iodium, tincture for rattle snake bites externally and one drop doses every 10 minutes. Gymnema sylvestre (will abolish the taste of bitter things; sense of taste altered; powdered root for snake-bite); Sisyrinchium-Blue-eyed grass-Ten to fifteen drop doses of tincture (rattlesnake bites).

EUPHORBIUM OFFICINARUM
Spurge-The resinous Juice of Euphorbia Resinifera (EUPHORBIUM)

An irritant to the skin and mucous membranes. Burning pain in bones. Pains in limbs and paralytic weakness in the joints. Important respiratory and skin symptoms. Terrible burning pains. Pains of cancer. Everything appears larger than it really is.

Head.--Acute mania. Violent, pressive headache.

Face.--Erysipelas; yellow blisters. Burning in cheek; worse, left. Eyes inflamed and agglutinated in morning; Red swelling of cheeks. Nasal pruritus with mucous secretions from naso-pharynx.

Stomach.--Great hunger. Sialorrhea (profuse salty saliva). Waterbrash. Thirst for cold drinks.

Abdomen.--Sunken; spasmodic, flatulent colic. Stools fermented, profuse, clayey. Feels hollow.

Respiratory.--Breathing oppressed, as if chest were not wide enough. Spasmodic, dry cough, day and night, with asthma. Violent, fluent coryza, with burning and cough. Constant cough, with stitches from pit of stomach to sides of chest. Croup, dry, hollow, cough. Warm feeling in chest, as if hot food had been swallowed.

Extremities.--Paralytic pains. Pain in hip-joint and coccyx.

Skin.--Erysipelatous inflammation, especially of the cheek. Biting and stinging, red, swollen. Vesicular erysipelas. Carbuncle; old, torpid, indolent ulcers with biting, lancinating pain. Old torpid ulcer, pustules; gangrene (Echinac; Secale). Ulcerating carcinoma and epithelioma of the skin.

Relationship.--Compare: Euphorbia amygdaloides-Wood Spurge (in pain in antrum, illusion of smell, odor of mice. Sense of taste blunted. Diarrhœa; stools difficult, with painful anal spasm).

Euphorbia corollata-Large Flowering Spurge--(a diaphoretic expectorant and cathartic of the old school in gastro-enteric disturbance, with deathly nausea. Vomiting of food, water, and mucus and copious evacuations. Attacks recur after short intermissions. Feeling of clawing in stomach; cold sweat) (Verat alb).

Euphorbia marginata-Snow on the mountain--(Honey from the flowers is poisonous, detected by the hot, acrid taste. The milky juice produces skin symptoms like Rhus).

Euphorbia pilulifera-Pillbearing Spurge--(Humid asthma, cardiac dyspnœa, hay-fever, and bronchitis. Urethritis, with intense pain on urinating, and much urging. Acrid leucorrhœa; worse least movement. Hæmorrhages from sunstroke and traumatism).

Compare, also: Psoralea-A Columbian plant--(Pain of cancer, ulcers. Leucorrhœa fetid. Pruritus. Uterine tumors). Croton; Jatropha; Colchic.

Antidotes: Camph; Opium.

Dose.--Third to sixth potency.

Euphrasia

Head: Euphrasia is a short acting remedy of great usefulness in acute catarrhal affections with or without fever. Headaches that occur with coryza and eye symptoms, head aches in the evening as if bruised. Stitching pain in the head.

Headaches; as if the head would burst with dazzling of the eyes from sunlight. These are catarrhal headaches with profuse watery discharge from the eyes and nose. The eye symptoms of Euphrasia are its most prominent feature.

Catarrh condition of the eyes with copious, acrid, watery discharge with or without coryza. Cutting pain in the eyes extending into the head, pressure in the eyes as if caused by sand. Sensation of dryness, burning, biting in the eyes. Sensation of dust in the eyes. Violent itching of the eyes obliging rubbing and winking, with copious lachrymation. Pupils much contracted and much tumefaction of the mucous membrane with redness and enlarged blood vessels and smarting.

Iritis: from rheumatism or in connection with rheumatic joints.

Copious thin or thick discharges. General inflammation of all the tissues of the eyes. Ulceration of the cornea. It has cured Pannus. Pustular inflammation. Opacity of the cornea after injuries of the eye. It is suitable in the most violent acute conjunctivitis. Amblyopia with inflammation of conjunctiva and lids.

Copious lachrymation and burning. The mucous membranes of the lids and eyeballs are injected, red, and vascular. agglutination of the lids in the morning. Copious, acrid lachrymation with fluent discharge from the nose during coryza.

Dryness of the lids and the margins of the lids red swollen, and burning. The lids are very sensitive and swollen. The margins of the lids itch and burn.

Suppuration of the margins of the lids. Much swelling of the lids with inflammation. Fine rash about the eyes with puffiness of the lids. Blurred vision. Paralysis of the third nerve.

The next most important group of symptoms is in connection with the nose. Sneezing and fluent coryza. The discharge is bland and this occurs with acrid lachrymation. The nasal mucous membrane is swollen.

Profuse, bland, fluent, coryza. After this coryza has existed for a day or two it extends into the larynx with a hard cough. The coryza is worse during the night while lying down. The cough is worse in the daytime and ameliorated by lying down.

The remedy has a rash like measles and it has febrile symptoms; therefore, when these symptoms are duly considered, it will be seen that Euphrasia is similar to the symptoms that occur in measles. It is a wonderful medicine in measles though not so frequently indicated as Pulsatilla, owing to the fact that this combination of symptoms does not often come.

Larynx and cough: Hoarseness in the morning. Irritation in the larynx compelling him to cough, followed by pressure beneath the sternum. Abundant secretion in the larynx causing loose cough with rattling in the chest.

Deep inspiration is difficult. The cough, considered by itself, furnishes a very rare group of symptoms. Cough with copious expectoration along with or following coryza. Difficult respiration ameliorated at night while lying down.

Worse in the morning when moving about with copious expectoration. Violent cough from tickling in the larynx. No cough at night causes the remedy to resemble Bry. and Mang. The dyspnoea and cough are ameliorated by lying down. The coryza symptoms, otherwise, are worse at night and from lying down. When these symptoms occur in grippe or influenza, this becomes a very suitable remedy.

The abundance of mucus scraped from the larynx and trachea is often like the ending of bad colds. The expectoration is easy and almost without cough. It comes up without much effort. Pressive pain beneath the sternum showing that the trachea is especially involved in the catarrhal condition. The pain in the eyes is worse in the open air. The coryza is worse in the open air. The cough sometimes comes on in the open air.

Windy weather causes fluent coryza. Cold air and windy weather cause lachrymation. He is a chilly patient and cannot get warm in bed.

There is chill, fever, and sweat in this remedy. This chill predominates. The fever occurs mostly during the day with red face and cold hands. The heat descends the body. The perspiration is often confined to the front part of the body. Perspiration during sleep at night. Strange odor sometimes very offensive and most profuse upon the chest. It is especially suitable in catarrhal fever, influenza and measles.

When the symptoms agree, it will make a violent attack of measles turn into a very simple form, making the patient feel better, bring out the eruption, control the fever, and relieve the cough, coryza, and other catarrhal symptoms. Streaming, hot, burning tears with rash, photophobia, running from the nose, intense throbbing headaches, redness of the eyes, photophobia from fever, dry cough during measles.

| **Euphrasia** | By: Jayashree<br>Calcutta, India | September 12 2006 |

A prsonal Experience:

My husband had some blurring of vision. He then used to wash his eyes by 10 drops of Enphrasia in a bowl of water. The

problem cleared up.
An old servant used to have ulcers on his feet. Actually his toes had dropped off when he was a child - he burnt his feet. I used to give him Echinacea Q to wash them and it always helped him. But this time I gave him Suphrasia by mistake. To my utter amazement, hisulcers dried up much sooner. Well now as he does not climb stairs he is not troubled by the ulcers any more.

EUPIONUM
Wood-tar distillation
(EUPION)

Marked female symptoms, and backache. A remedy for uterine displacements. Pain in back, followed by a bland leucorrhœa. Menses too early and copious; flow thin. Intense sweat from slightest exertion. Disgusting dreams. Sensation as if whole body were made of jelly.

Head.--Vertigo; everything turns round on sitting up in bed. Heat at vertex; stitches from vertex down limbs into abdomen and genitals. Sore painful spots on head. Painful pulsation in forehead.

Female.--Burning in right ovary. Gushing leucorrhœa. Chronic tubal disease. Uterine flexions. Menses too early and copious. During menses, irritable and disinclined to talk; burning and stitches in chest and heart. After menses, yellow leucorrhœa, with severe backache. When pain in back ceases, the discharge gushes out. Sore pain between labia during urination. Pruritus pudendi; labia swollen.

Extremities.--Cramps in the calves; worse at night.

Back.--Sacrum pains, as if broken. Severe backache; must lean against something for support. Pains extended into pelvis.

Relationship.--Kreosot; Graph; Lach.

Dose.--Third potency.

**Fenugreek**
**Started by: Jayashree at October 14 2007**

| **Fenugreek** | By: Jayashree<br>Calcutta, India | October 14 2007 |
|---|---|---|

Click picture for many more pictures

Seeds of this slightly maple-tasting legume (Trigonella foenum-graecum) have a long heritage of use as a medicinal plant and culinary spice, especially in India. Gel fiber from fenugreek resembles guar gum in chemical structure.
Traditional usesEgyptian, ayurvedic Indian, Greek, and Roman healers used it as an aphrodisiac and to remedy colds and sore throats, indigestion, and other complaints. Lydia Pinkham included fenugreek in her famous 19th century "Vegetable Compound" nostrum for menstrual aches.
Modern perspective
Recent studies support traditional uses for digestion, menopausal complaints, heart disease, weight control and diabetes.
Diabetes
Pre-clinical and clinical studies have documented the efficacy of the fiber-rich fraction of fenugreek seeds in the management of diabetes. In Type I and II diabetics, administration of de-fatted,

fiber-rich seed significantly reduces fasting blood glucose levels and improves performance in the glucose tolerance test. Researchers have used 5-100 g daily (one-fifth to three ounces) —of de-fatted fenugreek seed powder to control blood sugar swings in diabetes in the short term.

Weight control

Like guar gum, fenugreek can bind dietary fats to reduce their absorption. Fenugreek fiber also contributes to a feeling of fullness that may curb excessive appetite (see "Safety," below).

Heart Health

Fenugreek is rich in steroidal (furostanol) saponins—notably trigoneosides and diosgenin—which appear responsible for its healthful effects on blood fat and cholesterol levels. Serum total cholesterol, LDL and VLDL (bad) cholesterol, as well as triglyceride levels, can be significantly reduced, while HDL (ggod) cholesterol levels remained unchanged.

Do scientists know how it works?

Chemical analysis of the seeds has identified steroidal, estrogen-like saponins trigoneosides, that have therapeutic potential in the treatment of diabetes, menopausal symptoms and hypercholesteremia. The seeds are also rich in soluble fiber. Fenugreek seeds contain mucilage, which is soothing to mucous membranes of the respiratory and digestive tracts.

Safety

Fenugreek may stimulate uterine contractions so it shouldn't be used during pregnancy. Persons at risk of vitamin or mineral deficiency should not take high doses of dietary fiber for extended periods except under medical supervision, as fiber can bind with these nutrients and reduce absorption.

It is also a main ingredient in Indian Cookery. No Indian pickle is without Fenugreek

Jayashree Kanoi

A good liver remedy.

| **Re: Fenugreek** | By: fredandwilmaflinston | October 25 2007 |
|---|---|---|

Best is to soak some seeds in the water at night and chew up in the morning empty stomach.

| **Re:Fenugreek** | By: bhagvatjee | March 16 2011 |
|---|---|---|

hello Jayashree Ji
You haven't written the dose and method to eat it. People say it is good for arthritis also.

I wish to try this. Could you write the dose and method of eating it? Ans also for how long one should eat it to mark the effect?

Thanks very much
Sushma

iron(II) iodide

FERRUM IODATUM
Iodide of Iron

Scrofulous affections, glandular enlargements, and tumors call for this remedy. Crops of boils. Acute nephritis following eruptive diseases. Uterine displacements. Body emaciated Anæmia Exophthalmic goitre following suppression of menses. Debility following drain upon vital forces. Impetigo of the cheek.

Stomach.--Food seems to push up into throat, as if it had not been swallowed.

Abdomen.--Fullness, even after a little food; stuffed feeling, as if she could not lean forward.

Throat.--Sore, as if of a splinter, shooting in different directions. Hoarse.

Respiratory.--Coryza; discharge of mucus from nose, trachea, and larynx. Pressure beneath sternum. Scrofulous swelling of nose. Chest feels oppressed. Hæmoptysis.

Urinary.--Urine dark. Sweet smelling. Crawling sensation in urethra and rectum. Sensation as if urine were stopped at fossa navicularis. Difficulty in retaining urine. Incontinence in anæmic children.

Female.--On sitting, feeling as if something pressed upward in vagina. Much bearing down. Retroversion and prolapse of uterus. Leucorrhœa like boiled starch. Menses suppressed or scanty. Itching and soreness of vulva and vagina.

Dose.--Third trituration. Does not keep long.

© Lyn Topinka, 2004

FERRUM METALLICUM
Iron

Best adapted to young weakly persons, anæmic and chlorotic, with pseudo-plethora, who flush easily; cold extremities; oversensitiveness; worse after any active effort. Weakness from mere speaking or walking though looking strong. Pallor of skin, mucous membranes, face, alternating with flushes. Orgasms of blood to face, chest, head, lungs, etc. Irregular distribution of blood. Pseudo-plethora. Muscles flabby and relaxed.

Mind.--Irritability. Slight noises unbearable. Excited from slightest opposition. Sanguine temperament.

Head.--Vertigo on seeing flowing water. Stinging headache. Ringing in ears before menses. Hammering, pulsating, congestive headache; pain extends to teeth, with cold extremities. Pain in back of head, with roaring in neck. Scalp painful. Must take down the hair.

Eyes.--Watery, dull red; photophobia; letters run together.

Face.--Fiery-red and flushed from least pain, emotion, or exertion. Red parts become white, bloodless and puffy.

Nose.--Mucous membrane relaxed, boggy, anæmic, pale.

Mouth.--Pain in teeth; relieved by icy-cold water. Earthy, pasty taste, like rotten eggs.

Stomach.--Voracious appetite, or absolute loss of appetite. Loathing of sour things. Attempts to eat bring on diarrhœa. Spits up food by the mouthful (Phos). Eructations of food after eating, without nausea. Nausea and vomiting after eating. Vomiting immediately after eating. Vomiting after midnight. Intolerance of eggs. Distention and pressure in the stomach after eating. Heat and burning in stomach. Soreness of abdominal walls. Flatulent dyspepsia.

Stool.--Undigested, at night, while eating or drinking, painless. Ineffectual urging; stool hard, followed by backache or cramping pain in rectum; prolapsus recti; itching of anus, especially young children.

Urine.--Involuntary; worse daytime. Tickling in urethra extending to bladder.

Female.--Menses remit a day or two, and then return. Discharge of long pieces from uterus. Women who are weak, delicate, chlorotic, yet have a fiery-red face. Menses too early, too profuse, last too long; pale, watery. Sensitive vagina. Tendency to abortion. Prolapse of vagina.

Respiratory.--Chest oppressed; breathing difficult. Surging of blood to chest. Hoarseness. Cough dry, spasmodic. Hæmoptysis (Millefol). With the cough pain in occiput.

Heart.--Palpitation; worse, movement. Sense of oppression.

Anæmic murmur. Pulse full, but soft and yielding; also, small and weak. Heart suddenly bleeds into the blood vessels, and as suddenly draws a reflux, leaving pallor of surface.

Extremities.--Rheumatism of the shoulder. Dropsy after loss of vital fluids. Lumbago; better, slow walking. Pain in hip-joint, tibia, soles, and heel.

Skin.--Pale; flushes readily; pits on pressure.

Fever.--General coldness of extremities; head and face hot. Chill at 4 am. Heat in palms and soles. Profuse, debilitating sweat.

Modalities.--Better, walking slowly about. Better after rising. Worse, while sweating; while sitting still. After cold washing and overheating. Midnight aggravation.

Relationship.--Antidotes: Ars; Hep.

Complementary.: Chin; Alum; Hamamel.

Compare: Rumex (similar in respiratory and digestive sphere and contains organic iron).

Ferrum aceticum (alkaline urine in acute diseases. Pain in right deltoid. Epistaxis; especially adapted to thin, pale, weak children who grow rapidly and are easily exhausted; varices of the feet; copious expectoration of greenish pus; asthma; worse, sitting still and lying; phthisis, constant cough, vomiting of food after eating, hæmoptysis).

Ferrum arsenicum (enlarged liver and spleen, with fever; undigested stool; albuminuria). Simple and pernicious anæmia and chlorosis. Skin dry. Eczema, psoriasis, impetigo (Use 3x trituration).

Ferrum bromatum (sticky, excoriating leucorrhœa; uterus heavy and prolapsed, scalp feels numb).

Ferrum cyanatum (neuroses with irritable weakness and hypersensitiveness, especially of a periodical character; epilepsy; cardialgia, with nausea, flatulence, constipation, alternating with diarrhœa; chorea).

Ferrum magneticum (small warts on hands)

Ferrum muriaticum (Arrested menstruation; tendency to seminal emissions or copious urination at puberty; very dark, watery stools; diphtheria; phlegmonous erysipelas; pyelitis; hæmoptysis of dark, clotty blood; dyspareunia; pain in right shoulder, right elbow, and marked tendency to cramps and round red spots on cheeks; bright crystals in urine. Anæmia, 3x, after meals. Tincture 1-5 drops 3 times daily for chronic interstitial nephritis).

Ferrum sulphuricum (Watery and painless stools; menorrhagia pressing, throbbing between periods with rush of blood to head. Basedow's disease. Erethism. Pain in gall-bladder; toothache; acidity; eructation of food in mouthfuls); Ferrum pernitricum (cough, with florid complexion); Ferrum tartaricum (cardialgia; heat at cardiac orifice of stomach).

Ferrum protoxalatum (Anæmia). Use 1x trit. Compare also; Graph; Mangan; Cupr.

Dose.--States of debility where the blood is poor in hematin require material doses; plethoric, hæmorrhagic conditions call for small doses, from the second to the sixth potency.

| **FERRUM METALLICUM Constituion/personality** | By: girilal<br>New Jersey USA | September 21 2006 |
|---|---|---|

Ferrum, iron, is the metal of the planet Mars. Mars derives its red color from the large amounts of iron in the ground. In the human body the liver is the main storeroom of iron; a proper working liver is associated with courage and positivism. Our blood contains 70 % of our body-iron, transporting oxygen to the cells, thus providing us energy.

In astrology Mars symbolizes energy, strength, self-confidence, aggression, new beginnings, masculinity. According medical astrology Mars rules the blood, the muscles, the gall and the adrenaline.

The homoeopathic Ferrum-personality is tenacious and very positive; he has a strong willpower and is a man of action; he or she is made of iron. They will defend themselves, their opinions and their choices. They are convinced that they are right. Opposition highly irritates these people; they can be quite dictatorial. Ferrums are honest and have a very sharp tongue. They easily get obstinate and angry, but they can also be cheerful and laughing. Moods can change from glad to sad. They are very sensitive to noise; the sound of crackling of paper for instance can drive them crazy. An important characteristic is their positiveness; they won't give up. Even if the whole world tells them that they are on the wrong way, Ferrums will very tenacious persist in the direction they chose. The same thing goes for their opinions and philosophy.

The great problem for Ferrum-characters is that they lack the physical strength to actually carry out all their plans. They are tired and their muscles are weak. Physical exertion is accompanied by dizziness. They would like to lie down for a while. They suffer from anemia or complaints that very much look like anemia. Their face looks pale and gets flushes from exertion or excitement.

Ferrums have many blood circulation problems, like a high or a low blood pressure, palpitations, a headache because of congestion, a tendency to bleedings because of weak blood vessels, too much or too little menstruation. Long lasting loss of blood results in weakness. Other symptoms are a result of weakness of the muscular tissue, like weakness of the sexual organs and prolapse of the rectum, vagina or uterus. Furthermore Ferrums can be depressed; also postnatal depression is possible. There can be loss of appetite or the digestion is insufficient.

The Indian homoeopath Dr. R. Shah has studied this remedy very well; he rightly states that use of Ferrum metallicum should be much more spread than it is nowadays, due to the more or less standard prescription of iron-pills to pregnant women, thus creating a predisposition for homoeopathic iron.

Ferrum-personalities feel worse during rest and great exertion. They feel better while walking slowly about, by calm occupations, and by warmth.

Ferrum Phosphoricum
Great weakness, and desire to lie down. Nervous at night. Rheumatic conditions.
While it has been used by Schuessler's followers for the first stage of inflammatory fevers, it is useful in the higher potencies in chronic diseases, and is a deep acting anti-psoric, It could not be less than the Ferrum and Phosphoric acid that form it.
For many years I followed the Schüessler indications, but by the aid of new provings, homeopathic aggravations, and clinical experience the present arrangement of symptoms furnishes my guide for this valuable homoeopathic remedy.
The time of aggravation: of some complaints is in the morning, some in afternoon; others come in the evening and night, and after midnight. The patient is sensitive to the open air, and many symptoms are aggravated in open air.
The most noticeable features are anaemia and chlorosis (like Ferrum). The general physical anxiety is more like Phos. acid. Lack of vital heat, and aggravation in cold air and from becoming cold. Always taking cold. Congestion of head and

organs, with fever and red face.

The general weakness is like the low vitality of the phtisical inheritance. Dropsical conditions. Symptoms worse after eating, from physical exertion. Fainting spells. Cold drinks bring on symptoms. Sour food aggravates. Vascular fullness and distension of veins.

The haemorrhagic condition is a strong feature, as it is in Ferrum, Phos. acid and Phos. The nervousness of hysteria and hypochondriasis is found in this remedy. Soreness through the body, especially in congested parts; with aggravation from jar and walking. Complaints from lifting and straining muscles, and from sprains.

Many symptoms are worse lying in bed and from rest, and ameliorated by moving slowly about (like Ferrum), but the great lassitude compels him to lie down. Motion that is a real exertion aggravates, but slow. motion ameliorates. Numbness of parts and suffering parts. Surging of blood in body and head. Stitching, tearing pains. Tearing downwards. False plethora. Strong pulsation over body, and in head. Strong, full, frequent pulse. Generally oversensitive, and sensitive to pain. Standing aggravates many complaints. Trembling limbs. All combine to give us a remedy broad and deep acting.

Mind: This remedy has marked anger, even to violence; producing weakness, headache, trembling, sweat, and other nervous manifestations. Anxiety at night, as if he had done a great wrong to somebody; after eating; with apprehensiveness; during fever; about the future; hypochondriacal. Cheerful, talkative and hilarious; unnatural excitement, mingled with sadness. This remedy has been used in delirium tremens. Aversion to company and feels better when alone. He is unable to concentrate the mind, or reflect ordinary questions; can not study. Confusion of mind when trying to think, in the morning, in the evening, after eating; ameliorated by washing the face in cold water.

He is dissatisfied with everything he possesses, and with his surroundings. Very excitable in the evening. The fullness in his head makes him fear apoplexy. Fear of going into a crowd, or death, that some evil will come to him, of misfortune, of people. Forgetful. It is an excellent remedy for hysterical girls, when other symptoms agree.

His ideas are abundant, and there is unusual clearness of mind (Coff.). Again, extreme indifference to all pleasure and exciting events. Aversion to work. It might well be thought of for puerperal mania from the note,

"Sows eat up their young."

It has plenty of cerebral hyperemia, then why not madness?

Irritability. Alternating moods. Morose. Obstinate. Restlessness at night in bed, tossing about much during fever. Sadness in the evening before menses. Extremely sensitive to noise. Stupefaction. Indisposed to talk. Aversion to thinking. Weeping. Aversion to mental work.

Vertigo: Vertigo in afternoon from hyperaemia of brain, during chill, on closing the eyes; tendency to fall forwards; during headache; as if intoxicated; looking downwards; during menses; with nausea; on rising up; on rising from bed. Staggering when walking, with vanishing of sight. Sensation as if the head were pushed forward while walking.

The head: feels cold and the vertex is sensitive to cold air. Hyperaemia of the brain. Constriction of the scalp. Empty sensation in the head; during menses. Sensation of fullness in the head. The hair falls out. The head feels very hot. Flushes of heat, and red face. Heat in head; in vertex; during menses. The head feels heavy during menses. Weight in forehead and occiput. Itching of the scalp. Headache, in morning in bed, in afternoon, in evening. Cold air ameliorates the general headaches; ascending steps aggravates; blinding headache; catarrhal headaches.

Headache during chill, aggravated, on closing the eyes; cold applications ameliorate; with coryza; aggravation on coughing, after eating, excitement.

Headache during menses, worse from light and noise. Hammering headaches. Headache, aggravated from a jar. He is compelled to lie down. Lying ameliorates. Headache during menses; on motion, and on moving the head; noise. Paroxysmal pains.

Pressure ameliorates. Pulsating pains. Riding in a carriage aggravates. Sitting. Stooping; walking. Wrapping up the head brings on or aggravates the headache. Pulsating in head and temples, worse on right side. Headache with hot, red face and vomiting food.

Severe frontal headache with epistaxis, which ameliorates. Predominance of suffering on right side of forehead, aggravated in the morning on waking, evening; ameliorated in open air; aggravated on coughing. Pain above the eyes.

Pain in the occiput, on coughing, jarring; during menses. Pain in sides of head and temples, in vertex. Pain in vertex during profuse menses. Boring pain in temples. Bursting pain in head. Pressing pain in whole head, pressing outward, forehead, in frontal eminence, temples; vertex like a stone.

Soreness of the scalp, of occiput, vertex. Stitching pains in head, in forehead, over eyes occiput extending to forehead, on stooping; sides of head, temples, vertex. Tearing pains in head. General pulsation in head, aggravated by motion, and stooping; strong in forehead; in occiput on coughing, in temples, in vertex. Shocks in the head.

Eyes: Discharge of mucus from the eyes. Conjunctivitis with photophobia. Can not see on stooping. Blood vessels enlarged. Lachrymation. Half open lids.

Pain in eyes; aching, burning; sand. Stitching. Sensation of protrusion. Redness of conjunctiva, of balls and lids. Sunken eyes. Swollen lids. Sclerotics jaundiced. Vanishing of sight as from fainting.

Ears: Purulent discharge from the ear. Itching in ear. Noises in the ear; roaring, buzzing, humming, ringing and singing. Catarrh of Eustachian tubes. Inflammatory pains in the ear. Otitis media. Pain deep in the ear. Drawing. Stitching. Pain and swelling of the parotid glands. Sensitive to noise. Impaired hearing.

Nose: Catarrh of nose.

Coryza; discharge bloody. Crusts form in the nose. Discharge excoriating, purulent. When this remedy has been given on the biochemical theory in the low potencies its use has been limited to the acute stage of coryza, but when used homoeopathically this limitation does not hold good.

Who would think of limiting Ferrum or Phos. acid or Phos. to the acute or first stage of an acute, disease?

Epistaxis with coryza, during fever, or headache when the head is hot and full. Epistaxis in the morning, on blowing the nose,

with cough, Sneezing.
Face: Chlorotic face. Dark circles under the eyes. Earthy, pale, sallow face. Pale lips. Red face alternating with paleness. Circumscribed redness of cheeks. Red during fever; during headache. Yellow. Liver spots. Dryness of lips.
Heat of face; flushes; while sitting; with toothache; with pains. Hippocratic face. Inflammation of the parotid. Pain in face, from inflammation of teeth, neuralgia, ameliorated by cold applications, aggravated by motion. Pulsating pains. Stitching. Perspiration of face. Sunken face.
Mouth: Swelling oedematous, from toothache.
Swollen parotids. Bleeding from mouth and gums. Tongue dark red and swollen. Tongue white. Dry mouth. Inflammation of gums, fauces, tongue and tonsils. Pains in teeth, with red, hot, swollen gums; ameliorated by holding cold water in the mouth, and aggravated by warm things. Pains in the teeth after eating. Burning of the tongue. Salivation. Taste insipid, putrid, sweetish.

Throat: Constriction of throat.
Redness in throat and tonsils. Swollen tonsils. Heat in throat. Inflammation of throat and tonsils. Lumps in throat. Pain on swallowing. Burning. Soreness.
Stomach: Appetite diminished.
Ravenous appetite without relish of food. Appetite entirely gone. Aversion to food, meat, milk. Desires sour things. Distension of stomach after eating. Eructations, after eating, better, empty, of food, foul, sour. Water-brash. Fullness after eating.
Heat in stomach. Hiccough. Indigestion. Inflammation of stomach. Nausea after eating, during pregnancy. Sudden attacks of nausea, coming at any moment; sometimes waking her out of sleep, lasting a short time. Nausea felt in the throat. Nausea while walking. Pain in the stomach after eating. Burning in the stomach. Cramping. Pressing after eating. Soreness. Great thirst for much water. Vomiting, morning, on rising, on coughing, after drinking, after eating, during fever, during headache, during pregnancy, riding in a carriage. Violent vomiting; blood, food, green, sour. Vomiting with inflammation and pain in the stomach.
Abdomen: The abdomen is distended, and the liver and spleen

are enlarged.

Much flatulence, fullness and rumbling, gurgling. The abdomen is hard. Weight in the abdomen. Inflammation of the peritoneum. This remedy is curative in many complaints of the liver. Severe pain in the bowels, in the morning, evening, night; on coughing; during diarrhoea; after eating; during menses; as if menses would come on; paroxysmal, before stool, when walking.

Pain in hypochondria, in liver. Cramping, colicky pains. Dragging; pressing. Sore bruised pains. Tension.

Constipation; difficult stool. Constriction of anus. Diarrhoea, in morning, afternoon, night, after midnight; after eating; painless. Flatus.

Rectum and anus: Hemorrhage from anus, from piles. Haemorrhoids, external. Involuntary stools. Itching of anus. Moisture about the anus.

Pain in rectum during stool; with dysentery, and fever. Burning during stool, after stool. Tenesmus. Pain in rectum from inflammation, constant, aggravation by pressure on stomach. Prolapsus of anus, during stool. Ineffectual urging to stool. Stool is excoriating, bloody, brown, frequent, hard, lienteric, slimy, green mucus, thin, watery, green watery.

Bladder: Hemorrhage from the bladder or urethra.

Inflammation of the bladder with fever. Pain in the bladder and neck of the bladder. Tenesmus. Urging; constant; frequent; with pain in neck of bladder and end of penis, must urinate immediately, which ameliorates the pain; aggravated standing; only in the daytime.

Sudden urging. Must hasten or urine will escape. Frequent urination. Involuntary urination in the daytime, ameliorated lying down; at night in sleep; on coughing; while walking. Pain in the kidneys with fever.

Men: Gleety discharge from the urethra.

Gonorrhea with heat in urethra in inflammatory stage; scanty, watery or mucous discharge. Haemorrhage from urethra. Burning in urethra during flow of urine.

Urine albuminous, bloody, burning, cloudy on standing, dark, red, copious with headache; amoniacal, scanty; much sediment, mucus, much uric acid; high specific gravity.

Troublesome nightly erections and seminal emissions. Erections

feeble, or entirely wanting. Sexual passion increased, or entirely absent.
Women: In the woman there is slight change of symptoms; predisposition to abort, aversion to coition, or desire much dimished.
Leucorrhoea, excoriating, before menses, milky, thin, white.
Chlorotic girls. Menses absent. Menstrual flow bright red, clotted, copious, dark, too frequent, intermittent, irregular, late, painful, pale, protracted, scanty, suppressed, thin, watery.
Uterine haemorrhage. Pain in vagina during coition.
Dysmenorrhoea with fever and red face. Bearing down in pelvis with dull pain in ovarian region. Prolapsus of the uterus. Sterility. Sensitive vagina.
Respiration: Acute catarrh of air passages.
Inflammation of the larynx, with mucus, raw feeling and rattling in chest, fever, red face. Mucus in larynx and trachea. Dryness in larynx. Burning in larynx. Roughness in larynx. Hoarseness during coryza. Voice lost, weak.
Respiration asthmatic. Spasmodic asthma. Dyspnea, evening, night, with cough, while lying. Rattling. Short. Suffocative respiration. Stitching in chest on deep inspiration.
Cough: Cough, daytime, morning on rising, evening, night; cold air aggravates; asthmatic; acute.
Short, spasmodic and very painful cough. Deep breathing aggravates. Constant cough, with coryza. Dry cough. Cough after eating; exhausting; with fever. Hacking cough. Cough from irritation in larynx and trachea. Loose cough. Lying aggravates cough. Cough in bed, Paroxysmal cough. Rattling cough. Spasmodic. Talking aggravates. Tickling. Tormenting cough, aggravated on walking. Whooping cough. Touching larynx on bending head over. Increased cough from taking cold in phthisis.

Expectoration in daytime, morning, bloody, bright red, dark, copious, difficult, frothy, greenish, mucus, offensive, purulent, scanty, putrid, thick, viscid, whitish, yellow.
Anxiety in chest and region of the heart. Catarrh of the chest. Congestion of the chest. Constriction of chest and heart. Sensation of fullness. Haemorrhage of lungs. Heat. Inflammation of bronchial tubes, lungs and pleura; oppression of

chest. Pain in chest during cough, during inspiration; in sides of chest, during deep inspiration. Soreness in chest on coughing. Stitching in chest, in sides of chest, on coughing.
Right sided pleuritis. Stitches, aggravated coughing and breathing. Palpitation at night with anxiety, on exertion and motion, while sitting, walking rapidly. This is a valuable temporary remedy in the acute colds during the course of phthisis. In acute phthisis. Spasms of the chest with suffocation, fever and red face. Rheumatism in the upper thorax.
Back: Coldness in back.
"Crick" in the neck or back. Pain in the back at night, during menses, on motion, rising from a seat, while sitting, while walking, cervical region, between shoulders, lumbar region during menses. Aching. Stitching pains in back. Tearing. Stiffness in back of neck.
Cold extremities. Cold hands and feet. Cold feet evening in bed. Cold feet during headache. Contraction of fingers, result of rheumatism. Cramps in thighs, legs, calve, feet.
Limbs: Blueness of finger nails.
Hot hands, palms; soles. Heaviness of the limbs, upper limbs; legs. Inflammation of joints. Numbness of hands and fingers, legs and feet. Rheumatic pain in right shoulder and upper arm, of a drawing, tearing character, aggravated by violent motion of arm, ameliorated by gentle motion (Ferr.), part sensitive to touch.
Deadness of the right hand, could not lift with the hand. Acute rheumatism of right shoulder joint, red, swollen and sore. Rheumatism of right deltoid. Rheumatism of wrist. Rheumatism of knee joint with fever. Gouty affection of joints. Sciatica. Pain in thighs. Sore bruised pain in limbs. Stitching pains in limbs, upper limbs; shoulders; hips.
Tearing pain in shoulders, upper arms, hips. Shooting pains in both knees, extending down legs, with fever. Restless legs. Stiffness of lower limbs, of feet. Swollen joints, upper limbs, forearm, hands; feet.
Dropsical and rheumatic swelling. Great weakness of limbs, of joints, knees, legs. The rheumatism goes from joint to joint, aggravated by the slightest motion.
Sleep: There are many dreams, anxious, confused, of failing,

nightmare, vivid.
Late falling asleep. Restless sleep. Sleepiness in the evening. Sleepless before midnight, with sleepiness. After once waking up he is sleepless.
Chill afternoons; 1 P.M. daily. Chill at night in bed. Chilliness. Shaking chill. The fever predominates. Fever at any time with inflammation of organs, joints, or mucus membranes. Fever without chill.
Dry heat with thirst. Flushes of heat. Hectic fever and night sweats. Internal heat. Remittent fever. Heat after sleep.
Perspiration in daytime, morning; clammy; with great weakness, on slight exertion, following the fever; copious; during sleep.
Skin: Burning skin.
Coldness. Desquamation. Pale, red skin. Dry skin, Formication. Great sensitiveness of the skin. Skin feels sore. Ulceration. Small withered warts.

FERRUM PICRICUM
Picrate of Iron

Is considered a great remedy to complete the action of other medicines. The symptom that specially calls for it is failure of the function of an organ under exertion; e g, the voice fails after public speaking. Acts best in dark-haired patients, plethoric, with sensitive livers. Warts and epithelial growths; corns with yellowish discoloration. Senile hypertrophy of the prostate. Epistaxis. Chronic deafness and tinnitus due to gout. Meatus dry. Pseudo-leucæmia.

Ears.--Deafness before menses. Crackling in ears and low-pitched voice. Vascular deafness. Dental neuralgia, radiating towards ears and eyes. Humming in ears as from telegraph wires. Tinnitus.

Stomach.--Indigestion, furred tongue, headache after meals, especially in bilious, dark-haired persons.

Urinary.--Pain along entire urethra. Frequent micturition at night, with full feeling and pressure in rectum. Smarting at neck of bladder and penis (Barosma). Retention of urine.

Extremities.--Pain in right side of neck and down right arm. Locomotor ataxia, ocular stage. Hands covered with warts.

Dose.--Second and third trituration.

Fluoricum Acidum
Hydrofluoric Acid

It takes a long time for this remedy, in the proving, to develop its symptoms. It is a very deep-acting medicine, and an antipsoric, antisyphilitic and anti-sycotic.
It is insidious in its action and its symptoms are slow in approach; it is like the deepest and slowest and most tedious diseases, the miasms, and hence it is suitable in the very slowest and lowest forms of disease.
While it has in its nature some febrile action, it is not for this purpose that it is oftenest called for its most typical febrile action is very slow and insidious. It corresponds to overheated states of the system, old cases of nightly fevers, coming on week after week and year after year.
It is an unusually hot-blooded remedy at times, and again it has conditions of coldness. In the evening and night great heat seems to evolve from the body without increase of temperature. The skin becomes very hot.
That patient is often < from warm things, < from covering, < from

warm air; suffocates somewhat like Puls. in a warm room. He wants to bathe the face and head in cold water; such bathing is grateful.

The feet burn and are put out of bed in the night; he hunts around in bed for a cool place for the feet and bands. The soles perspire, and the palms perspire, and the sweat is acrid, making the parts sore; excoriation from the sweat between the toes.

The perspiration is offensive; offensive, acrid sweat between the toes. Burning, unusual heat and acridity are words that modify a great many symptom s; an acrid lachrymation or other discharge from the eye; acrid discharge from the nose, acrid sweat, etc.

Sensation of burning and burning pains in parts; heat evolved from the body as a chronic state. Aggravation from heat, from outward heat and from inward heat, belongs to this remedy. It is a strong feature, of this remedy to be worse from drinking tea and coffee. Warm, drinks bring on a diarrhea, or flatulence, or disturbance in the stomach, and cause indigestion to manifest itself in various way The symptoms are worse standing and sitting and better in the open air.

It is a remedy of great depth of action. It so disturbs the functions that there are peculiar outward signs in the nails, in the hair, in the skin; they are all imperfectly developed.

Skin: Whenever such is the case, we know that a remedy has great depth of action and that it is very long acting. It forms like incrustations here and there upon the skin that seem to have no tendency to heal.

A crust forms, but there seems to be no healing beneath the crust. The hair loses its luster; it falls out, and if examined closely under the microscope it is seen to be necrosed; little ragged ulcers will be found along the course of the hair.

The ends of the hair are dry, the hair mats and splits and breaks, becomes ragged in masses and lustreless. The nails are crippled, likewise corrugations in the nails; the nails grow too fast and grow awkwardly; that is, they are deformed and crippled, too thick in some places, and too thin in others; break easily, brittle.

There is a tendency to breaking down of a slow character, where the circulation is very feeble and the skin is near bone or cartilage as in the cartilages in the ears, and in the cartilages of joints.

Ulcers develop over the tibia. There is feeble circulation in the hands and feet and they become cold. In the evening the extremities burn and are feverish, because that is the time of the feverish state; but in the morning and in the daytime there is coldness of the extremities.

The patient is pallid and sickly, and at times becomes waxy and dropsical; oedema of the extremities, and particularly of the lower extremities; oedema of certain parts; oedema of the prepuce.

When a debilitated subject, one suffering from bone and cartilaginous troubles, contracts gonorrhoea, with it he will have enormous swelling of the prepuce, and nothing seems to act upon it. Fluoric acid will cure oedema of the prepuce with gonorrhoea in such a subject. Cannabis sativa has the same symptom, but it is especially useful in robust cases.

Fluoric acid will prevent the manifestation of disease in sycotic subjects, will prevent formation of fig warts. It cures fig warts. It produces hardened, dry warts, and dry crusts upon the skin, and crusts not unlike rupia. It is useful in syphilitic rupia.

Bone affections stand out prominently. Necrosis, especially of the long bones, but also of the bones of the ear. It creates an offensive acrid discharge from the ear. It establishes an offensive oezena, an acrid discharge, with necrosis of the nasal bones.

It is very analogous to Sil., and it is one of the natural followers of Sil. where Sil. has been too frequently repeated by persons who do not know that Silicea does its best in a single dose and that it is a long acting and slow medicine.

It not only antidotes the abuse of Sil., but also follows Sil., After practicing a while you will be surprised to observe the Pendulum like -action between beat and cold in various complementary remedies.

To make that clear I will illustrate it by using the series in which this remedy is set and to which it naturally belongs. You take a patient who is hot-blooded, who is always suffering from the heat, from too much clothing and too warm a room especially in the evenings, a patient that is tearful and sad, and may be a blonde.

Why you say, I am trying to describe a Pulsatilla patient. Well, yes; anyone can see that. Puls. is a hot-blooded patient, but after using that remedy a while you notice that the patient goes to the other extreme and becomes chilly, and wants much clothing; the heat is taken out of the case. Sil. is the natural follower of Puls., and you would be astonished to know bow often a patient leaving Puls. runs toward Sil.

Sil. goes deeper into the case, it does more cutting, and it is the, natural chronic of Puls. Other remedies of course follow Puls., but Sil. more frequently than any other medicine. Now, that is the second step; the patient has gone from a warm to a cool state; the overheated state has been lost and he has gone into Sil., but when Sil. has been administered for a while it cures the cold state, and removes the chilliness of the patient (remember, however, that Sil. has at times something of Puls. in it; in some of its complaints it is < from being overheated) and the patient under Sil. goes back to the warm state again, becomes hot-blooded, wants the warm covers thrown off, wants to be lightly covered.

Then it is that this medicine comes in the series. Fluor. ac. follows Sil. as naturally as Sil. follows Puls. They exist in threes.

Series: There are other remedies that exist in threes, but the most common ones you will think of will be:

Sulph., Calc. and Lyc.;

Sulph., Sars. and Sep.; and

Coloc. and Caust. and Staph., which often follow each other and rotate in this way.

Do not let these facts make you give a routine remedy unless the symptoms agree, but it does help to remember that remedies are somewhat similar. It is true that Puls., Sil. and Fluor. ac. are similar all along the line as to the nature of their symptoms.

Puls. corresponds to more acute disturbances, or to the earlier stages of chronic disease, the more active or violent operations of chronic disease. It will take off the wire edge of the disease, and it will be followed by some medicine that is complementary to it, always to be determined by the symptoms that arise.

There are cases that would be greatly injured by so deeply acting a remedy as Sil. if given in the beginning, that is, the suffering would be unnecessary; but if you commence with Puls. you can mitigate the case and prepare it to receive Sil., providing the two would appear to be on a plane of agreement. A very serious case had better first receive Puls., and the way being paved by that remedy follow it up with Sil.

Bones: Think of the remedy, then, in vicious bone diseases, in necrosis and caries, in fistulous openings, fistula leading to the teeth, fistula lachrymalis and fistula in ano; in calcareous degenerations; in deformity of the nails, hair and teeth; in affections of the thigh bones and leg bones, with chronic fistulous openings leading to bone discharging pus which excoriates the parts all around.

The patient is over-sensitive; is made worse if the bowels do not move regularly; is distressed if the menstrual flow is slightly delayed; suffers if the call to urinate cannot be immediately attended to, hence, as in the text, "headaches > by micturition."

Headache: That symptom is all that is given in the text; but remember something that is analogous to it, viz.; If the call to urinate be not attended to the headache will continue to grow < until the urine is avoided.

That is a peculiar symptom, and it sometimes leads to the study of Fluor, ac. Violent congestive headache with beat and fullness. Violent occipital headaches, worse from motion.

Now, if we take into consideration its great depth of action, we will see furthermore that it is suitable in some brain diseases. In persons who have overworked, who have been working day and night to establish a business, or to keep it up, and when there has been constant use of the brain it is suitable.

Mind: In mental depression and melancholy, with great sadness, in young men who have destroyed the nervous system by vicious practices, by secret vice. It is particularly suitable for that disorder of the human economy where men have continuously changed their mistresses.

There is a state in which a man is never satisfied with one woman, but continually changes and goes from bad to worse until he is a debauchee. If a young man cannot keep away from women, he is not so bad off if he will only keep to one, but he goes from one to many, until he stands upon the street corners and, in his lust, craves the innocent women that go along the street.

Fluoric acid is suitable in that state, like Picric acid and Sepia, and these medicines are particularly suited to that condition of enfeeblement of the mind and that disorder of the human economy that makes man so low, that we have the state described as "low mindedness."

It takes that form in one who is a sort of debauchee, running after alt sorts of things to tickle his fancy, but it takes another form in a man who stays at home with his good wife. He takes an aversion to his children and to his dearest friends and his wife, that is, he has lost that true and noble and orderly affection and friendship and companionship which ought to exist, and he fights against it.

An orderly man considers his wife his best friend and he would rather stay with her than go anywhere else. To him there is no place like home. Now, when man arrives at the state when he wants to go somewhere else, that he wants to go away from home, that be is disturbed at home, that everything annoys him at home, that be no longer loves his children as he once did, he needs Fluoric acid.

"Feeling of indifference towards those he loves best."

The Sepia state is like this, but Sep. is more frequently indicated in women. The woman will say,

"Doctor, there is one thing that I regret very much, and that is, I do not seem to enjoy my children, my home, my companions, my husband and my friends.

There is a sort of alienation."

Such is the way it is told where it is Sepia. In the man it is more commonly Fluoric acid, in the woman more commonly Sep., but this need not necessarily be so. Sepia corresponds more closely to the condition of the uterus and ovaries, and such conditions, as the woman alone can have. (Compare Calcarea.)

Men: Fluoric acid has with this state an overwhelming sexual erethism.

He is kept awake nights by erections. This state of desire forces itself upon him, not only when he is with the opposite sex, but at all times. At times, in the beginning of a gonorrhea, this condition of priapism and intense uncontrollable sexual desire, with swelling of the foreskin is overcome by Fluoric acid. There are times when this priapism demands Canth., but that remedy differs wholly in its nature from this.

Mind: Reticence and silence; sitting and saying nothing. This reticence is like Puls., and often belongs to the insane who will sit in the corner and say nothing all day, never uttering one single word, and hardly answering when spoken to.

A patient sits in the corner and says nothing and does nothing, eats when food is offered, is led to her room when the time comes, resists nobody, answers nothing; such a state is found in Pulsatilla, and is closely allied to this remedy.

There, is some insanity in it, but especially the fatigue and mildness of a the brain. Mental exhaustion from overwork or from vices.

It is suitable after Sil. in the spinal affections that are attended with paralysis, trembling and numbness in the soles of the feet.

It will often stop the progress of structural nervous diseases and prevent the, case from getting worse.

Veins: An excellent and very useful feature of this remedy is its ability to produce varicose veins and varicose ulcers.

The veins become varicosed anywhere, but particularly upon the lower limbs, especially following pregnancy.

Hemorrhoids protrude after a stool; the anus and rectum protrude, and there is some bleeding, because of the hemorrhoidal condition. Varicose conditions with very old ulcers upon the lower extremities; the varicose veins ulcerate.

You might predict what kind of ulcer and what kind of a margin Fluoric acid would produce. We see the feebleness of its circulation, we see its tendency to create hard crusts, and hardened, horny skin and eruptions.

We might now easily assume that the inflamed borders of an ulcer would become indurated, hard and glassy. The margins of ulcers are indurated and the ulcer is an old, indolent ulcer.

Parts once broken will not close up. Union will not take place between the broken ends of bones, there is no repair. From bones and from ulcers, we have the foetid, acrid, thin, watery discharges, or at times very scanty discharges, but acrid, burning the parts all around, raising eruptions and scurfs around the ulcers.

From the feebleness of the circulation one might suppose that

numbness would naturally be present, and it is true.
The ears become numb, the scalp becomes numb, there is a sensation as if the back of the head were made of wood. The scalp loses its sensation, the hair falls out and crusts form. The extremities become numb and there is numbness of the feet and bands extending upwards; numbness, with or without dropsy; numbness in spinal affections; numbness in brain diseases. Numbness of the limb not laid on.
"Crusta lactea; dry scales; itches very much, bald places. Caries of the temporal bone; discharges offensive smelling pus periodically." "whole left side of the head retarded in growth, left eye seems smaller."
Skin: That is a clinical state, but it is significant.
Its use in syphilis must not be overlooked. in old cases with exostoses, caries and necrosis, cases that have been mercurialized, and treated by other drugs until ulcers have developed or those affections of the nose that we have often observed in syphilitic states. He blows small pieces of bone out of the nose; great pain in the nose; nasal bones all destroyed, and the nose becomes flat as though only a soft piece of flesh with perforations.
The vulva is eaten off and the tonsils become honeycombed by syphilitic ulcers.
Lingering, low forms of ulcers and eruptions. The teeth decay or break off or ulcerate at the roots; fistulous openings from the root of the tooth, continuing to discharge.
Many a time has this remedy taken away that ulcer of the root, closed up that fistulous opening, cured the pain, saved the tooth.

"Craves cold water and is continually hungry."
Often that "all gone" sensation in the stomach. Is always eating and is relieved from eating, but like Iodine it does not last long, for soon be becomes hungry again. Such medicines are very deep. We see that they go, to the very root of assimilation and nutrition.
Chronic ulcers of the throat not necessarily syphilitic, but it is particularly useful in the old forms of syphilis; not generally so suitable in the earlier ulcers as in those that are associated with the tertiary forms, with debilitated states, with brain disease, with

nervous symptoms that go on for years when the patient is supposed to be cured.
Very often the trouble will come back in the throat, and the ulcers consist of little gummatous growths. Sil. especially covers such a condition, and Sil. is also one of the most useful medicines for rooting out Mercurius.
In potentized form sil. and Merc. are inimical, yet the high potencies of Sil. will antidote crude Mercury.
This patient craves pungent, highly seasoned things. The appetite must be tickled; there must be some inducement to eat. At times the appetite is changeable in spite of the fact that he is overwhelmingly hungry; he cannot eat, yet he is > when the food is in the stomach, > after eating.
The most vicious kind of chronic diarrhea with this low feeble constitution, in insidious complaints.
"Morning diarrhoea."
The itching of the anus is sometimes intense; protrusion of the anus during defecation; profuse haemorrhage after stool; constipation with piles; itching around and in anus, in perineum, etc,
This drug is also suitable in the dropsy of drunkards. They are very often liver dropsies. Old cicatrices become red around the edge surrounded by itching vesicles, itching violently; squamous eruptions upon the body; dry, cutaneous eruptions upon the body, very scaly.
"Sensation as if a burning vapor were emitted from the pores of the body."
Especially under the covers there is this sensation of great heat, tremendous, like steam. It is not in fever. He has no fever but it is a chronic state of giving out heat without thirst, or increase of temperature.
Mind.--Indifference towards those loved best; inability to realize responsibility; buoyancy. Mentally elated and gay.

Head.--Alopecia. Caries of skin. Pressure on sides of head from within outward. Caries of ossicles and mastoid, with copious discharge; worse warmth (Silica; worse cold). Exostosis.

Eyes.--Sensation as of wind blowing through eyes. Lachrymal fistula. Violent itching of inner canthus.

Nose.--Chronic nasal catarrh with ulceration of the septum; nose obstructed and dull heavy pain in forehead.

Mouth.--Dental fistula, with persistent bloody, salty discharge. Syphilitic ulceration of throat, which is very sensitive to cold. Teeth feel warm. Affects teeth and bones of upper jaw.

Stomach.--Heaviness and weight in stomach heat in stomach before meals. Sour eructations. Averse to coffee, wants fancy dishes. Stomach symptoms relieved by tight clothes. Desire for highly seasoned food. Craves cold water, hungry. Warm drinks produce diarrhœa.

Abdomen.--Soreness over liver. Flatus and eructations.

Stool.--Bilious diarrhœa, with aversion to coffee.

Male.--Burning in urethra. Sexual passion and desire increased with erections at night, during sleep. Swollen scrotum.

Urine.--Scanty, dark. In dropsy, produces frequent and free discharge, with great relief.

Female.--Menses copious, frequent, too long. Ulceration of uterus and os. Copious and excoriating leucorrhœa. Nymphomania.

Respiratory.--Oppression of chest, difficult breathing, great dyspnœa. Hydrothorax.

Extremities.--Inflammation of joints of fingers. Feeling as of a splinter under nail. Nails crumble. Caries and necrosis, especially of long bones. Coccygodynia. Ulcer over tibia.

Skin.--Varicose veins. Nævi. Ulcers; red edges and vesicles. Decubitus; worse, warmth. Syphilitic rupia. Itching of cicatrices. Feels as if burning vapor were emitted from pores. Itching especially of the orifices, and in spots, worse warmth. Nails grow rapidly. Periosteal abscess. Profuse, sour, offensive perspiration. Syphilitic tubercles. Dropsy of limbs in old, feeble constitutions. Atony of capillary and venous system. Tissues bloated.

Modalities.--Worse, warmth, morning, warm drinks. Better, cold while walking.

Relationship.--Compare: Thiosinaminum (action on cicatricial tissues; adhesions, strictures, tumors); Calc fluor; Silica.

Complementary: Silica.

Dose.--Sixth to thirtieth potency.

FUNERAL HOME
You can run, but you can't Formaldehyde

FORMALINUM
Aqueous Solution (35 per cent) of Formaldehyde Gas (FORMALIN)

Is a powerful disinfectant and deodorant; a potent poison. Prevents growth and kills almost any pathogenic micro-organism. It seems to have the peculiar property of eating into malignant tumors, leaving the surrounding healthy tissue uncharred and unchanged. A plug of cotton wool soaked in a 20 per cent solution of Formaldehyde, and applied for a few hours, will produce a necrotic slough, which must be scraped away before the next application, otherwise it hardens.

Formalin in hot water as vapor most valuable therapeutic agent in pertussis, phthisis, in catarrhal affections of upper air-passages.

Mind.--Forgetfulness. Anxiety. Unconscious.

Head.--Coryza; eyes water; vertigo.

Mouth.--Ptyalism, thick saliva; loss of taste.

Stomach.--Food feels as if it were a ball in stomach. Burning in mouth and stomach.

Abdomen.--Intense urging to stool, watery stools.

Urinary.--Anuria; albuminous urine.

Respiratory.--Dyspnœa. Laryngismus stridulus. Whooping-cough.

Fever.--Chills in forenoon, followed by long fever. Bones ache during whole paroxysm. During fever forgets where he was.

Skin.--Puckers skin like leather; wrinkles; scales off. Eczema in neighborhood of wound. Damp sweat most marked on right upper extremity.

Relationship.--Antidote: Ammonia water. Compare: Ammonium formaldehyde, known commercially as Cystogen (Dose, five to seven grains two to four times daily, dissolved in hot water, after meals. Prevents the decomposition of urine in the bladder, kidneys, and ureters. Turbid urine rendered clear and non-irritating; phosphatic deposits dissolved, and growth of pyogenic bacteria arrested). Also, Urotropin (A diuretic and solvent of uric acid concretions; relieves cystitis associated with putrefaction. Three to five grains well diluted. When administered invariably appears in the cerebro-spinal fluid and therefore advised in threatened meningeal infection).

Dose.--As vapor in hot water in respiratory affections; 1 per cent spray, otherwise 3x potency.

FORMICA RUFA
Crushed Live Ants
(MYRMEXINE)

An arthritic medicine. Gout and articular rheumatism; pains worse, motion; better, pressure. Right side most affected. Chronic gout and stiffness in joints. Acute outbursts of gouty poisons, especially when assuming the neuralgic forms. Tuberculosis, carcinoma, and lupus; chronic nephritis. Complaints from overlifting. Apoplectic diseases. Has a marked deterrent influence on the formation of polypi.

Head.--Vertigo. Headache with cracking in left ear. Brain feels too heavy and large. Sensation as if a bubble burst in forehead. Forgetful in the evening. Exhilarated. Coryza and stopped-up feeling in nose. Rheumatic iritis. Nasal polypi.

Ears.--Ringing and buzzing. Cracking in left ear with headache. Parts around ear feel swollen. Polypi.

Stomach.--Constant pressure at the cardiac end of the stomach, and a burning pain there. Nausea, with headache, and vomiting of yellowish bitter mucus. Pain shift from stomach to vertex. Gas cannot be passed.

Abdomen and Stool.--In the morning, difficult passages of small quantities of flatus; afterwards diarrhœa-like urging in the rectum. Pain in bowels before stool, with shuddering chilliness. Constriction in the anus. Drawing pain around navel before stool.

Urine.--Bloody, albuminous, with much urging; quantities of urates.

Respiratory.--Hoarseness, with dry, sore throat; cough worse at night, with aching in forehead and constrictive pain in chest; pleuritic pains.

Sexual.--Seminal emissions; weakness. "Slothful to venery".

Extremities.--Rheumatic pains; stiff and contracted joints. Muscles feel strained and torn from their attachment. Weakness of lower extremities. Paraplegia. Pain in hips. Rheumatism comes on with suddenness and restlessness. Sweat does not relieve. Relief after midnight and from rubbing.

Skin.--Red, itching and burning. Nettle-rash. Nodes around joints (Ammon phos). Profuse sweat without relief.

Modalities.--Worse, cold and cold washing, dampness, before a snowstorm. Better, warmth, pressure, rubbing. Combing hair.

Relationship.--Compare: Formic acid (Chronic myalgia. Muscular pains and soreness. Gout and articular rheumatism, which appear suddenly. Pains usually worse on right side, motion and better from pressure. Failing vision. Increases muscular strength and resistance to fatigue. Feels stronger and more "fit" in ordinary walking. Marked diuretic effect, greater elimination of products of disassimilation, particularly urea. Tremor. Tuberculosis, chronic nephritis and carcinoma, lupus, etc, have been treated successfully with injections of Formic acid of a dilution corresponding to the 3d and 4th centesimal. In prescribing it for varicose veins, polypi, catarrh, Dr. J. H. Clarke orders an ounce or two of a solution of Formic acid in the proportion of one part of the acid to eleven of distilled water. Of this one teaspoonful is taken in a tablespoonful of water after food once or twice daily. Pain in aponeurosis and muscles of head, neck and shoulders before a snowstorm). Rhus; (Dulcam, Urtica and Juniperus contain Formic acid), Wood alcohol, when taken as a constituent of a beverage so common in these prohibition days, is not eliminated easily and is slowly converted into Formic acid, attacking the brain and causes death or blindness.

Dr. Sylwestrowicz of the Hering Research Laboratory of Hahnemann College, Philadelphia contributes his experience with Formic Acid, as follows:

"The best field for the formic acid treatment are cases of atypical gout. Under this classification are to be mentioned disturbances in the muscles such as myositis, periostitic processes of the bones in form of doughy swellings, changes of the fascias such as Dupyutren's contraction, skin troubles such as chronic eczema, psoriasis and loss of hair, kidney disturbances such as subacute and chronic nephritis. In these cases formic acid in 12x and 30x, hypodermically 1 cc is indicated at intervals of 2-4 weeks. Eight till twelve days after the first injection an aggravation is often noticed.

In acute rheumatic fever and acute gonorrhœic arthritis formic acid 6x, every six days 1 cc, sometimes 12x in sensitive patients shows often splendid results abolishing the pains and preventing reoccurrence.

Chronic arthritis needs a special discussion. Clinical experiments of the Hering research Laboratory of the Hahnemann Medical College of Philadelphia on a great number of cases of arthritis with formic acid showed that it preferably acts on the ligaments, capsula and bursa of the joints. Such kind of cases respond very readily to treatment.

The prognosis depends to a large extent upon the etiology of the case. The most satisfactory cases are chronic arthritis in connection with gouty diathesis. Chronic arthritis following an attack of acute rheumatic fever shows also remarkable results although often pains of a neuralgic character persisting in certain spots are very stubborn. Finally chronic arthritis of traumatic nature can be cured by formic acid. In the latter case formic acid 6x showed quicker and better results than 12x or 30x which are indicated in the previous cases. In general the disappearance of the stiffness of the joint is the first sign of improvement. Then the pain and swelling cease gradually in 1-6 months time.

The prognosis of the formic acid treatment is not so favorably in chronic arthritis in which deformans processes have already taken place on the articular surfaces. Such processes in the beginning can be checked completely, advanced cases frequently show an improvement. But there is always the possibility that this improvement is only temporary. This is particularly to be expected in the cases of the so-called arthritis deformans in which even the inflammations on the ligaments and capsula are of a very progressive character".

Dose.--Sixth to thirtieth attenuation.

| **Re: FORMICA RUFA** | By: girilal<br>New Jersey USA | October 24 2006 |

Not just ants, but fire ants are used. Some manufacturers use just any ant but it does not make a good medicine.

Browner is the ant, more formic acid it contains.

FRAGARIA VESCA
Wood-strawberry
(FRAGARIA)

Acts on digestion and mesenteric glands. Prevents formation of calculi, removes tartar from teeth and prevents attacks of gout. The fruit has refrigerant properties. Strawberries produce symptoms of poisoning in certain susceptible individuals, such as urticarial rashes (strawberry anaphylaxis). Here give Fragaria high potency.

Chilblains; worse during hot weather. Lack of mammary secretion. Psilosis (Spruce).

Mouth.--Tongue swollen; strawberry tongue.

Skin.--Urticaria; petechial and erysipelatous eruptions. Swelling of whole body.

Relationship.--Compare: Apis. Calcarea.

GALLICUM ACIDUM
Gallic Acid

Should be remembered as a remedy in phthisis. It checks the morbid secretions, gives tone to the stomach, and increases the appetite. Passive hæmorrhages when pulse is feeble and capillaries relaxed, cold skin. Hæmaturia. Hæmophilia. Itching of skin. Pyrosis.

Mind.--Wild delirium at night; very restless, jumps out of bed; sweats; is afraid to be alone; is rude and abuses every one.

Head.--Pain in back of head and neck. Thick, stringy discharge from nose; photophobia with burning of lids.

Respiratory.--Pain in lungs; pulmonary hæmorrhage; excessive expectoration. Much mucus in throat in the morning. Dry at night.

Urinary.--Kidneys painful, distress along ureters into bladder.

Dull heavy pain in bladder, directly over pubis. Urine loaded with thick, cream-colored mucus.

Rectum.--Copious stool; anus feels constricted. Faint feeling after stool. Chronic mucous discharges.

Relationship.--Compare: Ars; Iod; Phos.

Dose.--First trituration and pure acid 2 to 5 grain doses.

BIOTOX.CZ

GAMBOGIA
Gummi Gutti
(GAMBOGIA - GARCINIA MORELLA)

The use of this drug in Homeopathy has been confined to its action on the alimentary tract. It produces a diarrhœa very similar to Croton. >From its pathogenesis, it is very evident that it has very intense and definite action especially on the gastro-enteric tract.

Head.--Heavy, with inertia, and drowsiness. Itching and burning in eyes; lids stick together, with sneezing.

Gastro-enteric Symptoms.--Feeling of coldness at edge of teeth. Great irritability of the stomach; burning, smarting, and dryness of the tongue and throat. Pain in the stomach after food. Tenderness in epigastrium. Pain and distention of abdomen from flatulence, after stool. Rumbling and rolling. Dysentery, with retained scybala, with pain in sacral region. Diarrhœa, with sudden and forcible ejection of bilious stools. Tenesmus after, with burning at anus. Ileo-cæcal region sensitive to pressure. Profuse, watery diarrhœa in hot weather, particularly old people. Pain in coccyx.

Modalities.--Worse, towards evening and at night.

Relationship.--Compare: Croton; Aloes; Pod.

Dose.--Third to thirtieth potency. Gamboge painted on the chest in lung tuberculosis is considered by Abrams specific and incipient cases are symptomatically cured in several weeks.

Gelsemium sempervirens
Photo by Virginia Ducey
USF Herbarium Slide Collection

Gelsemium

Weather: If you will observe the weather conditions in sharp climates, such as Minnesota, Massachusetts and Canada, you will find that the cold spells are very intense and that people when exposed, come down with complaints very rapidly and violently.
That is the way the Bell. and Acon. cases come on, but Gelsemium complaints do not come from, such causes nor appear that way. Its complaints are more insidious and come on with a degree of slowness.

A Gels. cold develops as symptoms several days after the exposure, while the Acon. cold comes on a few hours after exposure. The Aconite child exposed during the day in dry, cold weather will have croup before midnight. But in the South diseases are very slow. Like the people themselves, their organs are very slow, and their reaction is slow.

Their colds are not taken from the violent cold, but from getting overheated. Hence, they take colds and fevers of a low malarial type; they have congestive headaches and congestive complaints that do not come on suddenly. When we think of the climate, and consider the people, and the pace of remedies, we see that Gels. is a remedy for warm climates, while Acon. is a remedy for colder climates.

Certain acute complaints in the North will be like Aconite, while similar complaints will have symptoms in the warmer climate like Gels. The colds and fevers of the mild winters will be more likely to run to this medicine, whereas the colds and fevers of a violent winter will be more likely to run to Bell. and Acon.

It is true that Acon. has complaints in hot weather, fevers and dysentery of hot weather, but they are different from the complaints of winter.

Gels. has been used mostly in acute troubles. In lingering acute troubles and in those resembling the chronic it is very useful, but in chronic miasms it is not the remedy. It is only a short-acting remedy, though slow in its beginning. In this it is like Bryonia. Bry. complaints come on slowly, and hence it is suitable for fevers coming on in the southern climate, but it also has sudden violent complaints, though not to the extent we find in Bell.

Complaints: The complaints of Gels. are largely congestive. Cerebral hyperemia, determination of blood to the brain and to the spinal cord. The extremities become cold and the head and back become hot. The symptoms are manifested largely through the brain and spinal cord. In connection with brain affections there are convulsions of the extremities, crampings of the fingers and toes and of the muscles of the back.

Coldness of the fingers and toes; sometimes the extremities are icy cold to the knees, while the head is hot and the face purple. During the congestion the face is purple and mottled. The eyes are engorged, the pupils dilated (sometimes contracted), the eyes are in a state of marked congestion with lachrymation and twitching.

The patient feels dazed and talks as if he were delirious; incoherent, stupid, forgetful. It is like this in intermittent fever that gradually develops towards a congestive chill. Great coldness running up the back from the lower part of the spine to the back of the head. Shuddering, as if ice were rubbed up the back.

The pains also extend up the back. With the coldness of the extremities, the very dark red countenance, the dazed condition of the mind, the glassy eyes and dilated pupils, we have the neck drawn back and rigidity of the muscles of the back of the neck, so that the neck cannot be straightened, and there are violent pains up the back and coldness in the spine.
This state would remind one of cerebro-spinal meningitis. Pain in the base of the brain and in the back of the neck. With all states there is a very hot skin and a high temperature, with coldness of the extremities. Sometimes the troubles are ushered in with a violent chill.

This is a very important remedy to study when such symptoms are present in intermittents and in a few days the tongue begins to coat, nausea comes on, ending in vomiting of bile, and instead of there being an intermission a continued fever extends from one paroxysm into another, with a higher temperature in the afternoon.

The chill practically subsides, leaving a state which has the appearance of typhoid, with dry tongue, not much thirst and marked head symptoms, dazed in mind. If this continues many days delirium and all the features of typhoid will come on and the fever will change its type altogether from the intermittent to the continued.

In congestive chill with high temperature occurring in the afternoon, the chill part of it subsiding and the fever becoming continued, Gels. is a useful remedy. It is also a very important remedy in afternoon fevers without chill in infants and in children. You will find in malarial districts that it is a common thing for the infants to have remittent attacks, while the adults are having intermittents. it is only occasionally that you will see a child or infant shake with a distinct chill, but they often go into a remittent fever, an afternoon fever which will subside along towards morning, to be followed the next afternoon by fever. With Gels. the child will lie as still as in Bry. but there is more congestion to the head there is the dark red face and duskiness like Bry.

Running through the febrile complaints, in the spinal meningitis, in congestion of the brain, in intermittents or remittents that change to a continued fever, and even in a cold when the patient is sneezing and has hot face and red eyes, there is one grand feature, viz., a feeling of great weight and tiredness in the entire body and limbs.

The head cannot be lifted from the pillow, so tired and so heavy is it, and there is such a great weight in the limbs. The Bry. patient lies quietly because if lie moves the pains are worse. He has an aversion to motion, because he is conscious that it would cause an increase of suffering.

The heart is feeble and the pulse is feeble, soft and irregular. There is palpitation during the febrile state. Palpitation, with weakness and irregularity of the pulse. There is a sense of weakness and goneness in the region of the heart, and this weakness and goneness often extend into the stomach, involving the whole lower part of the left side of the chest and across the stomach, creating a sensation of hunger, like Ignatia and Sepia. There is a hysterical element running through Gels. and it has the nervous hunger, or gnawing.

There are cardiac nervous affections like Digitalis, Cactus and Sepia. Sepia is not known to be as great a heart remedy as Cactus, but it has cured many cases of heart troubles. Sepia has cured endocarditis, and a remedy that will take hold in endocarditis and root it out must be a deep acting remedy. He feels that if he ceases to move the heart will cease to beat.
The headaches are of the congestive type. The most violent pain is in the occiput, and it is felt sometimes as a hammering. Every pulsation is felt like the blow of a hammer in the base of

the skull. These headaches are so violent that the patient can not stand up, but will lie perfectly exhausted, as if paralyzed from the pain. There is an occipital headache that compels walking or rolling the head.

There is commonly relief from lying in bed, bolstered up by pillows, with the head perfectly quiet The face is flushed and dusky and the patient is dazed. After the headache progresses a while, the whole head seems to enter into a state of congestion, there is one great pain, too dreadful to describe, and the patient loses his ability to tell symptoms and appears dazed; lies bolstered up in bed, eyes glassy, pupils dilated, face mottled, and extremities cold.

Gels. has also headaches of a neuralgic character in the temples and over the eyes, with nausea and aggravation from vomiting. The headache is relieved by passing a copious quantity of urine; that is, the urine which has probably been scanty becomes free and then the headache subsides.

There is much nervous excitement. Complaints from fear, from embarrassment, from shock that is attended with fear, from sudden surprises that are attended with fright. A soldier going into battle has an involuntary stool; involuntary discharges from fright and surprises accompanying fright. On becoming suddenly overwhelmed by some surprise he becomes faint, weak and exhausted, he becomes tired in all the limbs and unable to resist opposing circumstances. His heart palpitates. This is similar to Arg. nit. Arg. nit. has the peculiar condition that when dressing for an opera a sudden attack of diarrhea comes on, causing more or less sudden exhaustion, and she must go several times before she can finish dressing.

They who are to appear before an audience are detained because of a sudden attack of diarrhoea. A lady has an attack of diarrhoea when about to meet friends over whom she expects to become excited at the meeting. The anticipation brings on the diarrhoea. Such a state is Arg. nit. These medicines are so closely related to each other that there are times when they will appear to do the work of each other.

Then we have paralytic affections of the sphincters, and so with the febrile conditions there is involuntary loss of stool and urine. There is also paralytic weakness of the extremities and of the hands. With paralytic states there is aching along the spine and in the muscles of the back; drawing, cramping in the muscles of the back and aching under the left shoulder blade.
There are many disturbances of vision; double vision, dimness of vision, appearance of a gauze before the eyes; confusion of vision and blindness. These symptoms come on before going into attacks, in connection with chill, at the coming on of sick headaches and congestive headaches. All sorts of objects are seen; the field of vision appears full of black spots, or full of smoke or little waves of various colors. It is useful in inflammation of all the tissues of the eye and of the eyelids. The eyeballs oscillate laterally when using them.

Drooping of the eyelids or ptosis is a marked feature and is in its paralytic nature.

The muscles are relaxed, they do not hold the lids tip. The lids close when he is looking steadily; they simply fall down over the eyes.

The patient in general is thirstless, and it is the exception that there is much thirst. It has a profuse, exhaustive sweat and is aggravated from motion, or rather motion seems to be impossible. It seems that he is unable to move, that be is too weak to move, and this runs through all complaints. At times it is a remedy for coryza, with sneezing and running of water from the nose, with coldness in the extremities, and the trouble will go down into the throat and produce sore throat, with redness, tumefaction, enlargement of the tonsils, hot head and congested face.

With this, as with the other febrile conditions, there is heaviness of the extremities. The red face, the heaviness of the extremities and sore throat that has come on gradually, a little worse from day to day, until it has become a severe throat, will lead you to Gels., especially if there is paralytic weakness all over, and as the throat trouble progresses the food and drink come back through the nose.

This is due to a paralysis of the muscles of deglutition. The tongue also becomes paralyzed and don not perform its work in an orderly way. There are times when the paralytic weakness is not sufficiently marked to account for things seen, but there is an incoordination of muscles and he is awkward. He undertakes to, take hold of an article and takes hold of something else. When he does grasp his hands feel weak. He is awkward and clumsy and the muscles do this and that and something not ordered to do.
The trembling incoordination and paresis are especially noticed during high excitement and afterwards, and these states occur with the febrile condition and remain sometimes after. Useful in paralytic cases that begin with fevers. Tearing is felt in the nerves all over the body and seems to be due to an inflammatory condition. It has cured sciatica, with tearing pains, associated with great weakness of the limbs.

Loss of sensation is sometimes found; numbness of the end of the nose, of the ears, of the tongue, of the fingers, of the hands and feet, numbness, here and there, of the skin.

In the male, the sexual organs arc in the same condition as the patient in general. The semen dribbles away; there is impotency, no ability to perform the sexual act; the sexual organs are relaxed.

The sleep is greatly disturbed. He cannot go to sleep; every excitement keeps him awake. During marked febrile conditions he has a profound sleep or coma. When he is not in this comatose sleep during congestion he is in a state of nervous excitement in which he lies awake thinking, and yet thinks of nothing in particular, because his!mind will not work in an orderly way.
The symptoms of Gels. may be present in inflammation of any

organ, uterus or ovaries, stomach, the lungs and of the rectum. It has congestion of organs, but it has also high grade inflammation. There is nothing peculiar in the inflammation itself that would indicate Gels., neither should Gels. ever be given because there is inflammation, but when the mental symptoms are present, the delirium, the flushed face, the determination of blood to the head with the cold extremities, the great heaviness of the limbs, the disturbance of sensation, the paralysis of sphincters, then Gels. would be good for inflammation of any organ of the body.

In a most distressing and violent, rapidly spreading erysipelas that seems destined to cause death in a few days all the symptoms point to Gels., and though Gels. may not have produced erysipelas, it will stop the progress of the disease in a few hours and the patient will go on to a quick recovery.
Many times when erysipelas has spread over the face and scalp and in the most dangerous manner with the dusky red color that belongs to Gels., and other symptoms such as I have described in a general way, Gels. has taken bold of the erysipelas and cured. If we master thoroughly the Materia Medica we do not stop to see if a remedy produces certain kinds of inflammation, etc., but we consider the state of the patient.

|---|---|---|

Gelsemium: body refuses to obey, paralysis feeling.

Once I was going to Florida and Gelsemium was blooming all over. I parked my car and inhaled the aroma.

Then I decided to experiment with the Gelsemium. I chewed some yellow flowers and leaves.

In few minutes I felt I am paralyzed, my senses stopped obeying me. Luckily I was with my cousin and we stayed in a motel there I recovered in few hours.

That is what is Gelsemium for. For paralysis, body refuses to obey. I used it in the case where one has sensation of paralysis.

girilal

| **Re: Gelsemium** | By: girilal<br>New Jersey USA | September 18 2006 |
|---|---|---|

GELSEMIUM SEMPERVIRENS
Yellow Jasmine
(GELSEMIUM)

Centers its action upon the nervous system, causing various degrees of motor paralysis. General prostration. Dizziness, drowsiness, dullness, and trembling. Slow pulse, tired feeling, mental apathy. Paralysis of various groups of muscles about the eyes, throat, chest, larynx, sphincter, extremities, etc. Post-diphtheritic paralysis. Muscular weakness. Complete relaxation and prostration. Lack of muscular co-ordination. General depression from heat of sun. Sensitive to a falling barometer; cold and dampness brings on many complaints. Children fear falling, grab nurse or crib. Sluggish circulation. Nervous affections of cigarmakers. Influenza. Measles. Pellagra.

Mind.--Desire to be quiet, to be left alone. Dullness, languor, listless. "Discernings are lethargied. " Apathy regarding his illness. Absolute lack of fear. Delirious on falling to sleep. Emotional excitement, fear, etc, lead to bodily ailments. Bad effects from fright, fear, exciting news. Stage fright. Child starts and grasps the nurse, and screams as if afraid of falling (Bor).

Head.--Vertigo, spreading from occiput. Heaviness of head; band-feeling around and occipital headache. Dull, heavy ache, with heaviness of eyelids; bruised sensation; better, compression and lying with head high. Pain in temple, extending into ear and wing of nose, chin. Headache, with muscular soreness of neck and shoulders. Headache preceded by blindness; better, profuse urination. Scalp sore to touch. Delirious on falling asleep. Wants to have head raised on pillow.

Eyes.--Ptosis; eyelids heavy; patient can hardly open them. Double vision. Disturbed muscular apparatus. Corrects blurring and discomfort in eyes even after accurately adjusted glasses. Vision blurred, smoky (Cycl; Phos). Dim-sighted; pupils dilated and insensible to light. Orbital neuralgia, with contraction and twitching of muscles. Bruised pain back of the orbits. One pupil dilated, the other contracted. Deep inflammations, with haziness of vitreous. Serous inflammations. Albuminuric retinitis. Detached retina, glaucoma and descemetitis. Hysterical amblyopia.

Nose.--Sneezing; fullness at root of nose. Dryness of nasal fossæ. Swelling of turbinates. Watery, excoriating discharge. Acute coryza, with dull headache and fever.

Face.--Hot heavy, flushed, besotted-looking (Bapt; Op). Neuralgia of face. Dusky hue of face, with vertigo and dim vision. Facial muscles contracted, especially around the mouth. Chin quivers. Lower jaw dropped.

Mouth.--Putrid taste and breath. Tongue numb, thick, coated, yellowish, tremble, paralyzed.

Throat.--Difficult swallowing, especially of warm food. Itching and tickling in soft palate and naso-pharynx. Pain in sterno-cleido-mastoid, back of parotid. Tonsils swollen. Throat feels rough, burning. Post-diphtheritic paralysis. Tonsillitis; shooting pain into ear. Feeling of a lump in throat that cannot be swallowed. Aphonia. Swallowing causes pain in ear (Hep; Nux). Difficult swallowing. Pain from throat to ear.

Stomach.--As a rule, the Gelsemium patient has no thirst. Hiccough; worse in the evening. Sensation of emptiness and weakness at the pit of the stomach, or of an oppression, like a heavy load.

Stool.--Diarrhœa from emotional excitement, fright, bad news (Phos ac). Stool painless or involuntary. Cream-colored (Calc), tea-green. Partial paralysis of rectum and sphincter.

Urine.--Profuse, clear, watery, with chilliness and tremulousness. Dysuria. Partial paralysis of bladder; flow intermittent (Clematis). Retention.

Female.--Rigid os (Bell). Vaginismus. False labor-pains; pains pass up back. Dysmenorrhœa, with scanty flow; menses retarded. Pain extends to back and hips. Aphonia and sore throat during menses. Sensation as if uterus were squeezed (Cham; Nux v; Ustilago).

Male.--Spermatorrhœa, without erections. Genitals cold and relaxed (Phos ac). Scrotum continually sweating. Gonorrhœa, first stage; discharge scanty; tendency to corrode; little pain, but much heat; smarting at meatus.

Respiratory.--Slowness of breathing, with great prostration. Oppression about chest. Dry cough, with sore chest and fluent coryza. Spasm of the glottis. Aphonia; acute bronchitis, respiration quickened, spasmodic affections of lungs and diaphragm.

Heart.--A feeling as if it were necessary to keep in motion, or else heart's action would cease. Slow pulse (Dig; Kalm; Apoc; Can). Palpitation; pulse soft, weak, full and flowing. Pulse slow when quiet, but greatly accelerated on motion. Weak, slow pulse of old age.

Back.--Dull, heavy pain. Complete relaxation of the whole muscular system. Languor; muscles feel bruised. Every little exertion causes fatigue. Pain in neck, especially upper sterno-cleido muscles. Dull aching in lumbar and sacral region, passing upward. Pain in muscles of back, hips, and lower extremities, mostly deep-seated.

Extremities.--Loss of power of muscular control. Cramp in muscles of forearm. Professional neuroses. Writer's cramp. Excessive trembling and weakness of all limbs. Hysteric convulsions. Fatigue after slight exercise.

Sleep.--Cannot get fully to sleep. Delirious on falling asleep. Insomnia from exhaustion; from uncontrollable thinking; tobacco. Yawning. Sleepless from nervous irritation (Coffea).

Fever.--Wants to be held, because he shakes so. Pulse slow, full, soft, compressible. Chilliness up and down back. Heat and sweat stages, long and exhausting. Dumb-ague, with much muscular soreness, great prostration, and violent headache. Nervous chills. Bilious remittent fever, with stupor, dizziness, faintness; thirstless, prostrated. Chill, without thirst, along spine; wave-like, extending upward from sacrum to occiput.

Skin.--Hot, dry, itching, measle-like eruption. Erysipelas. Measles, catarrhal symptoms; aids in bringing out eruption. Retrocedent, with livid spots. Scarlet fever with stupor and flushed face.

Modalities.--Worse, damp weather, fog, before a thunderstorm, emotion, or excitement, bad news, tobacco-smoking, when thinking of his ailments; at 10 am. Better, bending forward, by profuse urination, open air, continued motion, stimulants.

Relationship.--Compare: Ignatia (gastric affections of cigarmakers); Baptisa; Ipecac; Acon; Bell; Cimicif; Magnes phos (Gelsem contains some Magnes phos). Culex--(vertigo on blowing the nose with fullness of the ears).

Antidotes: China; Coffea; Dig. Alcoholic stimulants relieve all complaints where Gelsem is useful.

Dose.--Tincture, to thirtieth attenuation; first to third most often used.

| **Gelsemium Patient** | By: girilal<br>New Jersey USA | September 18 2006 |

Gelsemium

(No self confidence)

1. Fears losing self control
2. Fears talking
3. Irritable when spoken to.
4. Desires to be silence.
5. Help wants to be
6. Loves consolation.

Wants complete silence. Even little sound made by water drops bothers him. Thinks this time he tolerated the pain but next time he won’t.

Fears his body or muscle will stop working.
He is a coward, but if he gathers up his will power he wins big fights.

Natrum Mur. Gets angry when consoled
Ignatia Consolation makes her angrier.
Gelsemium Likes consolation, clings to the doctor who consoles him.

Argentum Nit. Hurry, everybody must hurry. Hurry while eating.
Gelsemium No Hurry.

Bryonia Wants complete silence and peace only around him but jumps up to talk business.
Gelsemium Loves silence and peace in general.

Gentian

Is the remedy for the relatively mild downheartedness and despondency that follows when something has gone wrong. As soon as things start to go right again this kind of despondency tends to lift by itself, but the remedy can be used to lift it the sooner so that the person is better able to make things go right, instead of just hoping they will do so.

Gentian is often confused with Gorse, but in fact they can be told apart quite easily. People in a Gorse state have decided to give up and so feel completely without hope. They have pitched their tents and refuse to be encouraged, and even if they are persuaded to try to find a way out they will do so grudgingly, assuring everyone that there is no use even trying. People in a Gentian state are discouraged: but they will soon pick up again when things start to go right.

Dr Bach's description
Those who are easily discouraged. They may be progressing well in illness, or in the affairs of their daily life, but any small delay or hindrance to progress causes doubt and soon disheartens them.

GENTIANA LUTEA
Yellow Gentian

Stomach symptoms marked. Acts as a tonic, increasing appetite.

Head.--Vertigo, worse, rising or motion; better open air. Frontal headache, better eating and open air. Brain feels loose, head tender. Aching in eyes.

Throat.--Dry. Thick saliva.

Stomach.--Acid risings, ravenous hunger, nausea, weight and aching in stomach. Inflation and tension of stomach and abdomen (Pothos). Colic, umbilical region sensitive to touch. Flatulence.

Relationship.--Compare: Gentiana quinque flora (intermittent fever; dyspepsia, cholera infantum, weakness); Gentiana cruciata (throat symptoms in addition to similar stomach symptoms; dysphagia; vertigo with headache; pressing inward sensation in eyes; constricted throat and head and abdomen. Distention, fullness and tightness in abdomen. Creeping over body as from fleas). Hydrast; Nux.

Dose.--First to third attenuation.

Good wishes. Milap Singh

GERANIUM MACULATUM
Crane's-bill

Habitual sick headaches. Profuse, hæmorrhages, pulmonary and from different organs. Vomiting of blood. Ulceration of stomach. Atonic and foul ulcers. Summer complaint.

Head.--Giddiness, with diplopia; better, closing eyes. Ptosis and dilated pupils. Sick headache.

Mouth.--Dry; tip of tongue burning. Pharyngitis.

Stomach.--Catarrhal gastritis with profuse secretion, tendency to ulceration and passive hæmorrhage. Lessens the vomiting in gastric ulcer.

Stool.--Constant desire to go to stool, with inability to pass anything for some time. Chronic diarrhœa, with offensive mucus. Constipation.

Female.--Menses too profuse. Post-partum hæmorrhage. Sore nipples (Eup arom).

Relationship.--Compare: Geranin 1x. Constant hawking and spitting in elderly people. Erodium-Hemlock-Stork's bill--(a popular hæmostatic in Russia, and especially used for metrorrhagia and menorrhagia); Hydrastinin; Cinch; Sabin.

Dose.--Tincture, half-dram doses in gastric ulcer. Tincture, to third attenuation, as a general rule. Locally, in ulcers, it will destroy the pyogenic membrane.

Good wishes. Milap Singh

Ginkgo Biloba
Ginkgo Biloba Leaf)

The ginkgo is the oldest living tree species, geological records indicate this plant has been growing on earth for 150 - 200 million years. Chinese monks are credited with keeping the tree in existence, as a sacred herb. It was first brought to Europe in the 1700's and it is now a commonly prescribed drug in France and Germany. It is one of the most well-researched herbs in the world.
In the last 30 years, more that 300 studies have given clinical evidence that ginkgo prevents and benefits many problems throughout the entire body. Ginkgo is gaining recognition as a brain tonic that enhances memory because of its positive effects on the vascular system, especially in the cerebellum. It is also used as a treatment for vertigo, tinnitus (ringing in the ears) and a variety of neurological disorders and circulation problems. Ginkgo may help to counteract the effects of aging, including mental fatigue and lack of energy.

Ginkgo works by increasing blood flow to the brain and throughout the body's network of blood vessels that supply blood and oxygen to the organ systems. It increases metabolism efficiency, regulates neurotransmitters, and boosts oxygen levels in the brain which uses 20% of the body's oxygen.

Benefits of enhanced circulation in the brain include improved short and long term memory, increased reaction time and improved mental clarity. Ginkgo is often used to treat elderly persons with Alzheimer's and other symptoms of cerebral insufficiency. Cerebral insufficiency is a general term for a collection of symptoms that include difficulties of concentration and memory, absentmindedness, confusion, lack of energy, depressive mood, anxiety, dizziness, tinnitus, and headache.

Ginkgo constituents are beneficial for a variety of imbalances and deterioration in the brain and body. Standardized ginkgo extract inhibits platelet activity factor (PAF), which is a common allergen in the body. Physical stress, and poor quality food can overstimulate PAF production; in other words, blood clotting. Excessive PAF can help cause cardiovascular disease, brain damage, hearing disorders and other immune and inflammatory diseases.

Ginkgo has been used to relieve tension and anxiety and improve mental alertness, elevate mood and restore energy.

Ginkgo has two groups of active substances, flavonoids and terpene lactones, including ginkgolides A, B, and C, bilobalide, quercetin, and kaempferol. The ginkgolides have been shown to control allergic inflammation, anaphylactic shock and asthma.

Ginkgo also acts as a powerful antioxidant and contributes to the oxidation of free radicals which are believed to contribute to premature aging and dementia. Antioxidants also protect the eyes, cardiovascular system and central nervous system.

Ginkgo may also help control the transformation of cholesterol to plaque associated with the hardening of arteries, and can relax constricted blood vessels.

The herb has been used in treatment of other circulation-related disorders such as diabetic peripheral vascular disease, Raynaud's syndrome, hemorrhoids and varicose veins. It can also aid in the treatment of insufficient circulation and complications from stroke and skull injuries. Ginkgo's beneficial effects on the circulatory system also can be of benefit in the treatment of eye and ear disorders.

Studies have confirmed that ginkgo increases blood flow to the retina, and can slow retinal deterioration resulting in an increase of visual acuity. In clinical tests ginkgo has improved hearing loss in the elderly. It also improves circulation in the extremities relieving cold hands and feet, swelling in the limbs and chronic arterial blockage. Among other things, ginkgo is being investigated as a potential treatment to prevent the rejection of transplanted organs, as a treatment for asthma and for toxic shock syndrome.

Parts Used: Dried leaf.

Common Use: Ginkgo has been shown to be nutritional support for mental alertness, enhanced vitality level, circulatory health and blood vessel health. Its high antioxidant activity is valuable for fighting age related conditions. All over the world, people have claimed Ginkgo to be beneficial in the fight against the gradual erosion of energy associated with aging.

Ginkgo Biloba Mother tincture is available at homeopathy stores.

GINSENG QUINQUEFOLIUM
Aralia Quinquefolia-Wild
Ginseng-Panax
(GINSENG)

Said to be a stimulant to the secretory glands, especially salivary. Acts on the lower part of the spinal cord. Lumbago, sciatica, and rheumatism. Paralytic weakness. Hiccough. Skin symptoms, itching pimples on neck and chest.

Head.--Vertigo, with gray spots before eyes; semi-lateral headache; occipital; difficult opening of eyelids; objects appear double.

Throat.--Tonsillitis, just like Bellad, but in dark-complexioned people.

Abdomen.--Tense, painful, rumbling. Pain in right side. Loud gurgling in ileo-cæcal region. Perityphlitis.

Male.--Rheumatic pains after frequent emissions. Weakness of genital organs. Voluptuous tickling at end of urethra. Sexual excitement. Pressure in testicles.

Extremities.--Hands feel swollen. Skin feels tight. Contraction. Coldness in back and spine. Bruised pain in small of back and thighs; nightly digging in right lower limb to toes. Burning heat in tips of fingers. Eruption on upper inner thighs. Stiff, contracted joints, heaviness of lower limbs. Crackling in joints. Stiffness in back.

Relationship.--Compare: Aral; Coca. Hedera-Ivy-mental depression and skin irritation antidoted by Gunpowder.

Dose.--Tincture, to third potency.

Good wishes. Milap Singh

Nitroglycer

Glonoinum
Head

The most common feature in this remedy is the surging of blood to the head and to the heart. A patient often describes the state as a feeling as if all the blood in the body must be rushing around the heart, with a sense of heat or a boiling sensation in the region of the heart, or in the left side of the chest.

Again he complains of a surging in the head, a warm glowing sensation in the head or a feeling of intense glowing from the stomach or from the chest up into the head, attended at times with loss of consciousness.
There are also wave-like sensations in the head, as if the skull were being lifted up and lowered, or as if it were being expanded and contracted. Along with this there is most intense pain, sometimes as if the head would burst, sometimes great soreness in the head, or a sense of soreness felt in the skull. Another accompaniment of the surging is great throbbing,

synchronous with the heat of the heart, and when the skull has this soreness then the throbbing is like the beating of hammers, and every pulsation is painful, so that there are painful pulsations and sometimes painless pulsations.

The pulsations are tremendous and when they are greatest in the head they are felt also in the extremities. The fingers and toes pulsate, there is pulsation throughout the back, and it seems that the whole body throbs. If this continues a while the soreness in the skull is likely to come on and with it the painful throbbing, every throb is a pain. In this state, with every jar in stepping, and every motion, it seems as if the head would be crushed.

Throbbing:

The throbbing becomes more painful from motion. The vomiting which attends this condition relieves. The head is relieved in the open air, it is worse in the warmth, and is often relieved from the application of cold. It is made worse by lying down, or lying, with the head low. In the extremities we have great coldness. The extremities cold, pale and perspiring, the head hot and the face flushed and purple or bright red. The pupils are dilated and the eyes red. Now, if this progresses only a little while, the tongue becomes dry, red and then brown. There is no great thirst, but the mouth is very dry. The eyelids become dry and stick to the eyeballs. At times the skin becomes dry and hot, and the face is red and glistens. All degrees of confusion of mind, even loss of consciousness, will be present.

Headaches:

Have I not described to a great extent that which is seen in a typical sunstroke? It is noticeable also that Glonoine symptoms are worse in the heat of summer and relieved in winter. The dull headaches and the continuous headaches are aggravated from warm weather and ameliorated from cold.

They are worse in the sun and better in the shade. All sorts of contrivances will be resorted to by Glonoine patients to keep the sun's beat from the head. When he has had these troubles for years, and it has become a chronic state, he will never go out in the warmth of the sun without an umbrella.

Glonoine corresponds to congestive states in the head that come on suddenly, especially from heat, but also from gaslight, or from any bright light.

The headaches that book-keepers are subject to, especially in those that have at their desk, or over the head, a hot gaslight. The bright light accompanied by the heat so close to the head will make this individual subject to headaches. These headaches are relieved by going into the cold air. The head aches all day when he is at his books, and when he goes home at night and lies down the headache comes on again, and he bas to be bolstered up in bed.

He wants the head high, and cold applications to the head; the headache is relieved from a long sleep, not generally relieved from siesta. From lying down and taking a nap the headache is sometimes aggravated, but from a good long sleep, a night's sleep, he is refreshed.

His feet and hands become warm, the feverish state, and the throbbing all over the body subsides and he wakes up in the morning comfortable; but if he goes out in the sun, or goes to the gaslight, he comes home with the headache again. Since electric lights have been brought into use there is not so much heat in the light, but gas throws out an immense amount of heat in its light,

The child comes down with cerebro-spinal meningitis, the neck is drawn back, the face is intensely hot, red and shiny, the eyes congested or glassy, the head and upper part of the body are very warm, the feet and hands and lower portions of the body and the extremities are cold and covered with cold sweat.

It is a most violent congestion to the brain and spinal cord.

Convulsions come on, convulsions throughout all the limbs, the neck and whole body drawn back, opisthotonos. Cold feels good to the head; heat feels good to the extremities. The warm room increases the convulsions. When the lower limbs are covered with clothing in a cool room and the windows open the convulsions are relieved and the patient breaths more easily.

With this head congestion there is difficulty in breathing and audible palpitation.

The head is made worse from shaking or jar, from stooping, from bending head backwards, after lying down, when ascending steps. It is aggravated in damp weather, and in the sun, while working under the gaslight, after overheating with copious sweat, and from the touch of the hat.

The weight of the hat is a very common aggravation in headaches in school children. The little ones work all day in a hot stuffy room and feel better in the open air, but the weight of the hat seems an encumberance as in Nitric acid and Calc. phos.

The Glonoine patient is also worse from wine and from stimulants, and from mental application. When the headache is on he cannot think, and he cannot write. An additional hindrance to writing is that he trembles so that he cannot write. Trembling and throbbing of the fingers so that he is unable to do his work or perform any delicate work with the fingers or hands.

We have puerperal convulsions with such an appearance as I have described. We may have the same violence in congestive chills, or in any type of congestion of the brain.

Brain:

There is a milder form of trouble that calls for its use, a condition corresponding to the chronic types of disease. This milder form exists where the patient has simply what might be called a hyperemia of the brain, a rush of blood to the head when able to be about. It comes in spells, comes in moments when be least expects it; while walking on the street he feels a surging to the brain like a flush of heat and a flush on the face, his hands tremble, and the hands and feet become cold, he breaks out in a sweat; he looks around him and does not know which way to go home, he does not know where his dwelling is.

He looks in the faces of friends and they seem strange, he loses his way when be is near home. It is a confusion which soon passes away, and he feels better again. But these spells come closer together, and constitute the earlier stages of softening of the brain. This surging of blood to the brain is attended with dizziness; he rolls and staggers, and must take hold of things, and especially does he suffer in this way from a warm day, or from the heat and light of the sun.

In threatened apoplexy, and when apoplexy has taken place, if the violent pressure keeps on, think of this remedy. The clot may not be at first in the place to take life, it may be outside of the life line, but if the congestion continues that blood clot will increase. Such medicines as Opium and Glonoine relieve the blood pressure when the symptoms agree. They equalize the circulation, and the patient may not die. A paralytic condition in one arm or leg may go on for a while, and at the end of many weeks or months the motion may be regained, and the patient recover; whereas if the suitable remedy had not been administered to reduce that blood pressure the continued congestion would certainly have ended in death in a few days.

The stertorous breathing, the coma, the history, and the general appearance of an apoplectic patient are found in this remedy, but the intense heat that comes on in many cases of apoplexy along with the shiny skin and coldness of the extremities are the guiding features.

Opium is the most frequently indicated medicine, but it must not be administered in large doses. The highest potencies are the best and one single dose is enough.

In a case noted it says, "frantic attempts to jump from the window."

The headache was so intense that the patient became violent and attempted to jump from the window. You may rest assured that with his headache there was all this determination of blood to the head. It is enough to make one frantic to feel this continued hammering upon every fraction of the skull. He cannot lie down, and he cannot walk, because every step increases the jar, so you see why it is that the word "frantic" is wed there. The patient becomes frantic with the pain.

Another expression used is "disinclination to step around."

The patient wants the room perfectly still. If sitting up in bed, you will often find a Glonoine patient with both hands pressing upon the head with all the power possible until the arms are perfectly exhausted. He wants the head pressed upon all sides. Wants it bandaged, or a tight cap fitted down upon it.

The headache is worse from bending backward and from stooping forward. There are times when the headache is so severe that lying back upon the pillow cannot be tolerated.

There is a sense of great heaviness in the head. You will notice, in reading over these congestive headaches as reported, that each patient has a different way of describing his headache and yet all have the same story to tell, that of violent determination of blood to the head.

"Some months after being violently jarred by being thrown from a carriage, a sensitiveness of the upper part of the back and neck came on."

There are two strong characteristics of Glonoine in that cure, viz:

"< from wine and the < from lying down."

The other symptoms might have pointed to other remedies, but these two features are there. It is interesting when reading a case, if you have first a knowledge of the Materia Medica, to note what symptoms are verified when you do not know the Materia Medica then the case is confusing.

Now, as we glance over that description we see at once these two things verified and the rest is fairly consistent. Very commonly the pain begins in the occiput and goes to the forehead, but the whole head is in a state of throbbing.

But, we notice more particularly, the "aggravation from motion and the least noise."

This patient will sit in perfect quietude and silence for hours. You will be astonished to, know how long a Glonoine patient can sit without moving a muscle, because motion is so painful.

Also "aggravation from lying with the head low and after sleeping." it is important for you to know what that sleeping means. As I have said before, the patient very often is worse after a little sleep, but the common state is relief after a prolonged sleep. If he can sleep long enough it will subside, unless it be the congestive sleep, or coma, and then it is a different thing.

"Amelioration from cold and external pressure."

"Vertex burning hot, likewise upper part of back."

The whole crown of the head feels as if it were covered by a hot iron, as if an oven were close by. Hot, especially in the back of the neck and between the shoulders.

The burning heat seems to appear at the top of the head and extend down between the shoulders; a sensation of heat, as from a band.

"Face bluish, with a heavy, stupid expression."

The face is bright red, but if the condition becomes severe the face assumes a dusky appearance, and the longer this state lasts the more dusky it becomes; that is true with apoplexy and also with sunstroke. When the sunstroke first comes on the face is bright red, intensely hot and shiny, but as the heat increases the face grows dusky, even to purple. In all of these cerebral congestions there is a stupid, heavy expression, even going on to coma.

"Frequent deep inspirations."

With this congestion of the head there is commonly vomiting, palpitation of the heart, pain in the stomach, great difficulty in breathing and finally loss of consciousness. In another clinical case reported we read:

"Every pulsation is felt as if the head would burst."

Now, suppose the head bones were already intensely sensitive and sore and the head filled as full as possible with blood, and then you commenced hammering upon the blood column you can understand that the pain would be most intense and would soon end in stupefaction.

"Sunken eyes, bluish pallor under the eyes."

"Red eyes, with photophobia; optical illusions.

Black specks before the eyes; blindness."

"Face pale, in spite of high fever."

In all of these cerebral congestions of great violence the pulse fluctuates; it even becomes fine and wiry and hard; sometimes becomes irregular and also slow.

Another common accompaniment of these congestions is tumefaction about the neck. The neck feels full. The collar must be opened as it causes choking, as if he would suffocate. Even in the chronic state in the one who stands upon the street corner not knowing his way home because of the surging of blood in the head, that state is accompanied by choking and the collar causes uneasiness about the neck like Lach. He chokes and swells up under the ears. There is not only a sensation, but with the sensation there is actual swelling. Tumefaction about the neck and throat, under the chin, and the glands become swollen.

The next circumstance in the text that brings forth the general aspect of the remedy is in connection with the catamenia. The menstrual flow does not appear, it is delayed, with violent

congestion to the head, violent headaches and these symptoms already described. These congestions may also come on during the menstrual period. Again, if a uterine hemorrhage stops suddenly, or a copious flow from any part stops suddenly, the patient comes down with great violence and the blood rushes to the head.
There are many conditions and complaints in life where we have surging of blood to the head, when this will be the remedy wanted. Persons who are subject to palpitation with dyspnea, upon any effort, he cannot go uphill, he cannot walk along the pavement without bringing on palpitation and dyspnea; any little exertion or excitement brings on the rush of blood to the heart and fainting spells; fainting, spells in women, who are not supposed to be subject to fainting. Great weakness, palpitation, trembling of the limbs, shaking of one or both hands as with palsy.
"Laborious action of the heart" is a strong feature of the remedy; pulsation all over.

Fluttering in the region of the heart. Pulse quick, irregular, slow or quick and wiry. There are some persons that are apparently plethoric; very much affected by the slightest exertion and who have pulsation all over; pulsation in a warm room. They are sometimes relieved by opening the window if it is cool, by fanning, by cold air, by cold applications to the head. In keeping with the remedy, this is clinical application of it.

"Children get sick in the night after sitting up at an open fire or falling asleep there."
"Bad effects from having the hair cut."
Bell. is generally thought of for taking cold in the head from having the hair cut.
"Bad effects from being exposed to the sun's rays."
"Bad effects from sunstroke."

| **Re: Glonoinum** | By: girilal<br>New Jersey USA | September 21 2006 |
|---|---|---|

This is Nitroglycerine; the heavy explosive stuff bombs are made of. In homoeopathy we use Glonoinum for sudden, heavy symptoms together with the feeling as if you, or a part of you, will explode.

There is a striking congestion to the head and the heart. It is as if all blood is compressed in the head, with heavy pulsation and a burning hot head. There is a heavy headache, as if the head will burst. Every footstep causes a painful pulsation. The patient holds the head with both hands, trying to stay motionless. The brains feel too large for the skull. This burning hot feeling can also be located in the heart region, causing violent palpitations. There can also be an alternative congestion of the head and the heart. During the congestion in the head the patient is confused and stupefied; convulsions are possible.

Glonoinum can be the right remedy in case of a sunstroke and sun headache, migraine, meningitis or a stroke. Also overheating (open fire, head under gaslight) can lead to this situation.

This remedy will regulate the circulation and the blood pressure.

Symptoms aggravate in the sun, by warmth, by movements and by alcohol. Open air and cold ameliorate, as well as vomiting.

PHARMACIE
OST
GLYCERINE PURE

GLYCERINUM
Glycerine

Used homeopathically, dynamized Glycerine seems to act

deeply and long, building up tissue, hence of great use in marasmus, debility, mental and physical, diabetes, etc. It disturbs nutrition in its primary action, and, secondarily, seems to improve the general state of nutrition (Dr. Wm. B. Griggs).

Head.--Feels full, throbs; mentally confused. Severe headache two days be before menstruation. Occiput feels full.

Nose.--Stopped up, sneezing, irritating coryza. Sensation of crawling on mucous membrane. Post-nasal dripping.

Chest.--Hacking cough with sense of weakness. Chest seems full. Influenzal pneumonia.

Stomach.--Fermentation, burning in stomach and œsophagus.

Urinary.--Profuse and frequent urination. Increased specific gravity and sugar. Diabetes.

Female.--Profuse, long-lasting flow with bearing down heaviness in uterus. General sense of exhaustion.

Extremities.--Rheumatic pains of a remittent type. Feet painful and hot, feel enlarged.

Relationship.--Compare: Lactic acid; Gelsemium; Calc.

Dose.--Thirtieth and higher potencies. Pure Glycerine in teaspoonful doses, t.i.d, with lemon juice for pernicious anæmia.

Good wishes. Milap Singh

GNAPHALIUM POLYCEPHALUM
Cud-weed-Old Balsa
(GNAPHALIUM)

A remedy of unquestioned benefit in sciatica, when pain is associated with numbness of the part affected. Rheumatism and morning diarrhœa. Polyuria.

Face.--Intermittent pains of superior maxillary of both sides.

Abdomen.--Borborygmus. Colic; pain in various parts of the abdomen. Irritated prostate. First stage of cholera infantum; vomiting and purging.

Female.--Weight and fullness in pelvis. Dysmenorrhœa, with scanty and painful menses.

Back.--Chronic backache in lumbar region; better resting on back. Lumbago with numbness in lower part of back and weight in pelvis.

Arum Triphyllum

Extremities.--Cramps in calves of legs and feet when in bed. Rheumatic pain in ankle joints and legs. Intense pain along the sciatic nerve; numbness alternates with pain. Frequent pains in calves and feet. Gouty pains in big toes. Better, drawing limbs up, flexing thigh on abdomen. Gouty concretions (Ammon benz). Anterior crural neuralgia (Staph). Pain in joints as if they lacked oil. Chronic muscular rheumatism of back and neck.

Relationship.--Compare: Xanthoxyl; Chamom; Pulsat.

Dose.--Third to thirtieth potency.

Good wishes. Milap Singh

| **Re:GNAPHALIUM POLYCEPHALUM** | By: garcot<br>Bangalore | October 16 2009 |
|---|---|---|

According to Arthur Hill Grimmer, M. D.

Gnaphalium: Its sphere of action is wide in painful states and its power effective. It stands high in the group of remedies for pain, therefore it should be studied and compared with Coloc., its nearest analogue in periodical intermittent nerve pains nor in gastrointestinal, pains and in diarrheic conditions.

Coloc. is relieved by pressure, Gnaphalium is not Coloc. has at 4 P. M. < like Lyc. and Hellebore, which has never been observed with Gnaph. with exception of the headaches which may occur at three or four P. M.

Cham. must be compared in painful states because of the marked irritability occurring in both remedies. Both Cham. and Gnaph. have numbness with the pains ; Gnaph. more often half numbness alternating with the pain.

Cham. is relieved by the walking or is compelled to walk with great irritability and anger and with many pains, toothache especially, is < by applied heat.

Gnaph. is > sitting in a chair with painful leg drawn up and its headache is > by cold bathing or applications.

In both these remedies the nerve pains are < at night.

The mercuries, especially Merc. cor. in dysenteric conditions, should be studied and compared.

Mag. phos. has intermittent, severe, neuralgic pains which are > by heat and pressure and rest.

Rhus tox. must be thought of in painful conditions where motion and heat relieve ; it, too has numbness with the pain.

In the upper limbs feeling of weakness as if unable to lift the slightest weight rheumatic pains in the elbows and shoulders.

In the lower limbs the pains are first dull then darting or cutting from the right hip joint extending posteriorly downward to the foot. Worse lying down, from motion, by stepping, relieved sitting in a chair with painful limb drawn up. Intense pain along the sciatic nerve causing the patient to toss and roll and cry out in great agony. Numbness at times alternates with, or takes the place of the pain. Exercise is very fatiguing.

Cramps in calves or feet, at night in bed.
Gouty pains in the large toes.

A frequent characteristic symptom is pain extending along cord to testicle.

This remedy has cured severe sciatica after Rhus., Coloc. and Sulphur failed.

It likewise has affinity for the anterior crural nerve.

The nerve and rheumatic symptoms are worse in cold, damp weather ; from exertion and strain, at night and in the early morning ; better sitting in a chair with painful limb drawn up.

The headaches are relieved by cold bathing.

There are two reasons for bringing this fragmentary sketch to your attention. First, because Gnaphalium is one of the greatest medicines not only for the relief of pain but for its cure as well. Second, it is a far deeper remedy than most homœopathic physicians suspect it to be because it has cured very chronic and obstinate cases of arthritis after the failure of some of our best proven and successful polychrests.

| **Re: GNAPHALIUM POLYCEPHALUM** | By: Joe De Livera<br>Sri Lanka | October 17 2009 |

I have prescribed Gnaphalium 200c in the Wet dose for patients who presented severe cases of Sciatica and can confirm that it is a very effective remedy.

I have also prescribed Colocynthis 200c in the Wet dose for patients who do not respond to Gnaphalium and this remedy too is an effective alternative.

Arnica 200 in the Wet dose also helps if taken alternatively with the above twice daily.

| **Re:GNAPHALIUM POLYCEPHALUM** | By: garcot<br>Bangalore | October 18 2009 |

Dear Joe,

Thanks for your confirmation on the efficacy of Gnaphalium in higher potencies too.

It is indeed a great remedy when remedies like Colocynthis, Rhus Tox fail to yield results.

Warm regards
Garcot

Gorse...
...is the remedy for people who have given up belief that there is any hope for them. It is a far stronger kind of downheartedness than the Gentian state, because Gorse people almost wilfully refuse to be encouraged, so certain are they that their case is hopeless. If ill, they may think of themselves as incurable, or say that they inherited this or that from their families so that nothing can be done for them.

Gorse is however classed by Dr Bach as a remedy for uncertainty, and not as a remedy for despair like for example Sweet Chestnut. This demonstrates that the main problem with Gorse people is a loss of certainty: if they can be persuaded to see things in a different light their faith in their lives would be renewed and they could go forward with a surer step. This is what the Gorse remedy helps to achieve.

Dr Bach's description
Very great hopelessness, they have given up belief that more can be done for them. Under persuasion or to please others they may try different treatments, at the same time assuring those around that there is so little hope of relief.

Good wishes. Milap Singh

GOSSYPIUM HERBACEUM
Cotton-plant
(GOSSYPIUM)

A powerful emmenagogue, used in physiological doses. Homeopathically, it corresponds to many reflex conditions, depending on disturbed uterine function and pregnancy. Gossypium will relieve tardy menses, especially with sensation that the flow is about to start and yet does not do so. Tall, bloodless patients, with nervous chills.

Head.--Pain in cervical region with tendency for head to draw backward with nervousness.

Stomach.--Nausea, with inclination to vomit before breakfast. Anorexia, with uneasy feeling at scrobiculum at time of menses.

Female.--Labia swollen and itching. Intermittent pain in ovaries. Retained placenta. Tumor of the breast with swelling of axillary glands. Morning sickness, with sensitive uterine region. Suppressed menstruation. Menses too watery. Backache, weight and dragging in pelvis. Uterine sub-involution and fibroids, with gastric pain and debility.

Relationship.--Compare: Action similar to Ergot when made from fresh green root. Lilium; Cimicif; Sabina.

Dose.--Tincture, to sixth attenuation.

Good wishes. Milap Singh

GRANATUM
Pomegranate

As a vermifuge for the expulsion of tapeworm, and homeopathically for the following symptomatic indications. Salivation, with nausea, and vertigo. Spasm of the glottis.

Head.--Feels empty. Sunken eyes; pupils dilated; weak sight. Vertigo very persistent.

Stomach.--Constant hunger. Poor digestion. Loses flesh. Vomiting at night.

Abdomen.--Pain in stomach and abdomen; worse about umbilicus (Cocc; Nux m; Plumb); ineffectual urging. Itching at anus. Dragging in vaginal region, as if hernia would protrude. Swelling resembling umbilical hernia.

Chest.--Oppressed, with sighing. Pain between shoulders; even clothing is oppressive.

Skin.--Itching in palms. Sensation as if pimples would break out. Jaundiced complexion.

Extremities.--Pain around shoulders, as if heavy load had been carried. Pain in all finger-joints. Tearing in knee-joint. Convulsive movements.

Relationship.--Compare: Pelletierine (one of its constituents -an anthelminitic, especially for tapeworm); Cina; Kousso.

Dose.--First to third potency.

Good wishes. Milap Singh

## Graphites

The complaints of Graphites are worse morning, evening and during the NIGHT, especially before midnight. It is useful in people who are morbidly fat, or have been fat and are now emaciating; with constipation more commonly than diarrhoea; in women in these conditions whose menstrual habit is pale, late, short and scanty; catarrhal discharges that are albuminous and viscid represent to the mind some peculiar general states of the sick man not explainable and not common to diseased conditions nor to many remedies; hence, strange, rare and peculiar. Raw surfaces upon the skin are generally marked by such viscid glutinous discharges.

It is a very deep acting remedy, like all carbons, and is accompanied with induration and burning in the base of the ulcers, inflamed tissues and old cicatrices; hence, its great usefulness in cancerous growths and ulceration.
Cancerous development in old cicatrices is a strong feature of this remedy. Contraction of tendons, especially behind the knee. It has hemorrhagic oozing of pale blood. In the higher sense the patient is anaemic and chlorotic. From eruptions, catarrhal discharges, menstrual flow, ulcers, breath and perspiration there is marked offensiveness (like Carbo v., Psorinum, Kali phos., Kali ars.).
When eruptions or discharges have disappeared suddenly from any cause and grave chronic phenomena have followed Graphites is one of the medicines to be studied. Scrofulous conditions and swelling of glands; recurrent herpes upon all parts of the body and especially about the anus and genitals; burning in many parts and especially in old cicatrices; general dropsical tendency; weakness in muscles and tendons after straining them by overlifting.

Modalities:

The patient is very sensitive to cold and needs warm clothing; he is sensitive to the cold in winter and to the heat in summer; he is sensitive to a warm room and desires open air which is grateful. Worse in a warm bed; complaints come on from becoming cold or heated; the headaches are worse in a warm room and better in the open air. Graphites has cured deep seated spinal complaints, and in such cases the patient delights to lie heavily covered in a cold draft from an open window.
It is easy to see in this, the resemblance to Carbo veg., which often cures when the patient wants to be fanned. Craving for air is strong in the carbons, yet often easily chilled and just as easily overheated and complaints that come from overheating are related to the carbons. This one becomes ill from being overheated; exertion makes all symptoms worse.
Motion increases all symptoms except the numbness and general feeling of stagnation which come on during rest. Extreme weakness. Weakness and desire to lie down. Paralysis

in any part but especially in the lower limbs; sensation of paralysis or stagnation creeps over the body and limbs.
He is made sick by bathing and is sensitive to cold, damp weather. What there is in the general life to cause eruptions to come out in the bends of the joints must be left for others to explain, but such is the case with this wonderful remedy.

Convulsions:

The same may be said of rawness and excoriation in the same regions. Cataleptic conditions are very marked in which the patient is conscious but without power to move or speak; tremulous sensation throughout the body; sudden sinking of strength; sudden weakness. Constriction in many parts. It has cured many kinds of convulsions. It is not the remedy for the convulsion, but in chronic sickness where the convulsion is but one of many elements it is often suitable. It has cured epilepsy and hysterio-epilepsy and epileptiform spasms many times when the totality of symptoms furnished the basis for the prescription.
A careful comparison of the symptoms shows that this remedy acts predominantly on the left side of the body. The patient is oversensitive to pain and outer parts are very sensitive.

Pains:

The pains are burning, drawing, pressing. Soreness. Stitching and tearing. Numbness is more characteristic than pain. The formation of fissures in all the commissures and in the anus with cracked and bleeding skin in many parts with much hardening; the tendency to grow wens on the scalp and elsewhere are features of this remedy not to be overlooked, and when coupled with the mental symptoms form such a strong and striking image of perverted vital action that the neophyte should not overlook Graphites.
It is as broad and deep as Sulphur, showing the great similarity to this great remedy in chronic cases.

Mind:

The patient becomes very restless when attempting close mental work and there is a marked dread of mental work. The mental depression is extreme, and it is made worse by music; her sadness is so great that she thinks only of death and salvation. Grief and vexation cause of recurrence of all her distressing mental sufferings.

Her moods are constantly changing; while she may recall all the events of youth, recent events are forgotten; slow of thought and weakness of mind worse in the morning; often excited, hurried and exhilarated in the evening; extremely fretful and impatient; irritable about trifles and very critical. Irresolution is a marked symptom.

She cannot make, up her mind to do or not to do. Extreme activity of mind in the evening and first half of the night, which, prevents sleep until midnight; apprehensive and distressed in the. morning and excited. in the evening; extreme anxiety even to desperation.

Vertigo in the morning on waking; in the evening; on looking upwards; on rising from stooping; compelled to lie down; with inclination to fall forward.

When the above general symptoms strongly predominate in any given sickness the following particulars will be cured by this remedy.

Hyperaemia of the brain in the evening in a warm room; frequent moments of congestion to head and face with faint feelings; numbness felt in whole head; burning spot on the vertex; drawing, pressing and tearing in forehead over the eyes; stitching pains in the temples; pain from temples to side of face and to shoulders; one-sided headaches in the morning on waking; tearing in one side of head extending to teeth and side of neck; pressing pain on the vertex and occiput; compressing, constricting pain in occiput and back of neck; pain as though the head were numb; violent headaches during menses.

Head:

The headaches are brought on from becoming cold and from looking into a bright light; are worse in a warm room, and better in the open air. There is marked soreness in the scalp; itching of the scalp with or without eruptions; eczema of the scalp oozing a glutinous fluid; eczema behind the cars; fissures that bleed behind the ears; scaly eruptions on scalp; falling out of the hair; bald, shiny patches on the scalp.

Eyes:

Extreme photophobia in the sunlight with copious lachrymation. No remedy has photophobia more marked than Graphites. Pain in the eyes and over the eyes by looking long toward a sun lighted window; complaints from eyestrain.
Letters appear double when writing, letters run together when reading; flickerings and fiery zigs-zags just outside the field of vision in the evening; misty vision; vanishing of sight during menses.
Burning, pressing, stitching pains in the eyes. It has cured ulceration of the cornea. Recurrent pustular inflammation of the cornea. Keratitis pustulosa in children with fissures in the canthi, extreme photophobia and eczema on the face.
Marked congestion and injected veins of the conjunctiva. Chronic lachrymation in open air, tears acrid. The fissured canthi bleed easily and itch violently. Purulent discharges from the eyes; the lids are stuck together at night; the eyes feel hot; the lids are much swollen and the margins are red, raw and bleed easily-sometimes hard; ulcers on the; margins of lids; the lids are covered with crusts; eczema of the eyelids and about the eyes; dry mucus in the lashes, styes on the lids, with drawing pain, especially when they recur frequently. Cystic tumors on the lids.

Ears:

Discharge from the ear of sticky, viscid pus; bloody, offensive. Noises in ears; cracking; bumming; hissing; ringing; rushing, roaring; reverberations. Violent roarings at night and the ears feel stopped; thundering, rolling sounds in ears.
Deafness in various degrees and he hears better in a noise. He can hear better when riding on the cars, in the roaring of the

train.
Deafness with eczematous eruptions on and behind the ears.
Stitching pains in ears in cold air. Marked swelling of the ears.

Nose:

Smell very acute; she cannot tolerate flowers; loss of smell with dryness in the nose; with coryza. Discharge from nose bloody mucus or pus, very offensive, viscid, thick, sometimes yellow.
It is a most useful remedy in chronic nasal catarrh. Very painful dryness in the nose. The bones and cartilages of the nose become very sore to touch. Sneezing and fluent coryza as marked as in Carbo veg.
Frequent attacks of coryza all winter, worse in cold air; the coryza extends to larynx, like Carbo veg; the excoriated, sore, cracked nostrils are plugged with scabs and hard mucus far up in the nose. Ulcers in the nose. Fissures in the nostrils that burn and indurate.

Face:

The face is pale, waxy and sickly.
Eczema and herpes are found on the face with glutinous moisture. Itching with or without eruptions. A sensation as of a cobweb on the face. The commissures of mouth are fissured and the fissures ulcerate and the edges become bard and there is great burning in them. The skin chaps and cracks and often becomes excoriated and bleeds. Erysipelas of the face, spreading from right to left. The beard falls out.
Crusts form on the lips and the chin is covered with eczema.
The submaxillary gland is swollen and indurated.

Mouth:

The gums are settling away from the teeth; the teeth burn and sting; drawing pain in teeth in cold wind; tearing in teeth worse from warmth.
Taste in the mouth is bitter, salty, sour and like spoiled eggs; nauseating taste in the morning; sour taste after eating. The

tongue is coated white; burning blisters on lower lip and on tip of tongue, painful ulcers on under surface of tongue, putrid odor from gums and mouth; breath smells like urine.
Dryness of the mouth in morning on waking; also in the night on waking; saliva flows from the mouth during the night.

Throat:

Chronic sore throat with ulceration and swelling; swollen tonsils; nightly pain in throat; copious white, viscid mucus; a continuation of the nasal and post nasal catarrh.
Constant choked feeling or constriction in the throat that makes swallowing difficult. Constant spasms in the throat compelling swallowing.

Stomach and abdomen:

Ravenous appetite.
Violent thirst in the morning with dry mouth and internal fever.
Aversion to meat; to cooked food; to fish; to salt, to sweets. He is driven to eat to relieve a feeling of suffocation and burning gnawing in the stomach.
Pain in the stomach, relieved by eating. Eructations bitter; sour; putrid; tasting of food eaten; of greenish water. Rancid heartburn after eating; nausea much of the time during menses, with trembling; vomits all she eats; vomiting, purging and cold sweat.
The stomach feels constantly in a spoiled state or as from indigestion. Flatulence is as marked as in Carbo veg., and the relief from belching is just as great. Burning, constriction, pulsation and cramping are frequent symptoms. Fullness, distension, pressure are constant features of Graphites.
Retching on swallowing food (like Merc. c.). Gastric catarrh with internal heat drive him to eat and drink. Gastric pains worse from cold drinks and better by warm milk; periodical gastralgia with vomiting of food soon after eating. It is a wonderful remedy for old drunkards when the gastric symptoms agree (like Carbon bisulphide).
It is a most useful remedy in hard, swollen, sore liver with weight and distress in the liver; stitches in both hypochondria, burning

in left hypochondrium when lying on it; sensitive to clothing in the liver region. Great suffering in the abdomen from flatulence; incarcerated flatus causes cramping pains, distension, and a continual source of distress.
Everything eaten seems to ferment and turn to gas; rumbling and movements felt in the abdomen; there is great burning and griping; cramping in the abdomen soon after eating; the clothing distresses the abdomen. The slightest indiscretion in eating causes increased flatus, rumbling and diarrhoea; the abdomen is distended with dropsy. Herpes zona oil the side of abdomen; herpes over lower abdomen and groin; hard swelling of inguinal glands; oedema of the abdominal walls.

Anus and stools:

From the anus there is copious discharge of very offensive flatus day and night. While diarrhoea is not so common as constipation, yet it is a marked condition in some patients, The diarrhoea is painless with much flatus, with watery, brown, putrid, lienteric stools; excoriating stools, extreme soreness of the anus; fissures of the anus; great burning. Chronic diarrhoea; from the slightest indiscretion in eating on comes a renewed attack.
With the loose stools, and with the constipated stools copious white jelly-like mucus is often found. Discharge of mucus from anus and a constant moisture about the outside parts. Large hemorrhoids extremely sore with fissures.
Constipation with large, hard, knotty, difficult stools passed with extreme pain from soreness and fissures of the anus. Long narrow stools (like Phos.). Violent burning in the anus, prolapsus of the anus.
It has cured many cases of bleeding piles of long standing where there was extreme soreness and fissures and great burning. Violent pains during stool. No desire to go to stool for many days. It requires a long time with hard straining to pass the stool.
It often suits patients who have no stool except by injection or cathartic. Violent itching of the anus; eczema and herpes near the anus or involving the anus. It has cured the stomach and

abdominal conditions that favor the tapeworm.

Genitals and urines:

The urine flows in a feeble stream, becomes very putrid after standing and deposits much red or white sediment; after standing the urine is covered with an iridescent cuticle.
After urination there is some dribbling; burning in the urinary passages and neck of the bladder when not urinating; pain in the sacrum and coccyx when urinating.
Violent sexual excitement and nightly emissions; the excitement is so strong that ejaculation comes instantly after intromission. The opposite state is also found where there is aversion to coition and erections are wanting. It is a most useful remedy for impotency following secret vice and sexual excesses. Emissions with feeble erections.
Herpes on the prepuce; excoriated and fissured glans penis; dropsical swelling of the scrotum and penis, hydrocele in small boys and baby boys. Itching and moist eruptions on the scrotum. It has cured gleety, viscid discharge from the urethra. It has cured swollen testes.
In the female it causes aversion to coition; enlarged, hard ovaries great tenderness in uterus and ovaries. It has cured ovarian tumor. Pain in the uterus when reaching high with hands; bearing down in uterine region.
It cures cauliflower excrescence of the uterus; it has restrained the growth of cancer in the cervix uteri, when there was burning and putrid bloody discharge; in this it resembles Carbo an.
Menses late, irregular, scanty, pale or mixed with scanty dark, small clots, short duration. Menses six or eight weeks apart. Menses suppressed or very late in chlorotic girls. First menses delayed. Leucorrhoea instead of the menses (Cocculus). Oedema of the vulva. Leucorrhoea in gushes day and night. Dryness and heat in the vagina; coldness in the vagina. Extreme lassitude during the menses. Many symptoms come during menses; dry cough, copious sweat; oedema of feet; hoarseness; coryza; headache; nausea; morning nausea. Violent itching of the vulva before menses; marked excoriation of the genitals and between the thighs during menses;

excoriating leucorrhoea before menses.
Leucorrhea white; yellowish-white; thin; viscid; offensive. Sore, cracked nipples in nursing women. Cancer of the breast coming in the cicatrix of an old cancer.

Larynx and cough:

sensitive to touch.
Hoarseness in the evening (like Carbo veg.). Dryness in the larynx in the night; copious glutinous mucus in the daytime.
He suffocates when falling asleep (like Lachesis) and often wakes up in the night gasping for breath; constriction of the chest.
Paroxysmal cough like whooping cough, cough is followed by expectoration of copious white viscid mucus; paroxysms come at any time It has cured whooping cough. Cough from tickling in the larynx or trachea; violent night cough; deep inspiration causes cough.
Rawness in the trachea; stitching pains in the chest.
Constriction of the heart; electric shocks in the heart; palpitation on motion or exertion with strong pulsation all over the body and in the extremities, pulse full and heard, slow during day but fast in the morning; fast pulse in evening after eating, with fever.
Itching herpetic eruption on the chest; herpes zona on left side of chest with pain. It is a useful remedy to ward off phthisis.
Enlarged hard painful glands of neck. Painless swollen glands of neck. The spine is very sensitive to the jar of the bed; pain in lumbar region as if "spine were broken "; pain in sacrum with numbness down the limbs; pain in sacrum and coccyx while urinating; itching and moisture over the coccyx.
Drawing and tearing pains in limbs; weakness of all limbs; sensation of paralysis of limbs; herpes and eczema on the limbs; marked numbness of the upper limbs, during rest and when lain on; numbness and coldness of fingers and hands.

Skin:

Rheumatic and tearing pains in shoulders, worse in left.
Herpes in axilla and bend of the elbow; horny callosities on the

palms; skin of the hands hard, fissured, hot and bleeding. Psoriasis of the hands and fingers; raw, moist places between the fingers; the finger nails thick and brittle; the finger nails become black and fall off. Great heat of palms.

Smarting and sore between the nates; excoriation from walking. Many eruptions on the thigh, but especially herpes and eczema; eruptions that ooze a glutinous fluid. Numbness of lower limbs during rest; the legs are weak and heavy as if paralyzed; oedema of the legs and feet.

Herpes in the groin and hollow of the knee. Cold feet in evening in bed; copious, offensive sweat of the feet; ulcers on the feet and legs; tearing in thighs, legs, feet and toes; burning heat in soles and heels; gouty-tearing in the toes; spreading blisters on the toes that become ulcers; the toenails become black; thick; and crippled toenails the nails are painful; ingrowing toenails.

Dreams vivid; anxious, horrible, vexatious. Sleepless before midnight; sleepiness during the day. Nightly pains in sleep. Frequent waking. Unrefreshed in the morning.

Graphites should be used more frequently in chronic recurrent intermittent fever. Chill in the evening with tearing in the limbs chill intermingled with the fever; wants to be covered in all stages chill worse after eating, better after drinking and in open air. Nightly fevers with chilliness but no sweat; dry beat evening and night, especially before midnight; anxiety and restlessness during the fever, hands and soles very hot; even burning heat.

It has chill with fever followed by sweat; sweat from slight exertion; sweat on front of body; the sweat is offensive, cold and stains yellow; copious night sweats in weakness and during phthisis; entire inability to perspire, in many chronic complaints.

Itching of the skin all over the body, with or without eruptions itching worse at night in the warm bed; itching and burning with eruptions; the skin is very hot at night; excoriation of the skin in the bends of joints.

Every injury festers. Fissures on ends of fingers, on nipples, labial commissures at anus and vulva, between the toes. Itching blotches. Erysipelas beginning in face and spreading to other parts; erysipelas beginning in face and going from right to left.

Jayashree Kanoi

| **Graphites & Eczema** | By: dr dutta | October 7 2006 |
|---|---|---|

For the sake of public, I am reproducing girilal/kuldeep's post from other forum:

Graphites for Eczema

In May of 1999 I was tracking with my friends in Himalayas. I was on a trail and we were deep in the mountains where the nearest road was 2 days away and from the road-head the nearest primitive bazaar was one day’s grueling journey.

We planned to stay in the village which was at ten thousand feet high and it was at the bottom of a pass. We saw an old man in village with severe skin eczema. He was basically bed ridden. He was sitting in the sunlight and his body full of red eruptions and glue like liquid oozing. Graphite was the clear indication. Old man got some hint that I may be able to treat his condition and he begged me to do something about him. Old man was dirt poor; he was not even able to feed himself. He told that his eczema is several years old and is progressing to take over the whole body.

I thought of mailing him Graphites 200 bottle but I was in doubt if the medicine will reach there or if he will use the medicine or what he will do when he runs out of medicine.

So I had a plan in my mind. Some medicine is better then nothing in that situation. I just bluffed that old man that I make siddha medicine. I walked out and found a small piece of clean rock. I said to old mans family that I will read some mantra and the rock will be holy. I put up an act of reading some mantras and told the man to get a pencil and he sent his grandson to bring a pencil. When pencil arrived I instructed the old man to make the symbol of his god on the rock and he made the symbol of Ganesha on the rock with the pencil.

Now I instructed the old man to put the rock in the mineral water bottle and fill it with water and shake it up about 50 times. He did it. Then I told him that he got his medicine and take two drops below the tongue two times a day and keep a gap of ½ hours between any food or drink, and whenever his medicine finished he can remove the rock and wash it dry it and mark the symbol of his deity on the rock with any pencil and he will get his medicine.

Next morning when we were about to leave the village, old man’s grandson came running to us and said that his grandpa’s condition worsened at night he had severe itching on his body. I visited to old man again and told him that this is the clear indication that the medicine is working upon him so keep taking the medicine for long time. Also he told me that his whole family took the medicine for their other various ailments and I told them not to do this because this medicine is only for skin and only for the symptoms that old man has.

In 2001 I was in Uttarkashi and I met a man from that same remote village and he gave me the news of the old man to whom I gave the siddha rock is cured and he has started curing other people’s skin disease with the same rock and a pencil. Now the old man is a celebrity in his area. That man requested a piece of holy rock for himself.

Later on I used kuldeep's method of making high potency graphite but just putting a scratch on a pebble and put it in the water bottle.

| **Homeopathy remedy for eczema** | By: annahaldar | November 1 2006 |
|---|---|---|

Dear Kuldeep,

I reviewed your suggestions on treatment for eczema
and have got few follow up questions;
I have two sons; one 41/2 years old and other 14
months. Both have eczema. As I remember, in both
children the eczema symptoms started after the age of
one year. Thye are allergic to wheat, nuts, eggs,

peas, banana and we have completely eliminated these from diet. We have started Sulphur 30 and have noticed the symptoms have worsen. Is this how the medicine is expected to work. I am concerned if he is allergic to Sulphur. How do we know if medicine is working ( i.e. should we continue for x days and then stop)? Can I give homeopathic medicine as per your treatment method and also give doctors' prescribed anti-histamine such as Zyrtec to relief the symptoms in the night?
What potency of homeopathic medicine should we start with for 41/2 and 14 month old? Do you need more background information about my children i.e. kind of eczema, mental behaviour, symptoms, etc. to recommend us a treatment plan or does your treatment method works for all types of eczema? Please help. I will very much appreciate your help. Thanks, Anna

GRATIOLA OFFICINALIS
Hedge Hyssop
(GRATIOLA)

Acts especially on gastro-intestinal tract. Chronic catarrhal conditions, leucorrhœa and gonorrhœa. Obstinate ulcers. Useful in mental troubles from overweening pride. Especially useful in females. Nux symptoms in females often met by Gratiola.

Head.--Sick headache. Rush of blood with vanishing of sight. Sensation as if brain was contracting and head became smaller. Tightness in forehead, with wrinkles in skin. Eyes dry, burn. Myopia.

Stomach.--Vertigo during and after meals; hunger and feeling of emptiness after meals. Dyspepsia, with much distention of the stomach. Cramps and colic after supper and during night, with swelling of abdomen and constipation. Dysphagia for liquids.

Clinical Symptoms Of Causticum

43,725 Pageviews
Feb 5th - Mar 5th
+
-

Stool.--Diarrhœa; green, frothy water, followed by anal burning, forcibly evacuated without pain. Constipation, with gouty acidity. Hæmorrhoids, with hypochondriasis. Rectum constricted.

Sleep.--Insomnia.

Female.--Nymphomania. Menses too profuse, premature, and too long. Leucorrhœa.

Modalities.--Worse, drinking too much water.

Relationship.--Compare: Dig; Euph; Tab; Cham; Ammon pic; Nux vom.

Dose.--Second to third potency.

Good wishes. Milap Singh

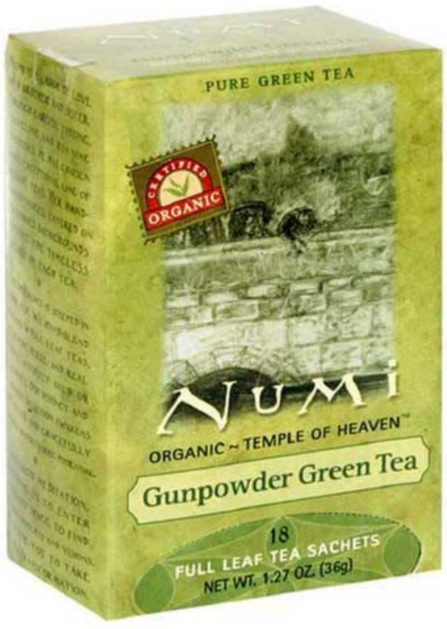
**Green Tea [Herb]**
**Started by: Jayashree at December 31 2007**

**Replies: 9 & Views: 7915** Font Bottom Of Page Page 1 of 1 Reply

| **Green Tea [Herb]** | By: Jayashree<br>Calcutta, India | December 31 2007 |
|---|---|---|

Click picture for many more pictures



Green Tea (Camellia sinensis)
Green tea consists of the leaves and delicate young leaf buds of an evergreen bush (Camellia sinensis) widely cultivated in Asia. Green tea is the freshest and least processed form of tea, the most popular human-made beverage in the world.
Traditional Uses:
Traditionally used by monks as a mild mental stimulant, green tea also has a long history as a medicinal herb, useful for treating coughs, colds, and breathing ailments.
Modern Uses:
The anticancer activity of green tea is thought related to its polyphenol content. Its chemopreventive attributes are associated with catechin epigallocatechin-3-gallate (EGCG), which is thought to induce apoptosis and tumor antiangiogenesis
In recent years scientists have begun to verify green tea's

remarkable health-promoting properties. Studies indicate that green tea may help protect against cancers of the lungs, skin, liver, pancreas, and stomach. Green tea benefits the heart by lowering cholesterol levels and reducing the tendency of blood platelets to stick together. It appears to reduce the incidence of dental caries and has shown promise as a weight-loss agent that can promote the burning of fat and help to regulate blood sugar and insulin levels. Green tea contains potent antioxidants called catechins, and tea extract is proven to increase antioxidant activity in the blood. In one study, human volunteers were supplemented with single doses of green tea catechins in free or in a phospholipid complex (phytosome) form, each containing 400 mg of epigallocatechingallate (EGCg)-a particularly potent antioxidant polyphenol. EGCg was chosen as biomarker for green tea catechin absorption, and blood levels over time were correlated to the subsequent percent variations of blood ascorbate, total glutathione, alpha-tocopherol, beta-carotene and total-antioxidant levels (Total Radical Antioxidant Parameter or TRAP). Green tea catechins were absorbed better when administered as phospholipid complex (phytosome) rather than as free catechins. Single dose intake of both forms of catechins produced a transient drop (10-20%) in blood ascorbate and total glutathione levels, but it increased total antioxidant levels (TRAP) by 16-19%. These variations were consistent with the blood levels of EGCg, ascorbate and total glutathione.

Recent findings:

• Japanese researchers reported that increased consumption of green tea prior to clinical cancer onset is significantly associated with improved prognosis of stage I and II breast cancer. Green tea appears to inhibit various human tumors in test tubes, including specific leukemic and skin cancers, plus carcinomas of the breast, gastrointestinal tract, colon, and lung.

• Topical application of the major polyphenol antioxidant in green tea (EGCg) reduces the amount of free radicals and inflammatory prostaglandins produced by immune cells in skin in response to UVB sunrays. The results suggest that skin products containing sufficient green tea extract may help protect against UVB-induced skin aging and skin cancers.

- Drinking green tea was tested in cancerous mice receiving the chemotherapeutic drug doxorubicin, with positive results suggesting that green tea may enhance cancer chemotherapy and patients' quality of life.

Do Scientists Know How It Works?

Green tea has been found to contain numerous polyphenol compounds, such as the flavonoid catechin, with antioxidant and health-promoting properties. It has more of these beneficial compounds than fermented black tea.

Safety:

The most worrisome chemical in green tea is caffeine, which occurs in small amounts (20 to 30 mg per cup, if brewed for 2 to 3 minutes) compared to coffee. Unless caffeine is added, caffeine content of the capsules should be approximately 5 to 15 mg. The potential health benefits from consuming four to five cups of green tea per day apparently outweigh any negative effects of caffeine. An increased risk of cancer of the esophagus has been associated with some tea-drinking populations, but the effect is apparently from drinking large amounts of extremely hot, salty tea. The evidence for green tea's potent antioxidant effects continues to accumulate. In a recent study, researchers found that compounds such as those found in tea not only directly scavenge free radicals but also enhance the effectiveness of the body's natural antioxidant systems.

|---|---|---|

My friend a truck driver Age 39 mentioned me that he is having arthritis in the knees and was always having pain in the knees region. One day suddenly pain was gone and he was amazed. But pain came back after a while and again it went away.

He discovered that anytime he drinks green-tea, pain disappears. Later on I told this to many people with rheumatic complains, they all felt better with green-tea.

Just buy green-tea, but heat up the water and add tea. Do not boil the leaves with the water. Boiling kills the medicinal character of the tea.

girilal

| **Re: Green Tea [Herb]** | By: Pat2006M | January 1 2008 |
|---|---|---|

In early September of 2007, I drank less than 20 bags of green tea. I have not gotton bloated around the waste since then. I've been suffering from severe bloating since September 1999 after my serious injury. I strongly suspect I got arthritis/inflammation/fibromyalgia in my digestive system.caused by the injury Even water was causing the severe bloating.

Since September 1999 I would start out being 2 inches smaller around the waste but by the end of the day I would end up being 2 or more inches bigger.

I checked with the measuring tape before making this post and indeed my waste is now only growing by 1/2" by the end of the day.

I have not drank any more green tea since early September 2007.

I wish I would drink it more often, but I just can't seem to get in the mood for it.

The only warning is that green tea can cause severe insomnia. I didn't know this when I took my first two cups. The first day I drank tea, I was fully awake until 3 a.m.

After that I diluted the tea and took sips of it through out the day.

There is not enough caffein in tea to cause insomnia. It is another ingredient in the tea that causes it.

Click picture for many more pictures

Grindelia robusta

GRINDELIA ROBUSTA
Rosin-wood
(GRINDELIA)

Both Grindelia robusta and Grindelia squarrosa have been used for the symptoms here recorded. There is practically no difference in their action, although the G. Squarrosa is credited with more splenic symptoms, dull pains and fullness in left hypochondrium; chronic malaria; gastric pains associated with splenic congestion. Induces paralysis, beginning in extremities Its action is shown on the heart first quickening, then retarding it.

Acts on the cardio-pulmonary distribution of the pneumo-gastric in dry catarrh (Tart Emetic in muco-purulent). Produces a paresis of the pneumo-gastric, interfering with respiration. Smothering after falling asleep. Asthmatic conditions, chronic bronchitis. Bronchorrhœa with tough mucus, difficult to detach. Raises the blood pressure. Nausea and retching of gastric ulcer. Sugar in urine. An effective antidote to Rhus-poisoning, locally and internally; also for burns, blisters, vaginal catarrh and herpes zoster. Hyperchlorhydria when attended with asthmatic and other neurotic symptoms. Hyperæmia of gastric mucous membrane with difficult respiration.

Head.--Feels full, as from quinine. Pain in eyeballs, running back to brain; worse, moving eyes. Pupils dilated. Purulent ophthalmia and iritis.

Respiratory.--An efficacious remedy for wheezing and oppression in bronchitic patients. The sibilant rales are disseminated with foamy mucus, very difficult to detach. Acts on the pulmonary circulation. Asthma, with profuse tenacious expectoration, which relieves. Stops breathing when falling asleep; wakes with a star, and gasps for breath. Must sit up to breathe. Cannot breathe when lying down. Pertussis, with profuse mucous secretion (Coccus). Bronchorrhœa, with tough, whitish, mucous expectoration. Sibilant rales. Weak heart and respiration. Cannot breathe lying down. Cheyne-Stokes respiration.

Spleen.--Cutting pain in region of spleen, extending to hips. Spleen enlarged (Ceanoth; Carduus).

Skin.--Rash, like roseola, with severe burning and itching. Vesicular and papular eruptions. Herpes zoster. Itching and burning. Poison oak (locally as a wash). Ulcers, with swollen, purplish skin.

Relationship.--Compare: Tart-emet. Eriodictyon; Lach; Sanguinar.

Dose.--Tincture in 1 to 15 drop doses, also lower potencies.

Good wishes. Milap Singh

GUACO
Mikania, Climbing Hemp Weed

Acts on nervous system and female organs. Antidote to bites of scorpions and serpents (Golondrina). Cholera. Bulbar paralysis. Syphilis. Cancer. Deafness-tongue heavy and difficult to move. Spinal irritation. Spinal symptoms most marked and verified. Beer drinkers threatened with apoplexy. Diarrhœa and dysentery with aching in sacrum and loins.

Headache, red face. Heaviness and difficulty in moving tongue.

Throat.--Larynx and trachea constricted; difficult deglutition. Tongue feels heavy, difficult to move.

Female.--Leucorrhœa copious, corroding, putrid, debilitating. Itching and smarting at night, as if fire were running out of parts.

Urine.--Increased, cloudy, phosphatic. Pain over region of bladder.

Back.--Pain between scapulæ, extending to forearm. Burning in nape of shoulders. Pain along spine; worse, bending. Weariness through hips and lumbar region.

Extremities.--Pain in deltoid, shoulders, elbows, arms, and fingers. Pain about hip-joint. Legs heavy. Pain in ankle-joints and soles. Paralysis of lower extremities.

Modalities.--Worse, from motion.

Relationship.--Compare: Oxal ac; Lathyr; Caust.

Dose.--Third to sixth potency.

Good wishes. Milap Singh

| **Re:GUACO** | By: garcot<br>Bangalore | March 7 2010 |

Powder:

Raintree's guaco leaf powder (Mikania guaco) has been milled into a fine powder which is suitable to stuff into capsules or to prepare your own teas, tinctures or extracts. It has been sustainably wild-harvested in the Brazilian Amazon and it is rich in active and beneficial phytochemicals that occur naturally in this plant. Guaco is a significant source of the natural plant chemical, coumarin (as high as 11% in some guaco plants). Coumarin is used to produce the commonly used anticoagulant and blood thinning drug called coumadin. Besides courmarin, other active plant chemicals in guaco include caffeolylquinic acids, cinnamic acid, glycosides, kaurenoic acids, germacranolides, stigmasterol, tannins, and resins.

Traditional Uses: for upper respiratory problems (coughs, bronchitis, colds/flu, asthma, allergies, etc.); for various internal and external bacterial and protozoal infections; for Candida and yeast infections; for snakebite and insect bites and stings; as an analgesic (pain-reliever) and anti-inflammatory for arthritis, rheumatism, intestinal inflammation, and ulcers.

---

Herb (Leaves):

Conditions Treated: Chronic Illness, Respiratory
Specific Conditions Treated: Asthma, Bronchitis
Ingredients Used: Guaco

Description: Guaco is a herb used to treat respiratory problems, like asthma, Bronchitis or allergies. It works causing a bronchodilatation, where the bronchial passages will widen, so that it will be easier to breathe.

Directions For Use: Infusion or decoction of the leaves - 50 ml, up to 4 times a day
Fluid extract of the leaves - 1 to 4ml a day

Not To Use With: anticoagulants, like heparin

Side Effects: The excessive use can cause vomiting and diarrhea.

Expected Results: It will be easier to breathe in a short time.

Expected Results Within: 1 hour

A homeopathic preparation in low potencies ( 3rd to 6th) will give all the benefits, that one enjoys in the raw form, without the danger of any side effect or aggravations due to overload.

© TopTropicals.com

GUAJACUM OFFICINALE
Resin of Lignum Vitæ
(GUAIACUM)

Chief action on fibrous tissue, and is especially adapted to the arthritic diathesis, rheumatism, and tonsillitis. Secondary syphilis. Very valuable in acute rheumatism. Free foul secretions. Unclean odor from whole body. Promotes suppuration of abscesses. Sensitiveness and aggravation from local heat. Contraction of limbs, stiffness and immobility. Feeling that he must stretch.

Mind.--Forgetful; thoughtless; staring. Slow to comprehend.

Head.--Gouty and rheumatic pain in head and face, extending to neck. Tearing pain in skull; worse, cold, wet weather. Feels swollen, and blood-vessels distended. Aching in left ear. Pains often end in a stitch, especially in head.

Eyes.--Pupils dilated. Eyelids appear too short. Pimples around eyes.

Throat.--Rheumatic sore throat with weak throat muscles. Throat dry, burns, swollen, stitches toward ear. Acute tonsillitis. Syphilitic sore throat.

Stomach.--Tongue furred. Desire for apples and other fruits. Aversion to milk. Burning in stomach. Constricted epigastric region.

Abdomen.--Intestinal fermentation. Much wind in bowels. Diarrhœa, cholera infantum.

Urinary.--Sharp stitches after urinating. Constant desire.

Respiratory.--Feels suffocated. Dry, tight cough. Fetid breath after coughing. Pleuritic stitches. Chest pains in articulations of ribs, with shortness of breathing till expectoration sets in.

Female.--Ovaritis in rheumatic patients, with irregular menstruation and dysmenorrhœa, and irritable bladder.

Back.--Pain from head to neck. Aching in nape. Stiff neck and sore shoulders. Stitches between scapulæ to occiput. Contractive pain between scapulæ.

Extremities.--Rheumatic pain in shoulders, arms and hands. Growing pains (Phos ac). Pricking in nates. Sciatica and lumbago. Gouty tearing, with contractions. Immovable stiffness. Ankle pain extending up the leg, causing lameness. Joints swollen, painful, and intolerant of pressure; can bear no heat. Stinging pain in limbs. Arthritic lancinations followed by contraction of limbs. A feeling of heat in the affected limbs.

Modalities.--Worse, from motion, heat, cold wet weather; pressure, touch, from 6 pm to 4 am. Better, external pressure.

Relationship.--Guaiacol (in the treatment of gonorrhœal epididymitis, 2 parts to 30 vaselin, locally).

Antidote: Nux. Follow Sepia.

Compare: Merc; Caust; Rhus; Mezer; Rhodod.

Dose.--Tincture, to sixth attenuation.

Good wishes. Milap Singh

GUARANA
Guarana
(PAULLINIA SORBILIS)

Contains a large percentage of Caffeine, which may explain its use as a remedy for certain forms os sick headache.

Head.--Intellectual excitement. Sick headache in persons who have used tea and coffee in excess. Throbbing headache after use of liquor.

Bowels.--Stools profuse, bloody, bright green; flakes inter-mixed; odorless. Cholera infantum.

Skin.--Chloasmata on temples and arms. Urticaria (Dulc; Apis; Chloral).

Sleep.--Uncontrollable sleepiness and heaviness of head, with flushed face after eating.

Dose.--Must be given in material doses-fifteen to sixty grains of the powder.

Good wishes. Milap Singh

| **Re:GUARANA** | By: garcot<br>Bangalore | February 3 2010 |
|---|---|---|

Description---This climbing shrub took the name of its genus from C. F. Paullini, a German medical botanist who died 1712. It has divided compound leaves, flowers yellow panicles, fruit pear shaped, three sided, three-celled capsules, with thin partitions, in each a seed like a small horse-chestnut half enclosed in an aril, flesh coloured and easily separated when dried. The seeds of Paullinia Sorbilis are often used or mixed with those of P. Cupana. Guarana is only made by the Guaranis, a tribe of South American Indians.
(Note: Marcos Garcia, Embrapa-CPAA, Manaus Amazonas, Brazil, also points out "The origin habitat of Guarana is the Amazon Region. But actually it is cultivated in others locations at Southest of Brazil." - editor HTML version - A MODERN HERBAL)

After the seeds are shelled and washed they are roasted for six hours, then put into sacks and shaken till their outside shell comes off, they are then pounded into a fine powder and made into a dough with water, and rolled into cylindrical pieces 8 inches long; these are then dried in the sun or over a slow fire, till they became very hard and are then a rough and reddish-brown colour, marbled with the seeds and testa in the mass. They break with an irregular fracture, have little smell, taste astringent, and bitter like chocolate without its oiliness, and in colour like chocolate powder; it swells up and partially dissolves in water.

---Constituents---A crystallizable principle, called guaranine, identical with caffeine, which exists in the seeds, united with tannic acid, catechutannic acid starch, and a greenish fixed oilConstituents---A crystallizable principle, called guaranine, identical with caffeine, which exists in the seeds, united with tannic acid, catechutannic acid starch, and a greenish fixed oil.

Medicinal Action and Uses---Nervine, tonic, slightly narcotic stimulant, aphrodisiac febrifuge. A beverage is made from the guaran sticks, by grating half a tablespoonful into sugar and water and drinking it like tea. The Brazilian miners drink this constantly and believe it to be a preventive of many diseases, as well as a most refreshing beverage. Their habit in travelling is to carry the stick or a lump of it in their pockets, with a palate bone or scale of a large fish with which to grate it. P. Cupana is also a favourite national diet drink, the seeds are mixed with Cassava and water, and left to ferment until almost putrid, and in this state it is the favourite drink of the Orinoco Indians. From the tannin it contains it is useful for mild forms of leucorrhoea, diarrhoea, etc., but its chief use in Europe and America is for headache, especially if of a rheumatic nature. It is a gentle excitant and serviceable where the brain is irritated or depressed by mental exertion, or where there is fatigue or exhaustion from hot weather. It has the same chemical composition as caffeine, theine and cocaine, and the same physiological action. Its benefit is for nervous headache or the distress that accompanies menstruation, or exhaustion following dissipation. It is not recommended for chronic headache or in cases where it is not desirable to increase the temperature, or excite the heart or increase arterial tension. Dysuria often follows its administration. It is used by the Indians for bowel complaints, but is not indicated in cases of constipation or blood pressure.

**Guava - Myrtaceae Psidium, the super fruit**
**Started by: garcot at September 1 2009**

**Replies: 1 & Views: 18133** Font Bottom Of Page Page 1 of 1 Reply

| **Guava - Myrtaceae Psidium, the super fruit** | By: garcot<br>Bangalore | September 1 2009 |
|---|---|---|

Click picture for many more pictures

Myrtaceae Psidium, known as guava, is a therapeutic super fruit.
It is not a herb but the leaves, fruit or bark can be used for healing.
Guava belongs to the Myrtaceae or Myrtle family and is related to clove, allspicey and eucalyptus, among others.
Some of its properties are calcium, iron, ash, protein, carbohydrates, potassium, magnesium, Vitamin A, a very high concentration of Vitamin C, omega-3 and omega-6, polyunsaturated fatty acids and dietary fibre.
Guava can be used for poor circulation, cataracts, vertigo, to help kidneys eliminate waste, to support the heart, reduce the risk of cancer, obesity, lower cholesterol, asthma, to heal wounds, diabetes, constipation, arthritis, expels placenta, prolonged menstruation, to fight free radicals, protects the prostrate and to control hypertension and cholesterol.
It is also an antiseptic, cough suppressant, an astringent, aids

with sore throats, conjunctivitis, bacterial infections, blood cleansing, gastroenteritis, respiratory problems, shock, ulcers, toothache, vaginal discharge, yeast and other imbalances.
Guava contains more than 30 chemicals and each chemical can have a healing effect on the body.
The guava leaf contains Quercetin which is thought to contribute to its anti-diarrhoea effect.
In addition, the lectin chemicals in guava were shown to bind to E-coli, thus preventing its adhesion to the intestinal wall and thus preventing infection which can cause diarrhoea.

Guavas can also be mixed with tamarinds for a refreshing healing beverage. Use them and experience their awesome healing power.

"wisdom in your body is deeper than your deepest philosophy" (Nietszche)

i use guava ( amrood ) for constipation. Luckily, since last few years Florida is growing amrood and now we can find them on many indian / pakistani stores. Recently, I heard that Florida is trying to grow Jamun. I have not seen it yet on indian / pakistani stores. Love to have Jamun. another fruit i miss is Falsa. I dont know the botanical name of it, but falsa, jamun, amrood helps in many condtions including diabetes, thyroid, blood pressure.

-Emaciation from below upwards. [Emaciation from above downwards-Sanic, Lyc, Nat-m]. Emaciation in children, pale, hollow eyed, old face, blue rings around eyes.

-Ravenous appetite. Child eats well yet loses flesh.

-Metastases-Rheumatism joints to heart, to spine, to mumps, to mammary glands or testes or pancreas.

-Alternations-
-Rheumatism <-> Piles [Collin, Sabina]
-Rheumatism <-> Dysentery [Kali-bi]
-Rheumatism <-> Skin eruptions
-Rheumatism <-> Catarrh of nose
-Diarrhoea <-> Constipation [Ant-c, Ant-t, Cheli, Podo, Nux-v, Sulph, Verat].

-Mind <-> Physicals
-Headache <-> Haemorrhoids
-Cardiac symptoms <-> Pain is joints

-Exudations into pleura, joints, from navel. Oozing of blood or moisture from navel. [Oozing of urine from navel-Hyos]

-Weakness-after influenza, after hectic fever, cannot hold up head.

-Perspiration of whole body at night (F.V. Synoptic).

-Wandering pains.

-G.I.T.-Tendency to loose stool after acute diarrhoea.

-Walking or stooping impossible from distension of abdomen.

-Bloated abdomen.

-Aversion to milk.

-Respiratory system-Dry cough following diarrhoea.

-Male genitalia-Hydrocoele in children.

-Extremities-Rheumatism from suddenly checked diarrhoea.

-Rheumatism without swelling, but gout with swelling and inflammation.

-Gout of ankle and wrist joints.

-Painful contractions of limbs (Amm-m) from cramps or following colic.

-Gout of ankle and wrist joints [Ruta].

-Skin-Purplish after suppression of eruptions, respiratory infections, after suppression of eruptions (Morrison).

ABIES CANADENSIS
PINUS CANADENSIS
Hemlock Spruce

Suited to women with uterine displacements, probably due to defective nutrition and debility (where prolapsus uteri is a symptom of general defective nutrition with little or no local congestion).

-GASTRIC SYMPTOMS are most marked. A catarrhal condition of the stomach is produced which increases the patient's hunger.

TENDENCY TO EAT FAR BEYOND CAPACITY FOR DIGESTION.

-CANINE HUNGER AND torpid liver. GNAWING, HUNGRY, FAINT FEELING at the epigastrium.

-PECULIAR CRAVINGS; for meat, pickles, radishes, turnips, artichokes, coarse food. Craving for indigestible or unsuitable articles of food - disordered digestion.

-Chilly. COLD SHIVERING AS IF BLOOD WERE ICE-WATER (Acon).

Chill extending up and down back, as if cold water dropped down the spine.

Cold-water feeling between the scapulae (Clarke;K.886).

Sensation of a WET CLOTH ON THE BACK.

-Great prostration, wants to lie down all the time. Cold, clammy skin, cold hands.

Faintness. Debility due to mal-assimilation of food.

-Burning and distension of stomach and abdomen with severe palpitation of heart.

FLATULENCE DISTURBS THE HEART'S ACTION.

Heart's action laboured.

-UTERINE DISPLACEMENTS pressure.

Sore feeling at fundus of uterus, relieved by pressure. Thinks womb is soft and feeble. Sensation as if will abort. Sensation uterus will fall out of pelvis. Lies with the legs drawn up.

-Peculiar sensations are:

-Right lung and liver feel hard and small.

-Uterus feels soft and feeble.

-Distension of stomach and abdomen with difficult respiration.

Breathing laboured, with sensation as if right lung is small and hard.

-Tipsy, swimming of the head, as if top of the head were congested.

A light headed feeling, attended with a gnawing hungry faint feeling at epigastrium.

Canine hunger, which if gratified, is followed by distension of stomach with hard beating of the heart.

-Wants to lie down. Lies with legs drawn up.

| **ABIES CANADENSIS-PINUS CANADENSIS** | By: girilal<br>New Jersey USA | September 10 2006 |
|---|---|---|

ABIES CANADENSIS-PINUS CANADENSIS
Hemlock Spruce

Mucous membranes are affected by Abies can and gastric symptoms are most marked, and a catarrhal condition of the stomach is produced. There are peculiar cravings and chilly sensations that are very characteristic, especially for women with uterine displacement, probably due to defective nutrition with debility. Respiration and heart action labored. Wants to lie down all the time; skin cold and clammy, hands cold; very faint. Right lung and liver feel small and hard. Gleet.

Head.--Feels light-headed, tipsy. Irritable.

Stomach.--Canine hunger with torpid liver. Gnawing, hungry, faint feeling at the epigastrium. Great appetite, craving for meat, pickles, radishes, turnips, artichokes, coarse food. Tendency to eat far beyond capacity for digestion. Burning and distention of stomach and abdomen with palpitation. Flatulence disturbs the heart's action. Pain in right shoulder-blade, and constipation, with burning in rectum.

Female.--Uterine displacements. Sore feeling at fundus of uterus, relieved by pressure. Prostration; wants to lie down all the time. Thinks womb is soft and feeble.

Fever.--Cold shivering, as if blood were ice-water (Acon). Chills run down back. Cold water feeling between shoulders (Ammon mur). Skin clammy and sticky. Night-sweat (China).

Dose.--First to third potency.

girilal

|---|---|---|
| **Re: Guiding Symptoms ABIES CANADENSIS-PINUS CANADENSIS** | By: girilal<br>New Jersey USA | October 25 2006 |

Like thuja or any other pine/spruce/cypress tree. Abies is also a bloating remedy.

Try it. Chew a small twig after the meals and you will notice belching/bloating increases and then a big burp.

girilal

| | | |
|---|---|---|
| **Re: Guiding Symptoms ABIES CANADENSIS-PINUS CANADENSIS** | By: girilal<br>New Jersey USA | October 25 2006 |

How to make this medicine:

Take one two liter clean empty water bottle. (Soda bottle would be fine)

Fill it up half with good mineral/spring/rain/canal or river water.

Put not more than a pinch of Abies gum in that bottle. (gum is found all over the tree or one can also used a crushed twig)

Shake the bottle vigorously, or rather bang it several times.

Take just 2 drops under the tongue. Sajjad is right, it is best suited if one feels a hard object in the tummy. I have solved some die hard cases of gerd/bad stomach.

girilal

Guiding symptoms of abis Nigra

-Useful remedy in many diseased conditions, when they are associated with gastric symptoms.

-It causes dyspepsia with functional heart symptoms, especially in the aged persons. Also useful in indigestion of those who abuse the drinking of tea and smoking or chewing of tobacco.

-The chief symptom in dyspepsia is a sensation of:

HARD BOILED EGG LODGED IN THE CARDIAC END OF THE STOMACH.

Patient describes it as if a hard lump is felt in the pit of stomach

Natrium Muriaticum (table Salt)

Picture of this second

facebook join our group +

43,725 Pageviews
Feb 5th - Mar 5th
+
−

or in the lung, which he wants to cough out.

-Continual distressing constriction just above the pit of the stomach as if everything were knotted up, worse whenever debilitated. LUMP (egg, rock, knot, stone) feeling in top of stomach.

-PAIN IN STOMACH ALWAYS COMES ON AFTER EATING. Pressing pain in the stomach, after a hearty meal, as if a load or stone was there. As though he had swallowed some indigestible substance which had stuck in his stomach would neither go down nor come up.

-TOTAL LOSS OF APPETITE, IN THE MORNING, BUT GREAT CRAVING FOR FOOD AT NOON AND AT NIGHT (waking from hunger or hunger prevents sleep). Low spirited and dull during the day, wakeful and restless at night with hunger.

-Painful sensation in chest as if something were lodged in chest, mostly on right side of sternum, and had to be coughed up; lungs feel compressed, cannot be fully expanded.

-Dyspnoea action heavy and slow. Coughing < waterbrash (waterbrash, cough during and after).

-Dyspepsia accompanied by hot head, dull headache, flushed cheeks and constipation.

-Menses at daytime only. Delayed with gradual decrease of menstruation.

| **Re: Guiding symptoms of Abis Nigra** | By: Milap Singh<br>Bangalore, India | September 13 2006 |
|---|---|---|

ABIES CANADENSIS-PINUS CANADENSIS
Hemlock Spruce

Mucous membranes are affected by Abies can and gastric symptoms are most marked, and a catarrhal condition of the stomach is produced. There are peculiar cravings and chilly sensations that are very characteristic, especially for women with uterine displacement, probably due to defective nutrition with debility. Respiration and heart action labored. Wants to lie down all the time; skin cold and clammy, hands cold; very faint. Right lung and liver feel small and hard. Gleet.

Head.--Feels light-headed, tipsy. Irritable.

Stomach.--Canine hunger with torpid liver. Gnawing, hungry, faint feeling at the epigastrium. Great appetite, craving for meat, pickles, radishes, turnips, artichokes, coarse food. Tendency to eat far beyond capacity for digestion. Burning and distention of stomach and abdomen with palpitation. Flatulence disturbs the heart's action. Pain in right shoulder-blade, and constipation, with burning in rectum.

Female.--Uterine displacements. Sore feeling at fundus of uterus, relieved by pressure. Prostration; wants to lie down all the time. Thinks womb is soft and feeble.

Fever.--Cold shivering, as if blood were ice-water (Acon). Chills run down back. Cold water feeling between shoulders (Ammon mur). Skin clammy and sticky. Night-sweat (China).

Dose.--First to third potency.

Good wishes. Milap Singh

| **How to Make Abies Nigera** | By: girilal<br>New Jersey USA | September 13 2006 |

This tree grows in front of my home in NJ. I use its resin (gum) to make this medicine. It is sparsly soluble in water but dissolves in Alcohol.

How to make this medicine:

Take one two liter clean empty water bottle. (Soda bottle would be fine)

Fill it up half with good mineral/spring/rain/canal or river water.

Put not more than a pinch of Abies Nigera gum in that bottle.

Shake the bottle vigorously, or rather bang it several times.

Take just 2 drops under the tongue. Sajjad is right, it is best suited if one feels a hard object in the tummy. I have solved some die hard cases of gerd/bad stomach.

girilal

| **Re: Guiding symptoms of Abis Nigra** | By: girilal<br>New Jersey USA | October 25 2006 |
|---|---|---|

Like thuja or any other pine/spruce/cypress tree. Abies Nigra is also a bloating remedy.

Try it. Chew a small twig after the meals and you will notice belching/bloating increases and then a big burp.

girilal

| **Re: Guiding symptoms of Abis Nigra** | By: MAX VARMA<br>New Delhi and Vancouver | October 26 2006 |
|---|---|---|

Once the digestive problem is solved by this med...the heart also begins to function more efficiently. So Abies has twin benefits.

There is only one religion....called mankind.
There is only one law....the law of Karma
There is only one God....He is everywhere and with everyone and knows everything.

GYMNOCLADUS CANADENSIS

American Coffee-tree (GYMNOCLADUS)

Sore throat, dark livid redness of fauces, and erysipelatous swelling of face are most marked. Hives. Desire for heat and quiet. Headache, throbbing in forehead and temples and over eyes, with bluish-white coating of tongue. Burning in eyes.

Face.--Sensation as of flies crawling over face. Erysipelas. Great sensibility of teeth.

Throat.--Sore; dark livid redness of fauces and tonsils. Sticking pain. Mucus in throat and hawking. Tickling, with dry cough.

Relationship.--Compare: Lachnant; Laches; Ailanth; Rhus.

Dose.--Lower attenuations.

HAEMATOXYLON CAMPECHIANUM
Logwood
(HAEMATOXYLON)

Sense of constriction is characteristic. Sensation as if a bar lay across chest. Angina pectoris.

Head.--Feels constricted; heavy, hot. Eyelids heavy.

Stomach.--Painful digging from abdomen to throat, causing pain in region of heart with oppression. Colic, tympanitis. Borborygmi and diarrhœa. Swollen, painful.

Chest.--Constriction, extending to epigastrium. Sensation of a bar across chest. Convulsive pain in heart region with oppression. Great soreness in region of heart. Palpitation.

Female.--Pain in hypogastrium, attended with slimy, whitish leucorrhœa. Weak feeling, with painful bearing down sensation at menstrual period.

Relationship.--Compare: Cactus; Colocy; Naja.

Dose.--Third potency.

Good wishes. Milap Singh

© Tom Harville

HAMAMELIS VIRGINIANA
Witch-hazel
(HAMAMELIS VIRGINICA)

Venous congestion, hæmorrhages, varicose veins, and hæmorrhoids, with bruised soreness of affected parts, seem to be the special sphere of this remedy. Acts upon the coats of the veins causing relaxation with consequent engorgement. Passive venous hæmorrhages from any part. Great value in open, painful wounds, with weakness from loss of blood. After operations, supersedes the use of morphia (Helmuth).

Head.--Wants "the respect due to me" shown. Feeling as of a bolt from temple to temple. Fullness, followed by epistaxis. Numbness over frontal bone.

Eyes.--Painful weakness; sore pain in eyes; bloodshot appearance; inflamed vessels greatly injected. Hastens absorption of intraocular hæmorrhage. Eyes feel forced out.

Nose.--Bleeding from nose profuse; flow passive, non-coagulable, with tightness in bridge of nose. Bad odor from nose.

Throat.--Mucous membrane distended and bluish; varicosis of throat.

Stomach.--Tongue feels burnt. Thirst. Blisters on side. Hæmatemesis of black blood. Throbbing and pain in stomach.

Stool.--Anus feels sore and raw. Hæmorrhoids, bleeding profusely, with soreness. Dysentery. Pulsation in rectum.

Urine.--Hæmaturia, with increased desire.

Female.--Ovarian congestion and neuralgia; feel very sore. Vicarious menstruation. Uterine hæmorrhage, bearing-down pain in back. Menses dark, profuse, with soreness in abdomen. Metrorrhagia, occurring midway between menstrual periods. Intermenstrual pain (Jas. W. Ward). Vagina very tender. Profuse leucorrhœa. Vulva itches. Milk-leg, hæmorrhoids, and sore nipples, after confinement. Metrorrhagia; passive flow. Vaginismus, ovaritis, soreness over whole abdomen. Phlegmasia alba.

Male.--Pain in spermatic cord, running into testes. Varicocele. Pain in testicles. Orchitis. Testicles enlarged, hot, and painful. Epididymitis.

Respiratory.--Hæmoptysis; tickling cough. Chest feels sore and constricted.

Back.--Sore pain down cervical vertebræ. Severe pain in lumbar and hypogastric region, extending down legs.

Extremities.--Tired feeling in arms and legs. Very sore muscles and joints. Varicose veins. Chilliness in back and hips, extending down legs. Neuralgia of internal saphenous nerve.

Skin.--Bluish chilblains. Phlebitis. Purpura. Varicose veins and ulcers; very sore. Burns. Ecchymosis. Traumatic inflammations (Arnica).

Modalities.--Worse, warm, moist air.

Relationship.--Compare in hæmorrhoids: Calc fluor; Aloe; Mur ac in varicose veins. Mangifera indica.

Compare: Arnica; Calend; Trillium; Bellis; Sulph ac; Pulsatilla.

Antidote: Arnica.

Complementary: Ferrum.

Dose.--Tincture, to sixth attenuation. Distilled extract locally.

Good wishes. Milap Singh

Click picture for many more pictures

Heather

Is for people who are obsessed with themselves, but who do not like to be alone. Dr Bach called them 'buttonholers' because they do anything to keep people with them, all the time talking at exhaustive length about their problems and illnesses, great and small, until people begin actively to avoid them. Thus the thing Heather people fear - loneliness - is brought about because of their own behaviour.

The remedy is given to help Heather people see their own concerns in the context of other people's. Having suffered themselves from the need to talk, they become good listeners and great supports for others. As a result people seek them out for their compassion rather than avoiding them because of their self-centredness.

Dr Bach's description

Those who are always seeking the companionship of anyone who may be available, as they find it necessary to discuss their own affairs with others, no matter whom it may be. They are very unhappy if they have to be alone for any length of time.

girilal

HECLA LAVA
Lava Scoriæ from Mt. Hecla
(HEKLA LAVA)

Marked action upon the jaws. Of great use in exostosis, gum abscess, difficult teething. Nodosities, caries of bone, etc. Osteitis, periostitis, osteosarcoma; rachitis. Tumors in general. Bone necrosis. Necrosis and sinus after mastoid operation.

Face.--Ulceration of nasal bones. Facial neuralgia from carious teeth and after extraction. Toothache, with swelling about jaws. Abscess of gums. Enlargement of maxillary bone. Cervical glands enlarged and indurated.

Relationship.--Compare: Silica; Mercur; Phos; Conchiolinum--Mother of pearl (diaphysis of bone affected; parts extremely sensitive to touch).

Amphisbæna-Snail-like lizard (great affinity for the jaw bones, worse by air and dampness).

Slag--(Great itching of parts).

Dose.--Lower triturations.

HEDEOMA PULEGIOIDES
Pennyroyal
(HEDEOMA)

Female symptoms are most marked; usually associated with nervous disturbances. Red sand in urine. Pain along ureter. Flatulent colic. Antidotes effects of Poison-oak (Grindelia).

Head.--Dull, heavy feeling in morning. Sore pain, as from a cut. Weak, faint; better, lying down.

Stomach.--Gastritis. Everything taken into stomach causes pain. Tongue coated thin white. Nausea.

Abdomen.--Distended, sore, and sensitive.

Urine.--Frequent urging, cutting pains. Pain along left ureter. Dragging pain from kidney to bladder. Dull burning pain over left kidney. Burning irritation at neck of bladder causing frequent intense desire to urinate and inability to retain urine for more than few minutes, better urinating.

Female.--Bearing-down pains, with much backache; worse, least movement. Leucorrhœa, with itching and burning Ovaries congested and painful; bearing-down spasmodic contractions.

Extremities.--Pain in thumb-joint. Pain, coldness, and paretic condition. Twitchings, jerkings, soreness. Tendo-Achilles painful, as if sprained and swollen; walking painful.

Relationship.--Compare: Mentha; Sepia; Lilium; Ocimum (uric acid diathesis, pain in ureters). Hedera Helix--Common Ivy--(Delirium and chronic convulsions. Chronic hydrocephalus Rhinorrhea, cerebro-spinalis. Cataract. Acts on blood vessels, menorrhagia). Glechoma Hederacea--Ground Ivy--(Hæmorrhoids with rectal irritation and bleeding. Diarrhœa. Anus feels raw and sore. Cough with laryngeal and tracheal irritation. Glandula sub-mentalis inflamed).

Dose.--First potency.

Good wishes. Milap Singh

Click picture for many more pictures

Helix Hedera (duck-foot)

April 2004 one of my friend homeopath in India discussed a case of hydrocephalus child and asked me if I can get him Hedera Helix. He was unable to find it in India.

On internet I checked about Hedera Helix and found that it is the common ground Ivy or also called duck foot. I was not aware if I have seen this plant in India.

Next week I went to mountains and hedera helix was everywhere. I cut and mailed those leaves to my friend. I forgot all about this thing.

Later on I made a call to my friend and he said that child is very close to normal. He tried his best to potentize the Hedera helix. As the kid started taking hedera helix, improvements were overwhelming. In the begining parents were about to take the kid to some advanced hospital to get the water removed surgically.

Fluid from child's brain started draining out from nose and eyes.

That's what is Helix Hedera indicated, to drain out sinus cavities.

girilal

| | | |
|---|---|---|
| **Re: Helix Hedera (English Ivy)** | By: rsamu<br>Tamil Nadu | October 16 2006 |

Will it help sinus problems?

AM

| | | |
|---|---|---|
| **Re: Helix Hedera (English Ivy)** | By: girilal<br>New Jersey USA | October 16 2006 |

Yes, it is a great expeller of mucus. It may not work instantly but in the long term.

Crush its leaves and dissolve a drop in a liter water in 2 liter empty soda water bottle. Shake/bang it several times and take a tea spoon of it twice a day.

girilal

| | | |
|---|---|---|
| **Re: Helix Hedera (English Ivy)** | By: rsamu<br>Tamil Nadu | October 17 2006 |

thanks girilal..really great..is it available in India?...i have seen a few ornamental plants like this.

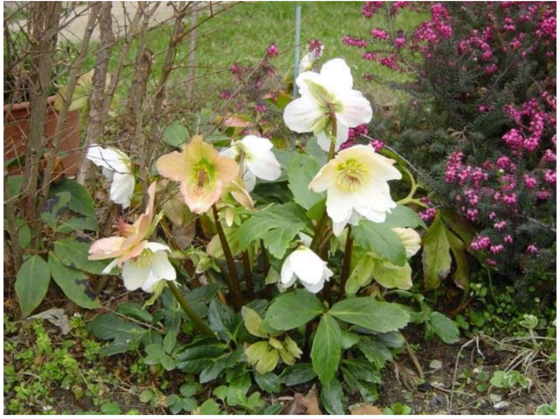
Click picture for many more pictures



HELLEBORUS NIGER
Snow-rose
(HELLEBORUS)

Produces a condition of sensorial depression. Sees, hears, tastes imperfectly, and general muscular weakness, which may go on to complete paralysis, accompanied by dropsical effusions. Hence, a remedy in low states of vitality and serious disease. Characteristic aggravation from 4 to 8 pm (Lycop). Sinking sensation. State of effusion in hydrocephalus. Mania of a melancholy type.

Mind.--Slow in answering. Thoughtless; staring. Involuntary sighing. Complete unconsciousness. Picks lips and clothes.

Head.--Forehead wrinkled in folds. Cold sweat. Stupefying headache. Rolls head day and night; moaning, sudden screams. Bores head into pillow; beats it with hands. Dull pain in occiput, with sensation of water swashing inside. Headache culminates in vomiting.

Eyes.--Eyeballs turn upwards; squinting, vacant look. Pupils dilated. Eyes wide open, sunken. Night-blindness.

Nose.--Dirty, dry nostrils. Rubs nose. Smell diminished. Nose pointed.

Face.--Pale, sunken. Cold sweat. Wrinkled. Neuralgia on left side; parts so tender he cannot chew.

Mouth.--Horrible smell from mouth. Lips dry and cracked. Tongue red and dry. Falling of lower jaw. Meaningless picking of lips. Grinding of teeth. Chewing motion. Greedily swallows cold water, though unconscious. Child nurses greedily, with disgust for food. Ptyalism, with sore corners of mouth.

Abdomen.--Gurgling, as if bowels were full of water. Swollen, painful to touch.

Stool.--Jelly-like, white mucus; involuntary.

Urine.--Suppressed; scanty, dark; coffee-grounds sediment. Frequent urging. Child cannot urinate. Bladder overdistended.

Respiratory.--Frequent sighing. Respiration irregular. Chest constricted; gasps for breath. Hydrothorax (Merc sulph).

Extremities.--Automatic motion of one arm and leg. Limbs heavy and painful. Stretching of limbs. Thumb drawn into palm (Cupr). Vesicular eruption between fingers and toes.

Sleep.--Sudden screams in sleep. Soporous sleep. Cri encephalique. Cannot be fully aroused.

Skin.--Pale, dropsical, itching. Livid spots on skin. Sudden, watery, swelling of skin. Falling off of hair and nails. Angio-neurotic œdema.

Modalities.--Worse, from evening until morning, from uncovering.

Relationship.--(Hellebor fætidus, or, Polymnia-Bear's foot--Acts especially on spleen (Ceanothus); also rectum and sciatic nerve. Splenic pains extend to scapula, neck and head, worse left side and evening; chronic ague cake; hypertrophied uterus; glandular enlargements; hair and nails falling off; skin peeling). Hellebor orientalis (salivation).

Antidote: Camphor; Cinch.

Compare: Threatening effusion; Tuberc; Apis; Zinc; Opium; Cinch; Cicuta; Iodoform.

Dose.--Tincture, to third potency.

girilal

| **HELLEBORUS Patient** | By: girilal<br>New Jersey USA | September 19 2006 |

HELODERMA
Gila Monster

The result of the bite is a benumbing paralysis like paralysis agitans or locomotor ataxia. There is no tetanic phase-a condition almost reverse in objective symptoms to Hydrocy acid or Strychnia. The most unusual action of the drug is noted upon the eye of the mouse. The eyeball becomes more prominent and the cornea opacities. The exophthalmus is due to the pressure of the blood behind the eyeball (Boyd). Homeopathically, it is indicated in many forms of disease characterized by great coldness-"arctic" coldness. Colic waves from occiput to feet or ascending.

Head.--Very depressed. Sensation as if would fall to right side. Cold band around head; cold pressure within the skull. Eyelids heavy. Pain beginning in right ear, extending round back of head to left ear.

Face.--Cold crawling feeling, as if facial muscles were tight.

Mouth.--Tongue cold, tender, and dry. Very thirsty. Swallowing difficult. Breath cold.

Chest.--Cold feeling in lungs and in heart. Slow labored thumping of heart.

Back.--Coldness across scapulæ. Burning along spine.

Extremities.--Numbness and trembling. Cyanosis of hands. Coldness. Sensation as if walking on sponge, and as if feet were swollen. Staggering gait. Cock's gait. When walking, lifts feet higher than usual, and puts down heel hard. Feet cold as ice or burn. Stretching relieves pains in muscles and limbs.

Fever.--Internal coldness, as if frozen to death. Cold rings around body. Cold waves (Abies c; Acon). Cold spots. Arctic coldness. Temperature subnormal-96° (Camph).

Relationship.--Compare: Lacerta-Green Lizard (skin eruptions. Vesicles under tongue. Increased mental acumen. Difficult swallowing. Constant accumulation of saliva in the mouth. Nausea; violent pressure in stomach). Camphor; Lachesis.

Dose.--Thirtieth potency.

Good wishes. Milap Singh

| **Re:HELODERMA** | By: dr.auntie<br>KY USA | October 22 2008 |

Some interesting info: AKA Gila [pronounced "hela"] Monster. A native of the Sonoran Desert in US southwest, other places too, I guess. I've seen one in the Arizona Sonora Desert Museum, a wonderful place to visit if you ever get to Tucson. I know people who have seen them in the wild and feel deprived because I never did, though took many walks on the desert while living there. One would probably have to try on purpose to get bitten by one. 😉

HELONIAS DIOICA
Unicorn-root
(HELONIAS - CHAMAELIRIUM)

Sensation of weakness, dragging and weight in the sacrum and pelvis, with great languor and prostration, are excellent indications for this remedy. There is a sensitiveness expressed as a consciousness of a womb. Tired, backachy females. The weakness shows itself also in a tendency to prolapse and other malposition of the womb. The menses are often suppressed and the kidneys congested. It seems as if the monthly congestion, instead of venting itself as it should through the uterine vessels, had extended to the kidneys. With it all, there is a profound melancholia. Patient must be doing something to engage the mind. Remember it, for women with prolapsus from atony, enervated by indolence and luxury (better when attention is engaged-hence when the doctor comes), or for those worn out with hard work; tired, strained muscles burn and ache; sleepless. Diabetes mellitus, and insipidus. Constant aching and tenderness over kidneys.

Mind.--Profound melancholy. Patient is better when kept busy, with mind engaged, when doing something. Irritable; cannot endure the least contradiction.

Head.--Burning sensation on top. Headache, better mental exertion.

Back.--Pain and weight in back; tired and weak. Aching and burning across the lumbar region; can trace outlines of kidneys by constant burning. Boring pain in lumbar region, extending down legs. Great languor, better exercising.

Female.--Dragging in sacral region, with prolapse, especially after a miscarriage. Pruritus vulvæ. Backache after miscarriage (Kali c). Weight and soreness in womb; conscious of womb. Menses too frequent, too profuse. Leucorrhœa. Breasts swollen, nipples painful and tender. Parts hot, red, swollen; burn and itch terribly. Albuminuria during pregnancy. Debility attending the menopause.

Urine.--Albuminous, phosphatic; profuse and clear, saccharine. Diabetes.

Extremities.--Sensation as if a cool wind streamed up calves of legs. Feet feel numb when sitting.

Modalities.--Better, when doing something (mental diversion). Worse, motion, touch.

Relationship.--Compare: Agrimonia-Cockleburr--(painful kidneys, impaired digestion and menstrual difficulties; Bronchorrhœa and catarrh of bladder. Cough with profuse expectoration attended with expulsion of urine. Tincture 1-10 gtt). Aletris; Lilium; Puls; Senecio; Stannum.

Dose.--Tincture, to sixth attenuation.

Good wishes. Milap Singh

Hepar Sulphur

Coldness:
The Hepar patient is chilly. He is sensitive to the cold and wants an unusual amount of clothing when in cold air. He wants the sleeping room very warm and can endure much heat in the room, many degrees warmer than a healthy person ordinarily desires, He has no endurance in the cold and all his complaints are made worse in the cold. If he becomes cold in sleep his complaints come on or if he is out in the cold, dry wind, complaints come on; inflammatory and rheumatic complaints appear.
The exposure of hand or foot at night in bed brings on symptoms. He wants the covers drawn close about the neck when in bed. This patient is also oversensitive to impressions, to surroundings and to pain. What with an ordinary person would only be an ache or disagreeable sensation becomes with Hepar

an intense suffering.

Pains:
But the pains of Hepar may be very severe, very sharp. Inflamed spots, eruptions, boils or suppurations are full of sharp pains. This is so intense that it is described at times, as a sticking and jagging like sharp sticks.
The pains in ulcers are often felt like sticks; intense and sharp as if sticks were jagging the ulcer. This sensation is often expressed by the patient suffering from sore throat. Lip feels as if he had swallowed a fish bone, or stick. This is in keeping with the general character, because it is present everywhere, in inflammations, ulcers, pustules, boils and eruptions; all seem to have sticks in them or some thing jagging.
Eruptions are sensitive, to touch. This accords with the oversensitiveness of the nerves found everywhere. The Hepar patient faints with pain, even from slight pain.

Mind:
This remedy belongs to patients that are called delicate, that are oversensitive to impressions. The mind takes part in this oversensitiveness and manifests itself by a state of extreme irritability.
Every little thing that disturbs the patient makes him intensely angry, abusive and impulsive. The impulses will overwhelm him and make him wish to kill his best friend in an instant. Impulses also that are without cause sometimes crop out in Hepar.
A man may have a sudden impulse to stab his friend. A barber has an impulse to cut the throat of his patron while in the chair. Mothers may have an impulse to throw the child into the fire or an impulse to set herself on fire; an impulse to do violence and to destroy. These symptoms increase to insanity and then the impulses are often carried out. It becomes a mania to set fire to things.
The patient is quarrelsome, hard to get along with; nothing pleases; everybody disturbs oversensitiveness to persons, to people and to places.
He desires a constant change of persons and things and surroundings and each new surrounding or person or thing

again displeases and makes him irritated. With this irritability of temper and physical irritability there is a tendency to suppuration in parts. Localized inflammations incline to suppurate, especially in glands and cellular tissue do we have suppuration and ulcers.

The glands of the neck, axilla and groin and the mammary glands swell, become hard and suppurate. First the hard swellings with the feeling as if they had sticks jagging in them, then it becomes highly inflamed and red over the part and ultimately it suppurates, discharges and heals slowly.
The bone even suppurates and takes on necrosis and caries. Felons around the root of the nail and ends of the fingers. The nail suppurates and loosens and comes off. Sensation of splinters under the nails, even when they do not suppurate. The nails become hard and brittle. Warts crack open and bleed, sting and burn and suppurate. Hepar is especially useful in felons in such a constitution as described, but sometimes you will have nothing more than the fact that the patient is a scrawny, chilly patient, who is always taking cold and subject to felons. I have often had to give Hepar on no better information and have known it to stop the tendency to felons. It also competes with Silica.
The patient is often scrawny, and has a tendency to enlargement of glands. The lymphatic glands are generally hard and enlarged, They are chronically enlarged without suppuration, and at any cold that comes on some particular gland may suppurate.

The catarrhal state:
is general.
There is no mucous membrane exempt, but especially do we have catarrh of the nose, ears, throat, larynx and chest. The Hepar patient is subject to coryza. In some instances the colds settle in the nose and then there will be much discharge, with sneezing every, time he goes into a cold wind.
The cold winds bring on sneezing and running from the nose, first of a watery character and finally ending in a thick, yellow, offensive discharge.

Discharges:
These offensive discharges smell like decomposed cheese, and this characteristic runs through the remedy.
The discharges from all parts of the body smell like old cheese. The discharges from ulcers are offensive, and have a decomposed, cheesy smell. It has discharges running through it also that smell sour, and this is also a general because it modifies all things that can be sour.
The babies are always sour in spite of much washing. Or it may be noticed by the members of the family that one of the family always smells sour, has a sour perspiration. The discharges from ulcers are sour, and also discharges from, mucous membranes. The discharge from the nose becomes copious, and causes ulceration in patches.

Throat and cough:
The throat has a catarrhal condition; the whole pharynx is in a catarrhal state with copious discharge. Throat extremely sensitive to touch; pain as if full of splinters; pain on swallowing. The larynx also is painful on talking; painful as a bolus of food goes down behind the larynx, and painful to touch with the hand.

There is a loss of voice, and a dry, hoarse bark in adults, especially in the mornings and evenings. Every time he goes out in the dry, cold wind, he becomes hoarse, loses the voice and coughs. It is a dry, hoarse, barking cough. Inspiring cold air will increase the cough and putting the hand out of bed will increase the pain in the larynx or cough.
Putting the hand or foot out of bed brings a general aggravation of all the complaints of Hepar. Putting the hand out of bed accidentally when sleeping will bring on cough, and cause sneezing. The larynx has its catarrhal state, and in oversensitive children this catarrhal state becomes a croup.
Sensitive children that are exposed during the day in a cold, dry wind, or cold air, come down next morning with a violent attack of croup. The Hepar croup is worse in the morning and in the evening; evening until midnight. Sometimes cases that at first call for Aconite run into Hepar.
The Acon. croup comes on with great violence, worse in the

evening before midnight. The child wakes up from its first sleep with a hoarse, barking croup. A dose of Aconit may prove entirely sufficient; or it may be only a palliative.

The child goes to sleep and along towards morning, or at least sometime after midnight, there is another attack, which shows that Acon. was not sufficient. Such a case will be controlled by Hepar.

When the croup comes on after midnight and the child wakes up frightened, suffocating, rouses up in bed with a dry, hoarse and ringing cough, which rings like a dry whoop, then Spongia will nearly always be the remedy, and again if Spongia palliates it and it is not sufficiently deep and there is a morning aggravation which shows that the trouble is returning Hepar follows. Acon., Hepar and Spongia are closely related to each other and they are truly great croup remedies.

Dry, paroxysmal cough from evening until midnight and sometimes lasting all night, with choking, gagging and crouping; some loose coughing in the daytime; rawness and scraping the larynx; worse in cold air or uncovering hand or foot in bed.

The catarrhal state is sometimes lower down in the trachea, and the trachea becomes extremely sore from much coughing. The patient has been coughing days and weeks and has the morning and evening aggravations; a rattling, barking cough with great soreness of the chest in an oversensitive and chilly patient.

The cough is attended with choking and gagging, even to vomiting; it is worse in the cold air, and from putting the band out of bed. He coughs and sweats. There is much sweating the whole night, without relief. Sweating all night without relief belongs to a great many complaints of Hepar. He sweats easily, so that with the cough and on the slightest exertion he is fairly drenched with perspiration.

Ears:

It has catarrhal affections of the ear.

A sudden inflammation comes on in the middle ear, an abscess forms, the drum of the car ruptures and there is a bloody discharge and sticking, tearing pains in the inflamed ear. There is first a sensation of stopping up of the ear, then, bursting and pressure in the ear, and then perforation of the drum.

There is also an inflammatory condition causing a discharge that is foetid, or a bloody yellow, purulent discharge, thick, with cheesy particles and smelling like old cheese.

Eyes:
Hepar sometimes is bad on the oculist.
When it is indicated, it cures eyes very quickly, so that the oculist does not have a very long case and it does away with the necessity for washes in the hands of the specialist. From the eyes we have the same offensive thick, purulent discharge.
Inflammation of the eyes attended with, little ulcers.
Ulcers of the cornea, granulations, bloody, offensive discharge from the eyes. The eyes look red, the lids are inflamed, the edges are turned out and the margin of the lids become ulcerated. In all sorts of so called scrofulous affections, the eye conditions may be covered by Hepar when the constitutional state is present.
The constitutional state of the patient is the only guide to the remedy. Many times the eye symptoms are nondescript. You have only an inflamed eye with catarrhal discharge, and for this you could give a large number of the anti-psorics; but when you go into the state of the patient and find these general symptoms, then this remedy will cure.
The general symptoms will guide to the remedy that will cure the eyes. You will see that the specialist for the eyes is often limited unless he knows how to secure all the symptoms of the patient and selects the remedy upon the totality of the symptoms.

Bladder:
There are other catarrhal, conditions. Catarrh of the bladder, with purulent discharges in the urine and copious muco-purulent deposits. Ulcers of the bladder. The walls of the bladder become hardened, so that it has almost no power to expel its contents, and the urine passes in a slow stream or in drops, or in the male the stream falls down perpendicularly. No ability to expel the urine with force. It is a paresis. There is burning in the bladder and frequent, almost constant, urging to urinate. It has also a catarrhal state of the urethra that resembles gonorrhoea, and it has been a very useful remedy in chilly patients with gleety

discharge of long standing. Thick discharge of a white, cheesy character. Ulcers and little inflammatory spots along the urethra.

There is a sticking sensation here and there along the urethra and when passing urine a sensation of a splinter in the urethra. Copious leucorrhoea with the same offensive, cheesy smell.

Leucorrhea:
The leucorrhea is so copious that she is compelled to wear a napkin, and the napkins, I have been told by women who have been cured by Hepar, are so offensive that they must be taken away and washed at once because the odor permeates the rooms.
This horribly offensive odor that is so permeating is often cured by Kali phos. It has really one of the most penetrating of odors, so much so that when a woman suffers from this leucorrhoea the odor can be detected when she enters the room.
A very important sphere for Hepar is after mercurialisation.
Many old people are walking the street at the present day who have been the victims of Calomel, who have been salivated, who have taken blue pill for recurrent bilious spells, to "tap the liver," until finally they get into a state of chilliness felt, as it were, in the bone.
They sweat much about the head, they ache in the bones, and every change of weather to cold, and every cold, damp spell affects them. They, are like barometers. Hepar is the remedy for that state.
They go into diseases of the bone easily and are always shivering. While they have periods of aggravation from warmth, as a general rule they are chilly subjects, and feel the cold easily. In the more acute affections of Mercury there is an aggravation from the warmth of the bed, but the old subjects who have been years ago poisoned with it get almost bloodless, and they become chilly; they cannot get- clothing enough ib keep them warm.
They become withered and shriveled, and have rheumatic affections about the joints. Then it is that the symptoms of Hepar agree and it becomes a valuable antidote to that state of mercurialisation.

Hepar is also a complement and antidote to potentized Mercury. When Merc. has been administered and has done all it can do as a curative remedy, or when it has acted improperly and has some, what mixed up the case and it is necessary to follow it with the natural complement or antidote and prepare for another series, Hepar is to be thought of as one of the natural followers of Merc. it is well known that Merc. is not followed well by Silica. Sil. does not do useful work when Merc. is still acting or has been acting.

This is the time that Hepar becomes an intercurrent remedy. Sil. follows well after Hepar, and Hepar follows well after Merc., and thus becomes an intercurrent in that series.

In old syphilitic cases when the symptoms agree Hepar is a very full and complete remedy. It corresponds to the majority of symptoms of syphilis, and it only needs to correspond to the symptoms of the individual patient when he is syphilitic to be indicated. Thus in old cases who have been mercurialized, who have had the symptoms suppressed so that the disease is latent and ready to crop out at any time, Hepar will come in and have a decided effect upon the syphilis and upon the mercury.

It will straighten matters out and cause a development that will lead to clear prescribing. In this relationship to syphilis and mercury Hepar is closely allied to Staph., Asa f., Nit. acid, Sil., etc.

Especially Hepar the remedy in those cases of syphilis where great quantities of mercury have been taken, until it is no longer able to suppress the symptoms of the disease; in old cases when the syphilitic miasm attacks the bones of the nose and they sink in, or a great ulceration takes place; those cases you sometimes see walking around the street, with a big patch over the nose or over the opening that leads down into the nasal cavity.

Nose:

When there is severe pain in the region of the nasal bones, the bridge of the nose is so sensitive that it cannot be touched and in the root of the nose there is a sensation as if a splinter were sticking in. For offensive discharge from the nose, foetid oezena in an old case, which has been mercurialized, who is chilly in his very bones, think of Hepar. It has cured many such cases; it has healed up the ulcers; it has cured the catarrhal state, and it has hastened the healing up of the portions of diseased bone, by hastening the suppuration and has returned the patient to an orderly state.

Throat:
As we go into the syphilitic affections that lead into the throat, we find ulcers of the soft palate which eat away the uvula, small ulcers which finally unite and destroy the soft palate and then commence to work upon the osseous portion of the roof of the mouth.
The odor that comes from that mouth when it is opened to show the throat is extremely offensive; very often like spoiled cheese.
The medicines that are especially related, or especially useful in this form of ulceration in old syphilitics, will be Kali bi., Lach., Merc. cor., Merc. and Hepar, but in those syphilitic cases that have been mercurialized Hepar and Nitric acid should be thought of.
Nitric acid is very closely related to Hepar; it is just as chilly; it has the sensation of sticks in the throat and in inflamed parts. It has fine ulcers in the throat, upon the tonsils and in the larynx. Nitric acid competes with Hepar.
You think of the two together. Both have sensation of a fish bone or stick in the throat.
The cartilages of the larynx become attacked in syphilitic affections and old mercurial affections. When the case is not of syphilitic origin but is of sycotic origin, small or large white gelatinous polypi form in the larynx and they are sore, causing loss of voice, or cracked voice; when they cause choking or uneasiness, Hepar is one of the remedies. Hepar, Calc., Arg. nit and Nit. ac. and sometimes Thuja are the remedies related to such conditions.

Genitals:
Again, in the earlier syphilitic manifestations, the chancre has the feeling of a stick in it; then comes the formation of a bubo that may be either non-suppurative or a suppurating gland, associated with a chancre or a harmless ulcer upon the penis.

These conditions are often indications for Hepar, when the constitutional state is present.

Hepar has also sycotic warts. It is useful in old cases of gleet; also when there is a sensation of a splinter in the urethra. In strictures and constrictions of inflammatory character during the inflammation there is a tendency to ulcerate, and with this the sensation of a stick is felt.

Arg. nit., Nit. ac. and Hepar run close together for this kind of inflammation, and will cure the inflammatory stricture before it becomes a complete and permanent fibrinous stricture.

It is only very rarely that you will be able with your medicines to cure a stricture after it has taken on permanency, after it is many years old, but as long as the inflammation keeps up there is hope.

I remember one very old one that was cured by Sepia. I did not know at first of its presence, but prescribed Sepia on the symptoms of the case, and the patient came back with great suffering in the urethra, and then confessed to me that he had had gonorrhoea and had been troubled for years with a stricture. That inflammation was aroused anew and after it ran its course it really left the passage clear and there was never any more trouble with the stricture.

That was a very unusual result. I have many times prescribed for patients with the utmost endeavors to do the same thing, and have cured the patient in other respects, but the stricture would remain. Remember then that Hepar has fig warts, chronic sycotic discharges, or chronic gonorrhoea, offensive, cheesy discharges, the sensation of sticks in the urethra, inflammatory stricture, which will be associated with difficulty in passing urine, to the extent that there is a weakness of the bladder and the urine falls perpendicularly.

Suppuration:

Hepar has served a valuable purpose in its ability to establish suppuration around foreign bodies. For instance, a foreign body is under the skin or is somewhere unknown. Perhaps it is the tip end of a projectile after the projectile itself has been taken away, or under the nail a splinter is forming a suppuration. It is so small that it is hardly observed and it is supposed often that the splinter has been entirely removed, but an inflammatory condition starts up.

Hepar if indicated by the general symptoms of the patient hastens the suppuration and heals up the finger, for it has all such things. Silica is another remedy capable of establishing inflammation and suppuration and removes little foreign bodies that cannot be located.

Of course it is understood that if the physician knows the location of a splinter, he will take such steps as are necessary to remove it, and not wait for the action of a remedy. But at times a needle point breaks off against the bone of the finger of a seamstress, or small portions of the needle may exist where they cannot be found without an immense amount of slashing which the patient refuses. Hepar or Silica will remove it. A little abscess will form and the little mite will be discharged.

Knowing that these two remedies have this tendency to establish a suppuration wherever there are foreign bodies, it is well to be reminded that if a bullet were encysted in the lungs it would be well, if the symptoms called for Hepar or Silica, to consider whether it might not be injurious to give a remedy that would establish a suppuration. It might be that the bullet is resting in a vital place, in a net-work of arteries, and it would be well not to establish suppuration in this vital region.

Deposits, of a tubercular character are often located in a place that they can easily be suppurated out, and the action of the remedy on them would be the same as a foreign body. Hence it is that Hepar, after its administration, will very often abolish a crop of boils all over the economy because in the skin there are small accumulations of sebaceous matter and these will be suppurated out.

Sulphur also does this, so that it may be well to be careful and not give Silica or Sulphur, or Hepar too often, or too high, in patients that have encysted tubercle in the lungs. Rokitansky in his numerous post-mortems found a large number of encysted caseous deposits in the lungs, in cases that had lived and outgrown these trouble; they had become encysted and therefore perfectly safe and the patient had died of something else.

It might be dangerous to administer these medicines that have a tendency to cause suppuration in such, and you should at least proceed cautiously in using them. After you have seen a great many cases you will find that you have killed some of them. If our medicines were not powerful enough to kill folks, they would not be powerful enough to cure sick folks. It is well for you to realize that you are dealing with razors when dealing with high potencies.

I would rather be in a room with a dozen negroes slashing with razors than in the hands of ail ignorant prescriber of high potencies. They are means of tremendous harm, as well as of tremendous good.

In contrast with Hepar (although Hepar is a form of Calcarea), Calc. carb. has no such tearing down nature in it. It does not establish inflammation around foreign bodies and tend to suppurate them but causes a fibrous deposit around bullets and other foreign, substances in the flesh. It causes tubercular deposits to harden and contract and become encysted.

Many excellent homoeopathic physicians have said to me,

"I do not agree with you as to the danger of Sulphur in phthisical cases. I have cured cases of phthisis with Sulphur."

So have I many of them. But I did not refer to curable cases, but to those cases which are well developed and have gave symptoms. It is well to know all the elements in the case; then if you have administered a remedy and killed your patient, you know at least what you have done.

It is better to know what you have done if you have killed your patient, than to be ignorant of it and go on and kill some more in the same way.

Hepar Sulphur Constituion

This remedy belongs to patients that are called delicate, that are oversensitive to impressions. The mind takes part in this oversensitiveness and manifests itself by a state of extreme irritability.

Every little thing that disturbs the patient makes him intensely angry, abusive and impulsive. The impulses will overwhelm him and make him wish to kill his best friend in an instant. Impulses also that are without cause sometimes crop out in Hepar.

A man may have a sudden impulse to stab his friend. A barber has an impulse to cut the throat of his patron while in the chair. Mothers may have an impulse to throw the child into the fire or an impulse to set herself on fire; an impulse to do violence and to destroy. These symptoms increase to insanity and then the impulses are often carried out. It becomes a mania to set fire to things.
The patient is quarrelsome, hard to get along with; nothing pleases; everybody disturbs oversensitiveness to persons, to people and to places.

He desires a constant change of persons and things and surroundings and each new surrounding or person or thing again displeases and makes him irritated. With this irritability of temper and physical irritability there is a tendency to suppuration in parts.

| **How to Make Hepar Sulphur** | By: girilal<br>New Jersey USA | October 3 2006 |
|---|---|---|

Yes I made Hepar Sulphur several times but I rather suggest all to use Calcarea Sulphurica. Chemically both are almost similar.

How to make Hepar Sulphur:

Clam shell powder and Sulphur in equal proportion: burn them together on a hot grill.

Result is Hepar Sulphur.

It is not soluble in water. Any calcium derivative is not soluble in water but still you can make your potentized medicine in water.

Put a pinch of the substance in half filled one liter water bottle, shake/bang it vigorously.

Take a drop a day becaue homemade batches are mostly low potency.

And how to make Calcarea Sulphurica is explained in:
http://www.homeopathyandmore.com/forum/viewtopic.php?t=396

| **Re: Hepar Sulphur** | By: Dr Hasmukh Shah | January 14 2007 |
|---|---|---|

HEPAR SULPHUR
Hahnemann's Calcium Sulphide
(HEPAR SULPHURIS CALCAREUM)

Suits especially scrofulous and lymphatic constitutions who are inclined to have eruptions and glandular swellings. Unhealthy skin. Blondes with sluggish character and weak muscles. Great sensitiveness to all impressions. Sweating patient pulling blanket around him. Locally, it has special affinity to the respiratory mucous membrane, producing croupous catarrhal inflammation, profuse secretion; also easy perspiration. After abuse of Mercury. Infected sinus with pus forming. The tendency to suppuration is most marked, and has been a strong guiding symptom in practice. The lesions spread by the formation of small papules around the side of the old lesion. Chilliness, hypersensitiveness, splinter-like pains, craving for sour and strong things are very characteristic. Feeling as if wind were blowing on some part. The side of the body on which he lies at night becomes gradually insufferably painful; he must turn. Pellagra (material doses required). Syphilis after antispecific gross medication.

Mind.--Anguish in the evening and night, with thoughts of suicide. The slightest cause irritates him. Dejected and sad. Ferocious. Hasty speech.

Head.--Vertigo and headache, when shaking the head or riding. Boring pain in the right temple and in root of nose every morning. Scalp sensitive and sore. Humid scald-head itching and burning. Cold sweat on head.

Eyes.--Ulcers on cornea. Iritis, with pus in anterior chamber; purulent conjunctivitis, with marked chemosis, profuse discharge, great sensitiveness to touch and air. Eyes and lids red and inflamed. Pain in the eyes, as if pulled back into the head. Boring pain in upper bones of the orbits. Eyeballs sore to touch. Objects appear red and too large. Vision obscured by reading; field reduced one-half. Bright circles before eyes. Hypopion.

Ears.--Scurfs on and behind the ears. Discharge of fetid pus from the ears. Whizzing and throbbing in the ears, with hardness of hearing. Deafness after scarlet fever. Pustules in auditory canal and auricle. Mastoiditis.

Nose.--Sore, ulcerated. Soreness of nostrils, with catarrhal troubles. Sneezes every time he goes into a cold, dry wind, with running from nose, later, thick, offensive discharge. Stopped up every time he goes out into cold air. Smell like old cheese. Hay-fever (Hepar 1x will often start secretions and profuse drainage in stuffy colds).

Face.--Yellowish complexion. Middle of lower lip cracked. Vesicular erysipelas, with pricking in parts. Neuralgia of right side, extending in streak into temple, ear, alæ, and lip. Pains in bones of face, especially when being touched. Ulcers in corners of mouth. Shooting in jaw on opening mouth.

Mouth.--Ptyalism. Gums and mouth painful to touch and bleed readily.

Throat.--When swallowing, sensation as if a plug and of a splinter in throat. Quinsy, with impending suppuration. Stitches in throat extending to the ear when swallowing. Hawking up of mucus.

Stomach.--Longing for acids, wine, and strong-tasting food. Aversion to fat food. Frequent eructations, without taste or smell. Distention of stomach, compelling one to loosen the clothing. Burning in stomach. Heaviness and pressure in stomach after a slight meal.

Abdomen.--Stitching in region of liver when walking, coughing, breathing, or touching it (Bry; Merc). Hepatitis, hepatic abscess; abdomen distended, tense; chronic abdominal affections.

Stool.--Clay-colored and soft. Sour, white, undigested, fetid. Loss of power to expel even a soft stool.

Urine.--Voided slowly, without force-drops vertically, bladder weak. Seems as if some always remained. Greasy pellicle on urine. Bladder difficulties of old men (Phos; Sulph; Copaiva).

Male.--Herpes, sensitive, bleed easily. Ulcers externally on prepuce similar to chancre (Nitr acid). Excitement and emission without amorous fancies. Itching of glans, frænum, and scrotum. Suppurating inguinal glands. Figwarts of offensive odor. Humid soreness on genitals and between scrotum and thigh. Obstinate gonorrhœa "does not get well".

Female.--Discharge of blood from uterus. Itching of pudenda and nipples, worse during menses. Menses late and scanty. Abscesses of labiæ with great sensitiveness. Extremely offensive leucorrhœa. Smells like old cheese (Sanicula). Profuse perspiration at the climacteric (Tilia; Jaborandi).

Respiratory.--Loses voice and coughs when exposed to dry, cold wind. Hoarseness, with loss of voice. Cough troublesome when walking. Dry, hoarse cough. Cough excited whenever any part of the body gets cold or uncovered, or from eating anything cold. Croup with loose, rattling cough; worse in morning.

Choking cough. Rattling, croaking cough; suffocative attacks; has to rise up and bend head backwards. Anxious, wheezing, moist breathing, asthma worse in dry cold air; better in damp. Palpitation of heart.

Extremities.--Finger-joints swollen; tendency to easy dislocation. Nail of great toe painful on slight pressure.

Skin.--Abscesses; suppurating glands are very sensitive. Papules prone to suppurate and extend. Acne in youth. Suppurate with prickly pain. Easily bleed. Angio-neurotic œdema. Unhealthy skin; every little injury suppurates. Chapped skin, with deep cracks on hands and feet. Ulcers, with bloody suppuration, smelling like old cheese. Ulcers very sensitive to contact, burning, stinging, easily bleeding. Sweats day and night without relief. "Cold-sores" very sensitive. Cannot bear to be uncovered; wants to be wrapped up warmly. Sticking or pricking in afflicted parts. Putrid ulcers, surrounded by little pimples. Great sensitiveness to slightest touch. Chronic and recurring urticaria. Small-pox. Herpes circinatus. Constant offensive exhalation from the body.

Fever.--Chilly in open air or from slightest draught. Dry heat at night. Profuse sweat; sour, sticky, offensive.

Modalities.--Worse, from dry cold winds; cool air; slightest draught, from Mercury, touch; lying on painful side. Better, in damp weather, from wrapping head up, from warmth, after eating.

Relationship.--Antidotes: Bellad; Cham; Sil.

Compare: Acon; Spongia; Staphis; Silica; Sulph; Calc sulph; Myristica. Hepar antidotes bad effects from Mercury, Iodine, Potash, Cod-liver oil. Removes the weakening effects of ether.

Dose.--First to 200th. The higher potencies may abort suppuration, the lower promote it. If it is necessary to hasten it, give 2x.

HIPPURICUM ACIDUM
Proved by Dr. Wm. B. Griggs
(HIPPURIC ACID)

Its chief action is on the external tissues of the eyes and naso-pharynx joint surfaces, liver and mucous membranes. Right side especially affected, general muscular soreness.

Head.--Pain over right eye, dull, constant, worse in warm room. Eyelids inflamed and swollen.

Throat.--Sore, raw, dry, swallowing difficult, foul odor, gummy exudate; thickness and infiltration of all tissues around throat.

Stomach.--Acid rising. Lump in pit of stomach. Soreness and pressure over liver.

Female.--Menstrual flow for three weeks with complete relief of muscular and joint pains.

Extremities.--Backache extending down hips. Pain in shoulders and extremities and sore swollen joints. Pain in middle of thigh posteriorly shooting down right leg. Tired, grating sensation in the joints.

Skin.--Itching, burning. Papules looking like goose flesh on chest.

Relationship.--Benzoic acid seems to be an analogue.

Dose.--Lower potencies.

**HOLLY [Bach Flower Remedy]**

**Started by: Jayashree at October 7 2006**

**Replies: 0 & Views: 8935** Font Bottom Of Page **Page 1 of 1** Reply

| **HOLLY [Bach Flower Remedy]** | By: Jayashree<br>Calcutta, India | October 7 2006 |
|---|---|---|

Click picture for many more pictures

HOLLY

This remedy is used to transform jealousy, hatred, and envy. It infuses a sense of Divine Love. It is close to the shadow side of envy as seen, for example, in business competition and spiritual practicioners. Holly is for everything that is not love. Sibling rivalry is a very good example of this state. Active anger is Holly and passive is Wild Oat. Holly opens the heart. The individual may experience "frazzled nerves" due to an overstimulating environment, especially noise and turmoil. There is a conflict experienced because if the anger is expressed others may suffer and if held within, the peson who is angry feels the pain. TENSION HEADACHES, MIGRAINES, PARANOIA, DELUSIONS, and ANTISOCIAL PERSONALITY DISORDERS. Much violence and abuse originate in this state and may manifest even if not wished for. It is also excellent for people with good intentions who are easily annoyed. The projected anger causes the individual to see disturbances or people as a threat. These strong emotions can rule the self and create much suffering.

## Home made Naturm Sulphate

**Started by: girilal at January 13 2010**

**Replies: 13 & Views: 10931** Font Bottom Of Page **Page 1 of 1** Reply

| **Home made Naturm Sulphate** | By: girilal<br>New Jersey USA | January 13 2010 |
|---|---|---|

Well I have experimented with homemade Nat. Sulphate. I discovered that is mostly used as filler in the powdered detergents etc (Example is 'Tide' brand name)

I have used potentized version of the powder detergents (at least 10c) and it worked on cases where I needed Naturm Phos. It worked especially on Head/Nerves and Spinal Cord injuries patients to some improvements because it is a polycrest incorporating Nat. Sulp. Nat Phos and also Causticum.

So if anyone wishes to experiment further, please do so. I myself love homemade remedies because these we can recommend to people for whom homeopathy medicines are no accessible or expansive. As in United States etc.

girilal

| **Re:Home made Naturm Sulp.** | By: girilal<br>New Jersey USA | January 13 2010 |
|---|---|---|

Someone repeatedly asked on email about how to potentize the detergent.

Put a pinch of detergent in half empty 1 liter water bottle. Shake it vigorously for at least 50 times.

Drain out most of the liquid but keep a spoonful still in the bottle. Fill up bottle to half again.

Shake it again vigorously for 50 times, then drain off most of the liquid but keep a spoonful.

Repeat the process at least 10 times.

Use 2 drops of the liquid as medicine for 2 weeks. If any effect is noticed. Potentized the same liquid each week to one succession again.

girilal

| **Re:Home made Naturm Sulp.** | By: garcot<br>Bangalore | January 14 2010 |
|---|---|---|

Giri,

It has wonderful effect on both Acidosis and Alkalosis.

This homeopathic preparation works both ways. It is my experience.

regards
Garcot

"wisdom in your body is deeper than your deepest philosophy" (Nietszche)

| **Re:Home made Naturm Sulphate** | By: girilal<br>New Jersey USA | January 14 2010 |
|---|---|---|

Sorry Garcot, I started the post by Naturm Phos my mistake but it was to be started as Naturm Sulphate. Naturm Phos is easily available as chemical and has wide uses but it is a bit difficult to find Naturm Sulphate.

girilal

| **Re:Home made Naturm Sulphate** | By: garcot<br>Bangalore | January 14 2010 |
|---|---|---|

Hi Giri,

I was aware, you meant Natrum Sulph, but the fact is, it contains many more ingradients, which is why it works for both acidosis and Alkalosis. I got very good results, when I tried this excercise almost 2 years ago, for excess accumulation of alkaline minerals/food.

Similarly baking soda does wonders even in raw form (without potentisation, but just dilution), when we have the problem of excess acidity.

Garcot

"wisdom in your body is deeper than your deepest philosophy" (Nietszche)

| **Re:Home made Naturm Sulphate** | By: udaya kumar<br>-- | January 14 2010 |
|---|---|---|

Dear Giri,
I am glad you prescribed this for home preparations. I wondered what happens to the other ingredients. So, my experiments leads me here:

1. I did not have Tide with me so I used another detergent "Total" (Swiss made).
The components are :

1. Zeolites - Sodium Calcium Alumina silicates.
Biomedical application sof Zeolites include - use as detoxicants, de-contaminent, vaccine adjuvants, anti-bacterial agents, anti tumor drug adjuvants, anti bacterial agents, hemodialysise, improve bone formation,

treatment of diabetis mellitus, lyme's disease as detoxifier.

2. polycarboxylates
3. Savon
4.Phosphonates
5. Perfume
6. Enzymes
7. Butylphenyl -methylpropional -sperm damage, skin irritator.
8. Citronellol -people with perfume allergy should avoid.
9. Hexylcicinnamaldehyde -extract essential oil of chamomilla.
10.Linalool
11. Benzyl Benzoates.

I took one sip after the fourth dilution and two sips after the 10th dilution/succusion.

The only symptoms or benefits seen after one minute and 10 minutes are :

1. scalded sensation on tongue.
2. heat at the scapula (may be due to the exercise of succusion).
3. slight irritation and tickling at throat.
4. minor hawking of throat once or twice.
5. A bit of dullness.

I think all the symptoms of Ethyl methyl derivatives or Ether (including perfumes) should show opposite benefits than what is received from material doses, and that of lesser gross elements should show similar benefits. I am waiting for any improvements in any fields. I am normally healthy, with endurance power, and therefore not expected to show much symptoms. I shall certainly mark my findings here from now on if any unusual symptoms occur and continue three times doses of the medicine for a few days for the benefit of all.

it is very interesting to note the Zeolite factor which is equivalent to our purging of the sins in spirituality. Here the etherial factor works, and in spirituality its equivalent god works. Mysterious are the ways of God. with regards.

--

| **Re:Home made Naturm Sulphate** | By: girilal<br>New Jersey USA | January 14 2010 |
|---|---|---|

Dear Udaya

I love homemade prescriptions because I travel a lot and meet many poor people who cannot afford medicine. For long ago I was looking to find homemade Nat Sul so I experimented with Tide detergent after reading its label. Results were wonderful.

And thanks for informing your own experiments. Probably with each brand one may get different result. Probably your result is good for cough due to itching in the throat. One should try.

Once in the Harshil (A village before Gangotri) I met a sheepherder man, his whole face was swollen. He said it was due to an accident some years ago and bone narcosis had set in. He went to PGI Chandigarh for his treatment, but due to lack of money he gave it up and also doctors told him that he must live with his ailment.

So matchstick remedy came to my mind and I taught him to make it with matchsticks. When I returned to the same village after a week, that sheepherder was half cured.

girilal

| **Re:Home made Naturm Sulphate** | By: garcot<br>Bangalore | January 15 2010 |
|---|---|---|

Dear Udaya,

I derived good benefits, may be of the fact that I had used a 1:1000 ratio potentised to something equivalent to 6c but with higher dilution.

Garcot

do you know any home made remedy or homeopathy for hair loss and dry skin

| | | |
|---|---|---|
| **Re:Home made Naturm Sulphate** | By: WillHolt<br>uk | January 16 2015 |

use the Q medicines regularly for a week.....the headache should not be coming....use Arsenic Album 30C and Natrum Mur 30C when having a headache...one dose each.

| | | |
|---|---|---|
| **Re:Home made Naturm Sulphate** | By: Mitchel880<br>United states | January 24 2015 |

After within the Harshil (A town ahead of Gangotri) I fulfilled a sheepherder gentleman, his or her full encounter was inflamed. They stated it was on account of any sort of accident several years ago along with bone narcosis had occur. They attended PGI Chandigarh intended for his or her treatment, although on account of deficiency of money this individual provided this in place and in addition health professionals instructed him or her that he have to are living in reference to his ailment.

Consequently matchstick cure stumbled on my brain along with I coached him or her to generate this together with matchsticks. While i delivered for the similar town from a few days, that will sheepherder was fifty percent healed.

Click picture for many more pictures

HONEYSUCKLE

This remedy treats homesickness and prolonged bereavement and belongs to the group, NOT SUFFICIENT INTEREST IN PRESENT CIRCUMSTANCES along with HORNBEAM, CLEMATIS, WILD ROSE, WHITE CHESTNUT, MUSTARD, and CHESTNUT BUD. These individuals are not fully engaged in the here and now and live in the past. There is UNRESOLVED TRAUMA or SEVERE GRIEF like STAR OF BETHLEHEM as well as SLEEPINESS, LETHARGY, AND DIMINISHED VITALITY. It is especially useful in circumstances where children or partners are dying or have died.

Jayashree Kanoi

| **Re:HONEYSUCKLE [Bach Flower Remedy]** | By: garcot<br>Bangalore | March 7 2010 |
|---|---|---|

Lonicera caprifolium

Honeysuckle is a trailing perennial climber that covers hedges and small trees, growing up to 6 m in length. The leaves are rounded in opposite pairs, the flowers bud at the end of the stem in a cluster of lengthening red tubes that split open to reveal the stamens and style. The inside of the tube is white but it turns yellow when the flower has been pollinated. The distinction that is made between L. caprifolium and L. periclymenum can be seen in the leaves. L. caprifolium, which Bach chose, has perfoliate leaves (only on the upper stems), that is they clasp around the stem without a stalk. L. periclymenum also has a pink variety so the leaves should be examined carefully. Fly Honeysuckle (L. xylosteum) has yellowish flowers in pairs, it is smaller and has pointed leaves.

Flowering Period

Honeysuckle flowers from June to August.

Preparation

Honeysuckle is prepared by the boiling method. The flowering heads are picked with a few leaves. Select those flowers that are predominantly red and white without too many of the dying yellowed petals.

Uses

Preoccupation with memories of the past.

This is the remedy for those who are unable to give their full attention to the present, but instead dwell on happy memories and the good times they once had. It is because they believe that life will never be as good again that they allow the past to dominate their thoughts.

Animals would need Honeysuckle for the same reasons - when they long for what has gone. The remedy might be considered if the animal shows signs of distress - becoming introverted, losing its appetite etc.- when it has been parted from someone or somewhere it knows and trusts.

Ref: http://www.herbs2000.com/h_menu/bfr_honeysuckle.htm

"wisdom in your body is deeper than your deepest philosophy" (Nietszche)

| **Re:HONEYSUCKLE [Bach Flower Remedy]** | By: garcot<br>Bangalore | March 7 2010 |
|---|---|---|

People in the negative Honeysuckle state are literally caught in a time warp. They live largely in the past.

Sometimes this condition is a temporary one, activated by being in a new environment such as the transitional period between jobs, dwellings, geographic locations, relationships. It is often experienced by the elderly, although this is less likely to happen if they are actively engaged in the present.

Often, though, it is a chronic condition, as in the case of people who feel that adult life can never be as good as the days of their youth, or those who lose a spouse or partner while young and never find anyone as good as the lost love.

This state is a refusal to accept that one is a growing, changing individual, and its source, as suggested above, is often the belief that if one roots oneself sufficiently in the past, when life was more pleasant, one may escape the present, which seems largely a disappointment. There may also be the fear that to make the attempt to achieve some satisfaction and pleasure in the present would result in even greater disappointment.

Sometimes, though, those who cling to the past aren't immersing themselves in positive memories, but are bound to it by regret and sorrow. They may say to themselves, "If only things had been different," "If only I hadn't . . ." They are attached to the past because it is for them incomplete; in their minds they constantly go over it, trying to make it better.

This can show up in subtle ways in cases of people who, because they were unloved or mistreated by their parents, find it impossible to love or trust anyone in an adult relationship. It is a factor in any situation in which people perpetuate limiting thoughts and behavior from earlier times. It is a way of being characterized by the often-unspoken belief that, bad as the past was, the future will be even worse.

The Honeysuckle Flower Essence helps people to dissolve their attachments to the past, and allows them to move with confidence and hope into the present. It helps them to finally release painful attachments, and while they will not forget those memories which were pleasant, they learn to use them as a foundation for confidence that the present and future can be just as rewarding.

Dear Garcot,
Only Caprifolium is used or other varities are also used? There are about 140 varieities of Lonicera viz:

Lonicera acuminata ; albiflora ;alpigena
;altmannii ;angustifolia ;anisocalyx ;arborea ; arizonica ;biflora
;bournei ;brevisepala ;buchananii ;buddleioides ;caerulea
;calcarata ;calvescens ;canadensis ;caprifolium ;carnosifolis
;chrysantha ;ciliosa;ciliosa ;ciliosissima ;cinerea
;codonantha;confusa;conjugialis ;crassifolia ;cyanocarpa
;dasystyla ;dioica ;elisae ;etrusca ;fargesii ;ferdinandii
;ferruginea ;flava;fragilis;fragrantissima ;fulvotomentosa
;glutinosa ;graebneri ;gynochlamydea ;hellenica ;hemsleyana
;heterophylla ;hildebrandiana ;hirsuta ;hispida ;hispidula ;humilis
;hypoglauca;hypoleuca; implexa ;inconspicua ;inodora

| **Re:HONEYSUCKLE [Bach Flower Remedy]** | By: garcot<br>Bangalore | March 7 2010 |
|---|---|---|

Dear Udaya,

Lonicera japonica is also called Honeysuckle flower, but I believe, it is Lonicera Caprifolium which is used at Dr.Bach research Centre.
There are many types of Honeysuckle, but Bach specifically used only Lonicera caprifolium found in a certain area. Many of the species he used are difficult to identify without the help of a botanist. Even plants with the same botanical name, grown in different areas of the world have very different effects. This is due to the difference in soil and climate which naturally effect the chemical activity and quality of the plant.

Dr. Bach left the planet feeling that his 39 flower essences provided the complete flower essence kit for all time and stated no others would be necessary. In fact, his legacy spawned an era of avid flower essence research and discovery. There are currently hundreds of flower essences available from all over the world. There are even Flower Essence Pharmacies in existence, that stock a multitude of the Flower Essences available on the planet today.

You can download the pdf file from here which gives the complete details of Botanical name and the corresponding name of flower essences. I am surprised many more flower essences that are under active research, and many of these plants are already used in Homeopathy.

http://www.fesflowers.com/pdf/botanicalnames.pdf

Regards
Garcot

|---|---|---|

Honeysuckle Herb seems to have many other healing properties:

RESEARCH

Research carried out on the properties inherent in the “jin yin hua” suggests that active compounds in the herb can help inhibit the growth of the tuberculosis bacillus and can help counteract infection of this dangerous pathogen. The Chinese also investigated other known properties of the herb, during one clinical trial, the jin yin hua was used in combination with the ju hua herb - this herbal mixture was found to be very effective in reducing the elevated blood pressure in individuals affected by hypertension. The European honeysuckle may also prove to be very useful in counteracting infection as it is very similar to the “jin yin hua” herb.
CONSTITUENTS

Honeysuckle's constituents include a volatile oil, tannins, and salicylic acid.
Honeysuckle contains a volatile oil (which includes linalool and jasmone), tannins, luteolin, and inositol.

## HOW IT WORKS IN THE BODY

The use of remedies made from the honeysuckle - Lonicera caprifolium - in the Western world is based on the knowledge gleaned from its age old usage and herbal lore. Some of the ways in which the honeysuckle is used in the West include the preparation of an herbal gargle or mouthwash from the leaves for use as a treatment for sore throats and gum or other general oral problems. The remedies made from the honeysuckle flowers are commonly employed in the treatment of asthma and related respiratory disorders - the herbal remedy helps soothe and relax the irritated respiratory passages. The traditionally use of the Lonicera japonica - variety of honeysuckle in China, or the “Jin Yin Hua’ as it is known is much more extensive. Clinical studies carried out in China have shown that the herb possesses distinct bactericidal action against both the streptococcus and staphylococcus strains of bacteria. During the laboratory experiments carried out on human subjects, the herb was demonstrated to induce some very potent protective effects on the tissues of the lungs in tuberculosis affected patients. The traditional uses of the herb in the Chinese system of medicine includes the treatment of abscesses or swellings in the body, the herbal remedy was particularly used in treating disorders affecting the breast, the throat, the eyes, and used extensively as an internal medication. The remedies made from the honeysuckle are also employed during the early stages of many diseases that come with fever. The herbal remedy is used to treat individuals with sensitivity to wind, they are used in treating chronic soreness in the throat, and to alleviate persistent or chronic headache. The herbal honeysuckle remedy is also employed as a remedy in treating cases of damp or heat dysenteric disorders in patients; it is also used in treating urinary dysfunction accompanied by pain. The property of being both “sweet and cold” is the alluded to this remedy in the Chinese system of medicine.

## APPLICATIONS

Flowers:

HERBAL INFUSION – the honeysuckle flowers can be combined in a remedy with many other expectorant herbal flowers, including flowers of herbs such as the cowslip, the elecampane, or the mulberry, this remedy is excellent for treating problems such as chronic coughs and in mild forms of asthma and some respiratory disorders.
SYRUP – the syrup made from the honeysuckle flowers can be used along with the floral infusion for treating coughs - particularly if they are chronic. The syrup may be used as a combination therapy with other herbal flowers, including expectorant herbs such as the mullein or the marshmallow herb.

Flower buds:
HERBAL DECOCTION – this form of the remedy can be used in the early stages of getting a feverish cold that is accompanied by some characteristic symptoms including persistent headache, great thirst, and soreness in the throat. The dosage to use is ten to fifteen g of the dried honeysuckle floral buds mixed in six hundred ml of water as one dose. If the cold is accompanied by very high fevers, than the huang lian and huang qin herbs can be added to the remedy.
HERBAL TINCTURE – the tincture prepared from the honeysuckle is used for the treatment of different digestive disorders, including persistent diarrhea or chronic gastroenteritis that accompanies food poisoning and related complaints.
Stems:
HERBAL DECOCTION – the decoction can be prepared by steeping fifteen to thirty g of dried honeysuckle stems in six hundred ml of water. The use of the stem decoction is similar to the way in which the flower bud decoction is used. This remedy is excellent particularly for chronic pain in the joints, as well as in the treatment of influenza and other infections. This herbal remedy can be combined with the use of other cooling herbs, including the Chinese “luo shi teng” or “shi hu,” particularly when intending to treat inflammatory diseases, such as rheumatoid arthritis and related problems.

HORNBEAM

This remedy is for THOSE WHO SUFFER UNCERTAINTY along with SCLERANTHUS, WILD OAT, MUSTARD, CERATO, GENTIAN AND GORSE. It clears the head and makes life a pleasure again. It has mental fatigue after a prolonged convalescense. One sees demands only on the mental plane, or prolonged consumption in the modern world. “nothing goes in.” It can be used in CONNECTIVE TISSUE DISEASE and MENTAL RETARDATION, AND PROCRASTI-NATION. There is no willpower to push oneself. The person is overwhelmed and bored and irritable. The remedy can be used after A HEAD INJURY to help with concentration.

HYDRASTIS CANADENSIS
Golden Seal
(HYDRASTIS)

Acts especially on mucous membranes, relaxing them and producing a thick, yellowish, ropy secretion. The catarrh may be anywhere,-throat, stomach, uterus, urethra,-it is always characterized by this peculiar mucous discharge. Hydrastis is especially active in old, easily-tired people, cachectic individuals, with great debility. Cerebral effects prominent, feels his wits sharpened, head cleared, facile expression. Weak muscular power, poor digestion and obstinate constipation. Lumbago. Emaciation and prostration. Its action on the liver is marked. Cancer and cancerous state, before ulceration, when pain is principal symptom. Goitre of puberty and pregnancy. Small-pox internally and locally. The power of Hydrastis over smallpox seen in modifying the disease, abolishing its distressing symptoms, shortening its course, lessening its danger and greatly mitigating its consequences (J. J. Garth Wilkinson).

Mind.--Depressed; sure of death, and desires it.

Head.--Dull, pressing frontal pain, especially connected with constipation. Myalgic pain in scalp and muscles of neck (Cimicif). Eczema on forehead along line of hair. Sinusitis, after coryza.

Ears.--Roaring. Muco-purulent discharge. Deafness. Estachian catarrh, with high-pitched voice.

Nose.--Thick, tenacious secretion from posterior nares to throat. Watery, excoriating discharge. Ozæna, with ulceration of septum. Tends to blow nose all the time.

Mouth.--Peppery taste. Tongue white, swollen, large, flabby, slimy; shows imprint of teeth (Merc); as if scalded; stomatitis. Ulceration of tongue, fissures toward the edges.

Throat.--Follicular pharyngitis. Raw, smarting, excoriating sensation. Hawking of yellow, tenacious mucus (Kali bich). Child is aroused suddenly from sleep by this tenacious post-nasal dropping. Goitre of puberty and pregnancy.

Stomach.--Sore feeling in stomach more or less constant. Weak digestion. Bitter taste. Pain as from a hard-cornered substance. Gone feeling. Pulsation in epigastrium. Cannot eat bread or vegetables. Atonic dyspepsia. Ulcers and cancer. Gastritis.

Abdomen.--Gastro-duodenal catarrh. Liver torpid, tender. Jaundice. Gallstones. Dull dragging in right groin with cutting sensation into right testicle.

Back.--Dull, heavy, dragging pain and stiffness, particularly across lumbar region, must use arms in raising himself from seat.

Rectum.--Prolapsed; anus fissured. Constipation, with sinking feeling in stomach, and dull headache. During stool, smarting pain in rectum. After stool, long-lasting pain (Nit ac).

Hæmorrhoids; even a light flow exhausts. Contraction and spasm.

Urine.--Gleety discharge. Urine smells decomposed.

Male.--Gonorrhœa, second stage; discharge thick and yellow.

Female.--Erosion and excoriation of cervix. Leucorrhœa, worse after menses (Bov; Calc c); acrid and corroding, shreddy, tenacious. Menorrhagia. Pruritus vulvæ, with profuse leucorrhœa (Calc c; Kreos; Sep). Sexual excitement. Tumor of breast; nipple retracted.

Respiratory.--Chest raw, sore, burning. Dry, harsh cough. Bronchial catarrh, later stages. Bronchitis in old, exhausted persons, with thick, yellow, tenacious expectoration. Frequent fainty spells, with cold sweat all over. Feels suffocating when lying on left side. Pain from chest to left shoulder.

Skin.--Eruption like variola. Lupus; ulcers, cancerous formations. General tendency to profuse perspiration and unhealthy skin (Hepar).

Relationship.--Antidote: Sulph.

Useful after too much Chlorate of Potash for sore throat.

Compare: Xanthorrhiza apifolia; Kali bich; Conium; Ars iod; Phytol; Galium (cancer-nodulated tumor of the tongue); Asterias; Stann; Puls. Also Manzanita (diarrhœa, gonorrhœa, gleet, leucorrhœa, catarrhal conditions). Hydrastinum muriaticum-Muriate of Hydrastia (Locally, in aphthous sore mouth, ulcers, ulcerated sore throat, ozæna, etc. Internally, third dec trit. Is a uterine hæmostatic and vasoconstrictor; metrorrhagia, especially from fibroid tumors; hæmorrhages; in dilatation of the stomach, and chronic digestive disorders). Hydrastin sulph 1x (hæmorrhage of bowels in typhoid). Marrubium-Hoarhound--(a stimulant to mucous membranes, especially laryngeal and bronchial; chronic bronchitis, dyspepsia, and hepatic disorders;

colds and coughs).

Dose.--Tincture, to thirtieth attenuation. Locally colorless. Hydrastis, mother tincture, or fluid extract.

## HYDROCYANICUM ACIDUM
## Prussic Acid
## (HYDROCYANIC ACID)

One of the most toxic agents known. Convulsions and paralysis express the action of this remedy. Spasmodic constriction in larynx, feeling of suffocation, pain and tightness in chest, palpitation; pulse weak, irregular. Singing sensation at the epigastrium. Hysterical and epileptic convulsions. Cyanosis. Collapse, due to some pulmonary condition not a cardiac collapse. Catalepsy. Cholera. Stage of collapse (Ars; Verat). Coldness. Tetanus narcolepsy.

Mind.--Unconscious. Wild delirium. Fear of imaginary troubles. Fears everything-horses, wagons, houses falling, etc.

Head.--Violent stupefying headache. Brain feels on fire. Pupils motionless or dilated. Supra-orbital neuralgia, with flushing on same side of face.

Face.--Jaws clenched in rigid spasm. Froths at mouth. Pale, bluish lips.

Stomach.--Tongue cold. Drink rumbles through throat and stomach. Gastralgia; worse when stomach is empty. Great sinking at pit of stomach. Pulsative pain in præcordial region.

Respiratory.--Noisy and agitated breathing. Dry, spasmodic, suffocative cough. Asthma, with contraction of throat. Whooping-cough. Paralysis of lungs (Aspidos). Marked cyanosis; venously congested lung.

Heart.--Violent palpitation. Pulse, weak irregular. Cold extremities. Torturing pain in chest. Angina pectoris (Spigel; Oxal ac).

Sleep.--Yawning with shivering. Irresistible drowsiness. Vivid, incoherent dreams.

Relationship.--Antidotes: Ammon; Camph; Opium.

Compare: Cicuta; Oenanthe; Camph; Lauroc.

Dose.--Sixth and higher potencies.

Jayashree Kanoi

| **Re: HYDROCYANICUM ACIDUM** | By: girilal<br>New Jersey USA | September 2 2007 |
|---|---|---|

I have discovered another great homemade remedy for Angina problems espacially for Cardiac Asthma. That is home-made Hydrocyanic Acidum.

Hydrocyanic Acid or prussic acid in present in the fruit kernels.

The kernel (also referred to as the pit or stone) of almonds, apricots, plums, peaches and also in the apple seeds. It feels like bitter almond.

Crush the inside soft of the pit or about 3 seeds of a ripe apple and mix it with about 100 parts of any liquor. Shake it vigorously for about 5 minutes and medicine is ready.

It works more predictable and better than potentized hydrocyanic acid. Please try this remedy along with Arnica and Crategus and report the symptoms here.

Make sure to shake up the mixture everyday before using.

girilal

HYOSCYAMUS NIGER
Henbane
(HYOSCYAMUS)

Disturbs the nervous system profoundly. It is as if some diabolical force took possession of the brain and prevented its functions. It causes a perfect picture of mania of a quarrelsome and obscene character. Inclined to be unseemly and immodest in acts, gestures and expressions. Very talkative, and persists in stripping herself, or uncovering genitals. Is jealous, afraid of being poisoned, etc. Its symptoms also point to weakness and nervous agitation; hence typhoid and other infections with coma vigil. Tremulous weakness and twitching of tendons. Subsultus tendinum. Muscular twitchings, spasmodic affections, generally with delirium. Non-inflammatory cerebral activity. Toxic gastritis.

Mind.--Very suspicious. Talkative, obscene, lascivious mania, uncovers body; jealous, foolish. Great hilarity; inclined to laugh at everything. Delirium, with attempt to run away. Low, muttering speech; constant carphologia, deep stupor.

Head.--Feels light and confused. Vertigo as if intoxicated. Brain feels loose, fluctuating. Inflammation of brain, with unconsciousness; head is shaken to and fro.

Eyes.--Pupils dilated, sparkling, fixed. Eyes open, but does not pay attention; downcast and dull, fixed. Strabismus. Spasmodic closing of lids. Diplopia. Objects have colored borders.

Mouth.--Tongue dry, red, cracked, stiff and immovable, protruded with difficulty; speech impaired. Foams at mouth. Teeth covered with sordes. Lower jaw drops.

Throat.--Stinging dryness. Constriction. Cannot swallow liquids. Uvula elongated.

Stomach.-- Hiccough, eructations empty, bitter. Nausea, with vertigo. Vomiting, with convulsions; hæmatemesis; violent cramps, relieved by vomiting; burning in stomach; epigastrium tender. After irritating food.

Abdomen.--Colic, as if abdomen would burst. Distention. Colic, with vomiting, belching, hiccough screaming. Tympanites. Red spots on abdomen.

Stool.--Diarrhœa, colicky, pains; involuntary, aggravated by mental excitement or during sleep. Diarrhœa during the lying-in period. Involuntary defecation.

Urine.--Involuntary micturition. Bladder paralyzed. Has no will to urinate (Caust).

Male.--Impotence. Lascivious; exposes his person; plays with genitals during fever.

Female.--Before menses, hysterical spasms. Excited sexual desire. During menses, convulsive movements, urinary flux and sweat. Lochia suppressed. Spasms of pregnant women. Puerperal mania.

Chest.--Suffocating fits. Spasm, forcing bending forward. Dry, spasmodic cough at night (worse lying down; better sitting up), from itching in the throat, as if uvula were too long. Hæmoptysis.

Extremities.--Picking at bed-clothes; plays with hands; reaches out for things. Epileptic attacks ending in deep sleep. Spasms and convulsions. Cramps in calves and toes. Child sobs and cries without waking.

Sleep.--Intense sleeplessness. Sopor, with convulsions. Starts up frightened. Coma vigil.

Nerves.--Great restlessness; every muscle twitches. Will not be covered.

Modalities.--Worse, at night, during menses, after eating, when lying down. Better, stooping.

Relationship.--Antidotes: Bell; Camph.

Compare: Bellad; Stram; Agaric; Gels.

Hyosc hydrobrom.--Scopolamine hydrobromide (Paralysis agitans); tremors of disseminated sclerosis. Sleeplessness and nervous agitation. Dry cough in phthisis. Similar in its effects to alcohol, both recent and remote. Corresponds to the effects of strong poisons introduced into or generated within the body. Symptoms of uræmia and acute nervous exhaustion. A remedy for shock. Third and fourth dec trituration. In physiological dosage (1-200 gr) mania and chorea; insomnia. Scopola (Japanese Belladonna)-chemically identical with Hyoscine

(Joyous delirium, licking of lips and smacking of mouth; sleepless; tries to get out of bed; sees cats, picks imaginary hairs, warms hands before imaginary fire, etc).

Dose.--Sixth, to 200th potency.

girilal

| **HYOSCYAMUS NIGER Constituion** | By: girilal<br>New Jersey USA | September 18 2006 |
|---|---|---|

Hyocyamus
(Fear of being betrayed, Suspicious)

1. If he is in partnership with you he will say, “You put your money first; I will put mine later on because I am busy”.
2. “Doctor be cautious while prescribing me, already I am in bad shape. Bad medicine may ruin me further”.
3. “Doctor, I have heard your big name, you have treated thousands of patients, I will only believe in you if you treat me, if you do, I will bring hundreds of more patients to you”,
4. “Doctor the medicine you are giving me is the good brand name, I don’t want any surprises”. He will even ask the company name and double check it with pharmacist.
5. “If it comes to eating at new place, he will tell the others to eat it first”
6. Blames others. You gave me pickle to eat and now I have fever. Blames parents, brothers and sisters.
1. Suspicious and doubtful
2. He says I am doing fine, even if he is sick, hides desire
3. Answers monosyllables or answers no to all questions.
4. Fears of being poisoned.
5. Always blames others, never blames himself.
6. Eccentric
7. Very greedy, does not throw any thing. Hoards things.
8. Can not keep a secret
9. Does not follow the law or rules.
10. Tells bad things to people right on their face.

He does not want any test or diagnosis done, he is scared that if some thing bad may come up.

Belladonna “Doctor, get the tests done”
Cocculus “I don’t care about tests, they tell nothing just start your treatment”
Hyocyamus “No not tests, they just find the bad thing which may not be there”

Belladonna Very simple minded person, he will eat whatever is given to him
Opium Taste a little bit first
Hyocyamus He will tell the others to eat it first

Belladonna Blames luck.
Opium Blames himself
Hyocyamus Blames others

| **HYOSCYAMUS NIGER Constituion/Personality** | By: sammy<br>Malaysia | September 23 2006 |
|---|---|---|

Hyoscyamus niger is a remedy for the more passive psychoses. There certainly can be outbursts of violent aggression, but usually the patient is mainly occupied with him- or herself. These people are talking nonsense to themselves or to unseen people, often making automatic gestures like picking at their clothes. This is the behaviour you often see in old senile persons.

The Indian homoeopath Sankaran states that the underlying basic emotion in Hyoscyamus is the idea that something injust has been done to him, as if he is sold or betrayed. Such an idea can result from a disappointed love affair, what makes understandable that one of Hyoscyamus' delusions is that "men are swine". The underlying disturbance in this remedy picture is a severe jealousy and suspicion. Hyoscyamus projects things upon others, holds them responsible for the wrongs in his life (it is possible that they prepare in cold blood a murder on the lover of their ex). Their tendency to blame everybody else is the seed for an ever growing suspicion and paranoia. It can possibly start with the idea that others are badmouthing him and end with the idea that every stranger behind a window is trying to kill them. In this great fear they refuse to take medicines or eat food because it might be poisoned. This fear is accompanied by great nervous restlessness, resulting in spasms, trembling, twitching, convulsions and constantly repeated movements like picking at bedclothes or making involuntary gestures in the air.

Another thing is being obsessed with controlling certain things, like guiding imaginary walking insects on the wall. Or by sitting on the floor while firmly pressing the feet against a bathroom door, because the devil and his army would hide behind it - as one of my patients feared.

When the insanity grows stronger the attention gets focused on the instinctive sphere. Here comes the erotic mania in, so characteristic for Hyoscyamus. They are very loquatious and like to talk dirty. Patients undress and expose their genitals to anyone; they constantly play with their genitals (it can be a good remedy for exhibitionists). At the same time they get very interested in urination and defaecation. It can work out in the way that they continiously speak and joke about sex, urination and stool. Or they play for hours with their genitals or their stool. Or they suffer from involuntary loss of urination and stool and sit or lie in it without conscious notion. (Please note that Hyoscyamus might also be the right remedy for a child who involuntarily looses urine or stool without any particular reason! In that case the child does not need to show any of the mental characteristics of this remedy.)

Swallowing can be difficult because of a spasm of the throat muscles. The tongue and mucous membranes are dry.

They feel worse by lying down, emotions, touch, jealousy, cold and sleep. They ameliorate by sitting straight up, by movement and warmth.

Hypericum
One who makes a study of the proving of Hypericum will be reminded of a class of injuries involving sentient nerves and it is not surprising that this remedy has come into use for the results of such injuries.
Injuries: The surgery of Homeopathy largely involves the use of Arnica, Rhus tox., Ledum, Staphysagria, Calcarea and Hypericum. These remedies are used in a routine way when a physician runs into semi-surgical conditions, or the results of injuries.
For the bruised, "black-and-blue," sore appearance and sensation Arnica comes into use it corresponds especially to the acute stage until the soreness and bruised condition have disappeared from the parts injured or from the whole body; but for the strains of muscles and tendons Arnica proves insufficient and a thorough study of Rhus will show that that remedy is suitable for the resultant weakness of tendons and muscles, and the bruised, rheumatic feelings that come on in every storm and often wear off on continued motion.

For the final weakness that persists even after Rhus we have Calcarea carb. In these three remedies we have a series, but to distinguish these from Hypericum is the important thing. Hypericum is only a minor remedy for bruised and strained tendons and muscles; it goes into a different class of complaints.

Hypericum and Ledum run close together, and they have to be compared. Ledum, as much of the sore bruised feeling of Arnica and will often take its place; but Hypericum and Ledum come together for consideration when an injury to a nerve has taken on inflammatory action. Instead of the muscles and bones and blood vessels, as in Arnica, Rhus and Calcarea, the nerves are the sphere for these two remedies.

Nerves injuries: When the finger ends or toes have beer, bruised or lacerated, or a nail has been torn off, or when a nerve has become pinched between a hammer and the bone in a blow, and that nerve becomes inflamed and the pain can be traced up along the nerve, and it is gradually extending toward the body from the injured part with stitching, darting pains, coming and going, or shooting up from the region of the injury toward the body, a dangerous condition is coming on.

In this condition Hypericum is above all the remedies to be thought of and hardly any other medicine is likely to come in. It hardly need be said that lock-jaw is threatening.

Sometimes a vicious dog will take bold of an individual through the thumb, or through the hand or the. wrist and run one of his great teeth through the radial nerve or some of its branches in the hand, causing a lacerated wound. You may not find in the earlier stages the symptoms of Hypericum, but they will develop gradually and you will have them to treat. Do not cut the off, but cure it. We cure all these injuries with medicines-punctured, incised, contused and lacerated wounds, painful wounds.

A wound will sometimes yawn, swell up, no tendency to heal, look dry and shiny on its edges, red; inflamed; burning, stinging, tearing pains; no healing process. That wound needs Hypericum. It prevents tetanus. Every practitioner knows that lock-jaw way develop after an injury to sentient nerves. The old school doctor is frightened by these shooting pains up the arms after an injury. A shoemaker may stick his awl into the end of his thumb or a carpenter may stick his finger with a brass tack and he does not think much of it, but the next night shooting pains extend up the arm with much violence.

The allopathic physician looks upon that as a series matter, for he sees lockjaw or tetanus ahead. When these pains come on Hypericum will stop them, and from this stage to advanced states of tetanus with opisthotonos and lock-jaw Hypericum is the remedy. It is full of just such symptoms as are found in tetanus and such symptoms as lead to tetanus and it is full of all the manifestations of an ascending neuritis.

Again, you may have an old scar, and it comes in contact with a hard body and is injured, bruised, torn internal) smashed, and stinging, tearing pains come in that cicatrix, and it burns and stings, and there is no relief, and the pain runs toward the body along the course of nerves. A painful cicatrix with pain shooting up toward the centre of the body following up the nerves. Hypericum is the medicine for that.

Now there are other remedies - all know about Arnica, but be sure you keep it in its place. The first stage of the injury, where much bruising has been done, and there are none of these pains that I have described, for the first hours for bruised conditions and concussions and shocks Arnica is routine, because it produces states upon the human body like it had been bruised. But you will find Arnica only fits into that one place.

Arnica should never be used for wounds the way the lay people use it, because if it is used in full strength it may bring on erysipelas.

Again, for bruised of bone, cartilages, tendons, insertion of tendons, bruises about cartilages and about joints, Ruta is better than any other remedy; and if we study the proving of Ruta we will not be surprised, because it produces symptoms like those found in such conditions.

Lingering, sore, bruised places on bones, in joints and upon cartilages. But Ledum comes in very often as a preventive Medicine. It is a preventive medicine when an accident happen to the ends of the fingers, if a patient steps on a nail or tack or sticks a splinter under a finger-nail or into the foot. If a horse pick up a nail, pull it out and give him a dose of Ledum; there will never be trouble, he will, not have lock-jaw.

These punctured wounds, rat bites, cat bites, etc-, are all made safe by Ledum; i.e., Ledum prevents the shooting pains that naturally come and the nerves will never be involved. We will have no trouble if we can give it at once. Again, if the pain is a dull aching in the part that was injured, in the wound Ledum is still the remedy; if it shoots from the wound up the nerve of the arm it is more like Hypericum.

A sensitive nervous women steps on a tack during the day, and she feels all the day where the tack went in, lies down in bed and it aches so violently she cannot keep it still. Ledum will prevent any further trouble, but if that goes on until the morning the pains will be shooting up the leg, calling for Hypericum.

I mentioned the use of Ledum when a horse picks up a nail. Now, if a nail goes through the thin part of the hoof and strikes the coffin bone that horse is almost sure to die with tetanus; the veterinarians know nothing for it; though they paultice it and put on liniments, etc., that horse will die with tetanus; but if a dose of Ledum is given before the tetanus comes on it will save the animal from tetanus; after the jerking comes on it will save the animal from tetanus; after the jerking comes on Ledum will not do, but Hypericum must be given.

Hypericum belongs to lacerated wounds and when there is laceration of parts that are full of small nerves, sentient nerves, give it at once. Do not waste time with Arnica because there is soreness, for the soreness is of much less importance than the danger from nerves in lacerated wounds. In punctured wounds give Ledum at once. Whatever sequences come on, of course, have to be met in accordance with the, state and symptoms of the case.

Spine injuries: Injuries of the spine give us another class of troubles requiring Hypericum.

I remember a case such as has been met with quite often and such as we read of and hear about, one, however, that was not saved. A sudden lurch of the car caused a man who was standing on the rear end of the car to be hurled back on his coccyx. He did not think much of it, went home, bad pains in the head and various pass of the body.

Several physicians were called; nobody could find out what was the matter with him, and at the end of ten days he died. They turned him over and found that his coccyx was black and an abscess was threatening in the muscular region. If it had been known Hypericum would have saved his life.

Many times I have seen Hypericum cure similar conditions. Injuries of the coccyx are among the most serious and troublesome injuries that the physician comes in contact with; injuries just like that, falling back and striking a stone, or something that bruises the coccyx.

Very little is found immediately in the coccyx; close examination reveals nothing more than soreness upon pressure, but many times we do have the description of pains shooting up the spine and down the extremities, shooting pains over the body and often convulsive movements.

When such symptoms are present any physician ought to be wise enough to find out an injury, but even very astute physicians are blinded over injuries of the coccyx. Many a woman sustains an injury of the coccyx during labor, and however, slight, soreness remains for years afterwards, and she is always in trouble, always hysterical and nervous, from this injury of the coccyx.

Such injuries, if taken early, can be cured by Hypericum. It is in the remedy. Slight inflammation or irritation of the lower part of the cord; it feels lacerated, and sore, and aches and never passes over until the results of the injury right in the spot have been removed. These injuries have been cured in after years by Carbo animalis, Silica and Thuja and other remedies as indicated.

It is related also to injuries of the spine higher up. It is not an uncommon thing for a man. while going down stairs, to fall backward, his feet to slip from under him and he strikes his back upon one of the steps and undergoes a sharp injury.

Some will at once give Rhus tox; I have known others to give Arnica. Hypericum is to be given at once to prevent the kind of inflammation that may come from such an injury. Then there will be other tendencies, such as drawings and rheumatic symptoms, that will come on, calling for Rhus and finally Calcarea.

Old weakness of the back, with painfulness on rising from a seat, are often cured by Rhus, followed by Calcarea, but Hypericum must first of all take care of the condition of the fibres of the cord and meninges. Meningeal troubles are common from injuries of that class, with drawing of the muscles of the back, a feeling of contraction or tightening. Stitching, shooting pains in the back in various directions; they shoot down the limbs. Injuries of the back are not so likely to end in tetanus as the injuries of the sensory nerves; but they are sometimes even more troublesome because they linger so long.

Persons who have been injured in the spine or about the coccyx linger along for years with symptoms that would lead to many remedies. We find in the provings such symptoms as occur after these injuries, and, of course, this remedy will cure anything that its proving justifies. Its action is upon the nerve sheaths and meninges, with stitching, tearing, rending pains along the nerves, wherever there are injuries.

Now, there is another remedy that we want to know. If you have a clear-cut or incised wound made with a sharp instrument, or if you have made such an opening with your knife while practicing surgery, if you have opened the abdominal cavity and the walls of the abdomen take on an unhealthy look, and there are stinging, burning pains, Staphysagria is the remedy that will make granulation come immediately.

Sphincters: Staphysagria is also a wonderfully useful remedy where the sphincter stretchers have been.

Staphysagria is the natural antidote to stretching. When the urethra of a woman has been stretched for stone in the bladder, Staphysagria is useful. I remember a case of stretching of the urethra; after the operation the patient was in great distress, screaming and crying, bathed in a cold, sweat. head hot and body in cold sweat.

Staphysagria was given to him and in a few minutes she went to sleep. She had been six hours in that suffering without any relief whatever. Where coldness, congestion of the head, and rending, tearing pains occur from stretching sphincters, or from tearing parts, for the purpose of operation, death is likely to occur, and Staphysagria is closely related to that tearing, lacerating and stretching of fibres which causes such suffering.

After a surgical operation, where there has been much cutting, a

great state of prostration, coldness, oozing of blood, almost cold breath, of course the Materia Medica man, if there is one around, will say,
"Why give him Carbo veg., of course."
Yes, you will, but it will not help him. It may disappoint you. But if you are a surgeon, know your surgical therapeutics better than a Materia Medica man, you will say,
"No, Strontium carb. is what I want."
It relieves that congestion all over the body; he gets warm and has a comfortable night. Strontium carb. is the Carbo veg. of the surgeon.
Lastly, we sometimes have to antidote chloroform, and because there are pains and aches you will get no action from these medicines; you can antidote your chloroform almost instantly by a dose of Phosphorus, because it is the natural antidote of chloroform. Phosphorus will stop the vomiting, Phosphorus has vomiting like that of chloroform. Phosphorus likes cold things, cold water in the stomach, and vomits as soon as water has become warm in the stomach. So does chloroform. Why should they not antidote each other?

Causes of Impacted Wisdom Teeth and Treatments
If the wisdom teeth do not fully come out from the gums it is known as the impacted wisdom teeth. The wisdom teeth are called so because they appear much later and last when compared to all other teeth. These are very common and cause no trouble or pain for most people. Most of us have 4 of these, two at the top and two at the bottom corners. These are also called as the third molars. They usually appear between the age of 18-24.
The impacted wisdom teeth remains embedded in the gums more than its usual time. It may be due to overcrowding also. Though they normally do not cause any problem, sometimes the mesioangular impaction causes impacted wisdom teeth swelling and pain, not being able to open the mouth, bad breath and having bad taste in the mouth. Another condition that is common

with them is pericoronitis. It is an infection caused on the surrounding tissues of the tooth that is not fully outside the gums and is not properly positioned. This is because food particles and bacteria get collected below the gums and cause infection locally. This again results in pain, bad breath, trismus and swelling also. Most dentists believe that it is better for the teeth to remain completely buried which will not cause any pain.
Why does one have teeth that are impacted? Though they develop like other teeth, they take very long time to come out and they are the last to emerge also. Sometimes the jaw is too small and causes overcrowding of teeth with literally no enough space for the wisdom teeth. They become displaced, tilted or twisted and become an impacted tooth. Harmless jaw tumors and cysts also may cause this.
How to make out if you have an impacted tooth? You will have bad breath, gums or the jaw bones will be soft, swelling on the jaw, bad taste in the mouth, lymph nodes may be swollen, you may have infection in the mouth, pain when you are swallowing food, development of tumors, difficulty while opening the mouth etc. There are different ways in which you can treat the impacted teeth.

Hello Jayashree,

Would Hypericum be useful for brachial plexus injury causing flacid paralysis of left arm in a 12 year old car accident ?

Please advise

Regards

IBERIS AMARA
Bitter Candytuft
(IBERIS)

State of nervous excitement. Has marked action upon the heart. Possesses great efficacy in cardiac diseases. Control vascular excitement in hypertrophy with thickening of the heart's walls. Cardiac debility after influenza. Liver region full and painful. White stools.

Mind.--Sad and sighing; fearful and trembling. Irritable.

Head.--Vertigo and pains around heart. Constant hawking of thick, stringy mucus until after a meal. Hot, flushed face. Vertigo, as if occiput were turning around; eyes feel forced outwards.

Heart.--Conscious of heart's action. On turning on left side, stitching pain as of needles through ventricles felt at each systole. Palpitation, with vertigo and choking in throat. Stitching pains in cardiac region. Pulse full, irregular, intermittent. Worse, least motion and in warm room. Sensation of weight and pressure, with occasional sharp, stinging pains. Dropsy, with enlarged heart. Violent palpitation induced by slightest exertion, or by laughing, or coughing. Darting pains through heart. Cardiac dyspnœa. Dilation of heart. Wakes with palpitation about 2 am. Throat and trachea fills up with mucus. Cough causes redness of face. Tachycardia.

Extremities.--Numbness and tingling in left hand and arm. Whole body sore, lame and trembling.

Modalities.--Worse, lying down; on left side; motion, exertion; warm room.

Relationship.--Compare: Cact; Dig; Amyl; Bell.

Dose.--Tincture and first potency.

Body Dysmorphic Disorder and Omega-3 Fatty Acids
Very few of us are ever satisfied by our appearance. Plastic surgery, permanent eyeliner, liposuction, and a series of other cosmetic procedures make the insecure more comfortable in their own bodies. But the millions of adults who suffer from body dysmorphic disorder (BDD) don't quite have these normal concerns about the way they look. Instead, their minds are so consumed by thoughts of the ugliness they perceive, they may go so far as putting their lives on hold. They avoid social occasions and work out of fear of ridicule or offending others with the way they look. Adults with BDD constantly look for affirmation from friends and family, failing to realize that the problem lies with their perception of their own bodies, and not the body itself.
Adults with BDD often insist that plastic surgery will get rid of their anxieties and make them feel less self-conscious about

their bodies. However, such procedures only provide temporary relief. After a few weeks of peace, they'll find something "wrong" with their body that needs correction. It's not uncommon for such patients to have experienced over 20 cosmetic procedures.

There is no treatment for BDD per se, but experts find that this disorder is usually co-morbid with mental conditions like obsessive-compulsive disorder, depression, or anxiety. Given that these disorders are usually caused by low levels of serotonin, their treatments apply to BDD as well. In some cases, selective serotonin reuptake inhibitors (SSRIs) like Zoloft (sertraline) or Prozac (fluoxetine) reduce the severity of the symptoms, especially when combined with psychotherapy. However, the doses required for BDD are significantly higher than the ones used to treat depression, which increases the risk of side effects.

**Replies: 1 & Views: 6917** Font Bottom Of Page **Page 1 of 1** Reply

| **ICHTHYOLUM** | By: Jayashree<br>Calcutta, India | October 28 2006 |
|---|---|---|

Click picture for many more pictures

iStockphoto

ICHTHYOLUM
A Combination of Sulphonated Hydrocarbons, a Fossil Product of Complex Structure found in Tyrol, supposed to be Fish Deposits, contains 10 % Sulphur.

Its action on skin, mucous membranes, and kidneys is prompt and useful. It is strongly antiparasitic; redness, pain and inflammation; decreases tension. Excellent in winter coughs of old people. Polyarthritis. Chronic rheumatism. Uric acid diathesis. Hay-fever. Chronic hives. Tuberculosis, aids nutrition. Alcoholism when nothing will stay on stomach.

Mind.--Irritable and depressed. Forgetful, lack of concentration.

Head.--Dull, aching; better cold, pressure. Dull frontal and supra-orbital headache; worse moving eyes, cold air; better, warmth.

Face.--Skin feels dry and itches. Acne on chin.

Throat.--Irritated; pain to ears; sore, dry, with hawking and expectoration.

Eyes.--Burn, red; worse, any change of temperature.

Nose.--Bland coryza; stuffed feeling; feels sore inside. Irresistible desire to sneeze.

Stomach.--Disagreeable taste, burning sensation, very thirsty. Nausea. Increased appetite.

Abdomen.--Disposition to soft, shapeless stools. Griping in umbilical and left hypogastric region. Early morning diarrhœa.

Urine.--Increased in quantity and frequency. Burning pain in meatus. Uric acid deposits.

Female.--Fullness in lower abdomen. Nausea at time of menses.

Respiratory.--Coryza; dry, teasing cough. Bronchiectasis and phthisis. Bronchitis, especially of the aged.

Skin.--Heat and irritation; itching. Scaly and itching eczema. Crops of boils. Pruritus of pregnancy. Psorisis, Acne, rosacea, erysipelas.

Extremities.--Lameness in right shoulder and right lower extremity.

Relationship.--Compare: Hepar; Calc; Silica; Sulph; Ars; Petrol.

Dose.--Lower potencies.

Externally, it is used as an ointment, with Lanoline 20 to 50 per cent; for chronic eczema and psoriasis, also acne rosacea and gouty joints. Chilblains, scabies. Rectal suppositories for senile prostate.

| **Re: ICHTHYOLUM** | By: girilal<br>New Jersey USA | October 31 2006 |
|---|---|---|

Major homoeopathic medicines prepared from fishes are
1. ERYTHRINUS
2. GADUS MORRHUA
3. OLEUM JACORIS ASELLI
4. EEL SERUM
5. ICHTHYOLUM and
6. TRACHINUS.

ERYTHRINUS
A kind of red mullet. Tincture of the fish is used.
Prover: Dr: Burnett.
Dr: Burnett noticed its effect on some sailors who ate the fish. A peculiar type of red rash seen all over body. It is clinically indicated in pityriasis rubra and also in syphilis.
Complimentary medicine is aurum mur.

GADUS MORRHUA
Natural order is Gadidae.
Proved by Petroz.
Tincture is prepared from the trituration of first cervical vertebra of the fish.
They said to act powerfully on the respiratory tract. Mental symptoms like hopelessness and desire for death are prominent. There is flapping of alae nasi as in lyco. There is general affections on bones. There is heat of palms of hands. Frequent cough with chest pain. Frequent breathing with movement of chest wall. There will be sharp pain in chest< from movement, deep inspiration, coughing etc;
Weak voice. Usually indicated in phthisis.

OLEUM JACORIS ASELLI
Commonly called as Cod liver oil. Oils obtained from the liver of Gadus morrhua and some other allied fishes
Prover: Neidhard.

It is a nutrient and hepatic remedy. The common indications are:

There is soreness of throat, chest, abdomen, kidney etc;
Palpitation is seen as a concomitant symptom.
The discharges are usually yellow.
Dry hacking cough with soreness of chest. Indicated in phthisis.
Sense of fluttering commencing in the region of sacrum rising to occiput.
Creeping sensation with rush of blood to heart.
Evening fevers with burning in palms. Chills running down back.
Cold feet.
Sensitiveness to cold and damp.
Locally applied in ring worm affections.
Emaciated. Dwarfish chilly babies with increased appetite, anemia and milk intolerance.
Abnormal growth of hair on the face of women.

EEL SERUM ( SERUM ANGUILLAR ICHTHYOTOXIN )
It is commonly indicated in renal affections.
The sphere of actions are
- Kidney
- Heart
- Blood.

Usually indicated in renal complaints with oliguria, albuminuria, anaemia etc; acute nephritis with uremia. Also in hypertension with oliguria without oedema.

ICHTHYOLUM
Ammoniacum ichthyol suophonate ( combination of sulphonated hydrocarbons) prepared from a mineral of Tyrol, which is rich in fossilized remains of fish.
This has been used in the old school therapeutics as an external application for skin affections and rheumatism. It is a powerful antiseptic.
Uric acid diathesis. There will be redness due to inflammation.
Indicated in chronic rheumatism. Increased appetite and thirst with nausea. Dry teasing cough as in tuberculosis. Winter cough of old people.

On the skin there is itching eczema, crops of bois, psoriasis and acne.

TRACHINUS
Two types are commonly seen.
- Trachinus draco (sting ball) and
- Trachinus vipera (sting fish).

Trituration of the poisonous fin is used for the preparation.
Intolerable stinging and pain in wounds inflicted with the fins.
Swelling of the part. Gangrenous blisters. Cold clammy sweat.
Also indicated in blood poisoning, asthma, neuralgias and ulcers.
It is associated with violent thirst in nearly all complaints.

COMMON FEATURES:

1. Almost all fishes have marked action on skin. Erythrinus: reddish coloured skin.
Oleum jacoris aselli: ring worm infection.
Ichthyolum: violent itching of skin.
Trachius: painful skin complaint.
2. Fishes seem to act on respiratory mucuous membrane. Also indicated in tuberculosis and asthma.
3. Increased appetite and thirst.
4. Heat of palms of hands.
5. Action on kidneys.

ICTODES FOETIDA
Skunk-cabbage-Ictodes
(POTHOS FOETIDUS)

For asthmatic complaints; worse from inhaling any dust. Hysteria. Erratic spasmodic pains. "Will-o'-the-wisp" like character of its subjective symptoms and its physometric property are special features (Samuel Jones). Inflation and tension in the abdomen. Millar's asthma.

Head.--Absent-minded, irritable. Headache in single spots, with violent pulsation of temporal arteries. Outward drawing from glabella. Better in open air (Puls). Red swelling across the bridge of the nose.

Abdomen.--Inflation and tension in abdomen.

Respiratory.--Spasmodic croup. Troublesome respiration, with sudden feeling of anguish and sweat.

Sneezing, with pain in throat. Pain in chest, with difficult breathing. Tongue feels numb. Asthma; relieved by stool.

Dose.--Tincture and lower potencies.

Strychnos ignatii P. J. Bergius
Image processed by Thomas Schoepke
www.plant-pictures.de

Ignatia
Ignatia is frequently required and is especially suited to sensitive, delicate women and children; to hysterical women. You will not cure the natural hysterics with Ignatia, but you will cure those gentle, sensitive, fine fibred, refined, highly educated, overwrought women in their nervous complaints with Ignatia when they take on complaints that are similar to such symptoms as come in hysteria.
Hysterical diathesis: The hysterical diathesis is one that is very singular and difficult to comprehend.
But a woman, when overwrought and overexcited and emotional, will do things that she herself cannot account for. She will do things as if she were crazy in her excitement. Will do things she regrets, while the hysteric is always glad of it. No

matter how much foolishness there is in it she has only made an exhibition that she is proud of. But our efforts go out for those who imitate them unconsciously. Those who will to do well.

A woman has undergone a controversy at home. She has been disturbed, is excited, and goes into cramps, trembles and quivers. Goes to bed with a headache. Is sick. Ignatia will be her remedy. When she has great distress; unrequited affections. A sensitive, nervous young girl finds out that she has misplaced her affections; the young man has disappointed her; she has a weeping spell, headache, trembles, is nervous, sleepless; Ignatia will make her philosophical and sensible.

A woman loses her child, or her husband. A sensitive, delicate woman, and she suffers from this grief. She has headaches, trembles, is excited, weeps, is sleepless; unable to control herself. In spite of her best endeavors, her grief has simply torn her to pieces. She is unable to control her emotions and her excitement.

Ignatia will quiet her and tide her over the present moment. In all of these instances where all of these conditions brought on from such troubles keep coming back, where your patient dwells upon them, dwells upon the cause, and the state keeps recurring, Natrum mur. will finish up the case.

It will nerve her up and help her to bear her sufferings.

Especially useful in constitutions that have been over wrought at school, in science, music, art. Of course, it is natural for very sensitive girls to go into the arts, such as music, painting, etc.

A daughter comes back from Paris after a number of years close application to her music. She is unable to do anything. She flies all to pieces. Every noise disturbs her. She cannot sleep nights. Excitable, sleepless, trembles, jerks, cramps in the muscles; weeps from excitement, and from every disturbing word. Ignatia will tone her up wonderfully.

Sometimes it will complete the whole case. But especially in these oversensitive girls is Natrum mur. very commonly the chronic. It is the natural chronic of Ignatia. When the troubles keep coming back, and Ignatia comes to a place when it will not hold any longer.

Another place where Ignatia and Natrum mur. run close together. A sensitive, overtired girl, after she has been working in music, and in art, and in school, and has tired herself out, is unable to control her affections. Her affections rest on some one whom she would despise. That may be a singular thing, one may not be able to understand it.

A sensitive girl, though she would not let anyone but her mother know of it, falls in love with a married man. She lies awake nights, sobs. She says,

"Mother, why do I do that, I cannot keep that man out of my mind."

At other times a man entirely out of her station, that she is too sensible to have anything to do with, she just thinks about him. Ignatia, if it is very recent, will balance up that girl's, mind. If not, Natrum mur. comes in as a follower. We do not know half as much about the human mind as we think we do. We only know its manifestations.

These little things belong to this sphere of the action of this medicine. The one who knows the Materia Medica applies it in its breadth and its length, and sees in it that which is similar.

Ignatia has quivering in the limbs. Nervous, tremulous excitement.

"Weakness of the body coming on suddenly.

Hysterical debility and fainting fits.

Fainting in a crowd."

It is especially useful in the tearful, nervous, sad, yielding, sensitive minds.

"Jerking and twitching.

Convulsive twitchings."

Children are convulsed in sleep after punishment.

"Convulsions in children in the first period of dentition.

Spasms in children from fright."

The child is cold and pale, and has a fixed staring look, like Cina.

"Convulsions with loss of consciousness.

Violent convulsions.

Tetanic convulsions.

Tetanus after fright.

Emotional chorea.

After fright, or grief."
Choreic girls. Emotional epilepsy, or epileptiform manifestations.
Paralytic weakness.
"Great mental emotion."
Nursing; night watching. A loss of one arm with as perfect paralysis as if it had come from a cerebral haemorrhage. In a few hours this passes off, and the arm is as well as ever. That is a hysterical paralysis.
"Numbness of one or the other arm.
Tingling and prickling in the arm."
Ignatia is full of surprises. If you are well acquainted with sickness, well acquainted with pathological conditions and that manifestations, you are then able to say whether you should or should not be surprised. You are then able to say what is natural, what is common to sickness. In Ignatia you find what is unnatural, and what is unexpected.
You see an inflamed joint, or an inflamed part where there is heat, redness, throbbing, and weakness; you will handle it with great care for fear it will be painful. Ordinarily you have a perfect right to expect it would be painful. But you find it is not painful, and sometimes ameliorated by hard pressure. Is not that a surprise?
You look into the throat. It is tumid, inflamed, red; the patient complains of a sore throat and pain. Naturally you will not touch it with your tongue depressor for fear it will hurt.
You have every reason to suppose that the swallowing of solids will be painful. But you ask the patient when the pain is present, and the patient will say:
"When I am not swallowing anything solid."
The pain is ameliorated by swallowing anything solid, by the pressure. It pains all other times. Mentally, the patient does the most unaccountable and most unexpected things. Seems to have no rule to work by, no philosophy, no soundness of mind, and no judgment. The opposite of what would be expected, then, will be found.
The patient is better lying on the painful side. Instead of increasing the pain, it relieves the pain.
"Pain like a nail sticking into the side of the head."
The only comfort that is felt is by lying upon it, or pressing upon

it, and that makes it go away.

Stomach: The stomach is just as strange in its indigestion. Some day or other you will have a queer patient, vomiting everything taken into the stomach, and you will have her try gentle food, a little toast, and the simplest possible things, because she has been vomiting for days and people begin to worry about it for fear she will starve to death.

You try this, and you try that, and she can keep nothing down. Finally she says,

"It I could only have some cole slaw and some chopped onions, I think I could get along all right."

It is a hysterical stomach, and the patient eats some raw cabbage and some chopped onions, and from that time on she is well.

Those strange things that are ordinarily hard to digest ameliorate the nausea rather than increase it. While milk and toast, and delicate things, and warm things, such as are usually taken, disturb the stomach and increase the nausea. Cold food is craved, and cold food will be digested when warm food will be disturbing and create indigestion.

Cough: The cough has similar features in it. An irritation will come in the throat, as a rule, that is why people cough.

People cough from smarting in the larynx and trachea, from irritation, from tickling, and from a sensation of fullness or a desire to expel something, and this is better by coughing.

But when the irritation in the larynx and trachea comes in the Ignatia patient you have the unexpected again; because the more she coughs the more the irritation to cough is observed, until the irritation is so great and the cough is so great that she goes into spasms. It has been known of an Ignatia patient, that the more she coughed the greater the irritation to cough, and she was drenched with sweat, sitting up in bed with her night-clothes drenched, gagging and coughing and retching, covered with sweat and exhausted.

When you are called to the bedside of such a patient, don't wait. You cannot get her to stop coughing long enough to say anything to you about it, only you will see the cough has grown more violent; Ignatia stops it at once. Without any provocation whatever a spasmodic condition will come on in the larynx.

Any little disturbance, a mental disturbance, a fright, or distress, or a grievance, will bring a young, sensitive woman home and to her bed, and she will go on with a spasm of the larynx. It is a laryngismus stridulus that can be heard all over the house. Ignatia stops it at once (Gelsemium, Moschus).

Mind: Nervous affections and troubles of all sorts come on at the menstrual period. The mind is always in a hurry, in a state of excitement.

No one can do things rapidly enough. The memory is untrustworthy. The mind flies all to pieces. It is a sort of confusion. No longer able to classify the things that have been classically put into the mind. Cannot remember her music, and her rules, and her scholastic methods. They have all vanished, and she is in a state of confusion. She is a worn-out, nervous person.

Then come fancies, vivid fancies, that are like delirium. Without fever, without chill. just after excitement. She comes home from some great disturbance of her emotions, and goes into a state that, if looked upon, per se, would appear to be a delirium such as appears in a fever. But upon close examination it is not a delirium. It is a momentarily hysterical excitement of the mind, in which the balance is lost, and she talks about everything.

Sees every manner of thing; it is a hysterical insanity, because after she rests or the next morning it has vanished. But these spells come oftener and oftener after they have once begun, and she gives way to them easier and easier, and, if they are not remedied, she becomes a lunatic, a confirmed mental wreck, so that excitement, grief, insanity, all intermingle together as cause and effect. These come first at the menstrual period, and then they come at other times, until they come from every little disturbance. Whenever she is crossed or contradicted.

"She desires to be alone and to dwell on the inconsistencies that come into her life.

Sits and sobs.

At times she is taciturn; again, she prattles and is loquacious, and talks to herself."

She comes into a state in a little while where she delights to bring on her fits and to make a scare. The natural hysteric is born with that, and Ignatia will do her no good. But when this is brought on from conditions described, Ignatia is of the greatest benefit. It runs closely along by the side of Hyoscyamus.

"A feeling of continuous fright, or apprehensiveness that something is going to happen."

With all these mental states she has a feeling of emptiness in the stomach and abdomen. Emptiness and trembling.

"Melancholy after disappointed love, with spinal symptoms,"

"Great grief after losing persons or objects very near.

Trembling of the hands disturbs her very much in writing.

Dread of every trifle."

She goes into a state where she is utterly unable to undertake anything, even to write a letter to a friend.

The Ignatia patient is not one that has been a simpleton, or of a sluggish mind or idiotic, but one that has become tired, and brought into such a state from over-doing and from over-excitement. From going too much. If rather feeble in body, from too much social excitement. Our present social state is will calculated to develop a hysterical mind. The typical social mind is one that is always in a state of confusion. Asks questions, not waiting for the answer.

A good many remedies have this state; a lack of concentration of mind, that is what it is, but this is a peculiar kind of lack of concentration of mind. Dread, fear, anxiety, weeping, run through the remedy.

"Sensitive disposition; hyperacute."

Overwrought intense. Ignatia has another thing:

"Thinks she has neglected some duty."

That is very much like Puls., Hell. and Hyos., only Aurum believes that she has committed a great wrong.

"Thinks that she has neglected some duty."

Dwells upon that much.

"Melancholy after great grief."

It is full of headaches, and they are all congestive, pressing headaches, or tearing headaches, or headaches as if a nail were sticking into the side of the head or temple; ameliorated from lying upon it. The headaches are all ameliorated by heat. The patient generally is ameliorated by warmth and aggravated by cold. Wants cold things in the stomach, but warm things externally. Jerking headaches, throbbing headaches, congestive headaches.

Headaches in nervous and sensitive temperaments. Those whose nervous system has given way to anxiety, grief or mental work.

"Headaches from abuse of coffee, from smoking, from inhaling smoke, from tobacco or alcohol."

Headache from close attention.

"Headache ameliorated, by warmth and rest; worse, from cold winds and turning the head suddenly; worse when pressing at stool, or from jar, from hurrying, from excitement."

Looking up increases the pain; moving the eyes; worse from noise, from light.

"Pain in the occiput; worse from cold, better from external heat. Headache better while eating, but soon after it is worse."

"Disturbance of vision.

Zigzags.

Confusion of vision."

Excessively nervous eyes.

"Acrid tears.

Weeping."

Face: The face is distorted, convulsed, pale and sickly. Pains in the face.

"Violent rending, tearing pains in the face."

Let me put it this way: Some of these overwrought girls that come back from Paris, that I described, overworked in their music, will have violent face-ache, pains in the face, or some other hysterical pains. Others will come back with violent headaches; others with the mental state and confusion; others with all the hysterical manifestations.

Prolonged excitement. Musical excesses. Yes, other girls come back fairly crippled with painful menstruation, ovarian pains, hysterical conditions, displacement; prolapsus of the vagina and of the rectum.

"Tearing, shooting pains upwards from the anus and vagina up into the body towards the umbilicus."

Strange antipathies run through the remedy. It will be impossible for you to ever form any conclusion what one of these sensitive women will think of any proposition that is presented. You cannot depend upon her being reasonable or rational.

It is best to say as little as possible, about anything. Make no promises, listen, look wise, take up your traveling bag and go home after you have prescribed, because anything you say, will be distorted. There is not anything you can say that will please Thirst when you would not expect it. Thirst during chill, but none during the fever, if she has a feverish state. It is suitable in intermittent fever. Excitable, nervous children and women with intermittent fever.

Ignatia Constitution

(Cannot support Injustice& stands against it immediately)
1. Fearless Daring (Audacity) Ignatia is on the top
2. Courageous to the extent of foolishness.
3. Defiant
4. Quarrelsome
5. Injustice cannot support
6. Protesting
7. Delusion that he has incurable disease.
8. Averse to amusement (Sulphur)
9. Consolation aggravates
10. Charitable, serves people.
11. Can not take criticism.

Ignatia does not like company, keeps his problems to himself.

She is very secretive about himself. He gets ailments from disappointment.

Fights back immediately if some body criticizes.

Feels that other laugh at him so he gets angry

Loves to travel

Music agrees

Ailments from financial loss, loss of loved one or emotional hurt.

Ignatia Compared with other remedies:

Sulphur Gets nervous with music (palpitations) + Soon regrets after getting angry
Crocus Sativa Cheerful from music + immediately regrets after getting angry
Natrum Mur. Music makes him/her better + late repentance after getting angry
Aconite Cannot stand music, everything frightens him.
Ignatia Weeps from music + late repentance after getting angry

Natrum Mur. Gets angry when consoled
Ignatia Consolation makes her angrier

Ignitia is the medicine for a broken love affair.
Helps to get over it....also keeps illness away in such a situation...becoz emotional stress causes physical ill-health.

Best / Max Varma

There is only one religion....called mankind.
There is only one law....the law of Karma
There is only one God....He is everywhere and with everyone and knows everything.

| **Re: Ignatia** | By: girilal<br>New Jersey USA | September 14 2006 |

Ignatia is a medicine for grief and anguish.
It relieves and heals acute emotional pain and physical complaints resulting from it.

Situations that might ask for Ignatia are for instance: sudden loss of a loved one, death of a human being or an animal, rape, assault, robbery, accident and scary, frightful situations, in fact anything that can cause you an emotional shock. Furthermore Ignatia is a beautiful medicine in cases of (silent) grief for several reasons, for instance feeling of being denied, disapproval, jealousy, homesickness. What makes Ignatia the right remedy in the above mentioned cases is the reaction of the person on what has happened: Ignatia suits when the painful situation remains very actual in the persons mind, as if it had happened yesterday, and the mind is focused on constantly thinking about it or reviving it.

About eight years ago an aircraft flew right into a block of flats in Amsterdam; still most victims of that drama daily go through the horror of an airplane crushing their apartment and setting it on fire within seconds. It remains a present situation for them; they cannot give it a place in their memory, in their personal past. Now in such a situation and reaction you need Ignatia.

Ignatia can show his/her emotional misbalance by hysterical behavior and/or unstoppable crying, but there can also be a silent grief with only sighing as a sign of internal suffering. In fact, frequently sighing is a keynote for this remedy. And there is a lot of fear, fright and anxiety in this drug-picture. Ignatia-characters have a highly sensitive nervous system, so it is not surprising that during stress their bodies react with twitching and spasms, a nervous constriction of the throat, trembling, nervous head-aches, nausea, sleeplessness and palpitations. Their mood changes quickly in opposite tempers and they react corresponding with paradoxical symptoms, like a nausea that disappears through eating, or extra urination with at the same time oedema (holding on moist in swollen parts of the body) or laughing at sad occasions like a funeral. The usually friendly Ignatia can change into an unreasonable, demanding and dictatorial person when ill or stressed. It is a good remedy for nervous breakdowns, whether they arise because of long-duration stress, living in unacceptable conditions, frustration, disappointment or long intense studying.

These people have something fine and artistic, they love beauty, are sensitive, quick-witted and conscientious, intuitive, they want to do everything perfect and they are very sensitive to criticism and disapproval. Their emotional balance is easily disturbed. The idealistic Ignatia can fly in fainting or in daydreaming. Another important data is, that Ignatia's tend to depend their own wellbeing on that of their loved ones. "If only he does well." The other one seems to be more important; there is a tendency to sacrifice their interests for the sake of a loved one. And in case of an unanswered love their whole world collapses.

This remedy is known as a remedy for women, but also a lot of men need it. Ignatia's do not want consolancy. After all, their whole mind is absorbed by their grief, so what will remain of them when you take that away, they fear...

| **Re: Ignatia** | By: Milap Singh<br>Bangalore, India | September 14 2006 |
|---|---|---|

WHAT IT IS Ignatia amara is a homeopathic remedy derived from the seeds of the St. Ignatius bean (Strychnos ignatii), a tree found in the Philippines and other parts of Southeast Asia.

HEALING CLAIMS Ignatia, sometimes referred to as "homeopathic Prozac," treats acute stages of grief, most often resulting from a sudden loss, abuse, romantic disappointment, or emotional trauma, and the physical ailments that result. These commonly include digestive disorders, mood swings, anxiety, headaches, insomnia, muscle spasms, a lump in the throat, and hemorrhoids.

THE EVIDENCE Ignatia has not yet been subjected to modern scientific trials or research, although it was added to Materia Medica (the equivalent of the Physician's Desk Reference for homeopathic medicine) after a successful "proving" in the early 1800s. (A proving involves giving a particular substance to a number of patients to find out if it has the desired effect.) Both Bernardo Merizalde, M.D., a psychiatrist in Bala Cywnyd, Pa., who has practiced homeopathy for 19 years, and Todd Rowe, M.D., a psychiatrist and homeopath in Phoenix, Ariz., have found Ignatia to be effective in about 80 percent of the patients for whom it's indicated.

Good wishes. Milap Singh

| **Ignatia** | By: Jayashree<br>Calcutta, India | September 15 2006 |
|---|---|---|

My sister in law had hysterical tendencies. She used to lose her voice and be weak in bed.
First she was given a single dose of Ignatia 1 M by my late Doctor and in 5 mins was able to speak again.
Next attack was after 2-3 months and was given Ignatia 10M this time. Similarly her voice returned after a few minutes.
The next attack, she was given a single dose of Ignatia 50M and my Sir said that now this will not recur.
This was 8 or 9 years ago, and his prophecy was proved correct. No more attacks!!
Now My Sir is no more, but his memory remains.

|---|---|---|

I had single does of Ignatia 1m(3pallets) two days ago and got 50% better. Should I take another dose? How often should I use it? Thank you

| **Re:Ignatia** | By: garcot<br>Bangalore | September 23 2010 |
|---|---|---|

Farfary,

It would be fair, if you can please let us know, for what symptom or disturbance, you decided to have a dose of Ignatia 1M, so that we can recommend for further doses and whether it is required.

Best
Garcot

| **Re:Ignatia** | By: urban_healing<br>london | February 21 2012 |
|---|---|---|

Excellent Ignatia remedy profile!
Also note the link between Ignatia and Nux Vomica: they both are high on stricknine a neuro-toxic. Both are worse for stimulants, Igantia is worse for tabaccum and Nux Vomica is worse for coffee.

| **Re:Ignatia** | By: ujwala | January 24 2014 |
|---|---|---|

how fast does it give results

| **Re:Ignatia** | By: ujwala | January 24 2014 |
|---|---|---|

and anacardium also does it gives result more effectively than ignatia how many does do we have to take

IMPATIENS

The personality is irritable, tense, and driven. There is loneliness like HEATHER and WATER VIOLET. The state creates NERVOUS TENSION and CARDIOVASCULAR STRAIN. Inner tension mounts out of concern for others. NERVOUS BREAKDOWN. The individual is efficient with lots of skill and ability. They are leaders with short tempers, and are arrogant, intimidating and self centered. There is also a problem with impulse control and the remedy restores a balance of mind over emotions. A feeling of self mastery is achieved as with HOLLY and CHERRY PLUM AND VERVAIN. These individuals can experience HOT FLASHES, and are QUICK THINKING and NATURAL EXTROVERTS, and can suffer from SKIN RASHES.

INDIGO TINCTORIA
Indigo--Dye-stuff
(INDIGO)

Marked action on the nervous system, and of undoubted benefit in the treatment of epilepsy with great sadness. Excited mood and desire to be busy. Neurasthenia and hysteria. Pure powdered Indigo placed on the wound cures snake and spider poison (Kali permang; Golondrina; Cedron). Stricture of œsophagus; blue color (Cupr).

Head.--Vertigo with nausea. Convulsions. Sensation of a band around forehead. Undulating sensation through whole head. Sensation as if brain were frozen. Gloomy; cries at night. Hair feels pulled from vertex. Head feels frozen.

Nose.--Excessive sneezing and bleeding from nose.

Ears.--Pressure and roaring.

Lonicera Xylosteum

Picture of this second

facebook join our group +

43,725 Pageviews
Feb 5th - Mar 5th

Stomach.--Metallic taste. Eructations. Bloating. Anorexia. Flushes of heat rising from stomach to head.

Rectum.--Falling of rectum. Aroused at night with horrible itching at anus.

Urinary.--Constant desire to urinate. Urine turbid. Catarrh of bladder.

Extremities.--Sciatica. Pain from middle of thigh to knee. Boring pain in knee-joint; better, walking. Pain in limbs worse after every meal.

Nerves.--Hysterical symptoms where pain predominates Excessive nervous irritation. Epilepsy; flashes of heat from abdomen to head; fit begins with dizziness. Aura from a painful spot between shoulders. Reflex spasms from worms.

Modalities.--Worse, during rest and sitting. Better, pressure, rubbing, motion.

Relationship.--Compare: Cuprum; Œstrus cameli, an Indian medicine for epilepsy.

Dose.--Third to thirtieth potency.

INDIUM METALLICUM
The Metal Indium
(INDIUM)

Headaches and migraine. Seminal emissions. Backache.

Head.--Pain in head when straining at stool. Bursting in head during stool. Dull pains in temples and forehead, with nausea, weakness, sleepiness. Gone feeling in stomach about 11 am. Violent attack of sneezing. Sexual psychopathy.

Face.--Painful suppurating pimples. Corners of mouth cracked and sore (Condur).

Male.--Horribly offensive smell of urine after standing a short time. Emissions too frequent. Diminished power. Testicles tender; drawing pains along spermatic cord.

Throat.--Uvula enlarged, ulcerated; thick, tough mucus in back part of pharynx. Worse evening.

Extremities.--Stiffness in neck and shoulders. Pain, especially in left arm. Legs restless and weary. Toes itch (Agar).

Dose.--Sixth to 200th potency.

Relationship.--Compare: Selenium; Titanium (male sexual organs).

Indol Test

INDOLUM
A Crystalline Compound Derivable from Indigo, but also a product of Putrefaction of Proteids
(INDOL)

Primary action is to increase the elimination of Indican. Auto-intoxication. Compare: Skatol.

Persistent desire to sleep, dull, discontented mental state, hideous, delusions and nervousness, constant motion of fingers and feet. Intestinal putrefaction.

Head.--Dull occipital and frontal headache in afternoon. Dull sensation over eyes. Eyeballs hot and hurt when moved. Pupils dilated with headache.

Stomach.--Bloated feeling. Hungry sensation after full meal. Great thirst. Constipation.

Extremities.--Very tired and sore in lower limbs. Feet burn.

Knee-joints sore.

Sleep.--Sleepiness. Continuous dreaming.

Dose.--Sixth attenuation.

Suspension for injection.
Insulin Mixtard 30HM
密斯它 30 胰島素注射液

INSULINUM
An active principle from the pancreas which affects sugar metabolism
(INSULIN)

Besides the use of Insulin in the treatment of diabetes, restoring the lost ability to oxidize carbohydrate and again storing glycogen in the liver, some use of it homeopathically has been made by Dr. Wm. F. Baker, showing its applicability in acne, carbuncles, erythema with itching eczema. In the gouty, transitory glycosuria when skin manifestations are persistent give three times daily after eating. Given a persistent case of skin irritation, boils or varicose ulceration with polyuria, it is indicated.

Dose.--3x to 30x.

STARWEST
BOTANICALS

INULA HELENIUM
Scabwort
(INULA)

A mucous membrane medicine. Bearing-down sensations in pelvic organs and bronchial symptoms are most marked. Substernal pain. Diabetes.

Head.--Vertigo on stooping; throbbing after eating, pressure in temples and forehead.

Respiratory.--Dry cough; worse at night and lying down; larynx painful. Chronic bronchitis; cough, with much thick expectoration, with languor and weak digestion. Stitches behind sternum. Teasing cough with much and free expectoration. Palliative in tubercular laryngitis.

Female.--Menses too early and painful. Labor-like pains; urging to stool; dragging in genitals, with violent backache. Itching of legs during menses, chattering of teeth from cold during menstruation. Moving about in abdomen, stitches in genitals. Chronic metritis.

Rectum.--Pressing toward rectum as of something extruding.

Urinary.--Frequent urging to urinate; passes only in drops. Violet odor (Tereb).

Extremities.--Pain in right shoulder and wrist; tearing in left palm, unable to double fingers; pain in lower limbs, feet and ankles.

Relationship.--Compare: Crocus; Ignatia; Arum dracontium (loose cough worse at night on lying down).

Dose.--First to third potency.

Nose Job Tips
No matter if you were born with a crooked nose, a nose that is too big for your face proportions, if your nose is too long, if you broke your nose, or anything else you can think of, you can fix your nose, feel better about your looks and breathe better by performing a nose job plastic surgery.
Rhinoplasty Recovery Time - How Long is the Recovery of a Nose Job?
During the first couple of days it will be suggested that you use ice packs to help control the swelling associated with the surgery. From then you may also have to deal with some nasal bleeding for at least the first week if not more. This bleeding will not be profuse but is can happen and it will be similar to that of a standard nose bleed except it will usually stop on its own. After about the third day of recovery, you are most likely going to feel ready to return to your daily activities which in most cases are just fine as long as you are comfortable about leaving the house with the cast on.
The bruises around your eyes which will appear like a black eye will usually go away after the first week following the rhinoplasty procedure. You will have to still deal with congestion and

swelling of the nasal cavity for up to two weeks following your surgery.
More detailed sinus infection symptoms include:
itching eyes and sneezing would likely accompany allergic sinusitis.
Home Remedies For Sinus Infection Right From Your Kitchen
In severe cases, when the eyelids become swollen and exhausted, accompanied by stiffness in the cheeks and the neck, the patient should immediately be rushed to the doctor before anything fatal (like meningitis) happens, which may cause severe damage to the brain and leads to coma.

IODIUM
Iodine
(IODUM)

Rapid metabolism: Loss of flesh great appetite. Hungry with much thirst. Better after eating. Great debility, the slightest effort induces perspiration. Iod individual is exceedingly thin, dark complexioned, with enlarged lymphatic glands, has voracious appetite but gets thin. Tubercular type.

All glandular structures, respiratory organs, circulatory system are especially affected; they atrophy. Iodine arouses the defensive apparatus of the system by assembling the mononuclear leucocytes whose phagocytic action is marked, at a given point. Lead poisoning. Tremor. Iodine craves cold air.

Acute exacerbation of chronic inflammation. Arthritis deformans. Acts prominently on connective tissue. The plague. Goitre. Abnormal vaso-constriction, capillary congestion followed by œdema, ecchymosis, hæmorrhages, and nutritive disturbances are the pathological conditions at the basis of its symptomatology. Sluggish vital reaction, hence chronicity in many of its aspects. Acute catarrh of all mucous membranes, rapid emaciation, notwithstanding good appetite, and glandular atrophy call for this remedy, in numerous wasting diseases and in scrofulous patients. Acute affections of the respiratory organs. Pneumonia, rapid extension. Iodine is warm, and wants cool surroundings. Weakness and loss of breath going upstairs. Adenoid vegetations. Tincture internally and locally to swollen glands and rattlesnake bites.

Mind.--Anxiety when quiet. Present anxiety and depression, no reference to the future. Sudden impulse to run and do violence. Forgetful. Must be busy. Fear of people, shuns every one. Melancholy. Suicidal tendency.

Head.--Throbbing; rush of blood, and feeling of a tight band. Vertigo; worse from stooping, worse in warm room. Chronic, congestive headache of old people (Phos).

Eyes.--Violent lachrymation. Pain in eyes. Pupil dilated. Constant motion of eyeballs. Acute dacryocystitis.

Nose.--Sneezing. Sudden violent influenza. Dry coryza becomes fluent in open air, also a fluent hot coryza with general heat of skin. Pain at root of nose and frontal sinus. Nose stopped up. Tendency to ulceration. Loss of smell. Acute nasal engorgement associated with high blood pressure.

Mouth.--Gums loose and bleed easily. Foul ulcers and salivation. Profuse, fetid ptyalism. Tongue thickly coated. Offensive odor from mouth.

Throat.--Larynx feels constricted. Eustachian deafness. Thyroid enlarged. Goitre, with sensation of constriction. Swollen submaxillary glands. Uvula swollen.

Stomach.--Throbbing at pit of stomach. Ravenous hunger and much thirst. Empty eructations, as if every particle of food were turned into gas. Anxious and worried if he does not eat (Cina; Sulph). Loss flesh, yet hungry and eating well (Abrot).

Abdomen.--Liver and spleen sore and enlarged. Jaundice. Mesenteric glands enlarged. Pancreatic disease. Cutting pain in abdomen.

Stool.--Hæmorrhage at every stool. Diarrhœa, whitish, frothy, fatty. Constipation, with ineffectual urging; better by drinking cold milk. Constipation alternating with diarrhœa (Ant cr).

Urine.--Frequent and copious, dark yellow-green (Bovista), thick, acrid with cuticle on surface.

Male.--Testicles swollen and indurated. Hydrocele. Loss of sexual power, with atrophied testes.

Female.--Great weakness during menses (Alum; Carbo an; Coccul; Hæmatox). Menstruation irregular. Uterine hæmorrhage. Ovaritis (Apis; bell; Lach). Wedge-like pain from ovary to uterus. Dwindling of mammary glands. Nodosities in skin of mammæ. Acrid leucorrhœa, thick, slimy, corroding the linen. Wedge-like pain in the right ovarian region.

Respiratory.--Hoarse. Raw and tickling feeling provoking a dry cough. Pain in larynx. Laryngitis, with painful roughness; worse during cough. Child grasps throat when coughing. Right-sided pneumonia with high temperature. Difficult expansion of chest, blood-streaked sputum; internal dry heat, external coldness. Violent heart action. Pneumonia. Hepatization spreads rapidly with persistent high temperature; absence of pain in spite of great involvement, worse warmth; craves cool air. Croup in scrofulous children with dark hair and eyes (Brom opposite). Inspiration difficult. Dry, morning cough, from tickling in larynx. Croupy cough, with difficult respiration; wheezy. Cold extends downwards from head to throat and bronchi. Great weakness about chest. Palpitation from least exertion. Pleuritic effusion. Tickling all over chest. Iod cough is worse indoors, in warm, wet weather, and when lying on back.

Heart.--Heart feels squeezed. Myocarditis, painful compression around heart. Feels as if squeezed by an iron hand (Cactus) followed by great weakness and faintness. Palpitation from least exertion. Tachycardia.

Extremities.--Joints inflamed and painful. Pain in bones at night. White swelling. Gonorrhœal rheumatism. Rheumatism of nape and upper extremities. Cold hands and feet. Acrid sweat of feet. Pulsation in large arterial trunks. Rheumatic pains, nightly pains in joints; constrictive sensations.

Skin.--Hot, dry, yellow and withered. Glands enlarged. Nodosities. Anasarca of cardiac disease.

Fever.--Flushes of heat all over body. Marked fever, restlessness, red cheeks, apathetic. Profuse sweat.

Modalities.--Worse, when quiet, in warm room, right side. Better, walking about, in open air.

Relationship.--Yatren. Iod pathogenesis is similar to that of Carbol acid. Antidotes: Hepar; Sulph; Gratiola.

Complementary: Lycopod; Badiaga.

Compare: Brom; Hepar; Mercur; Phosph; Abrot; Nat mur; Sanic; Tuber.

Dose.--The crude drug in saturated solution may be required. Third to thirtieth potency. Ioduretted solution of Potass iod (35 grains Potassa and 4 grains Iodine to 1 oz of water, 10 drops three times a day) expels tapeworms dead.

Locally the most powerful, least harmful and easily managed microbicide. Ideal agent to keep wounds clean and disinfected. Bites of insects, reptiles, etc. Gunshot wounds and compound fractures, excellent. Great skin disinfectant.

IODOFORMIUM
Iodoform
(IODOFORMUM)

Should not be forgotten in the treatment of tubercular meningitis, both as a local application to the head and internally (Bacil). Tuberculous conditions. Subacute and chronic diarrhœa of children.

Head.--Sharp, neuralgic pain. Head feels heavy, as if it could not be lifted from pillow. Itching of occiput. Meningitis. Sleep interrupted by sighing and cries. Very drowsy.

Eyes.--Pupils, dilated; contract unequally, react poorly. Diplopia. Failing sight due to retro-bulbar neuritis, central scotoma-partial atrophy of optic disc.

Chest.--Sore pain in apex of right lung. Feeling of a weight on chest, as if smothering. Cough and wheezing on going to bed. Pain in left breast, like a hand grasping at the base of the heart. Hæmoptysis. Asthmatic breathing.

Abdomen.--Scaphoid abdomen. Chronic diarrhœa with suspected tuberculosis. Abdomen distended; mesenteric glands enlarged. Cholera infantum. Chronic diarrhœa; stools greenish, watery, undigested, with irritable temper.

Extremities.--Legs weak; cannot stand and walk with eyes closed. Weakness of knees when going upstairs.

Dose.--Second trituration. Three grains on the back of the tongue will relieve attack of asthmatic breathing.

| **Re:IODOFORMIUM** | By: ishakrahim | September 21 2012 |

Is this can help with scotoma? If so, how can i get this? Pls help.

| | | |
|---|---|---|
| **Re:IODOFORMIUM** | By: udaya kumar<br>-- | September 21 2012 |

Yes it is specific for Scotoma. Use it in 2X potency, three times for one day, check the benefits and proceed for longer treatment. You may get it from any homoepathic dispenser. You may also check the symptoms of the following medicines:

1. Tabacum (specific)
2. Carboneum Sulph (specific)
3. Bufo
4. Physostigma
5. Gelsemium.
6. Arnica
7. Phosphorus
8. Ruta G.

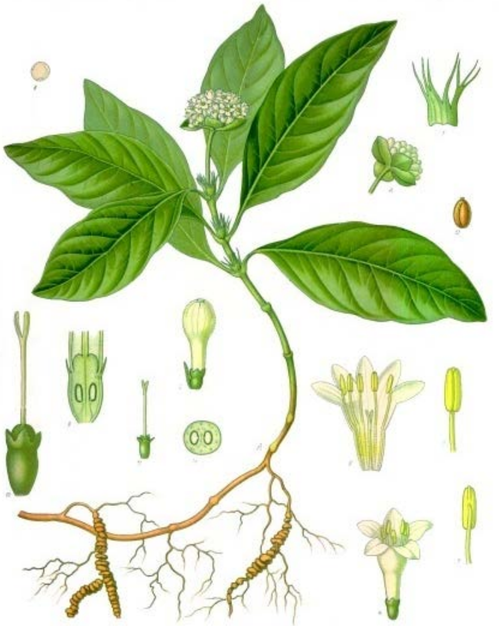
## Ipecac



Psychotria ipecacuanha (Brot.) Stokes
(Cephaelis ipecacuanha (Brot.) A. Rich)

Ipecac. has a wide sphere of action among acute sickness.

Most of its acute complaints commence with nausea, vomiting.

The febrile conditions commence with pain in the back between the shoulders, extending down the back, as if it would break, with or without rigors, much fever, vomiting of bile and seldom any thirst. This is the general aspect of the beginning of an Ipecac. fever or gastric. trouble or chill in intermittents or bilious attacks.

The stomach is disordered. There is a sense of fullness in the stomach, cutting pains in the stomach and below the stomach, going from left to right. The cutting pain in colic goes from left to right. The patient is unable to stir or breathe until that pain passes off. It holds him transfixed in one position, coming like the stabbing of a knife in the region of the stomach, or above the navel, going from left to right, and is attended with prostration and nausea.

Nausea: All the complaints in Ipecac. are attended more or less with nausea; every little pain and distress is attended with nausea. The sufferings seem to centre about the stomach, bringing on nausea.
There is continuous nausea, and gagging. The cough causes nausea and vomiting. It is a dry, hacking, teasing, suffocative cough, accompanied by nausea and vomiting. He coughs until his face grows red, and then there is choking and gagging. With every little gush of blood from any part of the body there is nausea, fainting and sinking.
Hence its value in uterine hemorrhages; bright, red blood with nausea; a little blood is attended with fainting or syncope, but the great overwhelming nausea runs through the complaints of this remedy. Though there is sometimes thirst, it is usually absent. When Ipecac. does its best work, there is thirstlessness.

With the Ipecac. fever, or with the chill, there is likely to be pain in the back of the head, a bruised pain through the head and back of the neck and sometimes down the back, and drawing in the muscles of the back of the neck. A congestive fullness in the head, a crushed feeling in the head and back of the head; the whole head aches and is full of pain.
Ipecac. is sometimes as restless as Arsenic., but the Ipecac. prostration comes by spells, whereas the Arsenic prostration is continuous. You will see Ipecac. patients tossing over the bed as much as they do when they need Rhus, turning and tossing, and moving the hands and feet, with restlessness.

This is especially the case when the spine is somewhat involved. Ipecac. has symptoms that look like tetanus it has opisthotonos, and it has been a useful remedy in cerebro-spinal meningitis with vomiting of bile, with pain in the back of the head and neck, and drawing of the muscles of the back, retracting the head.

Stomach: When cerebro-spinal meningitis has gone on until the patient is emaciated, when remedies have seemed but to palliate momentarily, and the whole body is inclined backwards, and there is vomiting of everything, even the simplest article taken into the stomach, the tongue is red and raw, and there is constant nausea and vomiting of bile, Ipecac. will cure.
Ipecac. cures inveterate cases of gastritis when even a drop of water will not stay down; everything put in the stomach is vomited, continuous gagging, sharp pain in the stomach, pain in the back, below the shoulder blades, as if it would break, vomiting of bile, continuous nausea and great prostration.
Irritable stomach. It also cures when the abdomen is distended, and sensitive, a tympanitic state, when there is vomiting of bile.

Ipecac. has proved a useful remedy in epidemic dysentery, when the patient is compelled to sit almost constantly upon the stool and passes a little slime, or a little bright red blood; inflammation of the lower portion of the bowel, the rectum and the colon. The tenesmus is awful, burning, and continuous urging with the passage of only a little mucus, and blood. With this there is constant nausea; while straining at stool, the pain is so great that nausea comes on, and he vomits bile. At times, whole families are down with it. It runs through a whole valley and may be epidemic, but it commonly relates to endemics.
In infants, it is indicated when a cholera-like diarrhoea has been present and it ends in a dysenteric state, with continued tenesmus, and the expulsion of a little bloody mucus, the child vomiting everything it takes into the stomach; nausea, vomiting, prostration and great pallor. It is also useful in such conditions when the stool is more or less copious, and is green, and the child passes, frequently, copious quantities of green slime. Much crying when at stool, much straining, with passages of green slime, vomiting of green slime, and vomiting of green curds; milk turns green and is vomited.

Chest: The chest complaints of Ipecac. are interesting. Ipecac. is especially the infant's friend and is commonly indicated in the bronchitis of infancy. The usual bad cold that ends in chest trouble in infants is a bronchitis.

It is very seldom that an infant gets a true pneumonia, it is generally a bronchitis with coarse rattling. The child coughs, gags and suffocates, and there is coarse rattling which can be heard throughout the room, and the trouble has come on pretty rapidly. The child is pale, looks dreadfully sick, and sometimes looks very anxious. The nose is drawn in as if dangerously ill, and the breathing is such as appears in a dangerous case. Ipecac. will sometimes modify this into a very simple case, break up the cold, and cure the child.

In the old books, the pneumonia of infancy had a distinct and separate description, and the typical symptoms were those of Ipecac. You will see a great similarity of symptoms when you study Ipecac. and Ant. tart. together in chest troubles. If you have been studying them together, you will say,

"How do you distinguish them; they both have rattling cough and breathing, and both have the vomiting?"

Well, the Ipecac. symptoms correspond to the stage of irritation, while the Tartar emetic symptoms appear in the stage of relaxation. That is, the Ipecac. symptoms come on hurriedly, come on as the acute symptoms, whereas the Tartar emetic complaints come on slowly. The latter is seldom suited to symptoms that arise within twenty-four hours, or at least the symptoms of Tartar emetic that arise in twenty-four hours are not of this class.

This group comes on many days later, comes on at the close of a bronchitis when there is threatened paralysis of the lungs; not in the state of irritation, not the dyspnoea from irritation, not the suffocation of that sort, but the suffocation from exudation, and from threatened paralysis of the lungs.

When the lungs are too weak to expel the mucus the coarse rattling comes on. Then there is the great exhaustion, deathly pallor of the face and sooty nostrils.

We see now that these two remedies do not look alike. If we observe the pace of the two remedies, we see that the complaints differ. It is not so much. that they belong to stages, although they do, but rather that Ipecac. brings on its symptoms

rapidly and effects a crisis speedily, and that Ant. tart. brings on its symptoms slowly and effects a crisis after many days.
You can readily see the value of Ipecac. in whooping cough, for it has the paroxysmal character, the red face, and vomiting and gagging with the cough. The red face, thirstlessness, violent whooping, with convulsions, with gagging and vomiting of all that he eats are the symptoms that you will generally find.

Haemorrhages: I have hinted at the haemorrhages, and these open out a great field for Ipecac. I could not practice medicine without ipecac., because of its importance in hemorrhages.
When I say haemorrhages, I do not mean those from cut arteries, I do not mean haemorrhages where surgery must come in; I mean such as uterine haemorrhages, haemorrhages from the kidneys, from the bowels, from the stomach, from the lungs.
You must know your remedies in haemorrhages; if you do not, you will be forced to use mechanical means; but the homeopathist who is well instructed is able to do without them.
In the severest form of uterine hemorrhages, the homeopathic physician is able to do without mechanical means, except when mechanical means are causing the haemorrhage.
This does not relate to hourglass contractions, it does not relate to conditions when the after birth is retained, or when the uterus has a foreign substance in it, because under such circumstances manipulation is necessary.
A distinction must be made. But when we have simply the pure dynamic element to consider, simply and purely a relaxed surface that is bleeding, the remedy is the only thing that will do the work properly. When the uterus is continuously oozing, but every little while the flow increases to a gush, and with every little gush of bright red blood the woman thinks she is going to faint, or there is gasping, and the quantity of the flow is not sufficient to account for such prostration, nausea, syncope, pallor, Ipecac. is the remedy.
When with the gushing of bright red blood there is an overwhelming fear of death, Aconite. If your patient while going through the confinement has had a hot head, an uncontrollable thirst for ice cold water, and after the confinement, everything has gone on in an orderly way, and the placenta has been

delivered, and although you have no reason to expect such haemorrhage it comes on, Phosphorus will nearly always be the remedy.

In those withered women, lean and slender, who are always suffering from the heat, who want the covers off and want to be cool, who have had a tendency to ooze blood from the uterus, and now have a haemorrhage that is alarming either with clots, or only an oozing of dark liquid blood, you can hardly do without Secale. A single dose of any one of these medicines on the tongue will check a haemorrhage more quickly than large doses of strong medicine.

The haemorrhage will be checked so speedily that in your earlier experiences you will be surprised. You will wonder if it is not possible that it stopped itself. In copious menstruation Ipecac. is often indicated When the woman has taken cold, or has a shock. In cases where she is not especially subject to copious uterine flow at the menstrual period, she is naturally alarmed, for it is something she has never bad before, and the flow is likely to continue for many days, attended with this weakness. All her power seems to go with a little gush of blood. Ipecac. will cure and end the menstrual flow normally. A fortunate thing in nature is the tendency to check haemorrhage, which is always good. There are a large number of medicines that control haemorrhage, and these you must keep at your finger's ends. They belong to emergencies. You must know the remedies that correspond to violent symptoms and violent attacks. Ipecac. is full of hemorrhage. Vomiting of great clots of blood, continuous vomiting of blood in connection with ulceration. In persons who are subject to violent attacks of bleeding, who bleed easily, who have a haemorrhagic tendency, Ipecac. will control temporarily the haemorrhage when the symptoms agree.

Urines: Severe pain in the back in the region of the kidneys, shooting pains, frequent urging to urinate, and the urine contains blood and little clots of blood. The urine is extremely red with blood, which settles to the bottom of the vessel, and lines the whole commode with a layer of blood the thickness of a knife blade. Every pint of urine that it contains will have that coating of blood in the vessel; every attack of pain in the kidney is attended with that condition of the urine. Ipecacuanha will stop that bleeding. It is true that when patients have bled until they have become anaemic, and are subject to dropsy, Ipecac. ceases to be the remedy; its natural follower then is China, which will bring the patient in a position to need an antipsoric remedy.

Colds: Then there are the "colds."
Simple, common coryzas among the children. When a cold settles in the nose, and the nose is stuffed up at night or when the adult has a coryza, with much stuffing up of the nose, blowing of mucus and blood from the nose, much sneezing, and the cold goes further down and is followed by hoarseness, extending into the trachea with rawness, and finally into the bronchial tubes with suffocation and settling in the chest, think of ipecac.

The Ipecac. colds often begin in the nose and spread very rapidly into the chest. With these colds in the nose there is copious bleeding of bright red blood. Every time he takes cold in the nose he has copious bleeding; a tendency to nosebleed with the colds. The inflammation that comes upon the mucous membrane in Ipecac. is violent.

The irritation comes on suddenly, and the mucous membrane inflames so rapidly that the parts become purple, turgescent, and bleeding seems to be the only natural relief. Stoppage of the nose and loss of smell; the nose becomes so stuffed up that he cannot breathe through it.
With the head symptoms, with the colds, with the whooping cough, with the chill, and with many of the inflammatory complaints, the face becomes flushed, bright red, or bluish red, and the lips blue; with the chill the lips and the finger nails are blue. The chill is violent, sometimes congestive in character and often a rigor. The whole frame shakes, and the teeth chatter.
There are old incurable cases of asthma that are palliated by Ipecac. and carry around a bottle of it from which they say they get much relief. It is useful in cases of humid asthma, in cases of asthmatic bronchitis, when they suffer from the damp weather and from sudden weather changes; every little cold rouses up this bronchial attack, and he suffocates and gags when he

coughs, or spits up a little blood.
He has to sit up nights to breathe, and the attacks are common and frequent. These patients say they get relief front Ipecac., and it is not surprising that Ipecac. relieves that state of asthmatic breathing, because it has such symptoms. Some of these cases are incurable, they are people advanced in life.
This remedy, more wisely administered, will give more relief. A powder of Ipecac. will break up the attack, so that the patient is comfortable, and then will go on in an ordinary sort of asthmatic way, until catching another cold. The cough is rattling and asthmatic.
Convulsions: As a convulsive medicine Ipecac. is not well enough known.
Convulsions in pregnancy. Convulsions in whooping cough; frightful spasms, affecting the whole of the left side, followed by paralysis; clonic and tonic spasms of children and hysterical women. Tetanus, rigidity of the body, with flushed redness of the face.
These are strong features of Ipecac., and they have not been sufficiently dwelt upon, and the remedy is not sufficiently known as having these states so prominently. Medicines like Belladonna are more frequently spoken of in the books and in treatises of spasms, yet Ipecac. is just as important a remedy to be studied in relation to spasms, and its action upon the spine.
Skin: In suppressed eruptions, the symptoms will very commonly point to Ipecac.
When the eruption does not come out, or an eruption has been driven back by cold, sometimes acute manifestations of stomach and bowels follow and colds settle in the chest from suppressed eruptions, Ipecac. will also cure erysipelas, when there is the vomiting, the chill, the pain in the back, the thirstlessness and the overwhelming nausea.

Ipecac. is often sufficient for the nausea and vomiting when the scarlet fever rash is slow to come out. Instead of the rash coming out as it should, Ipecac. symptoms come on in the stomach with nausea and vomiting. Ipecac. will check the nausea and vomiting, will bring out the eruption, and the disease will run a milder course.

There is only one God....He is everywhere and with everyone and knows everything.

| **Re: Ipecac** | By: girilal<br>New Jersey USA | September 13 2006 |
|---|---|---|

Root is used to make the medicine.

girilal

| **Re: Ipecac** | By: sammy<br>Malaysia | September 13 2006 |
|---|---|---|

ipecac (ĭp'ĭkãk) ,

drug obtained from the dried roots of a creeping shrub, Cephaelis (or Psychotria) ipecacuanha, native to Brazil but cultivated in other tropical climates. There are three varieties of the root, brown, red, and gray, varying according to the age of the plant, its place of growth, or the method of drying. Emetine, the active principle of ipecac, is obtained from the bark of the root. It is a powerful poison that produces vomiting and is sometimes prescribed to relieve the stomach of some other poison. Ipecac is used as an expectorant in the treatment of bronchitis or croup, stimulating bronchial secretions to make coughing easier. Brazilian Native Americans used ipecac for centuries to treat amebic infections. Its use became more widespread in the 17th cent., and the pure substance emetine is still used in the treatment of amebic dysentery and amebic hepatitis, as well as some parasitic infestations. Herbally Ipecac must be used with great caution and only under medical supervision.

Once my brother wanted a medicine to stop vomitting in emergency, where nothing else worked. I suggested him to buy Ipecac root, which he found at a vitamin store.

He diluted and potentized root powder (one part to 1000 parts) in water and in two doses of that liquid vomitting stopped in few hours.

Ipecac root is used to induce vomitting.

IRIDIUM METALLICUM
The Metal
(IRIDIUM)

Intestinal putrefaction and septicæmia. Anæmia, increases red corpuscles. Epilepsy; lupus. Rheumatism and gout. Uterine tumors. Spinal paresis. Exhaustion after disease. Children who are puny, weak-limbed, and grow too fast. Nephritis of pregnancy.

Head.--Difficult concentration of thought. Sensation as if mind were void. Though confused. "Woodeny" feeling in right side of head. Right side of scalp sensitive. Profuse, watery coryza, better indoors. Ozæna.

Respiratory.--Hoarse cough, worse talking; posterior nares feel raw, inflamed, profuse, thick, yellowish discharge. Chronic laryngeal catarrh.

Back and extremities.--Weakness in the kidney region. Spinal paresis, especially for the aged and after disease. Pressing in groin and left thigh. Tension in both thighs, especially left. Dislocated feeling in left hip-joint and dull pain toward left gluteal region.

Relationship.--Compare: Iridium chloride (Produces salivation and stiffness of jaws followed by head and nervous symptoms. Congestion of nares and bronchi. Dragging pain in lower back. Headache worse right side, heavy feeling as of liquid lead).

Compare: Platina; Palladium; Osmium.

Dose.--Sixth and higher.

IRIS VERSICOLOR
Blue Flag

Thyroid, pancreas, salivary, intestinal glands, and gastro-intestinal mucous membrane, are especially affected. Increases the flow of bile. Sick headaches and cholera morbus are a special therapeutic field for its action.

Head.--Frontal headache, with nausea. Scalp feels constricted. Right temples especially affected. Sick headache, worse rest; begins with a blur before eyes, after relaxing from a mental strain. Pustular eruption on scalp.

Ears.--Roaring, buzzing, ringing in ears, with deafness. Aural vertigo, with intense noises in ears.

Face.--Neuralgia after breakfast, beginning in infra-orbital nerve, and involving whole face.

Throat.--Mouth and tongue feel scalded. Heat and smarting in throat. Burning. Profuse flow of saliva; ropy. Goitre.

Stomach.--Burning of whole alimentary canal. Vomiting, sour bloody, biliary. Nausea. Profuse flow of saliva (Merc; Ipec; Kali iod). Deficient appetite.

Abdomen.--Liver sore. Cutting pain. Flatulent colic. Diarrhœa; stools watery, with burning at anus and through intestinal canal. Periodical night diarrhœa, with pain and green discharges. Constipation (give 30th)

Extremities.--Shifting pains. Sciatica, as if left hip-joint were wrenched. Pain extends to popliteal space. Gonorrhœal rheumatism (use Irisin).

Skin.--Herpes zoster, associated with gastric derangements. Pustular eruptions. Psoriasis; irregular patches with shining scales. Eczema, with nightly itching.

Modalities.--Worse, in evening and at night, from rest. Better, from continued motion.

Relationship.--Antidote: Nux.

Compare: Iris florentina-Orris-root--(delirium, convulsions, and paralysis); Iris factissima (headache and hernia); Iris germanica-Blue Garden Iris--(dropsy and freckles); Iris tenax-I. minor--(dry mouth; deathly sensation at point of stomach, pain in ileo-cæcal region; appendicitis. Pain from adhesions after). Pancreatinum-a combination of several enzymes--(Indicated in intestinal indigestion; pain an hour or more after eating. Lienteric diarrhœa. Dose.--3-5 grains, better not given during the active period of stomachic digestion). Pepsinum--(Imperfect digestion with pain in gastric region. Marasmus of children who are fed on artificial foods. Diarrhœa due to indigestion. Dose.--3-4 grains)

(Diseases of pancreas, gout, diabetes); Ipec; Podoph; Sanguin; Ars; Ant cr.

Dose.--Tincture to thirtieth potency. Favorable reports from the very highest potencies.

| **Re: IRIS VERSICOLOR** | By: girilal<br>New Jersey USA | September 15 2006 |

Iris Versicolor, a Potting plant, in these days it is found all over the world.

Iris Versicolor (Linn.) is a perennial herb, found abundantly in swamps and low grounds throughout eastern and central North America, common in Canada, as well as in the United States, liking a loamy or peaty soil. It is not a native of Europe.
It grows 2 to 3 feet high, with narrow, sword-shaped leaves, and

from May to July produces large, handsome flowers, blue, except for the yellow and whitish markings at the base of the sepals.

The root is an official drug of the United States Pharmacopoeia and is the source of the Iridin or Irisin of commerce, a powdered extractive, bitter, nauseous and acrid, with diuretic and aperient properties.

Pieris formosa
Chinese Andromeda
Photo by Jocelyn Pena

JABORANDI
Jaborandi
(PILOCARPUS
MICROPHYLLUS)

Pilocarpus is a powerful glandular stimulant and the most efficient diaphoretic. Its most important effects are diaphoresis, salivation and myosis. Hot flushes, nausea, salivation and profuse perspiration. The face, ears and neck become in a few minutes after a dose of Jaborandi deeply flushed, and drops of perspiration break out all over the body whilst at the same time the mouth waters and saliva pours out in an almost continuous stream. Other secretions, lachrymal, nasal bronchial and intestinal also but in less degree. The sweat and saliva produced by a single dose is often enormous in quantity, not infrequently half a pint.

Is homeopathic to abnormal sweats, and has achieved great success in night-sweats of consumptives. Acts upon the thyroid and its sudorific action may possibly be due to it. Exophthalmic goitre, with increased heart's action and pulsation of arteries; tremors and nervousness; heat and sweating; bronchial irritation. A valuable remedy in limiting the duration of mumps.

Eyes.--Eye strain from whatever cause. Irritability of the ciliary muscle. Eyes easily tire from slightest use. Heat and burning in eyes on use. Headache; smarting and pain in globe on use. Everything at a distance appears hazy; vision becomes indistinct every few moments. Retinal images retained long after using eyes. Irritation from electric or other artificial light. Pupils contracted; do not react to light. Staring eyes. Near-sighted. Vertigo and nausea after using eyes. White spots before eyes. Smarting pain in eyes. Lids twitch. Atrophic choroiditis. Spasm of the accommodation while reading.

Ears.--Serous exudation into the tympanitic cavities. Tinnitus (Pilocarpin 2x).

Mouth.--Saliva viscid, like white of egg. Dryness. Free salivation, with profuse sweating.

Stomach.--Nausea on looking at objects moving; vomiting; pressure and pain in stomach.

Abdomen.--Diarrhœa, painless; during day with flushed face and profuse sweat.

Urinary.--Scanty; pain over pubes with much urging.

Heart.--Pulse irregular, dicrotic. Oppression of chest. Cyanosis; collapse. Nervous cardiac affections.

Respiratory.--Bronchial mucous membrane inflamed. Much inclination to cough and difficult breathing. Œdema of lungs. Foamy sputa. Profuse, thin, serous expectoration. Slow, sighing respiration.

Skin.--Excessive perspiration from all parts of the body. Persistent dryness of skin. Dry eczema. Semi-lateral sweats. Chilliness with sweat.

Relationship.--Compare: Amyl nit; Atrop; Physos; Lycop; Ruta. Pilocarpin mur, (Meniere's disease, rapidly progressive phthisis, with free hæmorrhages, profuse sweating, 2x trit). Atropine is the antagonist to Pilocarpin, in dose of one one-hundredth grain for one-sixth of Pilocarpin.

Dose.--Third potency.

Non-Homeopathic Uses.--Chiefly as a powerful and rapid diaphoretic. It is of most service in renal disease, especially with uræmia, eliminating both water, and urea. Scarlatinal dropsy. Contra-indicated in heart failure, and in post-puerperal uræmia, and in senile cases.

Dose.--One-eighth to one-fourth grain hypodermically.

# JACARANDA CAROBA
Brazilian Caroba-tree
(JACARANDA)

Has reputation as a remedy in venereal diseases and rheumatism. Morning sickness. The urinary and sexual symptoms are important. Rheumatic symptoms.

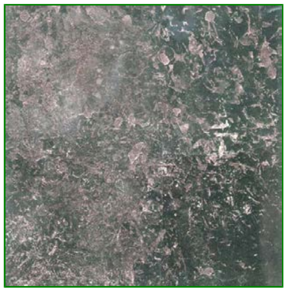
Head.--Vertigo on rising, with heavy forehead. Eyes pain; are inflamed and watery. Coryza with heavy head.

Throat.--Sore, dry, constricted. Vesicles in pharynx.

Urinary.--Urethra inflamed; discharge of yellow matter.

Male.--Heat and pain in penis; painful erections; phimosis. Prepuce painful and swollen. Chancroid. Chordee. Itching pimples on glans and prepuce.

Palladium Metallicum



Picture of this second

I have solved many cases of stomach ailments with this plant. It is found everywhere.

Its character is somewhat similar to Aloe but actually more potent. Leaves are high in Silica/Silicea.

Very effective if ailments are worse in heat and summer,
stomach problems, espacially hyperacidity bloating, belching.

JATROPHA CURCAS
Purging Nut
(JATROPHA)

Of value in cholera and diarrhœa. The abdominal symptoms are most important. Suppressed measles (H. Farrington).

Stomach.-- Hiccough, followed by copious vomiting. Nausea and vomiting, brought on by drinking, with acrid feeling from throat. Great thirst. Very easy vomiting. Heat and burning in stomach, with crampy, constrictive pain in epigastrium.

Abdomen.--Distended, with gurgling noises. Pain in hypochondria. Pain in region of liver and under right scapula to shoulder. Violent urging to urinate.

Stool.--Sudden, profuse, watery, like rice-water. Diarrhœa;

forced discharge; loud noise in abdomen like gurgling of water coming out of a bung-hole, associated with coldness, cramps, nausea, and vomiting.

Extremities.--Cramps in muscles, especially calves, legs, and feet. Coldness of whole body. Pain in ankles, feet and toes. Heels sensitive.

Modalities.--Better, by placing hands in cold water.

Relationship.--Compare: Camph; Verat; Gambog; Croton; Jatropha

Sleep.--Disturbed. Dreams of travelling.

Back.--Pain along spine radiating to abdomen and thighs.

Dose.--Tincture.

girilal

| **Re: JOANESIA ASOCA (Famous Ashoka tree of India)** | By: Joe De Livera<br>Sri Lanka | October 12 2011 |
|---|---|---|

I was not aware that the Ashoka tree had been potentized into a remedy.

To Pune

Do you suffer from:
"excessive menses with clots with fibroid menses before" ?

If so the remedy I have prescribed which has helped many with this complaint is

Arnica 30c in the Wet dose taken twice daily.

The Wet dose of any Homeopathic remedy is made as follows:

Order the remedy in the Liquid pack in Alcohol, also referred to as Liquid Dilution in a bottle preferably with a dropper arrangement.
Get a 500ml bottle of Spring Water from the nearest supermarket.
Pour out about 3cm of water from the bottle to leave some airspace.
Insert 3 drops of the remedy into the bottle and shake the bottle hard at least 6 times before you sip a capfull of the bottle or a large teaspoonful which is the dose.
Shaking the bottle hard is homeopathic succussion and this enhances the effect of the remedy on the user.

Walnut

Skin eruptions are prominent.

Head.--Confused; feels as if head were floating in air. Occipital sharp pain. Styes.

Female.--Menses early, black, pitch-like coagula. Abdomen distended.

Skin.--Comedones and acne of the face. Crusta lactea, with soreness around ears. Itching and eruptions of small red pustules. Scalp red, and itches violently at night. Chancre-like ulcer. Axillary glands suppurate.

Relationship.--Compare: Juglans cinerea.

Dose.--Tincture, and lower potencies.

| **atopic dermatitis** | By: vyushti | September 8 2006 |
|---|---|---|

hi,
on another forum, you had suggested the application of the water/oil in which walnut bark is soaked, for atopic dermatitis.
this was for my son who is 4.5 yrs old and keeps suffering from atopic dermatitis frequently(mostly behind knees, under arms, elbows.)
i have got the bark...from near jama masjid in delhi..how does one make sure that this is the walnut bark, not something else.
water or oil what would be better?
2 inches of bark soaked overnite or more?
thanks!

| **Re: JUGLANS REGIA** | By: girilal<br>New Jersey USA | September 8 2006 |
|---|---|---|

You just can't go wrong with it. I can tell it by smell or taste. Soak about 10gm piece of it in one glass of water and in few minutes water color would be brown. Soak it for overnight and then take a spoon of that water.

To make an ointment, soak the bark in the oil and don't remove it. Use that oil as ointment.

girilal

| **Re: JUGLANS REGIA** | By: vyushti | September 9 2006 |
|---|---|---|

Thanks,
I wish i could tell by the smell, as most bark would turn the water brown, does it taste like walnut?
anyways i'll go ahead and try, one teaspoon twice a day should be good for my little one?...or just the topical application?

Autism Treatment Using Biomedical Therapies
Previously in other videos I have talked about therapies that are considered traditional treatments for Autism spectrum disorders like medications such as Risperdal and therapies like speech

therapy, occupational therapy and behavioral therapy. Now I would like to cover something called biomedical therapies. Biomedical therapies are therapies that are utilized medically but are not what we would consider a recognized therapy in traditional medical communities. However, that does not reduce their effectiveness since these therapies can be very effective. They may not be well known or recognized throughout the medical world but biomedical therapies really break down into multiple categories.

The first category we will cover is supplements. We have seen that using various supplements like multi-vitamins, multi-minerals, B-12, folic acid, etc. can be helpful for some individuals. In fact, B-6 which is a specific vitamin, can be very helpful for quite a few individuals on the Autism spectrum because it has a bolstering effect on brain chemistry that can aid in eye contact, focusing, attention and even in some cases, behavioral problems.

There are also therapies out there that address the digestive problems that many children with Autism have. We know there is a link between digestive toxicity and brain function. So when we look at yeast and bacterial issues in the digestive tract and we use things like probiotics or prescriptions like Nystatin, Diflucan or even sometimes antibiotics to treat these issues, we see children improve cognitively.

JUSTICIA ADHATODA
An Indian Shrub, Singhee
(JUSTICIA ADHATODA BASAKA)

Highly efficacious medicine for acute catarrhal conditions of the respiratory tract (used in the beginning)

Head.--Irritable, sensitive to external impressions; hot, full and heavy head; lachrymation, with coryza, profuse, fluent, with constant sneezing; loss of smell and taste; coryza with cough.

Throat.--Dry, pain during empty swallowing, tenacious mucus. Mouth dry.

Respiratory.--Dry cough from sternal region all over chest. Hoarseness, larynx painful. Paroxysmal cough, with suffocative obstruction of respiration. Cough with sneezing. Severe dyspnœa with cough. Tightness across chest. Asthmatic attacks, cannot endure a close, warm room. Whooping-cough.

Relationship.--Seems to come between Cepa and Euphrasia, which compare.

Dose.--Third potency and higher. Severe aggravation have been noticed from lower potencies.

| **Re:JUSTICIA ADHATODA (BASAKA)** | By: garcot<br>Bangalore | October 3 2008 |

Dear Girilal,

Have you tried this medicine at higher potencies say 12c and above? I tried at 12c and gave me good results as mentioned in MM. Is it a poisonous herb when consumed raw?

Thanks and regards
Garcot

| **Re:JUSTICIA ADHATODA (BASAKA)** | By: garcot<br>Bangalore | October 3 2008 |

On further reading it is found, it is one of the top remedies used in Ayurveda.

Homeopathically,

Justicia adhatoda Linn.
(Vasaka)
Common Name
:
Vasaka
Sanskrit
:
Baidyamata, Vasaka
Hindi
:

Arusha
English
:
Malabar nut
Family
:
Acanthaceae
Description

It is a small tree which flowers in cold season. There is a saying is Sanskrit about this drug meaning of which is that as long as Vasaka will remain, patients suffering from spitting of blood, phthisis and common cold and cough need not despair. The physicians confidently proclaim that no death can take. place from cough of any kind if Vasaka can play its role and find time to display its healing properties. Traditionally it has long been used as a great remedy for respiratory disorders.

Homoeopathic uses

Homoeopathic proving and clinical verifications has brought out good number of symptoms of upper respiratory tract.

Rhinitis - Fluent profuse coryza from nose with constant sneezing. Nose is swollen with sense of obstruction. There is loss of taste & smell. Throat, mouth & tongue all feel dry. Tongue is coated white.

Cough-Paroxysms of cough with suffocation & rattling in chest followed by vomiting. Expectoration bloody. Cough Particularly worse at night.

Potency-6X

Reference: http://ccrhindia.org/common_indian_plants/L17.htm

Infact, this site has listed good number of Indian medicinal plants, which can be used effectively in homeopathy.

Regards
Garcot

| **Re: JUSTICIA ADHATODA (BASAKA)** | By: Joe De Livera<br>Sri Lanka | October 3 2008 |

It is interesting to note that Justicia Adhatoda is a medicine which has been used for over 2000 years in Sri Lanka in the Ayurvedha. It is known here as ADATHODA and I am informed by an Ayurvedic physician that it is widely used even today a specific for respiratory ailments. It is usually boiled down with other medicinal roots, leaves and bark into a decoction which is usually very bitter in taste and gulped down.

I remember that during my childhood my uncle who was a well known Ayurvedic physician used to give me Adathoda with other medicines in the early 1930's to cure the flu with a cough and cold. I hated his decoctions which eventually were found to be life saving as medicine as we know it today was hardly known at that time here in Sri Lanka then known as Ceylon.

|---|---|---|
| **Re:JUSTICIA ADHATODA (BASAKA)** | By: girilal<br>New Jersey USA | October 4 2008 |

It Grows all over India but most often on the low mountains. There is difference in homeopathy and ayurvadic prepration. In ayurveda, a tea is made but in homeopathy, flowers are soaked in liquid and then removed after few days, then more flowers in the same liquid, as the liquid becomes saturated, it is called Q.

POTASSIUM IO
KIO3 85 mg. 200 TA
MEDICAL
CORPS

Kalium Bichromicum
This remedy is recognized by most physicians by the copious ropy mucous discharges from all mucous membranes, but it is also a most important remedy in rheumatic affections of the joints with swelling, heat and redness, whenever these conditions wander around from joint to joint.

The bones all over the body feel bruised, and caries is reckoned among its symptoms. A marked feature of this remedy is the alternation between catarrhal symptoms and rheumatic pains. Exudations from mucous membranes, somewhat like croup, are found in the larynx, trachea and in the rectum. it is not surprising, therefore, that it has proved a very effective remedy in diphtheria. It emaciates, like the rest of the Kali salts. We have running through it the cachectic conditions, or malignant diseases with ulceration; and especially is it indicated when the ulceration period is present.
Ulceration: is a striking feature of this remedy. Its ulcers are

Ficus Religiosa

Feb 5th - Mar 5th
+
-

deep; are said to be as if punched out and are very red. Gouty conditions are as common in this remedy as in the other Kalis. It is especially like Causticum with its cracking in the joints. Syphilitic conditions have been cured in the most advanced stages. It has the sharp stitching pains like Kali carb., it has one feature quite its own very severe pain in small spots that could be covered by the end of the thumb.

Pains: It has wandering pains from place to place, and wandering rheumatism in from joint to joint. There are pains in all parts. Pains are sometimes very violent; sometimes shooting; sometimes stitching stinging; again aching. Burning is a very marked symptom of the remedy. The pains appear rapidly and disappear suddenly.

Cold and warm: The patient is sensitive to cold. There is a lack of vital heat. In fact, he wants to be wrapped up and covered warmly, and many of his complaints are much better when he is perfectly warm in bed. All the pains and his cough are relieved from the warmth of the bed, and yet there are other complaints, like rheumatic conditions, that come on in hot weather.

The cough is better in warm weather and worse in winter. Catarrhal conditions of the larynx and trachea are worse in winter, especially in the cold, damp weather, like Calc. phos. when the snow melts. Sensitive to cold winds. Causticum, it ill be remembered, is sensitive to cold, dry winds.

The Kalis generally are sensitive to cold, dry weather, but Kali bichromicum throat troubles are continuous in the winter and during cold, damp weather, and are worse in cold, damp winds.

It is a most useful remedy in septic and zymotic fevers.

Many of its symptoms are aggravated about 2 or 3 A.M., like Kali carb. Most of the symptom are worse in the morning yet some come on in the night. A marked feature of Kali. bichromicum is a feeling of great weakness and weariness. When the pain has passed off, if in the limbs, the limbs are felt very weary. Great prostration and cold sweat.

It has neuralgia every day at the same hour, showing its periodicity. Like the rest of the Kalis it has cured epilepsy. Ropy saliva and mucous discharges from the mouth during the convulsion has led to its use in epilepsy. The symptoms generally, especially the pains, are worse from motion, except the sciatic and some of the pains in the lower limbs, which are better from motion. The patient pulsates all over the body.

There are very few mental symptoms owing to the fact that the remedy has been proved only in crude form. It needs to be proved in potencies to bring out the mental symptoms.

Head: It has violent headaches and its headaches are mostly associated with catarrhal conditions. A Kali bichromicum patient always suffers more or less from catarrh of the nose, and if he is exposed to cold weather the catarrhal condition will turn to dryness; then will come on violent headache; also headaches during coryza.

Headaches during coryza when the discharge of the coryza slacks up a little. Headaches often begin with dim vision. Pains are violent. Headaches are better from warmth, especially warm drink; better from pressure; worse from stooping; worse from motion and walking; worse at night and still much worse in the morning. Pain is pulsating, shooting and burning. Headaches come on with vertigo. Headaches are often one-sided. It has been a very useful remedy in syphilitic head pains.

Pains over the eyes and in the forehead. It is very useful when the headaches are with retching and vomiting; when the pain is confined to a very small spot that could be covered with the thumb and is violent; when the headaches come periodically and with dizziness. Headaches are somewhat ameliorated in open air if it is not too cold. It has cured eczema of the scalp with thick, heavy crusts from which ooze a yellow, thick, gluey substance.

Eyes: Daylight brings on photophobia, There are sparks before the eyes; dim vision before the headache, as mentioned above. Rheumatic conditions affecting the eyes, hence it is said rheumatic affections of the eyes. Granular lids. Ulceration of the cornea. The ulcer is deep with pulsation in it. The eyes are much inflamed and red. The lids are red and swollen. Eyes and lids are injected.

Croupous inflammation of the eyes. Burning and itching in the eyes. Inflammation of the mucous membrane of the eyes with copious flow of thick mucus. Margins of the lids are red and swollen. It has cured polypus on the conjunctiva, swelling of the lids and stringy mucus.

Ears: There are yellow, viscid discharges from the ears, with stitching pains and pulsating in the ears. Chronic suppuration of the middle, ear with perforated tympanum; eczematous eruptions on the ears, itching of the whole external ear.

Nasal passages: The symptoms of the nasal passages are very numerous. The most prominent are the catarrhal symptoms. It has catarrhal symptoms both acute and chronic, with copious, thick, viscid, yellow or white mucus. Foetid odor from the nose. Troubled much with a sensation of dryness in the nose. Loss of smell, and the nose is obstructed nights with thick yellow mucus, too viscid to be blown out. Accompanying this catarrhal condition there is a hard pain at the root of the nose.

Ulcers form all over the nasal mucous membrane. There are ulcers, crusts, mucous plugs; must blow the nose constantly without success, but finally blows out large green crusts or scabs from high up in the nose. Sometimes they are drawn into the posterior nares.

There is burning and pulsating in the nasal cavities. When the nasal cavity is in this state of ulceration and catarrh there is shooting pain from the root of the nose to the external angle of the eye through the whole forenoon. Extreme soreness inside of the nose.

Expired air feels hot and causes a sensation of burning. He has snuffles and increased catarrhal conditions in damp weather.

There are also burning. excoriating, watery discharges from the nose, as in acute catarrhal conditions. Coryza is fluent, excoriating, with loss of smell. With the chronic condition there comes perforation of the septum and pressing pains of the frontal sinus.

A very strange condition then is observed. Scabs form upon the nasal septum; when these are removed there comes photophobia, then dimness of vision, followed by hard frontal headache. The septum is sometimes destroyed by ulceration. Much thick blood is blown out of the nose. Now, it has cured these conditions when they were syphilitic. It has cured nasal polypus. It has cured lupus of the nose.

Face: The bones of the face are often very sore, with shooting pains in the malar bones. Pain in the malar bones on coughing. With the catarrhal conditions there is much suffering from the malar bones, like Merc. It has cured lupus exedens. It has cured ulceration of the lip. Swollen parotid is quite a common feature in its proving. It has cured impetigo.

The tongue: is smooth, shiny, sometimes cracked. This is especially observed in low forms of fever, like typhoid. The tongue is often coated, thick and yellow at. the base. Papillae raise on the dorsum of the tongue, making it look like strawberry tongue. Again the tongue is coated a thick brown. The provers seemed to be much annoyed by a sensation of a hair on the base of the tongue. It has produced and cured ulceration of the tongue; even when syphilitic, it is a useful remedy. Ulcers deep as if punched out; with stinging pains.

There is great dryness of the mouth; ropy saliva and mucus ulcers anywhere in the mouth; aphthous patches; ulcers of the roof of the mouth; even when these are syphilitic it is a most useful remedy; deep punched out ulcers.

The throat: symptoms are very numerous. I will only mention a few of the most characteristic ones. Inflammation of the throat in general, involving all the tissues in it, extending up into the nose, and down into the larynx, even with a high degree of ulceration with copious, ropy mucus.

It has cured diphtheria exudation in the throat when it is confined to the throat, and also when it has extended to the larynx. A marked feature of the Kali bichromicum throat is its oedematous uvula: This symptom, is also found in Apis, Kali i., Lach., Mur. ac., Nit ac., Phos., Sulph. ac., and Tab.

Deep ulcers in the throat and ulcers on the tonsils. Ulceration so extensive that it has destroyed the whole soft palate.

Inflammation of the tonsils when they are swollen and very red, when the neck is swollen; inflammation of the tonsils with suppuration. In this sore throat there is quite commonly a shooting pain extending to the ears.

Throat: There are also enlarged veins in the throat. Like the sensation of the tongue as if a hair in various places in the fauces and nose. Dry, burning sensation in the throat is very common. Quite a characteristic symptom of Kali bichromicum is the intense pain in the root of the tongue, when putting the tongue out. It has much exudation in the throat that is not diphtheria, but resembles it.

The stomach: symptoms are also very numerous. There is aversion to meat and strange to say, he craves beer, which makes him sick, brings on diarrhoea. Food lies like a load in the stomach; digestion seems suspended; there is a pressure as of a load after eating and much foods eructations. Nausea comes on very suddenly, sometimes while eating, soon after eating; vomits all food and it is sour as if it had turned sour very rapidly; so that there is vomiting of sour, undigested food, bile, bitter mucus, blood, yellow mucus and ropy mucus.

It is a very useful remedy in nausea and vomiting of drunkards and beer drinkers. When a beer drinker has arrived at a point where he can no longer tolerate his beer but it makes him sick, Kali bichromicum is a useful remedy. In the stomach there is also soreness and coldness. It is a very useful remedy in ulceration of the stomach; and when such ulcer is cancerous it relieves the pain, stops the vomiting, makes the patient comfortable for a long time.

In other words, it palliates him. There are some pains in the stomach that are ameliorated by eating; nausea sometimes is ameliorated, but such is the exception. He has a faintness in the stomach which drives him to eat often. Chronic catarrh of the, stomach is a strong feature and perhaps is a condition that is generally present with Kali bichromicum patients.

Liver: There is pain in the liver, hard contracting pain extending to the shoulder, resembling Crot. h. Pain in the liver from motion. Dull, aching pain in the liver. It is a useful remedy in liver conditions associated with gall stones. It corrects the action of the liver so that healthy bile is formed and the gall stones are dissolved. Stitching pain in the liver, and also in the spleen, on motion.

The abdomen is very tympanitic, with tenderness. There are stitching, cutting pains. Sinking in the abdomen with nausea after eating, then comes vomiting, then comes diarrhoea. This is the order in which these symptoms generally appear. It is a very useful remedy in gastro-intestinal cases. Ulcers of the intestines in typhoid conditions.

This remedy has also a morning diarrhoea like Sulphur. It has diarrhoea in phthisis. It has diarrhoea in typhoid fever. Watery Stools. Stools are brown and watery, or may be blackish watery. There is often much tenesmus at stool. Chronic diarrhoea in the morning. Diarrhoea after beer like Aloe, China, Gamb., Lyc., Mur. ac., and Sulph.

Frequently there are clay colored stools. Again there are bloody stools, as in dysentery. It has both diarrhoea and dysentery after rheumatism has disappeared. It seems rheumatic conditions are inclined to alternate with diarrheic conditions. In hot weather it has diarrhoea and dysentery; in winter it has chest troubles and catarrh of the air passages.

There is pain in the abdomen before the stool much pain during the stool, cramping and tenesmus. After stool it has tenesmus like Merc. It has constipation with hard, knotty stool, followed by severe burning in the parts. Burning in the anus after stool. Prolapsus of the rectum. After dry hard stool there is burning in the rectum. Patient suffers from a sensation of a large plug in the rectum and there is great soreness in the anus. He suffers much from hemorrhoids which protrude after stool and are very painful.

Urines: Pain in the back with bloody urine. Shooting pains in the region of the kidneys, also aching in the region of the kidneys with urging to urinate in the day time. There is suppressed urine with aching in the kidneys. Ropy mucus in the urine. Pain in the coccyx before urination, relieved afterwards. Burning in the fossa navicularis during urination.

In the male the sexual desire is generally absent. There is a strong constricting or contracting pain in the end of the penis and much itching of the pubes. Deep punched, out chancres, very hard. Stitching in the prostate gland when walking. Ropy, viscid, mucous discharge from the urethra.

As there is much relaxation in the remedy during hot weather, it especially affects the woman. She suffers from prolapsus in the summer time, during hot weather.

It is a very useful remedy in the woman for subinvolution. In the menstrual flow there are often membranes that cause her to suffer. The menstrual flow is too soon, excoriates the parts, causes the labia to swell and itch. Like the catarrhal conditions of other mucous membranes, there is leucorrhoea that is yellow and ropy.

It has been a most useful remedy in the vomiting of pregnancy when the other symptoms agree and also where the milk becomes stringy.

There are numerous symptoms connected with the larynx and as is usual copious, thick, ropy mucus. Chronic hoarseness, rough voice, dry cough, swollen feeling in the larynx and sensation as if there was a rag in the larynx. Catarrh of the larynx, croup, cough when breathing, membranous croup, diphtheria, burning, smarting and rawness of the larynx, rattling in the trachea.

Now these symptoms come in the cold, damp weather, in the winter. They are associated with much coughing and uneasiness. Sometimes these symptoms are entirely relieved and he is comfortable in a warm bed at night; and he is worse always in cold weather; they come on when the cold weather comes in the fall and last all winter.

Chest: He has much wheezing when breathing; tightness at the bifurcation of the trachea.

Quite a characteristic pain in the chest is the pain from the sternum to the back, associated with catarrhal conditions and with cough. Cough is caused from tickling in the larynx and at the bifurcation; dry, frequent, hard cough; great soreness in the chest when coughing and breathing deep.

Cough with pain in the sternum through to the back. Cough with stitching pain in the chest. Loud, hard cough. When he wakes up in the morning he begins this hard coughing. He is often ameliorated by lying down and is ameliorated by the warm bed; is worse undressing, from exposure to the air, worse after eating, aggravated by taking a deep breath, ameliorated by getting warm in bed.

The irritation and the cough is increased very much exposure to cold air. The cough is also a choking cough at times; sometimes a hoarse cough. It is sometimes much like whooping cough, spasmodic and constrictive.

The expectoration connected with the chest cough is ropy, yellow, or yellowish green, sometimes bloody; sometimes expectorates quantities of clotted blood. There is much rattling in the chest, catarrhal conditions in the winter, last all winter, with rattling catarrhal conditions in old people, rattling in the chest.

It is a most useful remedy in phthisis and hemorrhages from the lungs and cavities in the lungs. There is a cold sensation in the chest which is generally felt in the region of the heart. There is a pressure in the chest after eating also near the heart or supposed to be about the heart and there is palpitation.

It has cured and been a very useful remedy in hypertrophy of the heart with palpitation. In all parts of the body there is chilliness, in the back, especially in the back of the neck.

Stabbing pains in the neck and in the dorsal region. Sharp pains in the region of the kidneys. Dull ache in the back. Many of the symptoms in the back are of a rheumatic character and wander from place to place. The rheumatic pains are worse stooping, and, like other pains, worse from motion.

Pains: An exception to this is in the sacrum where there is an aching pain at night when lying and is better in the day time on motion. There is pain in the sacrum on straightening up from sitting. Pain in the coccyx from rising after sitting; pain in the coccyx on first sitting down and in the act of sitting down.

The limbs are stiff in the morning on rising and the pains wander about, especially in the joints. Rheumatic pains that wander about. Pains in the limbs are worse from cold and worse from motion. They are better from heat and better in rest. Periodical pains, coming at regular times. The bones feel sore to the touch or on deep pressure.

There is cracking in the joints. Rheumatic pains are very common in the shoulders; lameness; there is burning in the forearms; rheumatic pains in the elbows; weak feeling in the hands and fingers with much clumsiness; spasmodic contraction of the fingers. Bones. in the hands and fingers feel bruised and very tender to hard pressure. Rheumatic pains of the fingers are very common to this remedy. In the lower limbs we have marked rheumatic pains through to hips and knees, worse walking and on motion.

Then comes the exception: pains in the sciatic nerves very, severe, worse in hot weather; these are better in motion, better in the warmth of the bed, worse from changes in the weather and better on flexing the leg. Drawing pains in the tibia are very common. It has cured ulcers on the legs, deep as if punched

out.
Burning on the ankles, soreness of the heels. It has cured ulcers on the heels.
The sleep is most restless. Starting in sleep and turning and tossing. Its chest symptoms are worse on walking.
Upon the skin we have pustules, boils, eczema, blisters, herpes, shingles, ulcers on the skin, tubercles, suppurating tubercles and eruptions that are syphilitic in character.

KALIUM BROMATUM
Bromide of Potash
(KALI BROMATUM)

Like all Potash Salts, this weakens the heart and lowers temperature. Brominism is caused by it. General failure of mental power, loss of memory, melancholia, anæsthesia of the mucous membranes, especially of eyes, throat, and skin; acne; loss of sexual desire, paralysis. Leading remedy in psoriasis. Nodular form of chronic gout. Symptoms of apoplectic attacks, uræmic or otherwise; somnolence and stertor, convulsions, aphasia, albuminuria. Epilepsy (with salt-free diet).

Mind.--Profound, melancholic delusion; feeling of moral deficiency; religious depression; delusions of conspiracies against him. Imagines he is singled out as an object of divine wrath. Loss of memory. Must do something-move about; gets fidgety (Tarant). Fear of being poisoned (Hyos). Amnesic aphasia; can pronounce any word told, but cannot speak otherwise. Night terrors. Horrid illusions. Active delirium.

Head.--Suicidal mania with tremulousness. Face flushed. Numb feeling in head. Brain-fag. Coryza with tendency to extension into throat.

Throat.--Congestion of uvula and fauces. Anæsthesia of fauces, pharynx, and larynx. Dysphagia, especially of liquids (Hyos).

Stomach.--Vomiting, with intense thirst, after each meal. Persistent hiccough (Sulph ac).

Abdomen.--Sensation as if bowels were falling out. Cholera infantum, with reflex cerebral irritation, jerking and twitching of muscles. Green, watery stools with intense thirst, vomiting, eyes sunken. Prostration. Internal coldness of abdomen. Diarrhœa, with much blood. Green, watery stools. Retraction of abdomen.

Urinary.--Sensibility of urethra diminished. Urine profuse, with thirst. Diabetes (Phos ac).

Male.--Debility and impotence. Effects of sexual excesses, especially loss of memory, impaired co-ordination, numbness and tingling in limbs. Sexual excitement during partial slumber.

Female.--Pruritus. Ovarian neuralgia with great nervous uneasiness. Exaggerated sexual desire. Cystic tumors of ovaries.

Respiratory.--Spasmodic croup. Reflex cough during pregnancy. Dry, fatiguing, hacking cough at night.

Extremities.--Fidgety hands; busy twitching of fingers. Jerking and twitching of muscles.

Skin.--Acne of face, pustules. Itching; worse on chest, shoulders, and face. Anæsthesia of skin. Psoriasis.

Sleep.--Restless sleep. Extreme drowsiness. Sleeplessness due to worry and grief and sexual excess. Night terrors. Grinding teeth in sleep. Horrible dreams. Somnambulism.

Modalities.--Better, when occupied mentally or physically.

Dose.--A few grains of the crude salt to the third trituration. Remember the unstable character of this salt. Said to be much more active if salt is eliminated from the diet.

POTASSIUM IO
KIO3 85 mg. 200 TA
MEDICAL
CORPS

Kalium Carbonicum
The Kali carb. patient is a hard patient to study, and the remedy itself is a hard one to study.
It is not used as often as it should be, and the reason is that it is a very complex and confusing remedy. It has a great many opposite symptoms, changing symptoms, and thus it is related to patients that withhold their symptoms and have many vague symptoms.
Mind: The patient is whimsical, irascible, irritable to the very highest degree, quarrels with his family and with his bread and butter. He never wants to be alone, is full of fear and imaginations when alone, "fear of the future, fear of death, fear of ghosts."
If compelled to remain alone in the house he is wakeful, sleepless, or his sleep is full of horrible dreams. He is never at peace, is full of imaginations and fear.
"What if the house should burn up!"
"What if I should do this or that!" and

"What if this and the other thing should happen! "

He is oversensitive to everything, sensitive to every atmospheric change; he can never get the room at just exactly the right temperature; he is sensitive to every draft of air and to the circulation of air in the room. He cannot have the windows open, even in a distant part of the house. He will get up at night in bed and look around to see where that draft of air comes from. His complaints are worse in wet weather, and in cold weather.

Pains: He is sensitive to the cold and is always shivering. His nerves feel the cold; they are all painful when it is cold. The neuralgias shoot here and there when it is cold, and if the part affected be kept warm, the pain goes to some other place. All his pains change place and go into the cold part; if he covers up one part, the pain goes to the part uncovered.

This remedy is full of sticking, burning, tearing pains, and these fly around from place to place. Of course Kali carb. has pains that remain in one place, but usually the pains fly, around in every direction, Pains cutting like knives. Pains like hot needles, sticking, stinging and burning.

These pains are felt in internal parts and dry passages. Burning in the anus and rectum, described as if a hot poker were forced into that passage; burning as with fire. The hemorrhoids burn like coals of fire. The burning of Kali carb. is like that of Arsenicum.

Again from studying the text it will be seen that it is a common feature of this medicine to have its symptoms come on at 2, 3 or 5 o'clock in the morning. In Kali carb. the cough will come or have its greatest < at three or four or five o'clock in the morning. The febrile state will occur from 3-5 in the morning. The patient, who is subject to asthmatic dyspnoea, will have an attack at 3 o'clock in the morning, waking him out of sleep. He will wake up with various symptoms and remain awake until 5 o'clock in the morning, and after that to a great extent they are relieved.

Of course, there are plenty of sufferings at any time in the twenty-four hours, but this is the worst time. He wakes up at 3 o'clock in the morning with fear, fear of death, fear of the future, worries about everything and is kept awake for 2-3 hours and then goes to sleep and sleeps soundly.

His body is cold and requires much clothing to keep it warm, but in spite of the fact that he is cold he sweats copiously; copious, cold sweat upon the body. Sweats upon the slightest exertion, sweats where the pain is, sweat over the forehead; cold sweat on the forehead with headache.

Neuralgia of the scalp and the eyes and the cheek bones in association with the nervous shooting pains. Violent pains here and there in the head, as if the head would be crushed. Cutting and stabbing, in the head. Violent congestive headaches as if the head were full. Head hot on one side and cold on the other; forehead covered with cold sweat.

Head: It has catarrhal congestive headache.

Whenever he goes out in the cold air, the nose opens up and the mucous membranes become dry and burn; when he returns into a warm room the nose commences to discharge, and the nose stuffs up so that he cannot breathe through it, and then he feels most comfortable; so that it has stuffing up of the nose in a warm room, and opening up of the nose in the open air. When the nose is open so that he can breathe through it, that is the time the head is most painful; it is painful to the cold air and the cold air makes it burn.

The cold air feels hot. All these patients suffer from a chronic catarrh and when they ride in the wind the catarrhal discharge ceases and then will come on a headache, and thus he has headache from riding in the cold wind.

Whenever the discharge ceases from taking cold in a draft on comes headache, and as the discharge becomes free again the headache is relieved. Neuralgic pains in eyes and scalp and through the cheek bones from a cessation of chronic catarrhal discharge, and when the discharge starts up again, these pain cease.

With the chronic catarrh of the nose there is a thick, fluent, yellow discharge; dryness of the nose, alternating with stuffing up. The one who suffers from a chronic catarrh will also have the discharge in the morning, which will fill up the nose with yellow mucus. In the morning he blows out and hawks up dry, hard crusts that fill up the nasal passage, clear over into the pharynx and down into the throat.

These crusts become dry as if they were partly formed upon the mucous membrane and when they are blown out there is bleeding. The bleeding starts from where the crusts are lifted up. He is subject to sore throat, is always taking cold, and it settles in the throat. He is also subject to enlarged tonsils and with these has enlargement and chronic hardness of the parotid glands-one or both. Great knots below the ear, behind the jaw. These grow and become hard, and at times, painful; shooting, darting pains when he is moving about in the open air. When air strikes these enlarged glands they are sore and painful, and he is ameliorated by going into a warm place.

The acute colds extend into the chest, but Kali carb. has been found most suitable in the chronic catarrh of the chest, chronic bronchitis.

Chest: The chest is very often affected in just the same way as the nose.

There is the dryness and dry barking, hacking cough in cold air, but a copious expectoration of mucus when it becomes warm, and that is the time he is most comfortable, for the expectoration seems to relieve him. He suffers mostly from a dry, hacking cough with morning expectoration. The cough begins with a dry, hacking, increases gradually and sometimes very rapidly to a violent. Spasmodic cough with gagging or vomiting, and when coughing it feels as if his head would fly to pieces.

Face: The face becomes puffed, the eyes seem to protrude and then there is seen that which is commonly present in Kali carb., a peculiar sort of a swelling between the eyelids and eyebrows that fills up when coughing.

Your attention is called to that peculiar feature, for although there may be bloating nowhere else upon the face that little bagging will appear above the lid and below the eye brow. It fills up sometimes to the extent of a little water bag.

Such a swelling has been produced by Kali carb., and sometimes that symptom alone guides to the examination of the remedy for the purpose of ascertaining if Kali carb. does not fit all the rest of the case.

Boenninghausen speaks of an epidemic of whooping cough in which the majority of cases called for Kali carb., and this striking feature was present. No remedy should ever be given on one symptom. If you are led to a remedy by a peculiar symptom, study the remedy and the disease thoroughly to ascertain if the two are similar enough to each other to expect a cure. Any deviation from that rule is ruinous and will lead to the practice of giving medicines on single symptoms.

Dry, hacking incessant, gagging cough with whooping, blowing of blood from the nose, vomiting of everything in the stomach, and expectoration of blood-streaked mucus, is a whooping cough that will be commonly cured by Kali carb., but especially if there is present that peculiar and striking feature of a bag-like swelling below the eyebrow and above the lids, puffiness of the eyes.

There are some cases of pneumonia that need Kali carb, in the stage of hepatization (like Sulph.). Again, when pneumonia has passed away think of Kali carb. if every time the patient takes a little cold it settles in the chest with these symptoms that I have described.

There is sensitiveness of the body to weather changes, to cold air and to wet, a continuous dry, hacking cough, with gagging, the aggravation from three to five the morning, and the patient, has flying neuralgic pains. These symptoms gradually increase and the patient dates them back to his pneumonia. He says: "Doctor, I have never been quite well since I had pneumonia." The catarrhal state has settled in his chest and there is a chronic tendency to take cold. These cases are threatening to go into phthisis and will hardly be likely to recover without Kali carb. In this tendency for catarrhal states to locate in the chest, Kali carb. should be thought of as well as Phosphor., Lycopod. and Sulphur.

Dropsies: Another general state that belongs to this remedy is a tendency to dropsies.

It has dropsies all over the body. The feet bloat and the fingers puff; the back of the hands pit upon pressure, the face looks puffy and waxy. The heart is weak. I can look back upon quite a number of cases of fatty degeneration of the heart in which I could have prevented all the trouble with Kali carb. if I had known the case better in the beginning.

These cases are insidious, and the indications calling for Kali carb. must be seen early or the patient will advance into an incurable condition. That peculiar state of weakness and feeble circulation that finally ends in dropsy and many other complications has its likeness in Kali carb.

There is an insidiousness about Kali carb. in the approach of all of its complaints.

He has a sort of nondescript appearance, he is withered, has much dyspnoea upon going up hill or even walking on the level. Examination of the lungs shows them to be in very fair condition, but finally complications come on, there is a break down and organic changes and you look back over these cases and say, if I had only seen in the beginning of this case what I see now it seems as if the patient ought to have been cured.

We learn the beginnings of remedies as we learn the beginnings of sickness. It is a prudent thing for a homoeopathic physician to glance back over a case that he has failed on, or someone else has failed on, to study its beginnings and see what the manifestations were. This kind of study to the homoeopathic physician is as delightful as post mortems are to the old school.

Teeth: The teeth present a peculiar state. The gums take on a scorbutic or scrofulous character. The gums separate from the teeth and the teeth decay and become discolored and loose, so that they have to be extracted early in life.

He suffers from pain in the teeth whenever he takes cold from riding in the wind and raw weather. The pains come on even when the teeth are not yellow or decayed: stitching, tearing, rending pains in the teeth. Offensive smell from the teeth; pus oozing out from around the teeth. The mouth is full of little ulcers, little aphthous patches. The mucous membrane is pale and ulcerates daily. The tongue is white with offensive taste; coated gray, with sick headaches.

While many of the symptoms of Kali carb, are aggravated after eating, some symptoms are relieved after eating. There is throbbing in the pit of the stomach when the stomach is empty. There is also throbbing all over the body, pulsation to the fingers and toes; there is no part that does not pulsate, and he is kept awake by this pulsation. Pulsation even when there is often no feeling of palpitation in the region of the heart. It has also violent palpitation of the heart.

Stomach: Kali carb. fits many old dyspeptics.

After eating be feels as if he would burst, so bloated is he. Great flatulence; belches wind upwards and passes flatus downwards;

offensive flatus. The belching up is also attended with fluid eructations, sour fluids that set the teeth on edge; they excoriate, or cause smarting in the pharynx or mouth. Pain in the stomach after eating; burning in the stomach after eating. Gone feeling in the stomach, that is not even relieved by eating.
A peculiar condition in Kali carb. is a state of anxiety felt in the stomach, as though it were a fear. One of the first patients I ever had expressed it in a better way than it is expressed in the books; she said,
"Doctor, somehow or other I don't have a fear like other people do, because I have it in my stomach."
She said when she was frightened, it always struck to her stomach.
"If a door slams, I feel it right here" (epigastric region).
Well, that is striking, that is peculiar. It was not long before I developed another feature of Kali carb.
By a little awkwardness on my part my knee happened to hit the patient's foot as it projected a little over the edge of the bed, and the patient said, "Oh"
Sure enough that was Kali carb. again, for you will find in Kali carb. a patient that is afraid and everything goes to the stomach and when touched upon the skin there is an anxiety or fear or apprehension felt in the region of the stomach.
You might imagine that it is connected with the solar plexus, but the symptom is the all in all to the physician.
Feet: A Kali carb. patient is so sensitive in the soles of the feet that the mere touch of the sheet brings a sensation of thrill throughout the body. Hard pressure is all right, it does not disturb, but something that comes unawares excites.
The Kali carb. patient is over sensitive to all the surrounding things, over sensitive to touch; shivering from the simplest and lightest touch, even when hard pressure is agreeable. Violently ticklish in the soles of the feet. I have often examined the feet when a patient would shiver and draw up the feet and scream out,
"Don't tickle my feet."
I had probably touched it so lightly that I did not know that I had touched it at all.
In Lach. also gentle touch is painful, while hard pressure is

agreeable but here it is not so much the ticklishness. In Lach. the abdomen is so sensitive that the touch of the sheet is painful. I have seen Lach. patients using a hoop to keep a light sheet from touching the abdomen. You may know then that you are in the realm of Lachesis, and that it is like those persons who are unable to bear the slightest touch upon the neck and suffer from uneasiness on wearing a collar.

All that, however, is different from this state of ticklishness. I have seen patients who are really so sensitive in the skin that I would not dare touch it, unless they knew just where I was going to touch.

"Now I am going to feel your pulse, hold still."

If I were to touch the hand, or reach out to feel the pulse without warning there would be a thrill.

Such a state is in keeping with Kali carb. These things often have to be dug out by observation in studying the nature of provings, and associating things. These things that run into the oversensitiveness of patients are of great value clinically. The capabilities of our Materia Medica are something wonderful, but they could be developed much more rapidly if a number of homoeopathic physicians would make application of the Materia Medica with accuracy and intelligence, observing what they see and relating it literally.

At the present day there is only a very small number of homoeopathic physicians that can come together in a body and say things that are worth listening to, a shamefully small number when we consider the length of time Hahnemann's books have been before the world.

Liver: There are many old chronic liver subjects who talk about nothing else but the liver.

Every time they go to the doctor's office they talk about the liver, and about a condition of fullness in the region of the liver and pain through the right shoulder blade and up through the right side of the chest, with a good deal of oppression and distension; vomiting of bile and a good deal of stomach disorder, fullness after eating; attacks of diarrhoea, alternating with constipation lasting for many days with great straining at stool.

Periodical bilious attacks, when a constipated state is present; cannot lie down at night; difficult breathing at night or at 3 o'clock in the morning, especially when it is in a patient over-sensitive to cold, damp weather, one who wants to sit by the fire all the time.

These liver subjects are often thoroughly cured by Kali carb. Sometimes they have been resorting to all sorts of liver tappings, taking such medicines as purge or cause vomiting, drugs that really aggravate the trouble. Kali carb. goes to the bottom of these cases, and roots out the evil.

Abdomen: In the abdomen we have many Kali carb. symptoms. Persons subjected to repeated attacks of colic, cutting pains, with distension, with pain after eating, constipation or diarrhoea. Colic, with cutting, tearing pains, doubling him up, coming on every little while. Tremendous flatulence. When the attack of colic is on it might remind you of Colocynth or of some other of the acute remedies that cure colic in two or three minutes, but you will find that these acute remedies that relieve colic so speedily when given the second or third time do not produce so marked an effect.

You will find it necessary to hunt for an antipsoric, a remedy that will control the whole case. In the study of the colic alone during its attack you only get a one-sided view of the case, and after the colic is over (say he has been cured by Colocynth) you now study the patient and go over the case, and behold all the symptoms are covered by Kali carb. After giving that remedy you may expect that the patient will not have another attack. Such is the nature of Kali carb. It is deep-acting, long-acting, goes deep into the life. It cures conditions due to psora, or to the suppression of eruptions in childhood, or to the closing up of old ulcers and fistulous openings with a history of troubles ever since. All these wandering pains and the chilliness are again relieved by eruptions, by the outbreak of discharges, by haemorrhages, by ulcers that eat in deep and flow freely and fistulous openings.

"Cutting in abdomen, as if torn to pieces."

"Violent cutting, must sit bent over pressing with both hands, or lean far back for relief; cannot sit upright."

"Cutting and drawing like false labor pains."

There is great coldness with the pains, with the cutting in the abdomen; he wants heat, hot drinks, hot water bags. A chronic coldness is felt in the abdomen, cold externally and internally.

It would sometimes be cruel to give a dose of Kali carb. when the colic is on, because if the remedy fitted the case constitutionally, if all the symptoms of the case were those of Kali carb., you would be likely to get an aggravation that would be unnecessary.

There are plenty of short acting remedies that would relieve the pain speedily, and at the close of the attack the constitutional remedy could then be given. If the patient can bear the pain to the end, it is better to wait until it passes off without any medicine.

That sometimes is cruel, and then the short acting medicines should be given. All recurrent troubles, those that come periodically, or after eating certain articles, or from exposure, or with a periodicity that belongs to time - all these states are chronic; they are not acute troubles.

They are simply a small portion of a chronic miasm, a side view and all such cases must have a constitutional remedy sooner or later. You can, it is true, relieve violent pain at the first visit, but then you must look deeper and prevent your patient having more trouble.

Otherwise, if you should give Bell. or Colocynth or any medicine that simply fits the colic, the trouble will come back again; you have not cured your patient; you have only palliated. But, on the other hand, you take such a colic as is described here and Kali carb. fits just these symptoms alone and does not fit the whole constitution of the patient.

Then it is that a constitutional and long-acting remedy like Kali carb. acts in fullness. It does not take the usual long time to act and is not attended with an aggravation.

"Abdominal muscles painful to touch; swelling of glands."

In the abdomen, also following troubles in the bowels, or following peritonitis, we have effusion into the peritoneal sac, which is usually associated with dropsy of the extremities, but not always. In liver dropsies especially is that remedy useful.

Rectum: It has a great many complaints of the rectum and anus and of the stool.

It has most persistent and enormous hemorrhoidal tumors that burn, that are extremely sensitive to touch, that bleed copiously, that are extremely painful, making it impossible for him to sleep. He is compelled to lie upon the back and hold the nates apart, because the pressure is very painful to the external piles.

The piles cannot be put back; there is great distension and swelling inside. Haemorrhoids that come out after stool and bleed copiously and are very painful; they must be pushed back, and long after going to bed they burn like fire.

There is great aggravation from stool, which is hard and knotty and requires great straining to expel. Fistulae of the anus.

Burning temporarily relieved by sitting in cold water.

It has chronic diarrhoea and also diarrhea alternating with constipation. Many times where there are numerous particulars, we have to rely upon the generals that are characteristic of the remedy. The text gives much less of diarrhea than has been developed by clinical uses.

"Diarrhoea painless, with rumbling in the abdomen and burning at stool, only by day; chronic cases with puffiness under the eyebrows."

It gives few symptoms, but it is a large and extensive remedy in diarrheas that are chronic. In old, broken down subjects, in weakly, pallid subjects, with poor digestion, with great flatulence, with much distension, with disordered liver.

Kidneys, Bladder: Then the kidney, bladder and urethra come in for their share of trouble, which is of a catarrhal nature.

Discharges from the bladder, purulent discharges of a thick, tenacious, copious mucus deposited in the urine. In keeping with this there is much burning; burning in the urethra, during and after micturition.

"Urine flows slowly with soreness and burning."

Kali carb. runs very close to Natr. mur. in many of its old, long-standing bladder troubles, In old cases of gleet and long-standing cases of urinary troubles that follow gonorrhea these two medicines are useful, both suitable in the scanty, white, gleety discharge that remains. In both the urination is painful.

In Nat. mur. the burning is after urination. Where there is scanty, gleety discharge and the burning is very marked and only after urination, and the patient is extremely nervous and fidgety, Natrum mur. will cure.

If the burning is during and after urination and you have the broken down constitution we have described then the remedy may be Kali carb. Some of these old cases are entirely painless, having no pain either during or after micturition.

Then you get an entirely different class of remedies. The old chronic discharges following a gonorrhoea are as troublesome for the young doctor as anything that will ever fall into his hands. The remedies are numerous, the symptoms are scanty, and many times the patient has not been long under the doctor's care, therefore he does not know the patient's constitutional state well and the patient can only tell him of the discharge. "Nothing but the discharge, doctor."

You cannot get his mind on his symptoms; he has forgotten that he wakes at 3 o'clock in the morning and cannot get to sleep until 5 o'clock, he has forgotten all the nervous manifestations. With the patient you have had under control, whose constitutional state you get before this condition comes, you ought not to have much difficulty.

One of the evidences that the Kali carb. patient is of a weakly constitution and is on the road to a break-down is that all of his symptoms are aroused and brought into action after coition, after sexual excitement. Now you will take notice in practice and remember it, that coition is a natural thing with man, when it is carried on in order, and when that which is natural is followed by prostration, and this has been so for a long time, there is a break in the constitution, there is something radically wrong.

Genitals: All the symptoms are likely to be worse after coition in Kali carb. He has weak vision, weakness of the senses, tremulousness, and is generally nervous; he is sleepless, and weak, and he shivers and trembles for a day or two after coition.

Similar symptoms are observed in the woman. In spite of the fact that the patient is weak, the sexual desire is excessive. It is not orderly. There is a sexual erethism, which is not under the command of the will, and in the male he is subject to copious and frequent pollutions, nightly dreams, sexual prostration. Young men who have abused themselves, or who have indulged excessively in sexual pleasure, go into marriage with weakened genitals, incapacitated; and then there comes a disgust, and it is not strange that there are so many divorces in the world. When the patient is young, some of this trouble can be overcome by living an orderly life and correct Homeopathy.

In Kali carb. there are many complaints affecting the male genital organs; uneasiness and sensitiveness of the testicles. One is in a state of swelling and hardness. Itching and smarting and annoying sensations in the scrotum and sensations that constantly remind the patient that he has genital organs. Constant irritation calling his attention to the genitals, brought on from abuse, from vice, from excesses. Phosphorus is a medicine that is abused in this sphere. Many physicians look upon it as one of the great remedies for the weakness of the genital organs.

In Phos. the genital indications are extreme excitement, too active erections, a disorderly strength of the genital organs. Beware of giving it in impotency or in weakness, as this is often associated with very feeble constitutions, and Phos. not only fails to cure, but seems to add to the weakness. It is a weakness that you will learn is a vital weakness. Phos. will set patients to running down more rapidly who are suffering from a vital weakness, who are always tired, simply weak, always prostrated and want to go to bed.

The female has a great friend in Kali carb. It is full of her complaints and has many symptoms likely to be found in a sick woman. It is useful in cases of uterine hemorrhages that have been incessant in pale, waxy, hemorrhagic women; incessant haemorrhage following an abortion.

She has been curetted and has had all sorts of treatment, but still that oozing keeps right on. At the menstrual period the flow is very copious and clotted, and then after prolonged menstruation of ten days or so, during which she has had a copious flow, she settles back into a state of oozing and flowing until next month and then it rouses, up into another ten days of copious menstruation. Kali carb. has cured a number of cases of fibroid tumor long before it was time for the critical period to cure.

You must remember that there is natural tendency for a fibroid to cease to grow at the climacteric period, and afterwards to shrivel and that this takes place without any treatment, but the appropriate remedies will cause that haemorrhage to cease, will cause that tumor to cease to grow and after a few days there will be a grand shrinkage, in its size.

Pregnancy: Kali carb. is often a remedy for vomiting in pregnancy, but find out when it is the remedy for vomiting of pregnancy we ha to go to the whole constitutional state. Vomiting of pregnancy is not cured, although it may be temporarily relieved, by Ipeca, as this is a medicine that corresponds merely to the nausea its. In a large number of instances gagging and nausea are only a second or third grade symptom in the remedy that will cure. The condition really depends upon the constitutional state, and the remedy th is to cure must be a constitutional remedy. Sulphur, Sepia and Kali carb. are among the remedies commonly indicated.

Sometimes Arsen is needed. Of course, if a pregnant woman has simply disordered her stomach and has vomited bile a few times the remedy might be Ipeca. When a pregnant woman has no constitutional symptom at all, and upon examining the case you find nothing but the nausea, overwhelming deathly nausea, with continuous vomiting day an night, a single dose of Symphoricarpus rac. will help.

That is prescribing upon very limited information, and should only be done in circumscribed or one-sided cases. It is not a long acting remedy, it is not a constitutional remedy and acts very much like Ipecac.

At times you will go into the confinement room when the woman has pains in the back below the waist line. The pains in the uterus are very weak, they are not sufficiently expulsive to make progress in the labor, the kind of pain that makes the woman utter the cry,

"My back, my back!"

The pains extend down the buttocks and legs. Pain in the back as if the back would break. Under good prescribing these pains are changed into contractions, which prove sufficient to expel the contents of the uterus.

When you hear such things you will look back over the history of the case. You will look back for weeks as th woman has been drawing near the end of gestation and see that the vague things, the chilliness and other features in her constitutional state for which you have been trying to find a remedy now culminate at the time of her confinement into a class of pain. Had you seen that six weeks before and given her Kali carb. you would have prevented the severe labor.

It is a severe labor, a prolonged labor; the uterus appears to be weak, and the pains are feeble they are all in the back, and do not go to the centre of operation as they should. Now, this same kind of a pain may deceive you in taking another form. The pains begin in the back, and appear to go to the uterus and then run up the back, which would turn you aside entirely from the Kali carb. pain into a pain that would indicate Gelsemium.

Sometimes these pains are so severe that they actually seem to prevent rather than encourage the contractions of the uterus; when the contractions of the uterus cease, and the woman screams out and wants her hips rubbed, and screams out with pain in each side of the abdomen rather than in the centre, pains in the region where the broad ligaments ought to be, Actea racemosa will make the pains regular.

Puls. is the medicine for absence of marked contraction, in cases inclined to do nothing; in a case that is inactive when the os is sufficiently dilated and the parts relaxed, and the prediction is an easy and simple labor, but the patient does not do anything. It is a state of mildness or inactivity. Puls. will very often cause in five minutes a very strong contraction of the uterus, sometimes almost, in a painless way.

"The back aches so badly while she is walking that she feels as if she could lie down on the street," etc..

The pain seems to take the force and vigor all out of the patient.

After delivery there is a tendency to prolong the flooding, rousing up at every menstrual period, as described.

Heart: Weakness of the heart, cardiac dyspnea; the breath is short and the patient cannot walk or must move very slowly.

It is the coming on of a fatty heart.

With the suffocation and dyspnoea the breathing is so short that the patient cannot stop to take a drink or eat; the breathing is rapid, not deep, but weak. Dyspnea with violent, irregular palpitation of the heart, throbbing that shakes the whole frame, pulsation that can be felt to the ends of the fingers and toes.

Violent pulsations; patient cannot lie on the left side;

accompanied by stitching pain through the chest, and cough. In old asthmatic patients with weak pulse, with the same pulsations and palpitation and cannot lie down.

The only position it seems that be can find any comfort in is leaning forward, with his elbows resting upon a chair. The attack is violent and continuous, especially worse from 3 to 5 A.M., and worse from lying in bed. He is aroused at 3 o'clock in the morning with these asthmatic attacks. Asthmatic dyspnea, when the state is that of humid asthma or filling up of the chest with mucus, course rattling in the chest, loud rattling breathing.

In patients who always have rattling in the chest, rattling cough, stuffy breathing; with every rainy spell or misty spell, or in cold, foggy weather, the condition becomes that of a humid asthma; asthmatic breathing, with much weakness in the chest, worse from 3 to 5 in the morning. The patient is pale, sickly and anemic, and complains of stitching pains in the chest.

The cough: of this medicine is one of the most violent coughs of all the medicines in the Materia Medica. The whole frame is racked. The cough is incessant, attended with gagging and vomiting, comes on at 3 o'clock in the morning, a dry, hacking, hard, racking cough.

"Suffocative cough and choking cough at 5 A.M.

Great dryness in the throat between 2 and 3 A.M."

Think of Kali carb. when, after troubles like measles, a catarrhal state is left behind, due to lack of reaction, the psoric sequelae. The cough following measles is very often a Kali carb. cough. Kali carb. Sulphur, Carbo veg. and Drosera are perhaps more frequently indicated than other medicines in such coughs as follow measles of pneumonia.

The expectoration is copious, very offensive, tenacious, lumpy, blood-streaked or like pus, thick yellow or yellowish-green. Very often it has a pungent, cheesy taste, strong taste, as of old cheese. Catarrh of the chest. Dry cough day and night, with vomiting of food and some phlegm, worse after eating and drinking and in the evening.

Pains: Nothing is more striking in Kali carb. than the wandering stitching, pains through the chest, and the coldness of the chest.

The great dyspnoea, the transient stitches, the pleural stitches are important features of this remedy. A great number of the cases in which Kali carb. is suitable are those where the trouble has spread from catarrhal origin and from the lower portion of the lungs upwards. It is not so commonly indicated in those cases where the dullness has begun at the apex of either or both lungs.

It will very often ward off future sickness where the family history is tuberculous. Do not be afraid to give the antipsoric remedies when there is a history of tuberculosis in the family, but be careful when the patient is so far advanced with tuberculosis that there are cavities in the lung, or latent tubercles, or encysted caseous tubercles.

Your antipsorics might rouse him into a dangerous condition. Do not suppose, however, that it is dangerous to give Sulphur because one's father and mother have died of phthisis. Sulphur might be just the remedy to prevent the child from following the father and mother.

Kali carb. is often suitable, and will act as ail acute remedy in the advanced stages of phthisis in cases in which it was not indicated primarily as a constitutional remedy. In such instances it will act as a palliative in phthisis, whereas if it were indicated primarily as a constitutional remedy it would do damage in the last weeks.

The fortunate thing is that a great many homeopaths are not able to find the homoeopathic remedy. If the patient has yet lung space enough to be cured, Kali carb. will do wonders where the symptoms agree.

Gout: I want to warn you in one respect concerning Kali carb. It is a very dangerous medicine in gout. When you get an old gouty subject who has big toe joints and finger joints, and they are sore and inflamed every now and then, you might think that Kali carb. covers the case very suitably; he is disturbed in just such weather, he is pallid and sickly, his complaints come on at 2 to 3 o'clock in the morning, he has the shooting pains.

But these gouty patients are often incurable, and, if so, to undertake to cure them, would be a dreadful calamity, because the aggravations would last so long. If you give Kali carb. to one of these incurable patients in very high potency it will make your patient worse, and the aggravation will be serious and prolonged, but the 30 th may be of great service. Kali iod., when it is indicated in the gouty state, acts as a soothing and palliative remedy.

But Kali carb. seems to be a dreadful medicine to handle, it is a sharp and a two-edged sword. Do not undertake to give medicine with a view to curing these old cases of gout when the nodosities are numerous. Do not give that constitutional medicine that should have been administered to these patients twenty years ago, because there is not reaction enough in the life of the patient to turn him into order, and he will be destroyed. It seems paradoxical to say it, but to cure him is to kill him.

The vital action that is necessary to restore him to health would practically tear his framework to pieces. You need not believe these things, you are not obliged to. But think about them, and some day after practicing awhile and making numerous mistakes in attempting to cure incurables you will admit the awful power of homeopathic medicines.

They are simply dreadful. In old gouty cases, in old cases of Bright's disease, in advanced cases of phthisis where there are many tubercles, beware of Kali carb. given too high.

While studying the text book, look over the sensations. They are very numerous. Of course, those most striking are the stitching, and tearing pains, shooting, sticking and wandering pains.

KALIUM CHLORICUM
Chlorate of Potassium-K clo. 3
(KALI CHLORICUM)

Acts very destructively upon the kidneys, producing a croupous nephritis, hemoglobinuria, etc. Parenchymatous nephritis with stomatitis. Produces most acute ulcerative and follicular stomatitis. Noma. Toxæmic conditions of pregnancy (urinary symptoms). Chronic nephritis; hepatitis. Septicæmia. Anæmia.

Mouth.--Profuse secretion of acid saliva. Whole mucous surface red, tumid, with gray-based ulcers. Tongue swollen. Stomatitis-aphthous and gangrenous. Fetor. Mercurial stomatitis (as a mouth wash).

Stomach.--Feeling of weight in epigastric and umbilical region. Flatulence. Vomiting of greenish-black matter.

Stool.--Diarrhœa; profuse, greenish mucus.

KALIUM CYANATUM
Potassium Cyanide
(KALI CYANATUM)

Sudden sinking sensation. Cancer of tongue and agonizing neuralgia have been benefited by this drug. Sick headache; sciatica; epilepsy.

Tongue.--Ulcer of tongue, with indurated edges. Speech difficult. Power of speech lost but intelligence intact.

Face.--Severe neuralgia in temporal region, recurring daily at same hour. Pain in orbital and supra-maxillary region, with screaming and loss of consciousness.

Respiratory.--Cough prevents sleep; respiration weak; cannot take deep breath.

Modalities.--Worse, from 4 am to 4 pm.

Relationship.--Compare: Platin; Stann; Cedron; Mezer; Mur ac.

Dose.--Sixth potency and 200th.

POTASSIUM IO
KIO3 85 mg. 200 TA
MEDICAL
CORPS

Kalium Iodatum

This remedy is an antipsoric and antisyphilitic. It has been used very extensively by the old school as an antisyphilitic, but in the very large doses which they used it became to a great extent allopathic to the disease, because of the tremendous effect it produced upon the economy, and implanted its own miasm, and thereby in a measure it suppressed many cases of syphilis.

The medicines that are the most powerful substances are really those that sustain in homoeopathic relation to the disease in general, and of these the very smallest dose often cure when similar. When the remedy is not similar enough to cure in such a form the increasing of the dose does not make it homoeopathic. There is an idea in vogue that increasing the dose makes the remedy similar. That is going away from principle. If the remedy is not similar there is no form of dose that can make it similar.

It affects the glandular structures and the periosteum after the

Feb 5th - Mar 5th

manner of syphilis. It produces catarrhal inflammations. It is a deep-acting medicine and closely related to Mercurius. It has ulcerations and catarrhal states and glandular affections like Mercurius. It is similar in its action to Mercurius and is an antidote to it.

The old subjects who have always been taking Calomel or Blue Mass for their bilious complaints will in time become subject to frequent coryzas, constipation, pains and aches, and disturbance of the liver, and disordered stomach, and must have another dose of Mercury. Some of these cases need this remedy. If you practice medicine in a neighborhood where there is a very poor homeopath you will find that he is giving the Biniodide, or some other preparation of Mercury, for almost all of the colds or sore throats.

This establishes upon all of these patients an over-susceptibility to the weather changes, and they keep taking these red mercurial powders. Some of them carry them around in their pockets. But the more they take of these red powders the more frequently they have sore throats and colds. Many times they will not get over these troubles without Kali iod. in potentized form, or Hepar.

Hepar and Kali iod. are the two principal medicines that such patients need. Individuals with this susceptibility to colds and sore throats and weather changes, that is, from the effects of Mercury, who have been led into a Mercurial state, run two ways,

Those who are invariably shivering and cold, and want to hover around the fire, and cannot keep warm, will need Hepar, and those that are always too warm, that want the covers off, and want to be in constant motion, extreme restlessness, very tired when keeping still, will have their Mercury antidoted by Kali iod. The Mercurial state will be antidoted, but it sometimes takes several prescriptions and sometimes a series of carefully selected remedies. The psora, that is, his chronic state, will not manifest itself until you have lifted off this miasmatic state, which has been caused by Mercurius. It is astonishing what a great number of men, women and children are bowed down by the miasm that Mercury produces, and yet those prescribers go on, giving this form of Mercury and say it is practicing Homoeopathy. I am led to remark that there is yet much to be learned about the art of prescribing.

Mind: This remedy has a peculiar mental state.

There is a very strong degree of irritability, cruelty, and harshness of temper. He is harsh with his family and with his children; abusive. It will take all the sense of refinement out of his mind and then he will become sad and tearful.

Extremely nervous, and must walk and be on the go. If he remains in a warm room he becomes weak and tired, and feels as if he could not stir, does not want to move, and does not know what is the matter with him.

He is worse in the warmth of the house, but as soon as he goes into the open air he feels better, and as soon as be begins to walk he feels still better and can walk long distances without fatigue; goes into the house again and becomes weak and tired and exhausted.

A nervous and mental exhaustion comes on from resting.

The head: manifests some peculiar things, such as we sometimes see in syphilis, which the remedy controls when the other symptoms agree.

Bi-parietal head pains of nerve syphilis, old, long standing cases. Pains through the parietal bones, through the side of the head, as if crushed in a vise; awful crushing, pulsating, pressing, rending pains on both sides of the head.

These are worse in the house, and better from warmth and from motion, better walking in the open air. All through the head there are pains like knife stabs, like nails driven in; lancinating pains, cutting pains in the scalp, in the temples, over the eyes through the eyes. The pericranium becomes sensitive and filled with nodules. The scalp breaks out with nodular eruptions, tuberculous eruptions, syphilitic eruptions.

"Scalp painful on scratching as if ulcerated."

"Great disposition for hair to change color and fall out."

Coldness of the painful parts.

Eyes: In watching a syphilitic case, there is often noticed disturbance of vision, and finally iritis. They can be treated homeopathically. I have seen syphilitic iritis of the most severe character cured with Staphysagria, Hepar, Nitric acid, Mercurius, Kali iod, and many other remedies. The inflammatory process stops at once, there are no adhesions, no deformity, and no troubles remaining behind.

If you consider that a case of inflammation must run its course, and will be associated with fibrinous exudations, and adhesions most probably follow, of course you must adopt the plan of dilating with Atropine, and hold the iris so until the disease has run its course. But the disease does not run its course after a proper remedy, and as that is the last symptom to appear, it will be the first to go, and you may expect the eye symptoms to disappear within twenty-four hours after the administration of the homeopathic remedy.

This remedy has marked conjunctival trouble, with green catarrhal discharges from the eyes. This green character applies whenever you can find discharges. There is copious, thick, green expectoration, green discharges of muco-pus from the nose, from the eyes, from the ear, thick, greenish leucorrhoea, green discharge from ulcers. These thick green or yellowish-green discharges are sometimes very foetid.

At times when you examine the conjunctiva it seems to puff out as though water were behind it, a chemosis.

Iodide of potash, produces that state.

"Chemosis, purulent secretion."

In olden times when I used to give Iodide of potash to rheumatic patients, according to the prevailing craze, I would notice, after a day or two, chemosis coming into the eyes and the patient beginning to ache in his bones all over, while the rheumatism of the joints would disappear. An allopathic effect was taking root upon that patient which would last for years. I have noticed that a large dose of Kali iod. in syphilitics would make the patient get up the next morning with difficulty in opening the lids, and upon opening the eyes the conjunctiva would form water bags, as though water were behind them and they were bagged out.

Kali iod. also produces oedema of the lids and injection and tumefaction of the conjunctiva. The mucous membrane becomes red, raw and bleeding. The vessels are enlarged and the surface is very sore, inflamed and smarting. He is compelled to hold the eyelids during winking; the winking is painful and causes scratching, as from sand. Acute conjunctivitis, especially when it occurs in patients who have rheumatism, who have been abused with Mercury, or those afflicted with syphilis. Syphilitic and rheumatic affections of the eye.

Old gouty subjects who must keep in motion, and must keep in the open air, who are always too warm, and cannot endure any degree of warmth in the room, who suffer more from their gouty pains when keeping quiet, those who are fatigued when keeping quiet and can walk and move without fatigue in the open air, especially when it is cold, with enlarged joints, with restlessness, anxiety, nervousness, harshness of the temper and great irritability, alternating with weeping.

This relief from motion will make the routinist give Rhus in many instances, but Rhus would have no relation to the case whatever. Remember, Rhus is a cold patient, who is always shivering and wants to be by the fire, whose complaints are > by the heat, he is > in a warm room and becomes fatigued from motion, whereas Kali iod. does not become fatigued from continued motion.

The nose: comes in for much trouble.

In old syphilitic catarrhs they blow out great crusts and pieces of bone; syphilitic ozoena; the bones of the nose are very sensitive to touch and become necrosed, and the nose flattens down and becomes soft. It is deprived of the bony framework that holds it in shape and settles down flat, leaving only the red tip. Extreme pain at the root of the nose like Hepar.

Thick, yellowish-green, copious discharge from the nose. Every change of the weather brings on catarrhal states. He is constantly taking cold, sneezing continuously. Copious, watery discharge from the nose, excoriating the passage, and causing burning in the nose. This coryza is < in the open air, but all the rest of the patient is > in the open air.

Consequently, when a patient has two such conditions that operate against each other he suffers much, because he cannot find quarters for relief. In a warm room his nasal catarrh, or his coryza, is >, but in the open air he feels > as to the rest of his complaints.

"Repeated attacks of violent, acrid coryza from the least cold." With the coryza the frontal sinuses become involved, and there is great pain through the forehead; pain in the eyes, pains through the cheek-bones.

Throat: In the throat, as you might suppose from its relations to syphilis and Mercury, there is much trouble.

Deep ulcers in the throat, old syphilitic ulcers; perforating ulcers, eating away and destroying all the soft tissues, the uvula and the soft palate. Ulceration upon the tonsils; enlarged tonsils; very painful sore throat. Knots and knobs in the throat upon the mucous membranes.

"Dryness of throat and enlarged tonsils."

"Terrible pain at the root of the tongue at night."

The whole pharynx, larynx, trachea and bronchial tubes suffer from catarrhal conditions. Inflammatory conditions with greenish discharge.

While all the external symptoms and the rest of the body symptoms are relieved in the cold air and by the contact of external cold, internally cold things aggravate. Cold milk, ice cream, ice water, cold drinks and cold food, cold things in the stomach < all the symptoms. Though he has an excessive thirst and will drink large quantities of water, if very cold it will make him sick.

Kali iod. has all the flatulence and belching of Carbo veg. and Lycopodium.

The glands all over the body become tumid, enlarged and hard. It has cured enlargement of the thyroid gland; it may take this from Iodine.

Very characteristic is the chronic inflammation of the urethra, following gonorrhoea, where the discharge is thick and green, or greenish yellow, without pain. Inflammation of the testicles, syphilitic in character.

Pain and rawness in the larynx, with hoarseness; awakens from constriction of the larynx. It is very useful in phthisis of the larynx. Cough from constant irritation in the larynx. Dry, hacking cough, hoarse cough with copious greenish expectoration. Catarrhal phthisis with thick, copious, greenish expectoration. Pleuritic effusion. Fluttering of the heart. Palpitation on slight exertion or when walking. Rapid pulse.

Not only in old gouty troubles, but in patients threatening phthisis, and in old malarial troubles this medicine will be of great service.

It cures sciatica when the pain is sharp from the hip down, worse lying, sitting or standing and better walking.

You may go to the bedside of a patient who is suffering from what she calls "hives;" you will find she is covered from head to foot with an eruption that forms great nodules; she is fairly burning up from head to foot. She cannot endure any covering; the heat of her body is intense, yet she has no rise of temperature.

Rough nodular manifestations all over the skin; a condition that will go away in a few hours, but in a few days, weeks or months come back again. A single dose of a very high potency of Kali iod. will turn things into order in persons subject to these hives and they will not come again.

KALIUM MURIATICUM
Chloride of Potassium-KCl
(KALI MURIATICUM)

Although not proven, this remedy has a wide clinical use, through its introduction by Schuessler. It certainly is of great value in catarrhal affections, in sub-acute inflammatory states, fibrinous exudations, and glandular swellings. White or gray coating of base of tongue, and expectoration of thick, white phlegm, seem to be special guiding symptoms. Bursitis præpatellaris.

Head.--Imagines he must starve. Headache, with vomiting. Crusta lactea. Dandruff.

Eyes.--White mucus, purulent scabs. Superficial ulcer. Trachoma. Corneal opacities.

Ears.--Chronic, catarrhal conditions of the middle ear. Glands about the ear swollen. Snapping and noises in the ear. Threatened mastoid. Great effusion about the auricle.

Nose.--Catarrh; phlegm white, thick. Vault of pharynx covered with adherent crusts. Stuffy cold. Nosebleed (Arn; Bry).

Face.--Cheek swollen and painful.

Mouth.--Aphthæ; thrush; white ulcers in mouth. Swollen glands about jaw and neck. Coating of tongue grayish-white, dryish, or slimy.

Throat.--Follicular tonsillitis. Tonsils inflamed; enlarged so much, can hardly breathe. Grayish patches or spots in the throat and tonsils. Adherent crusts in vault of pharynx. "Hospital" sore throat. Eustachian catarrh.

Stomach.--Fatty or rich food causes indigestion. Vomiting of white, opaque mucus; water gathers in the mouth. Pain in the stomach, with constipation. Bulimia; hunger disappears by drinking water.

Abdomen.--Abdominal tenderness and swelling. Flatulence. Thread-worms, causing itching at the anus.

Stool.--Constipation; light-colored stools. Diarrhœa, after fatty food; clay-colored, white, or slimy stools. Dysentery; purging, with slimy stools. Hæmorrhoids; bleeding; blood dark and thick; fibrinous, clotted.

Female.--Menstruation too late or suppressed, checked or too early; excessive discharge; dark-clotted, or tough, black blood, like tar (Plat). Leucorrhœa; discharge of milky-white mucus, thick, non-irritating, bland. Morning sickness, with vomiting of white phlegm. Bunches in breast feel quite soft and are tender.

Respiratory Organs.--Loss of voice; hoarseness. Asthma, with gastric derangements; mucus white and hard to cough up. Loud, noisy stomach cough; cough short, acute, and spasmodic, like whooping-cough; expectoration thick and white. Rattling sounds of air passing through thick, tenacious mucus in the bronchi; difficult to cough up.

Back and Extremities.--Rheumatic fever; exudation and swelling around the joints. Rheumatic pains felt only during motion, or increased by it. Nightly rheumatic pains; worse from warmth of bed; lightning-like from small of back to feet; must get out of bed and sit up. Hands get stiff while writing.

Skin.--Acne, erythema, and eczema, with vesicles containing thick, white contents. Dry, flour-like scales on the skin (Arsenic). Bursitis.

Modalities.--Worse, rich food, fats, motion.

Relationship.--Compare: Bellad which Kali mur follows well in catarrhal and hypertrophic conditions. Kino (otorrhœa, with stitches in right ear); Bry; Mercur; Puls; Sulph.

Dose.--Third to twelfth potency.

External use in skin affections with burning sensation.

In India and Pakistan, people use Kala Namak. Also called Sendha Namak, black salt, red salt or Lahory salt.

It comes from the mines of Rajesthan and also in Pakistan.

This salt contains Nat. Muricatum as well Kali Muricatum (Potassium Chloride) plus many more things.

I have obtained wonderful results by using potentized black salt.

constricted and sore.

Stool.--Thin, watery, bloody. Membranous shreds, with tenesmus. Diarrhœa from eating veal.

Female.--Menses too early, profuse, black; preceded and with violent backache. Leucorrhœa. Burning pains in the ovarian region only during menses (Zinc after).

Respiratory.--Hoarseness. Dry, morning cough, with pain in chest and bloody expectoration. Bronchitis, with sharp, short, dry, hacking cough. Asthma, with excessive dyspnœa, nausea, dull stitches, and burning in chest. Dyspnœa so great that breath cannot be held long enough to drink, though thirsty. Chest feels constricted. Oppression worse in morning. Sour-smelling expectoration. Expectoration of clotted blood, after hawking mucus. Acute exacerbations in phthisis; congestion of lungs. Spasmodic croup; paroxysm of crowing. Laryngeal diphtheria.

Heart.--Pulse weak, small, thready. Violent stitch in præcordia, and beating of heart.

Extremities.--Stitches between shoulder-blades. Tearing and sticking in shoulders and joints. Hands and fingers seem swollen.

Modalities.--Worse, eating veal; towards morning and in afternoon. Better, drinking sips of water.

Relationship.--Antidotes: Opium; Nitr sp dulc.

Antidote to Opium and Morphine poisoning, 8-10 grains to glass of water.

Compare: Gun-powder (Nitre with sulphur and charcoal-2x trit. "Blood poisoning. " Septic suppuration. Protractive against wound infection. Antidote to Ivy and Primula rash (Clarke) Herpes facialis; crops of boils. Carbuncles). Osteo-myelitis.

Cannab sat (which contains a large amount of Kali nit). Lycop; Sanguin; Allium sat; Antimon iod.

Dose.--Third to thirtieth potency.

AGAR DIFFUSION:
POTASSIUM PERMANGANATE
200 ml
250 ml
PYREX
No. 1000
50

KALIUM PERMANGANATUM
Permanganate of Potassium
(KALI PERMANGANICUM)

Intense irritation of nose, throat, and larynx. Diphtheria. Dysmenorrhœa. Bites of serpents and for other animal poisons. Septic conditions; tissues infiltrated with tendency to sloughing.

Respiratory.--Bleeding from nose. Nasal discharge. Smarts and irritates. Constrictive, smarting sensation in throat. Larynx feels raw. Short, hacking cough.

Throat.--Swollen and painful. Everything hawked up streaked with blood. Posterior nares painful. Muscles of neck feel sore. Swollen uvula. Fetor of breath.

Dose.--Locally, 1 dram to a quart of water, to correct fetor in cancer, ulcer, ozæna, and other foul odors. Also as an injection in leucorrhœa and gonorrhœa. Internally, 2x dilution in water.

Saturated solution locally in eruption of smallpox.

Potassium Permanganate for Morphine Poisoning.--Potassium permanganate is recognized as being the most effective chemical antidote in cases of morphine or opium poisoning, acting directly on the morphine and oxidizing it to less toxic substances. To be effective the permanganate must come in direct contact with the opium or morphine in the stomach; hypodermatic or intravenous injections are absolutely useless, as the salt would be decomposed by the blood serum at once. The approved treatment is administration of two to five grains of potassium permanganate in dilute aqueous solution as soon as possible after the poison is taken, this amounts to be increased if very large doses of the poison have been taken. Washing out the stomach with a quantity of 1 to 500 solution of permanganate is also recommended, using at least a pint of this solution either by a stomach pump or by enforced vomiting. Permang of Potash counteracts effects of alkaloids of many poisonous plants. Owing to its oxidizing powers if given before the alkaloid has been absorbed (Dr. Chestnut in Dept of Agriculture).

POTASSIUM IO
KIO3 85 mg. 200 TA
MEDICAL
CORPS

Kalium Phosphoricum
Generals: The symptoms of this remedy are worse morning, evening and during the night. The over-sensitive, nervous, delicate person, worn out from long suffering, much sorrow and vexation, and prolonged mental work; also such as are broken down from sexual excesses and vices.
It is a long-acting antipsoric. Anemic and chlorotic patients, Most complaints are worse during rest, and ameliorated by gentle motion and slowly walking about. The patient in general, and his pains, are aggravated in cold air, from becoming cold, after becoming cold, from entering a cold place, and in cold, wet weather. He takes cold easily. Aversion to the open air. Draft of air aggravates, and open air aggravates. Numbness in the extremities. Great lassitude. Aggravated by ascending stairs, and by physical exertion. Glands dwindle. Choreic movements. Complaints are worse after coition. The weakness, emaciation, and anaemia and tubercular tendency are strong features of this

wonderful antipsoric remedy. Oedema of the limbs and dropsy of serous sacs. Complaints aggravated after eating. Emaciation, wasting diseases with putrid discharges and putrid stools. Fainting spells. Fasting ameliorates, Fatty tendency of muscles and organs. Aggravated alter cold drinks, milk. This remedy has been used in gangrenous condition. Parts become black. Septic, putrid hemorrhages, and great prostration. All forms of nervous weakness. Hypochondriasis and hysteria. Inflammation of glands.

Complaints from loss of fluids. Orgasm of blood. The pains are aching, pressing, stitching, tearing, tearing downwards, paralyzing. Chronic neuralgia, ameliorated by gentle motion, aggravated from cold. One sided paralysis from a gradually increasing weakness. Paroxysms of pain followed by exhaustion. Pulsation felt all over the body and in the limbs. Symptoms are often one-sided. Many symptoms come during and after sleep. Twitching of muscles, and jerking of limbs. Ulcers with putrid discharges. Offensive catarrhal discharges. Walking fast aggravates; walking in open air aggravates. Warmth of bed ameliorates. Complaints worse in winter. Too many cures have been made by the followers of Schüessler to permit this remedy to remain unexplained. Good provings are found in our literature. The high and highest potencies have served the best, and it should be used in the single dose.

Mind: Flies into a passion and can hardly articulate.

Aversion to answering questions. Apprehensive anxiety, in the evening in bed, and during the night; anxiety after eating, about the future, about his health, about his salvation.

Whenever he wakens it oppresses him, and he becomes hypochondriacal. She takes an antipathy to her husband. She is cruel to her baby and husband. Perverted affections. Broods over his condition. Aversion to company. Complaints come on from bad news.

Confusion of mind morning and evening. Contrary humor. Low form of delirium in typhoid and septic fevers. Delirium tremens. Imaginations. Sees dead people. Sees figures, frightful images. Discontented and sad. Dullness of mind in the morning. Discouraged. He refuses to eat, He is very excitable and greatly wrought up from bad news; then follows palpitation and many nervous symptoms.

Exhaustion after exertion of mind. He dwells much in fancy. Fear in the evening. Fear of a crowd, of death, of disease, of evil, of people, of solitude. He is easily frightened, which increases his many nervous and mental symptoms. Weak memory. Forgetful. Cannot recall words. Homesickness. Effects of grief and prolonged sorrow. A nervous hurry is noticed in action and speech. Nervous excitement has increased until hysterical conduct is present. It is a great remedy for imbecility. She is impatient and impetuous.

Indifference to surroundings, to joy and to her family. Indifference to his business matters, and then comes indolence and lassitude. Insanity; melancholia; thinks she has sinned away her day of grace and refuses to eat. She does not recognize her surroundings. Shrieks and acts like one insane. Quarrels with her family.

The irritability is very marked, in morning on waking, in the evening, after coition, during headache, during menses, when spoken to, on waking at any time, after becoming exhausted from a diarrhoea, There is laughing and crying, lamenting and wringing the hands. There is loathing of life; moaning during sleep.

Dullness of the senses. Weakness of memory for words, and great prostration of mind. Sadness in morning on waking, in the evening, and also day and night. Obstinate; morose; mood changeable. Mistaken in speaking and writing. In many cases cured a mild mental state was noticed.

Over-sensitive in general, and especially to noise. Restlessness during menses. The numerous cases of nervous prostration from mental work, prolonged anxiety, much sorrow, and sexual excesses and vice are likely to require this remedy. Incoherent speech. Starting; easily startled from fright, during sleep, from touch and from noise. Stupefaction and suspicious.

He is indisposed to talk, or to be talked to. Talking in sleep. Vanishing of thought. Becomes timid and bashful. Vexation brings on many complaints. Weeping and weary of life.

Vertigo: afternoon and evening, ameliorated in open air, aggravated after eating, with a tendency to fall forward; aggravated on looking upwards, compelling him to lie down; with nausea and with headache; objects turn in a circle on rising up, when standing, when stooping, on turning the head, when walking in open air.

The head: is cold, and sensitive to cold air. Congestion; fullness of the head felt on coughing. Heat in head evening, flushes of heat in the forehead. The head inclines to fall forward.

Tension of scalp. Heaviness of the head, morning on rising, in forehead and occiput. This has been a useful remedy in hydrocephalus and many brain affections, when associated with putrid diarrhoea. Itching of the scalp morning on waking, in the night in bed, aggravated 3 to 5 A.M.

Movements felt in the head. It has much pain in the head. Pain morning in bed, on rising, on waking, and passes off on moving about. Pain afternoon, evening and night. Worse in very cold air, but ameliorated in open fresh air. She must let the hair hang down. The headache comes with coryza, comes from taking cold.

The pain is worse on coughing, and ameliorated by eating; aggravated from becoming overheated, from disordering the stomach, from excitement, and from physical exertion. Weight in occiput with exhaustion. Must lie down and shun the light, lying on back ameliorates; aggravated from jarring and stepping, aggravated before and during menses.

The headaches from mental work, in students, brain-fag from overwork are cured by this remedy when the symptoms agree. Nervous headache during menses. Paroxysmal headaches. The pains in head are ameliorated by gentle motion; aggravated from noise, riding in a carriage, after sleep, sneezing, stepping, stooping, touch, pressure, walking and writing. Headache comes from eye-strain, and is ameliorated by wrapping up the head. Violent pulsating pains. Pain in forehead before menses, above the eyes extending to occiput; across forehead into both temples.

Pain in occiput lasting all night; frequent waking, with pain on rising; wakens with pain in occiput and loins ameliorated lying on back, passes off after rising. Pain in occiput as if hair were pulled; must let hair hang down. Violent headache in sides of head.

Neuralgia of left mastoid process, aggravated by motion and in open air. Pain in temples. The pains are aching, boring, burning. Burning in forehead during stool. Bursting in forehead. Drawing in forehead, sides of head and vertex. Jerking pain, pressing pain. Forehead as though bored, ameliorated by eating. Pressing outward in forehead, over eyes as if brain would expand. Pressing in occiput, ameliorated by eating. Pressing in temples and vertex. Soreness in occiput. Stitching in the head, forehead, over eyes, in occiput sides of head, right frontal eminence and in temples. Stunning pains.

Tearing pains in the head, in forehead before menses, ameliorated lying and on appearance of the flow. Tearing in occiput, sides of head, temples, and vertex. Perspiration on mental exertion, of the forehead; cold sweat. Pulsation, forehead and temples. The brain is very sensitive to jar, and to sounds. Shocks felt in the head. Softening of the brain. Complaints come on from uncovering the head.

Eyes: Anemia of the optic nerve. Lids agglutinated in the morning and a discharge of mucus, aggravated in the evening. Dryness and dullness of the eyes. Falling of the lids. Inflammation of the conjunctiva, injected blood-vessels and lachrymation. Paralysis of the optic nerve. Photophobia. Redness of the eyes. Staring, restless, excited look. Strabismus following brain diseases.

Sunken eyes. Swollen oedematous lids. Twitching of eyes and lids. Weak eyes. Pain in eyes on motion of eyes, on reading, on waking; aggravated in sunlight. Aching. Smarting of eyes and margins of lids. Drawing, pressing. The balls are sore to touch. Sharp pains from eyes to temples in the morning. Stitching. Sticks. Sensation of sand. Tearing pains. Mouth: The tongue is dark coated and bleeding.

The gums bleed, and are covered with sores. The typhoid mouth, tongue and teeth in septic fevers when there are putrid odors. Redness of gums and edges of the tongue. The tongue is white, slimy, greenish yellow. Dry mouth and tongue in the morning. Inflamed mouth and gums.

Offensive odor, putrid morning, like spoiled cheese. Sore burning mouth and tongue. Receding gums. Thick salty saliva. Scorbutic, spongy gums. The roof of the mouth swollen in ridges, feels as if lined with grease.

Taste bad, bitter, insipid, putrid, sour; bitter in the morning. Grinding teeth in sleep. Nervous chattering of teeth. Pain in teeth from taking cold, aggravated by cold things, aggravated masticating, aggravated after sleep. Pulsating, aching, jerking, pressing, sore, stitching, tearing.

Throat: This remedy has been used with some success in diphtheria with putrid odor.

Dryness in throat in evening. Fullness and constriction of the throat. Inclination to clear the throat by hawking. Mucus in the throat in the morning, sometimes tasting salty. Lump in throat. Pain in throat on swallowing. Pain in right tonsil. Burning, rawness, soreness. Stitching on swallowing. Stitching pain from left tonsil to ear, while driving in forenoon. Inflammation and swelling of throat and tonsils, with white deposits like membrane.

Stomach: The appetite is increased and sometimes ravenous, but goes on the sight of food.

Hunger soon after eating, from nervous weakness. Hunger during menses. Aversion to food, to bread, to meat. Sensation of coldness in the stomach. Desires cold drinks, sour things, sweets. The stomach is commonly disordered. Fullness and distension. Emptiness with nausea, during menses, after eating. Eructations, after eating, ineffectual, of bile, bitter, empty, of food, sour; waterbrash. Heartburn. Weight in stomach after eating.

Loathing of food. Nausea on coughing, after eating, during headache, during menses, during pregnancy; ameliorated by eructations. Retching. Pain in stomach after eating and during menses. Burning, cramping, cutting, soreness. Stitching. Gnawing pain at 5 A.M. on waking. Pressing after eating. Sensation of a stone in the stomach. Extreme thirst for cold water. Thirst during heat. Thirstlessness sometimes. Vomiting in the morning, on coughing, after eating, during headaches, during menses, during pregnancy. Vomiting bile, blood, food, mucus, sour.

Abdomen: The abdomen feels cold, and is sensitive to uncovering.

Distension after eating, during menses. Tympanitic with great pain, in typhoid fever. Distended with dropsy. Sensation of emptiness. Fermentation with distress in heart. Flatulence, obstructed, noisy. Sensation of fullness after eating. Heat in abdomen and heaviness. Inflammation of intestines, peritoneum, and liver. Pain in abdomen aggravated at night; across the abdomen left to right; bending double ameliorates; during cough, during diarrhoea, after eating, before and during menses; paroxysmal; before stool.

Pain in region of liver. Bearing down, ameliorated sitting, aggravated lying on left side, aggravated after drinking. Seems as though sides of abdomen would burst when sneezing. Burning. Cramping after eating. Cutting. Griping in hypogastrium with ineffectual urging to stool. Soreness in abdomen and liver. Stitching in abdomen and liver. Stitching, catching in spleen, aggravated from motion. Rumbling and tension.

Anus: Constipation with very difficult stool; hard, large, knotty. Diarrhoea, morning, 6 A.M., evening, night, during or after eating; colliquative; from fright or excitement, during menses, painless, with vomit ing and cramps, with great exhaustion, in typhoid. Dysentery. Offensive flatus which ameliorates the symptoms. Formication of the anus. Haemorrhage from intestines in typhoid.

Haemorrhoids, external and internal, itching, painful with burning and swelling. Inflamed piles with offensive moisture. Inactivity of the rectum. Involuntary stools. Pain in rectum during and after stool. Burning during and after stool. Soreness and pressing pains. Stitching pain. Tenesmus after stool. Paralysis of the rectum. Relaxed anus. Ineffectual urging to stool. The stool is excoriating; bloody mucus or pure blood, brown, clay colored, watery stool; putrid flatus followed by tenesmus after breakfast. Stool copious, dark, frequent; large, light colored. Lienteric stools. Stools offensive, putrid, purulent, watery, like rice water, yellow or yellowish green mucus.

Bladder: Chronic catarrh of the bladder in old people and nervous wrecks.

Pressing and stitching in the bladder. The urging to urinate is frequent, or ineffectual, and worse at night. The urine dribbles. Dribbling after urination; feeble stream, frequent, copious at night, Stream stops and starts. Involuntary at night, in old people, in typhoid, in nervous prostration.

In obstinate cases of enuresis, in excitable, sensitive children. Unsatisfactory urination. Inflammation and stitching in the kidneys. Burning in the urethra during and after urination. Stitching in the urethra. The urine is albuminous, burning, cloudy, copious, offensive, scanty, watery, yellow like saffron. Sediment is flocculent, mucous, red and sandy. Specific gravity increased. Sugar in the urine.

Genitals: Erections very troublesome in the morning and during the night without sexual desire; violent in the morning. Impotency. Frequent seminal emissions with erections. Inflammation of glans penis. Sexual passion obliterated.

In tired out nervous women who are subject to abortion. Aversion to coition. Desire increased, intense for four or five days after menses. Inflammation of uterus. Itching from leucorrhoea. It cured a chronic abscess discharging periodically through the vagina and rectum a copious orange-colored fluid. Leucorrhoea acrid, burning, copious, greenish, yellow, offensive, putrid; after menses; in young girl.

Menses absent, black, copious, dark, delayed, frequent, irregular, late, offensive, painful, pale, protracted, scanty, short, suppressed, thick. Uterine haemorrhage. Pain in ovaries, in left, ameliorated lying on the back and bending double, during menses. Pain in ovaries on going to sleep. Stitching pain in ovaries. Pain in uterus and ovaries at night during pregnancy. Labor-like pains. Prolapsus of uterus.

Respiration: Irritation of the larynx and trachea in cold air. Catarrh of the air passages, with thick, yellowish white mucus. Soreness and scraping in the larynx. Tickling in larynx and trachea. Voice hoarse, lost from paralysis of the vocal cords; hoarse from over-exertion of vocal cords.

Respiration difficult at night; rattling, short; difficult on going up stairs. Nervous asthma, aggravated after eating.

Cough in daytime, morning, evening in bed and during the night.

Dry cough at night during fever. Hacking cough. Cough from, irritation in larynx and trachea. Loose cough. Paroxysmal cough. Racking cough. Rattling cough. Short, spasmodic. Cough in cold air, from deep breathing, during chill and fever, after eating; aggravated lying. Asthmatic cough. Cough from tickling in larynx and trachea. Whistling cough. Whooping-cough with great nervous exhaustion.

Expectoration in morning, bloody, frothy, greenish, mucous, offensive, purulent, putrid, salty, thick sweetish, viscid, yellowish white.

This remedy has been favorably mentioned in angina pectoris. Anxiety in the chest in the morning. Catarrh of the chest. Spasmodic constriction. Constriction of the heart. Fatty degeneration of the heart. Haemorrhage from the lungs. Hepatization of the lungs. Inflammation of the bronchial tubes. lungs, pleura. Oppression of the chest. Itching of the skin. Pain in chest during cough, on inspiration, on motion, on breathing. Pain in lower part of chest on coughing, inside of chest, in heart. Aching in left side of chest through to scapula. Burning in chest. Cutting under right breast. Soreness in chest. Stitching in chest on coughing, during respiration, in mammae, sides of chest, in heart. Tearing pains in chest.

Heart: Palpitation, anxious, ascending steps, aggravated by motion. Violent.

Perspiration like onions in axilla. It is a very useful remedy in catarrhal phthisis. Suffocation of lungs. Swelling in axilla; abscess. Weakness of chest. Weak heart. Pulse intermittent and irregular; feeble circulation.

Back: The back feels cold.

Eruptions on the back, pimples. Weight in lumbar region. The nape and back lame. Itching. Pain in the back during rest, ameliorated by motion, respiration aggravates, during menses. Pains in occiput and loins morning on waking, ameliorated lying on back, passing off after rising. Pain in back of neck. Pain in dorsal region. Pain in scapulae morning on waking, had to sit up to turn over. Pain first in right, then left scapula. Pain between scapulae.

Pain in lumbar region during menses, while sitting, ameliorated by motion. Pain in sacrum during menses. Intense pain along spine. Pain in coccyx. Aching between scapula. Sore, bruised spine. Burning in back, in lumbar region. Drawing in back, lumbar region. Lameness and stiffness of whole back, ameliorated by gentle motion. Stitching pains in the back, in dorsal and lumbar regions,

Stitching toward front of chest with dyspnoea, ameliorated leaning back against chair, aggravated lying on the back, sitting or walking. Tearing pains in the back, in lumbar region.

Softening of the spinal cord. Weakness with stumbling when walking. Swollen glands of neck. Weak back. Cannot sit erect without a chair back to lean against.

This remedy cures many nondescript spinal affections.

Limbs: Cold hands and feet.

Feet cold and damp. Cramps in thighs, calves and soles.

Eruptions on limbs, pimples. The hands are hot. Heaviness of limbs, of lower limbs and feet. It has been of great service in hip joint disease. itching of the limbs, of palms and soles,

Numbness of the limbs, upper and lower; hands and finger tips, feet and legs.

Rheumatic and gouty pains in limbs and joints, ameliorated by motion and warmth. Pain in back and limbs, ameliorated by motion. Pain in shoulders and arms, in arms when raising them.

Sciatica, ameliorated by gentle motion. Pain in hip and knee.

Pain in legs at 5 A.M., on waking, ameliorated by gentle motion.

Bruised knees and legs. Burning feet, soles and toes. Paralytic drawing in limbs, ameliorated by warmth and gentle motion.

Drawing in upper limbs, in the thighs, knees and legs. Drawing laming pain in soles, Pressing pain in shoulder and thighs.

Stinging in soles. Stitching in joints, shoulders and knees.

Tearing in the limbs; shoulders, upper arm, elbow, forearm, hand, fingers. Tearing in lower limbs; hip, knee, legs, feet.

Paralytic tearing in limbs, ameliorated by motion. Paralysis of limbs. Hemisplegia.

The feet perspire. The lower limbs and feet are restless.

Rheumatic stiffness after resting. Oedema of hands and feet.

The hands tremble. The limbs twitch. Weakness in all the limbs, especially the lower.

Sleep: Profound sleep.

Dreams anxious amorous, of falling, frightful, of being naked, nightmare, vivid; night terrors in children (Borax). Restless, nervous and hot in sleep. Sleeps on the back. Sleepiness early in evening, after eating. Sleepless after midnight, after mental exertion, after excitement, after vexation. Sleepless with sleepiness. Waking early, as from fright. Walking in sleep. Very troublesome yawning.

Chill, morning, forenoon, noon, afternoon, evening. Chilliness in the open air, in bed. Could scarcely get warm in bed. Chilliness ascending spine in evening. Cold all day. Chilliness after eating. External and internal chill. Nervous shivering and shuddering. Shaking chill. One-sided coldness.

Fever in afternoon and evening. Heat all night, with hunger. Fever alternating with chill. Fever at night in bed. Typhoid fever, low, putrid type. Dry heat. Flushes of heat. It has been a very useful remedy in hectic fevers when there is putrid sweat and putrid expectoration and great nervousness and excitement. Internal heat. Fever with no sweat. Scarlet fever, skin dusky and throat putrid and dark red. Sweat mornings and nights, when eating and drinking, and on slight exertion, during sleep offensive; profuse night sweats.

Dusky spots on calves. Burning after scratching. The skin is cold, jaundiced, dry. Eruption moist, and the moisture is bad smelling. Herpes. Eruptions, itching, pimples, psoriasis, scabby, urticaria; vesicles, bloody, ichorous. It has cured erysipelas that was almost gangrenous with putrid odor. Inactivity of the skin. Itching, crawling, stinging in the skin. Very sensitive skin. Sticking in skin. Ulcers, burning, offensive, even putrid, with yellow discharges.

ANALYSIS

Potassium Oxide ($K_2O$)

Soluble in Water 48.0% (39.9%K)

Sulphate of Potash

Plant food for better blooms and fruit yields

A ready to use plant food. 1kg

## Kalium Sulphuricum

Two very deep acting remedies unite to form this one. It was left to Schüessler to show its first curative powers.

Dewey's work, on the "Tissue Remedies" gives the best presentation from the biochemic view. The writer gathered the symptoms from reported cures for many years, and found that they were justified by the study of the two remedies entering into the formation.

Generals: Many of these symptoms come out upon the sick as aggravations. Some of these are only cured symptoms. This arrangement could be improved upon much by provings. If the reader will carefully use this remedy as herein directed he will be astonished at its depth of action, and if he uses it high he will be surprised at the length of action of every dose.

It has cured epilepsy, lupus and epithelioma, and many desquamating skin affections. It has cured most obstinate case of chronic intermittent fever. It is useful in catarrhal affections with thick yellow or greenish pus, viscid or thin yellow watery discharges.

Most symptoms are aggravated in the evening. The patient craves fresh and even cold air, and he is ameliorated in open air and cool air. Aggravation by exertion and becoming heated. Complaints come on during rest, and are ameliorated by motion. Complaints aggravated in warm room. Takes cold from being overheated.

When once heated he cannot cool off without taking cold. Predisposition to phthisis. It is frequently indicated after Tuberculinum. Epileptiform convulsions. Jerking of the limbs and twitching of muscles. Dropsical condition of the extremities. Loss of flesh, and complaints aggravated after eating. Fasting ameliorates many symptoms. Flabby muscles. Fatty degeneration of glands, liver and heart. Heaviness of limbs and weariness of the body.

Hysterical symptoms. Sluggishness of the body and lack of physical irritability. Well selected remedies fall short in action. Wants to lie down, but lying in bed aggravates; he must walk about to ameliorate his sufferings. Surging of blood in the body.

Pain: in the limbs, bones and glands.

Wandering pains. Pains ameliorated by motion, ameliorated walking, ameliorated in open air; aggravated in a warm room, aggravated sitting or lying, or rest in any form.

The pain are burning, cutting, jerking, stitching and tearing, ulcerative pains. Tearing downward in the limbs. Tearing in glands and muscles. pulsation all over the body. Touch aggravates many symptoms. Many symptoms appear on waking.

Trembling and quivering. Walking ameliorates. Warm coverings aggravate, warm room aggravate, warm bed aggravates, warm wraps aggravate; bathing aggravates. Complaints dating back to suppressed eruptions. Post scarlatinal nephritis. One does not need to reflect to perceive this is Pulsatilla somewhat intensified. It takes up the work and finishes as a complement of Pulsatilla, unless, as in some instances, the patient becomes a cold and chilly subject and is better during rest, and then Silicea often will be found to have what symptoms remain.

It is usual for a patient under a deep acting remedy to go to opposite modalities, and hence Puls. is so often followed by Silicea; but this is not always true. When Puls. has acted well for a time and because of opposite modalities Silicea does good work for a while, and then the patient swings back to the original state, symptoms and modalities, then it is that Kali sulph. is of great usefulness.

What occurs is the same as when Sulph., Calc. and Lyc, have rotated in a given case too deep to be cured by a single remedy and a series of remedies has been what was required because the symptoms changed in such a manner that such a series was homeopathically suited.

Mind: Quite unlike Pulsatilla, this patient is easily angered and obstinate and very irritable.

Seems to be thinking of something far away. Anxiety in evening in bed, during the night and on waking. Aversion to work, to business and to company (like Puls.)

Concentration of mind difficult, and want of self-confidence. Confusion in the evening and in the morning, in a warm room, ameliorated in open air. Dullness of mind, discouraged and discontented with everything.

Extremely excitable, and mental exertion aggravates. Fear at night of death, of falling, and of people. Frightened at trifles, and forgets what he was going to do and to say. he is always in a hurry as if excited. Impatient and impetuous.

Hysterical and excited in the evening, and mind active. Cannot make up his mind to do and am Very irritable in the morning on waking, in the evening and during menses. Misplaces words in writing. Alternating moods. Changeable disposition. Restlessness during menses. Low spirited morning and evening. Oversensitive to noise. Mental symptoms from sexual excesses. Walking in sleep. Shrieking. Easily startled, from fright, on falling asleep, and during sleep. Indisposed to talk. He talks in sleep. General timidity. Weeping.

Head: The vertigo is a prominent feature in the evening, in a warm room, aggravated after eating, aggravated during headache; aggravated looking upwards; with nausea; must, lie down; objects, turn in a circle; aggravated sitting, aggravated rising up, and standing; ameliorated in open air. Feels he is falling forward. He staggers. Boiling sensation in the head, and coldness of vertex. Hyperemia in bed, on coughing, and in a warm room. Constriction like a band or close fitting-cap.

Constriction of forehead. Much dandruff. Eruptions on scalp, crusts, eczema moist, sticky, pimples, scaling. Fullness in head and hair falls out. Heat in head in a warm room. Heat in forehead. Flushes of heat. Heaviness of head, morning, in forehead, in occiput. Itching of the scalp in the morning.

The brain feels loose. Sensation of movements in head on moving the head. There are numerous headaches. Pain, morning on waking, evening and night, aggravated from a draft, during chill, taking cold, during coryza, on coughing, after eating, when heated, from warm room, jarring, during menses, motion of the head, pressure.

It is ameliorated evening, in open air, in cold air, lying. Rheumatic headache in evening aggravated in warm room, aggravated moving head from side to side or backwards. Catarrhal headaches. Gastric headaches.

The aggravation of headaches by motion is an exception, and it will be interesting to learn what further provings and observations bring forth.

The pains are pulsating, aggravated shaking head, after sleep, sneezing, standing, stepping heavily, stooping, straining the eyes aggravated in a warm room. The pains are violent. Walking in open air ameliorates. Pain extends to eyes and forehead. Pain in forehead, morning, evening; aggravated after eating. Pain over eyes. Pain in occiput, sides of head, temples.

The pains are boring, burning, bursting drawing, jerking, pressing, Stitching in head and Sides of head.

Stunning. Tearing. Pulsating in occiput, sides of head, temples, vertex. Shocks in head, in sides of head, mostly in right side.

Eyes: The eye symptoms are numerous.

Lids agglutinated. Dryness. Discharge, yellowish, greenish. Inflammation of conjunctiva, of lids. Dark veins. Eruptions about the eyes and on the lids.

Lachrymation and itching. Opacity of the cornea. It is recommended for cataract. Pain, burning, pressing and tearing. Photophobia, redness of eyes and edges of lids. Spots on the cornea; ulceration of the cornea. Swollen lids. Dark colors, variegated colors, yellow. Halo around the light. Black floating specks.

Dazzling. Dim vision. Exertion of vision brings on many complaints. Foggy vision. Sparks before the eyes. Weak vision.

Ear: Catarrh of Eustachian tubes and middle ear.

Dryness of the middle ear. Discharge from ear, yellow, thin, bright yellow or greenish, bloody, offensive, purulent.

Eruptions, eczema, excoriated, pimples. Eruptions behind ears. Itching in ears.

Noises; buzzing, chirping, cracking, crackling, humming, ringing, roaring, rushing, whizzing. Flapping sensation in the ear.

Pain in ear, evening, aching, boring, cutting, pressing, stitching, tearing. It has cured polypus. The cars feel stopped, and pulsate. The bearing is impaired.

Nose: Fluent coryza.

Catarrh with discharge, bloody, burning, excoriating, greenish, offensive, purulent, thin, yellow, slimy, or thick and viscid. Dryness in the nose. Bleeding in morning on blowing. Itching in nose. Obstruction. Pain, burning. Soreness in nose, of septum. Smell acute, later lost. Sneezing. Swollen nose.

Face: Sickly, yellow, chlorotic face.

Cracked lips. Sometimes pale. Sometimes circumscribed redness. Drawn face. Suffering, sickly expression. Eruptions on face, lips and nose. Herpes, pimples and scales. Desquamating face.

Flushes of heat. Itching. Inflammation of the submaxillary gland with swelling. Prosopalgia, aggravated when the room becomes too warm, and in the evening; ameliorated in the open air.

The pains are drawing, stitching and tearing. Perspiration of the face. Swollen glands of jaw, swollen lips. Twitching face. It has cured a wart on the lip, and will cure epithelioma when the symptoms agree.

Aphthae in mouth. Dryness of mouth and bleeding gums. Mucus in mouth and on the tongue. Sore burning tongue. Salivation. Taste insipid, putrid, sour, sweetish, wanting.

Coated yellow slimy tongue, mostly at the base. Toothache aggravated in a warm room, ameliorated in cool fresh air.

Throat: Dryness and constriction of throat.

Frequent hawking of mucus. Heat and inflammation of throat. Sensation of a lump in the throat. Mucus in the throat in the morning. Painful sore throat. Pain on swallowing. Rawness, burning and sticking.

The tonsils much swollen. Swallowing difficult.

Stomach: Great anxiety and distress in the stomach.

Appetite is increased, ravenous, or wanting. Aversion to bread, to eggs, to food, to meat, to hot drinks and warm food. Coldness in stomach. Catarrh of stomach. Desires sour thing, sweets, cold drinks and cold food.

Distension of stomach. Irritable, easily disordered stomach. Sensation of emptiness and faintness in stomach. Eructations, after eating, bitter, empty, of food, sour, waterbrash. Eructations ameliorate.

Gastro-duodenal catarrh with jaundice. Fullness after eating ever so little (Lyc.). Heartburn, heaviness and flushes of heat. Hiccoughing. Loathing, of food. Nausea during chill, during cough, after cold drinks, after eating, with headache, on motion.

Pain in stomach after eating and drinking. Burning, cramping, cutting, pinching, pressing, soreness, stitching. Pulsating in stomach. Retching when coughing.

Burning thirst. Vomiting on coughing, after eating, during headache, during menses. Vomiting bile, food, mucus, sour.

Abdomen: Coldness in the abdomen.

Distension after eating. Dropsy. Enlarged liver. Obstructed flatulence. Sensation of fullness after eating, Sensation of emptiness in lower abdomen after stool ameliorated by displacing flatus. Heat and heaviness.

Complaints of the liver. Itching of the skin. Pain in abdomen at night. Cramping during diarrhoea, after eating, before the menses, during menses, aggravated by motion. Pain in inguinal region and in the liver. Burning, cutting, pressing.

Pressing in hypogastrium and liver. Soreness in abdomen and in the liver. Stitching in the abdomen, in the sides of the abdomen, in the inguinal region, in the liver. Pulsating. Rumbling before stool. Trembling in abdomen. Tympanitis.

Constipation that is very obstinate, alternating with diarrhoea. Stool, difficult, soft or hard, insufficient, during menses, from inactivity of the rectum.

Diarrhoea in the morning, evening, night, after midnight, painless, or with cramps, during menses. Chronic diarrhoea. Offensive, putrid flatus which ameliorates many abdominal symptoms.

Hemorrhage from the anus. Hemorrhoids, external, internal, large and bleeding. Involuntary stool. Violent itching of the anus. Pain in the rectum and anus, during stool after stool; burning during diarrhoea, during stool, after stool. Cutting, pressing, smarting and great soreness. Parts excoriated. Stitching in anus. Tenesmus after stool. Urging to stool, ineffectual, absent in constipation.

Stool is excoriating, black, thin and offensive. Stool bloody, frequent, offensive, purulent, watery, yellow slime. When constipated the stool is dry, hard, knotty, large, like sheep dung, small. The stool is light colored and bileless.

Bladder: Chronic catarrh of bladder.

The pain is pressing, sticking. It has urging to urinate aggravated at night, constant or frequent, ineffectual.

Urination is painful, frequent at night, dribbling when walking. Inflammation of the kidneys with stitching pains.

Gonorrhoea in the advanced stage, with green or yellow thin or viscid discharge. Haemorrhage from the urethra. Burning during urination, and in the meatus. Cutting.

The urine is albuminous, and this remedy has been especially useful in albuminuria following scarlet fever. The urine burns and is cloudy, high colored, copious, or scanty, offensive, with red and purulent sediment, copious, viscid mucus in the urine.

Genitals: Impotency.

Induration of testes. Inflammation of glans penis. Orchitis after suppressed gonorrhoea (Puls.). Itching of genitalia and scrotum. Drawing in testes. Sexual desire diminished or entirely lost. Swollen testes.

It builds up women who have been subject to abortion. Aversion to coition. Excoriation of the genitalia, with itching.

Leucorrhea, burning, excoriating, greenish, yellow, purulent, thick or watery. Menses absent; bright red, copious, too soon, or too late, offensive, painful, protracted, scanty, suppressed.

Haemorrhage from the uterus, Pain in uterus, during menses. Bearing down in the pelvis, Burning in the genitalia. Labor like pains during menses. Prolapsus of the uterus.

Chest: Catarrh of the air passages with thick greenish, yellow or white mucus.

Dryness in the larynx. Rawness in the larynx. Soreness and roughness. Almost constant scraping in the larynx, aggravated after eating, at night in bed, until midnight; almost driven to distraction by the necessity to clear the larynx and gets up only white thick mucus.

Tickling in the larynx. Hoarseness. Recurrent coryza with irritation in larynx. Voice lost. Every cold settles in the larynx.

Asthma aggravated in a warm room, ameliorated in open air. Dyspnoea evening, night, with cough, when lying, walking, ameliorated in open air. Rattling Breathing.

Short, suffocative breathing in a warm room. Wheezing in a warm room. Whistling.

Coughing in morning, evening, in bed, night; ameliorated in cold air, ameliorated in open air, ameliorated by cold drinks. Cough with coryza; aggravated lying. Dry, hoarse, croupy cough at night. Cough aggravated after eating, during fever. Exhausting cough. Hacking tough. Loose cough. Paroxysmal, racking cough. Rattling cough. Suffocating cough. Tickling in larynx, trachea and deep in chest.

Warm room aggravates cough. Whooping cough with yellow, slime or yellow watery expectoration. Expectoration bloody, difficult, must be swallowed, or slips back, purulent, yellow or greenish, slimy, watery, viscid.

Anxiety in the chest, It is one of the most surprising remedies in catarrh of the chest.

Rattling in chest from every cold change in the, Weather. Constriction of the chest. The last part of pneumonia and pleurisy will bring out symptoms for this remedy. Itching of the skin of the chest. Eruptions, eczema, pustules.

Oppression of chest and haemorrhage. After bronchitis in children, when every cold causes rattling in chest and there is no expectoration. Burning, cutting, stitching, and soreness in chest. Pain in heart. Stitching in the heart. Palpitation with anxiety of heart. Tumultuous palpitation. Perspiration in axillae. Weak chest. This remedy has saved many people from phthisis. It has cured swollen sensitive mammae coming every month before menses.

Back: Coldness in the back.

Pain in the back on breathing, during menses, periodical, aggravated sitting, aggravated standing; ameliorated walking; aggravated in a warm room. Wandering pains.

Pain in cervical region, dorsal region, between the shoulders. Pain in lumbar region during menses while sitting, and walking. Pain in sacrum. Aching, bruised, burning, drawing, stitching. Tension in the cervical region. Weakness in the lumbar region.

Limbs: Arthritic nodosities.

Coldness of upper limbs and hands. Cold Feet evening in bed, and during fever. Cracked hands. Cracking in joints.

Pimples and vesicles on limbs. Desquamation on legs above the shoe tops in a young woman. Heat of hands. Hip joint disease.

Heaviness of lower limbs. Itching of the skin. Jerking of the limbs. Numbness of hands, lower limbs and feet. Pain in the limbs during chill. Rheumatic pains in limbs. Cramps in muscles. Drawing in knees and legs.

Rheumatic pains aggravated in a warm room; ameliorated walking in open air; aggravated sitting; ameliorated moving about. Sore bruised pain in tibia. Stitching in the joints, in lower limbs, knees, legs; wandering, stitching.

Tearing pains during chill, in joints, upper limbs, lower limbs, thighs, legs. Wandering tearing pains, ameliorated by motion, and walking in open air.

Perspiration of palms, of feet. Cold sweat of feet. Restless legs. Stiffness of joints. Swelling of knees, legs, feet. Trembling of limbs, hands and feet. Twitching thighs. Ulcers on legs. Weakness of joints, upper limbs, of knees.

Sleep: The sleep is full of dreams. He has nightmare. Dreams anxious, of death, of being in an accident and nearly killed, of robbers, of sickness, frightful, of ghosts.

Late falling asleep. Restless sleep. Sleepiness in afternoon and evening, and after eating. Sleepless before midnight. Waking early, and frequently.

Chill evening and night. Chilliness in the evening. Chilliness after exertion. Coldness of the skin. Quotidian chill. Shaking chill; evenings, 5 P.M., 6 P.M. Fever without chill, evening until midnight. Fever, dry heat, flushes. Hectic fever. Intermittent., Perspiration in morning, night, after midnight. Perspiration on slight exertion; copious.

Skin: Sensation of burning, in the skin; burning after scratching.

The skin is often cold. Desquamation. Discoloration; liver spots; red spots. Dry skin; inactivity of skin. Dry, burning skin. Epithelioma.

Eruptions, blisters, burning, dry, moist; eczema with yellowish green, watery, discharge, herpetic. Itching and stinging eruptions. Rash like measles. Eruptions painful, pimples, psoriasis, pustules, red eruptions. Scabby eruptions. Scabby after scratching. Scaly eruptions on a moist base. Smarting, suppurating eruptions. Tubercular eruptions. Urticaria, nodular. Vesicular eruptions.

Erysipelas with blisters. Easy excoriation of the skin. Intertrigo. Formication. Itching, burning, crawling. Stinging; aggravated when warm in bed; ameliorated scratching. Moisture of the skin after scratching. Neuritis.

The skin is very sensitive: a sore feeling in the skin. Sticking after scratching. Skin swollen and dropsical. Sensation of tension. Ulcerative pain. Ulcers, bleeding, burning, bloody discharge, stabbing, yellow discharge, indolent, pulsating, suppurating, tuberculous. Painful warts.

| **Re: Kalium Sulphuricum** | By: girilal<br>New Jersey USA | October 17 2006 |
|---|---|---|

Potassium Sulphate is commonly used in fertilizers, providing both potassium and sulfur. So I consider is a combination of Kali + Sulphur and a deep acting remedy.

girilal

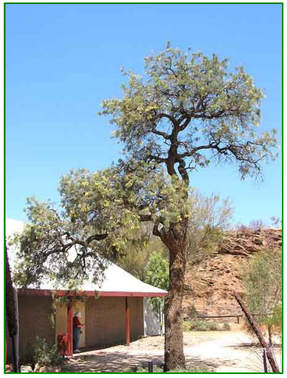
Kalmia Latifolia

Generals: The symptoms that indicate this remedy show themselves especially in the muscles, in the tendons, in the joints, along the course of the nerves, in rheumatic complaints.

Pains: The pains change about, wandering pains, and they axe aggravated from motion. The sharp pains spread from the centres to the extremities, the wandering pains go downwards, down the arms, down the back and down the legs; from the shoulder to the fingers, and from the hips to the toes.

These pains sometimes shoot like lightning, again they tear along the nerves, along the sciatic and crural nerves, down through the calves. In rheumatic constitutions the pains are dull, tearing, crushing and pressing, and are aggravated by motion and go from the lower to the upper limbs. Motion will bring on the pain or aggravate it when it is present. The head pains are very severe. They often begin in the back of the neck or back of the head, and extend to the top of the head. There are also

Duboisia Myoporoides



Picture of this second

facebook join our group +

43,725 Pageviews
Feb 5th - Mar 5th

pains in the front of the head, pains over one or both eyes, tearing neuralgic pains aggravated by heat and motion.

Pains come and go with the sun, that is, they begin in the morning at the rising of the sun and increase till noon, then gradually decline and disappear at sunset. He is incapacitated for mental work when in motion and even when sitting up, but, when lying upon his back perfectly quiet, making no motion, the mind works well and with clearness; with the slightest motion, however, even of the hand, on comes vertigo and confusion of mind.

Moving about disturbs makes him incompetent. The pains are also worse the first half of the night. With these symptoms there is cardiac trouble of rheumatic origin. The condition has increased until organic disease has come, even hypertrophy of the heart and valves.

Heart: This remedy has cured that state. Palpitation very marked when lying on the left side, > when lying on the back, sometimes > when sitting erect, < when bending forward.

These symptoms alone cause this remedy to stand out in relief. It is useful in rheumatic patients where syphilis is at the bottom, syphilitic rheumatism that has taken the course described until finally the heart has become affected and there is thickening of the valves. Shooting pains through the heart, pains in the chest, intermittent pulse, pulse skipping a beat now and then.

Either the arterial or venous system, or the valves of the heart, or both, may be affected. Dyspnoea from any kind of exercise, cardiac dyspnoea. You have in this a remedy for such complaints. It goes to the bottom in old cases of rheumatic syphilis, and has cured many a cardiac complaint that was the result of syphilis.

You will be guided to it especially if the pains wander from place to place, and if they go from above down wards, if they go from the shoulder down toward the fingers, from the hips toward the feet, or down the spine. It is also suitable in old cases of gonorrhoeal rheumatism when the symptoms agree.

The slightest motion, the slightest effort or exertion brings on the vertigo, and this is due to disturbance of the circulation. The heart is so susceptible to any exertion that disturbance of the circulation of the blood in the brain comes on from the slightest motion.

"In a recumbent posture mental faculties and memory perfect, but, on attempting to move, vertigo."

If the patient persists in moving, nausea and vomiting will follow. It has palpitation, shaking the whole frame, audible, vehement palpitation. He cannot lie on his left side.

It is suitable in old, troublesome, recurrent headaches associated with cardiac affections. A headache will come on daily if the sun comes out, but it will not come on if the day is clouded. He is aggravated from the light of the sun and the increasing brightness of the sun's rays.

In addition to these there are paroxysms of pain that are nightly. These are the bone pains, pains in the shin bones as if the periosteum would be torn off; these pains come on at night, or the first half of the night. It is well known in syphilis that the < is at night. It is an antipsoric, antisycotic and antisyphilitic, it can be selected when the symptoms agree with any of the three miasms. Pains in the pericranium, pains in the bones nearest to the surface. In bed at night the pains become very severe and last all night.

This night aggravation, is especially true of the marked antisyphilitic medicines. It is found under Hepar and Mercurius; but in none of the remedies do we find it so strikingly manifested as in the disease, or miasm, syphilis itself.

In syphilis the < comes with the setting of the sun. It is one of man’s enemies that does its work in the night. Many of the complaints of sycosis conform to the day hours, and the pains are < from the rising. to the going down of the sun.

Medicines also have such I queer whims. We must study remedies as we would human character. Some of them seem to be extremely whimsical, and it is by knewing these whimsical, strange and peculiar things that we are able to mark the character of the remedy, When we know these peculiari ties we have found the circumstance under which the remedy Works

Kidneys: There are kidney affections.

All the organs are related. to each other but especially the heart and kidneys. When the kidneys are not working well, the heart is very often troublesome. All through the varying forms of Bright’s disease the heart is troublesome.

Difficulties of breathing, difficult heart action, with albuminuria. It will relieve the breathing. Again, associated with kidney affections, we have many eye complaints, difficulties of vision, and these also especially call for this remedy. It is often indicated in Bright's disease, with disturbance of vision, occurring during pregnancy.

Pains: For the pains in the eyes, the stitching, tearing pains that occur during kidney disturbance in pregnancy, or during albuminuria, Kalmia becomes a remedy,

This remedy is useful in neuralgia; neuralgia of the eye, neuralgia of the face, violent, tearing pains in the face. Sometimes it takes the form of a nightly < and sometimes it takes the form of daily <. The aggravation in the daytime comes and goes with the sun. The < at night time comes with the lying down.

"Anxious expression of countenance" associated with rheumatism of the heart.

"Flushing of the face, with vertigo."

After the disappearance of a herpetic eruption, violent neuralgic pains, shooting, tearing pains in those nerves that supply the part where the eruption was. When shingles, ring-worm, cold sore, or isolated vesicular eruptions disappear, suddenly from some violent cause or inappropriate treatment, or from catching cold, violent neuralgias come in their place and continue until the eruption comes out again.

This remedy becomes suitable if the symptoms agree; that is, if the whole patient is in agreement with the state of the remedy.

The pains are stitching and tearing, very severe, sometimes cutting and shooting when this remedy is mw useful. The pain will seem to take hold of a nerve and will hold on to it for many minutes, Coming with violence, coming suddenly and letting loose suddenly. Pains come in the extremities in the same way, taking hold as if the nerve were being pinched by nippers, or as if it were being torn to pieces.

"There, now it is gone!" says the patient.

Pretty soon, again, you will see his face in a state of horrible distress. The pain is there again and he cannot move a muscle, and "there, it is gone!" he says, and it remains away for some minutes and sometimes for hours.

Heart: The heart has many symptoms which should be studied.

"Fluttering of the heart, palpitation of the heart."

"Palpitation up into the throat, after going to bed, trembling all over."

Very slow pulse. I remember a patient, an old syphilitic, who was told if he ever made a violent move he would die, the valves of his heart were so badly affected. He had all the murmurs that it seemed possible from the heart valves.

He had traveled all over and had taken large doses of Mercury, and his syphilitic condition had to a great extent been suppressed, until finally the whole trouble had located in the heart. Kalmia removed all the dyspnea and palpitation in a few months, and it was nearly two years before there was a marked return of the symptoms and a repetition put him in a state of health, so that be needed no more medicine.

This shows what a deep-acting remedy Kalmia is, how long it may act, what wonderful changes it may effect. A remedy must be capable of going deep into the life to do such things.

"Wandering rheumatic pains in the region of the heart."

"When articular rheumatism has been treated externally and cardiac symptoms ensue."

Rheumatism that goes from the lower to the upper limbs. Not uncommonly you will meet such things. These "rubbers" that go around the streets with a strong liniment and considerable magnetism frequently do cause a rheumatism to leave the knee joint, and when it does that, the heart is likely to be the organ that suffers.

Then Kalmia, Aurum, Bryonia, Rhus tox., Ledum, Calc. and Abrotanum, and sometimes Cactus, are remedies that prove suitable for such cardiac affections. Rheumatic affections that are driven away in this manner are changed without being cured. The people cannot realize the danger, of merely removing symptoms. Every removal that is not in accordance with cure affects the centres of man, that is the heart and brain.

Rubbing is a dangerous thing. When you are importuned with the question,

"Doctor, will it hurt me to have this rubbed?" you reply, "If rubbing does not affect any change in the symptoms, it will do no harm."

In proportion as it mitigates the symptoms or relieves, just in that proportion it does the patient harm, for the whole vital economy is weakened. There are instances where rubbing is of benefit, but not in rheumatism.

In paralyzed muscles it is a beneficial exercise, for then rubbing can take the place of exercise of the patient himself, of the muscles. But rubbing is not admissible if it is used to reduce pain. The more agreeable it is, the worse, it is for the patient.

In a Phosphorus patient you would be astonished what wonderful relief they can get from rubbing. There is no person more inclined to be weak in the vitality, in the internal economy, than the Phosphorus patient. He is an excitable, weakly patient, and feels better by rubbing and craves it, but if he has rheumatism in the knees and the knee is rubbed the rheumatism may go to the heart, The Phos. patient loves to be rubbed, because rubbing relieves the symptoms; he loves to be magnetized.

"Weariness of all the limbs; shuns all exertion."

"Weakness the only general symptom with neuralgia."

This weakness is a state that you can glean something from. When severe pain is fatiguing the economy the heart is threatened. A general weakness, prolonged weakness after confinement, or from the pain, as we find in Hepar, but with the weakness, these pains are threatening to leave their parts and go to the heart. He is perfectly exhausted and continuously tired.

The text speaks only of Aconite and Belladonna as the antidotes. Spigelia follows this remedy very well and antidotes it. Benzoic acid is a natural complement to it. Calc., Lith. carb., Lyc., Nat. mur., and Puls. are the remedies that are closely related and should be compared.

KAOLINUM
Bolus alba (China Clay) Alumina Silicate
(KAOLIN)

A remedy for croup and bronchitis.

Nose.--Itching and burning. Discharge yellow. Sore, scabby, stopped up.

Respiratory.--Soreness of chest along trachea; cannot stand percussion. Gray sputa. Capillary bronchitis. Larynx and chest sore. Membranous croup-extends down trachea.

Dose.--Lower triturations.

Karela - BITTER MELON
(Momordica charantia)

CLINICAL SUMMARY
Derived from the fruit and seed of the tree. Bitter melon has been used to treat diabetes, cancer, viral infections, and immune disorders. Data suggest that a significant hypoglycemic effect occurs in both healthy and diabetic patients. However, bitter melon should not be used in place of mainstream therapies. In vitro and animal studies indicate antiviral activity against HIV and herpes, cytotoxic effects against leukemic cells, and cytostatic effects in breast cancer, but related human studies have not been conducted. Children and pregnant women should not use bitter melon because of its potential toxicity. Reported adverse effects include hypoglycemia and hepatotoxicity. There is a potential for

additive effect when bitter melon is combined with insulin or oral hypoglycemic agents. A clinical trial demonstrated no effect on natural killer cell activity in cervical cancer patients

SCIENTIFIC NAME

Momordica charantia

ALSO KNOWN AS

Bitter gourd, bitter apple, wild cucumber, bitter cucumber, balsam apple, balsam pear, margose, la-kwa, leprosy gourd, karela

PURPORTED USES

- Cancer prevention
- Diabetes
- Fever
- HIV and AIDS
- Infections
- Menstrual disorder

CONSTITUENTS

- Fruit
- Glycosides: momordin, charantin
- Alkaloids: momordicin
- Others: polypeptide-P
- Oils (seed only): stearic, linoleic, oleic acids
- Glycoproteins: alpha-momorcharin, beta-momorcharin, lectins
- Others: vicine (pyrimidine nucleoside), protein MAP30 (1)

MECHANISM OF ACTION

Vicine, charantin, and polypeptide-P in both animals and humans increase glucose uptake and glycogen synthesis in the liver, muscle, and adipose tissue, and improve glucose tolerance. Studies with hepatic enzymes in mice revealed reduction in glucose-6-phosphatase and fructose-1,6-bisphosphatase activity, and increased glucose oxidation by G6PDH pathway. Bitter melon displays cytotoxic activity against leukemic cells in vitro (guanylate cyclase inhibitor). The MAP30 extract has a cytostatic effect on MDA-MB-231 human breast cancer cells xenografted into mice. MAP30 also demonstrates dose-dependent inhibition of HIV-1 integrase leading to poor viral DNA integration, thus inhibiting T lymphocyte and monocytes.

WARNINGS

Red arils (covering on seed) are reportedly toxic in children, causing vomiting, diarrhea, and death.
ADVERSE REACTIONS
Reported: Hypoglycemia, hepatotoxicity (animal studies)
Toxicity: Ingestion of vicine (seed) may cause favism characterized by headache, fever, abdominal pain, and coma.

A prospective evaluation of 18 newly diagnosed adult diabetics comparing blood glucose level with and without bitter melon administration 30 minutes prior to an oral glucose tolerance test (GTT). Patients had not started any hypoglycemic therapy (e.g. insulin or sulfonylureas). A statistically significant reduction in blood sugar after administration of bitter melon, approximately 20-30%, was demonstrated. Larger randomized trials are necessary to establish long-term effects.

Note:In India people make a curry like preparation to eat with rice or Indian bread – paratha. The vegetable is quite bitter but by mixing ground mustard seeds this becomes quite tasty. The preparation may be dry or with gravy. People usually smear with salt and after some time drain off the water accumulated alongwith the bitterness.

Kreosotum

Characteristics: There are three things that stand out most prominently in Kreosotum, and when they appear together the symptoms in minor degree will be likely to be associated.

These three characteristics are:

1. Excoriating discharges;
2. Pulsations all over the body, and
3. Profuse bleeding from small wounds.

When these three things arc associated in a high degree Kreosote should be examined. A prick of a pin will cause the oozing of bright red- blood, and mucous membranes bleed easily. Any pressure upon the mucous membranes will cause oozing.

Bleeding here and there about the body. The lachrymation is excoriating. It excoriates the margins of the lids and checks, and they become red and raw, and smart. If there is a purulent discharge it is acrid. The corners of the lips and mouth are red and raw, and' the saliva burns and smarts. The moisture about the mouth, whatever it may be, excoriates and the mouth is raw. The eyes smart and burn as if raw.

The leucorrhoea causes smarting and burning about the vulva, so that the mucous surfaces of the labia are red and raw, sometimes inflamed, but always burning. The vagina burns during coition, and there is bleeding after coition; granulations of the vagina and os uteri, so that the pressure of the act of coition brings on bleeding and burning, smarting and excoriation. And the male organ will smart and burn after coming in contact with the secretion of the vagina during coition.

The urine burns and smarts. This tendency to excoriation from the excretions and secretions applies to all the tissues of the body.

Every emotion and exciting circumstance is attended with throbbing all over the body, pulsations to the ends of the fingers. Every emotion is attended with tearfulness, Music that will in the slightest way excite the emotion, minor strains and music that strikes home to the heart, pathetic music, will bring out tears that are acrid, and palpitation and pulsations that are felt to the extremities.

When the Kreosote sore throat is present the least pressure of the tongue depressor will establish oozing, little drops of blood will appear. During the coryza there is nosebleed. When the eyes are red and raw and inflamed, they will bleed easily. If an individual pricks the finger the blood will not merely be a single drop, but a good many will flow. Prolonged haemorrhage from the passages; hemorrhage from the kidneys, from the eyes, the nose, the uterus. Haemorrhage after coition. Tumors bleed easily.

These are the most marked features of Kreosote. If these are fixed in your mind, we have what may be known, as a Kreosote constitution out of which may come all the rest of the symptoms in all their minutiae, and little symptoms and fragments in every organ. You have in this one group the strong features of Kreosote. No matter how many particulars you may have in a case, if you do not have something of these general features you need not expect to find your patient constitutionally cured or relieved by Kreosote. These may be considered essentials.

Mentally the patient is so irritable that there is nothing that will suit him. The wants are so numerous that nothing satisfies. The patient wants everything and is satisfied with nothing, that is, he wants something and when he has it he does not want it. That is the state of irritability and lack of satisfaction in a chronic condition.

You see the child in the mother's arms. It wants a toy, and when given it throws it in the face of somebody; it wants this and that and is never satisfied, always wanting something new, a new toy which it throws away the moment it gets it and then calls for something else.

The lips are red and bleeding, the corners of the month are raw, the eyelids red and the skin excoriated. If it has, in connection with all this, loose passages from the bowels and you examine the fissure between the nates, you will find it is red and raw. If the child be old enough to make such motions he will put the hands upon the sore genitals and fissures and cry out in a most irritable way, because of the smarting.

Such is the Kreosote baby. It may be suffering from cholera infantum; it may be subject to wetting the bed; it may have spells of vomiting, in which it vomits all its food; it is a Kreosote baby.

Kreosote has attacks of diarrhoea and vomiting; all sorts of disturbances of the urine; great distension and trouble with the bowels; abdomen distended from flatus. You look over the whole case at once as a Kreosote case, because of these general features that can be summed up in the aspect of the child.

The Kreosote face has a yellowish pallor; it is a sickly countenance, semi-cachectic, intermingled with blotches that are reddish looking, as if erysipelas were going to set in. In olden times this countenance was called a scorbutic countenance.

Take a woman with this kind of countenance; at every menstrual flow she complains of much swelling and rawness of the genitals; the flow is copious, clotted, stops and then starts again, comes too soon and lasts too long; at times it is black, very foetid, produces rawness upon the thighs and the genitals, with much swelling; at every menstrual period there is rawness of the lips and fissures in the corners of the mouth; the tears become acrid; at the menstrual period all the fluids of the body seem to be acid and they burn wherever they touch.

Very often there is a loose stool, which is also acrid and smarts the anus at the menstrual period. All the symptoms are worse at the menstrual period, sometimes in the early part, sometimes at the middle, sometimes all through, and sometimes at the close. Something more about the scorbutic constitution is brought out in relation to the gums; the gums become puffed and red and tumid and settle away from the teeth.

They become spongy and bleed easily. In the mouth there is much ulceration and little ulcers spread from aphthous patches, smarting and burning; the tongue has ulcers upon it, which bleed easily upon touch.

At the close of a typhoid fever haemorrhage from the bowels, bleeding from the mucous membranes. The mouth becomes raw, and wherever there is a mucous membrane there is a rawness, and the fluids that ooze continue to, eat and cause ulceration. If at the close of a typhoid fever, when the time comes for convalescence, vomiting comes.

Vomiting, bleedings, diarrheas. The fluids vomited from, the stomach are so acrid that they seem to take the skin off from the mouth, set the teeth on edge, make the lips raw. So excoriation from acrid fluids, as well as throbbing all over the body, are features that you must bear in mind with Kreosote.

The discharges from the body are offensive; offensive, bloody, acrid discharges from the nose; offensive, watery discharges from any part of the body; sometimes even putrid; the leucorrhea is very offensive. Rapid emaciation, with spongy, burning ulceration, pus acrid, ichorous, foetid and yellow. Sometimes the inflammatory condition will run so high in an ulcer, only a small ulceration, that gangrene will set in, and hence we have a gangrenous ulceration; gangrene of parts that are inflamed.

Very low formations occur upon the margins of mucous membranes; crusts form. Indurations under the crusts and the crusts continue to form.

The circulation is so poor, so feeble in the parts all about the margin of the lips and the corners of the mouth, and corners of the eyes, and eyelids, and upon the genitals, and there is so much venous engorgement that crusts form and ulcerate and bleed and pile up, and this continues until a phagedenic spot comes. This condition is so much like epithelioma that Kreosote has cured epithelioma.

Stomach: The next striking thing in Kreosote is its stomach symptoms, Soon after eating there comes a burning pain in the stomach, and then a sense of fullness and an increasing nausea, ending in vomiting of the food, which looks as it did when taken; it looks undigested, but it is sour and acrid, coming up an hour or two after eating. Vomiting, the stomach seems unable to digest, and after the patient empties it there is constant nausea. After a swallow of water a prolonged bitter taste remains in the mouth.

There is aggravation from eating cold things and relief from warm diet. In malignant diseases of the stomach when this symptom is present, Kreosote becomes a great palliative; it relieves the burning and improves the digestion for a while, but the trouble comes again. Many times our remedies furnish us the greatest known palliation in cancerous affections. Homoeopathy should at all times furnish a degree of palliation in cancerous and other incurable malignant diseases of the stomach.

This palliation will bring more comfort to the stomach than can possibly be brought about by Morphine. I have watched patients under Morphine and under homeopathic medicine, and as a mere matter of comfort I will take the homoeopathic medicines.

This has been the experience of many. When you hear a homoeopath say that he prefers anodynes in cancerous affections of the stomach and in other painful affections, it is pretty sure evidence that he is not able to find the medicines that are suitable for the patient. These cases test the ability of the physician.

Diarrhea: Kreosote is a great remedy for diarrheas in the summer, especially for infants. The infant that I described as to his temper may be the infant suffering from the worst form of summer complaint, or having a light attack of cholera infantum. Or he may be "teething," and suffering from the troubles that are sometimes associated with teething. Infants have troubles at the time of teething only because they are sick, and if the child were not in disorder he would not have trouble when teething. Teething is a crisis, and the things that are within will come out at the time, just as there are troubles that are likely to come out at the time of puberty and at the climacteric period.

A marked feature of the Kreosote constitution is that when the desire to urinate comes, he must hurry or the urine will escape. The urine is passed during sleep. Bloody urine; clots in the urine; acrid and excoriating urine; weakness of the bladder; inability to hold the urine.

Smarting and burning in the pudenda, during and after micturition.

"Sugar in the urine."

It has cured diabetes. Generalize the symptoms given and you will see what kind of a diabetic patient will need Kreosote.

| **Re: Kreosotum** | By: girilal<br>New Jersey USA | January 21 2007 |
|---|---|---|

KREOSOTUM
Beechwood Kreosote

Kreosotum is a mixture of phenols obtained from this distillation.

Pulsations all over the body, and profuse bleeding from small wounds. Very severe, old neuralgic affections; pains rather aggravated by rest. Excoriating, burning, and offensive discharges. Hæmorrhages, ulcerations, cancerous affections. Rapid decomposition of fluids and secretions, and burning pains. Overgrown, poorly developed children. Post-climacteric diseases. Tumefaction, puffiness, gangrene. Ailings of teething children.

Mental.--Music causes weeping and palpitation. Vanishing of thought; stupid, forgetful, peevish, irritable. Child wants everything but throws it away when given.

Head.--Dull pain, as from a board pressing against forehead. Menstrual headache. Occipital pain (Gels; Zinc pic).

Eyes.--Salty lachrymation. Lids red and swollen.

Ears.--Eruption around and pimples within. Difficult hearing and buzzing.

Face.--Sick, suffering expression; hot, cheeks red.

Mouth.--Lips red, bleeding. Very painful dentition; child will not sleep. Very rapid decay of teeth, with spongy, bleeding gums; teeth dark and crumbly (Staph; Ant c). Putrid odor and bitter taste.

Nose.--Offensive smell and discharge. Chronic catarrh of old people. Acrid rawness. Lupus (Ars).

Throat.--Burning, choking sensation. Putrid odor.

Stomach.--Nausea; vomiting of food several hours after eating; of sweetish water in the morning. Feeling of coldness, as of ice water in stomach. Soreness; better eating. Painful hard spot. Hæmatemesis. Bitter taste after a swallow of water.

Abdomen.--Distended. Burning hæmorrhoids. Diarrhœa; very offensive; dark brown. Bloody, fetid stools. Cholera infantum in connection with painful dentition, green stools, nausea, dry skin, exhaustion, etc.

Urine.--Offensive. Violent itching of vulva and vagina, worse when urinating. Can urinate only when lying; cannot get out of bed quick enough during first sleep. Dreams of urinating. Enuresis in the first part of night. Must hurry when desire comes to urinate.

Female.--Corrosive itching within vulva, burning and swelling of labia; violent itching between labia and thighs. During menses, difficult hearing; buzzing and roaring; eruption after. Burning and soreness in external and internal parts. Leucorrhœa, yellow, acrid; odor of green corn; worse between periods. Hæmorrhage after coition. Menses too early, prolonged. Vomiting of pregnancy, with ptyalism. Menstrual flow intermits (Puls); ceases on sitting or walking; reappears on lying down. Pain worse after menses. Lochia offensive; intermits.

Respiratory.--Hoarse, with pain in larynx. Cough; worse evening, with efforts to vomit, with pain in chest. Raw burning in chest; pains and oppression. Cough after influenza (Eriodyction). Winter coughs of old people, with heavy pressure on sternum. Gangrene of lungs. After every cough, copious, purulent expectoration. Hæmoptysis; periodic attacks. Sternum feels pressed in.

Back.--Dragging backache, extending to genitals and down thighs. Great debility.

Extremities.--Pain in joints, hip and knee. Boring pain in hip-joints. Scapulæ sore.

Skin.--Itching, worse towards evening. Burning in soles. Senile gangrene. Small wounds bleed freely (Crot; Lach; Phos). Pustules and herpes. Ecchymosis; dorsal surface of fingers and hands eczematous.

Sleep.--Disturbed with tossing. Paralytic sensation in limbs on waking. Anxious dreams of pursuit, fire, erections, etc.

Modalities.--Worse, in open air, cold rest, when lying; after menstruation. Better, from warmth, motion, warm diet.

Relationship.--Antidote: Nux. Inimical: Carbo.

Complementary in malignant diseases: Ars; Phos; Sulph.

Guaiacol (is the principal constituent of Kreosote, and similar in action. Used in pulmonary tuberculosis. Dose 1 to 5 m).

Matico-Artanthe or Piper augustifolia, (Gonorrhœa, hæmorrhage from lungs; catarrhal conditions of genito-urinary organs and gastro-intestinal tract. Topically a hæmostatic. Difficult, dry, deep, winter cough. Use tincture).

Compare also: Fuligo ligni; Carbol ac; Iod; Laches.

Dose.--

LAC CANINUM
Dog's Milk

This remedy is of undoubted value in certain form of sore throat and diphtheria, and rheumatism. Corresponds to a low-vitiated, non-feverish type of sickness. The keynote symptom is, erratic pains, alternating sides. Feels as if walking on air, or of not touching the bed when lying down. Great lassitude. Ozæna. Decided effect in drying up milk in women who cannot nurse the baby. Great weakness and prostration. Sinking spells every morning. Mastitis.

Mind.--Very forgetful; in writing, makes mistakes. Despondent; thinks her disease incurable. Attacks of rage. Visions of snakes. Thinks himself of little consequence.

Head.--Sensation of walking or floating in the air (Sticta). Pain first one side, then the other. Blurred vision, nausea and vomiting at height of attack of headache. Occipital pain, with shooting extending to forehead. Sensation as if brain were alternately contracted and relaxed. Noises in ears. Reverberation of voice.

Nose.--Coryza; one nostril stuffed up, the other free; alternate. Alæ nasi and corners of mouth cracked. Bones of nose sore to pressure. Bloody pus discharged.

Mouth.--Tongue coated white with bright red edges; profuse salivation. Drooling in diphtheria. Cracking of jaw while eating (Nit ac; Rhus). Putrid taste increased by sweets.

Throat.--Sensitive to touch. Painful swallowing; pain extends to ears. Sore throat and cough with menstruation. Tonsillitis and diphtheria symptoms change repeatedly from side to side. Shining glazed appearance of deposit, pearly-white or like pure white porcelain. Stiffness of neck and tongue. Throat feels burned raw. Tickling sensation causes constant cough. Sore throat beginning and ending with menses.

Female.--Menses too early, profuse, flow in gushes. Breasts swollen; painful before (Calc c; Con; Puls) and better on appearance of menses. Mastitis; worse, least jar. Helps to dry up milk. Sinking at epigastrium. Sexual organs easily excited. Backache; spine very sensitive to touch or pressure. Galactorrhœa.

Extremities.--Sciatica, right side. Legs feel numb and stiff, cramps in feet. Rheumatic pains in extremities and back, from one side to the other. Pain in arms to fingers. Burning in palms and soles.

Sleep.--Dreams of snakes.

Modalities.--Worse, morning of one day and in the evening of next. Better, cold, cold drinks.

Relationship.--Compare: Lach; Con; Lac felinum-Cat's Milk--(ciliary neuralgia; eye symptoms, photophobia; asthenopia; dysmenorrhœa); Lac vaccinum-Cows' Milk--(headache, rheumatic pains, constipation); Lac vaccinum coagulatum-Curds--(nausea of pregnancy); Lactis vaccini floc--Cream--(diphtheria, leucorrhœa, menorrhagia, dysphagia); Lactic ac.

Dose.--Thirtieth and the highest potencies.

| **LAC CANINUM Patient** | By: girilal<br>New Jersey USA | September 19 2006 |
|---|---|---|

Lac Caninum (Dog’s milk)

(I will fail)

1. Anxiety that he can’t succeed.
2. Fears he won’t be able to perform his duties
3. Thinks he is short and small
4. No self confidence
5. Despair of recovery
6. Fears, his problems has no solution
7. Fears his disease is incurable
8. Delusion he is dirty
9. Delusion his clothes are torn
10. Transferring pains (No reasonable objective)

A famous remedy for wandering pains.

“Doctor some times I have pain in my right knee and some times it is exactly at the same place but on the left knee”
If a patient complains about the pain and doctor gives him some medicine but next time he comes and complains that pain from that part is gone but reappeared exactly at the opposite side, Lac Caninum is the medicine.

LAC VACCINUM DEFLORATUM

Skimmed Milk
(LAC DEFLORATUM)

A remedy for diseases with faulty nutrition; sick headaches, with profuse flow of urine during pain. Car sickness.

Head.--Despondent. Pain begins in forehead to occiput, in morning on rising. Intense throbbing, with nausea, vomiting, blindness, and obstinate constipation; worse, noise, light, motion, during menses, with great prostration, and better by pressure and bandaging head tightly.

Stool.--Constipation. Stools hard, large, with great straining; painful, lacerating anus.

Relationship.--Compare: Colostrum (Diarrhœa in infants. Whole body smells sour. Colic). Nat mur.

Dose.--Sixth, to thirtieth potency and higher.

Jayashree Kanoi

How to Choose A Veterinary Clinic
When choosing a veterinary clinic you must follow these steps in order to ensure your pet and you are completely satisfied with your choice. Choosing the right veterinarian and an associated clinic is important for a number of reasons:
Your pet's life and quality of life will depend on itYour peace of mind will depend on itYour wallet will depend on it
Your pet's life and quality of life will depend on itYour peace of mind will depend on itYour wallet will depend on it
Your pet's life and quality of life will depend on it
Your peace of mind will depend on it
Choosing Among Veterinary Clinics
A reputed clinic should have an active website up and running, however that may not necessarily be the case. In the latter case checking out the clinic becomes even more important. You should try to seek out as much information as you can glean from different sources like the internet, forums, yellow pages, magazines, local publications etc before you decide on visiting because visits take up time and effort.
Referrals cannot replace paying a visit to the Clinic itself. Pet owners get a chance to examine the facility, connect with the staff and meet the Vet. Details of the kinds of services provided and care of the pets can be observed first hand. You should check for licenses, qualifications, general cleanliness, efficiency etc. Even if you are not an expert on vet clinics you should be able to make out by taking into account these factors.
In addition, you might want specific services like spay and neuter etc. if you are looking for such services it is best to go for a place that is affordable but does not compromise on quality at the same time. So if the clinic skimps on basics like anesthetic et al. then you may want to keep looking.

The Vet has to have the two E's i.e. education, as in qualifications and certifications, and he also has to have sufficient experience in pet care. Vets are supposed to be comfortable around new animals and vice-versa. Moreover, there are some clinics that specialize in certain types of pets and are good with these particular animals only. So you should keep this in mind while evaluating a Clinic.
Moreover, the Vet isn't the only person your pet is going to come in contact with. There are receptionists, veterinarian assistants, veterinarian technicians, and often kennel personnel, as well. So you should try to evaluate the efficiency and professionalism of the staff as a whole. Keeping the above factors in mind should help you reach an informed decision.

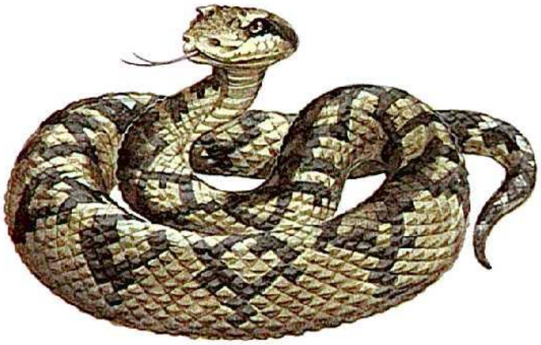
Click picture for many more pictures



Lachesis
Lachesis is a frequently indicated remedy, and one that you will need to study much in order to know how to use. Lachesis seems to fit the whole human race, for the race is pretty well filled up with snake as to disposition and character and this venom only causes to appear that which is in man.
Generals: We will first give a survey or the general symptoms, those which characterize the remedy and are of greatest importance, and the circumstances under which the symptoms appear, are brought out or are aggravated.
One who is a constitutional Lachesis patient will find himself suffering from an aggravation of his symptoms in the Spring, when he goes out from the cold weather into the milder weather, and especially is that so if it mild and rainy, or cloudy weather. Or if he goes from a cold into a warmer climate the symptoms of Lachesis will come out. The warm south winds excite the Lachesis symptoms.
The symptoms of Lachesis are worse on entering sleep. He may have felt nothing of his symptoms when awake, but when sleep

comes on they are aroused, and they gradually increase as the sleep is prolonged, so that a very long sleep will aggravate all the state and condition of a Lachesis patient, and when awakening from sleep he looks back on that sleep with sorrow. The sleep has been disturbed by attacks of suffocation and by awful dreams, and now, after having slept a long time, he arouses with dreadful headaches, with palpitation, with melancholy, with sorrows from head to foot. His body is full of suffering and his mind sees no brightness in anything.

There is a cloudy state, sadness, melancholy, insane notions, whims, jealousy and suspicion. When taking a warm bath, or applying warm water to places that are inflamed, his mental symptoms are aggravated. After a warm bath or after getting warmed up, or, if he becomes chilled from being out on a cold day and then goes into a warm room, the symptoms come on. After going into a warm bath, palpitation comes on; it seems as if his head would burst, his feet become cold, and he is shocked all over, pulsation all over, or feeble heart. Fainting in a warm bath. Girls sometimes faint when going into a warm bath. The patient may be cold and chilly yet the warm room increases or brings out the symptoms.

The general aspect of the patient and the localities will point some times to Lachesis. Upon the face there is an appearance of anxiety, of unrest and distress. The face is spotted or purple and the eyes are engorged. The eyes look suspicious. If there is an inflamed spot, it is purple. If there is an inflamed gland, and Lachesis is full of inflammation of the glands and cellular tissues, there is a purple or mottled appearance.

If there is an ulceration the ulceration bleeds black blood, which soon coagulates and looks like charred straw. From the wounds there is much bleeding. Small wounds bleed much like Phosphorus and Kreosote. A prick of a pin will ooze great drops of blood. Ulcers eat in, have false granulations, are putrid, bleed easily, and the blood is black, and all round the ulceration there is a purple, mottled appearance, looking as if about to become gangrenous.

Often gangrene does come; gangrene of parts that have been injured. Sloughing with great offensiveness. The parts turn black and slough. The veins become varicose. These are found upon the limbs, having the appearance of the varicose veins that come after gestation. Enlargement of the veins is a prominent condition of Lachesis.

From the slightest exertion of the mind or from the slightest emotion the extremities become cold, the heart becomes very feeble, the skin is covered with sweat and the head is hot. Warmth does not seem to relieve the coldness of the feet and hands; they are so cold. They may be wrapped up in flannels and still they remain cold, but suffocation is brought on. He cannot breathe and wants the windows open. It is weakness of the heart; sometimes so weak that it can hardly be heard or felt, and the pulse is feeble and intermittent. At other times there is audible palpitation of the heart.

As we go over the symptoms of the text we will notice something singular about the complaints, that is, their tendency to affect the left side, or to, begin on the left and extend to the right. The paralysis begins by gradually appearing weakness upon the left side. Which extends to the right side. It has a strong affinity for the ovaries, and in this it will be found that the left ovary is affected first. So, in inflammation of the ovaries, the left will be affected first, and later the right.

The inflammation begins on the left side of the throat and gradually goes to the right. The left side of the head is commonly most affected. The left eye becomes painful and the pain extends to the right. The left side of the back of the head, in the occipital headache, will be more affected than the right. This does not always follow, and if the reverse is true it does not contra-indicate Lach., but such is the common feature of it. Left upper and right lower has been observed.

In many symptoms of Lachesis, there is morning aggravation. This is the well-known Lachesis aggravation after sleep; the patient will sleep into the aggravation. In the milder symptoms this aggravation is mild and is not felt until after the patient wakes up from a long sleep, but if the aggravation is one that is of considerable violence, the patient may feel it immediately on going to sleep, and it arouses him; for instance, the heart symptoms. As soon as he goes into a sleep he rouses up with palpitation, with dyspnoea, with suffocation, with exhaustion, with vertigo, with pain in the back of the head, and many other circulatory disturbances.

Mind: The next most important thing to be studied is the mental state. Nothing stands out more boldly than the self-consciousness, the self conceit, the envy, the hatred, the revenge and the cruelty of the man. These things, of course, are matters of self-consciousness, an improper love of self.

Confusion of the mind to insanity.

All sorts of impulsive insanity. The mind is tired. The patient puts on an appearance like the maudlin of a drunkard, talks with thick lips and thick tongue, blunders and stumbles, only partly finishing words; the face is purple and the head is hot.

There is choking and the collar is uneasy about the neck; and the more uneasiness about the neck, the more choking, the more confusion of mind and the more appearance of intoxication. You will see if you talk with one who is intoxicated with whiskey symptoms like Lachesis, he stumbles through, hardly realizing what he says, half finishing his sentences and his words, leaving his "g's" off, all the present participles; he stumbles and blunders, he mutters, and tells you first one thing and then another.

These symptoms are increased under the circumstances mentioned in the Spring; in the warm weather following a cold spell; in rainy weather; after a warm bath; after sleep.

The mental state is large. Jealousy without any reason.

Unwarranted jealousy and suspicion. Many times this medicine has cured suspicion in girls, when they were simply suspicious of their girl friends. She never sees a whispered conversation going on but they are talking about her, to her detriment.

Suspects that they are contriving to injure her, and she will resort to any scheme to see if they were not talking of her to her detriment. A woman imagines that her friends, husband, and children are trying to damage her; that her friends are going to put her in an insane asylum.

Apprehension of the future. Thinks she is going to have heart disease, and is going insane; and that people are contriving to put her in an insane asylum. Imagine her relatives are trying to poison her and she refuses to eat. She thinks sometimes that it is only a dream and she can hardly say whether she dreamed it or whether she thinks it. She thinks she is dead, or dreams that she is dead, and in the dream preparations are being made to lay her out, or that she is about to die.

Thinks she is somebody else, and in the hands of a stronger power. She thinks she is under superhuman control. She is compelled to do things by spirits. She hears a command, partly in her dream, that she must carry out. Sometimes it takes the form of voices in which she is commanded to steal, to murder, or to confess things she never did, and she has no peace of mind until she makes a confession of something she has never done. The torture is something violent until she confesses that which she has not done. Imagines she is pursued. Imagines that she has stolen something, or that somebody thinks she has stolen something, and fears the law. She hears voices and warnings, and in the night she dreams about it. The state of torture is something dreadful, and it then goes into a delirium with muttering. The delirium is carried on like one muttering when drunk. This state increases until unconsciousness comes on and the patient enters into a coma from which he cannot be aroused. The patient also goes through periods of violence and violent delirium.

It is full of religious insanity. You will find a dear, sweet old lady who has always lived what would be called an upright and pious life, yet she is not able to apply the promises that are in the Word of God to herself; these things seem to apply to somebody else but not to her. She is full of wickedness and has committed the unpardonable sin. She is compelled to say these things; she is overwhelmed by these things and she is going to die and going to that awful hell that she reads about. The physician must listen to this with attention. The physician might make the mistake in this instance of making light of such feelings. If he does, the patient will not return, and he will be deprived of the chance of benefiting her.

No matter what her whims are, no matter what her religious opinions are, her state of mind must be treated with respect. It must be treated as if it were so.

She must have sympathy and kindness. It is an unfortunate thing for a doctor to get a reputation of being an ungodly man, among pious people, as he will be deprived of doing these people an immense amount of good. He must be candid with all the whims and notions of the people that he visits in the world. He must be everybody’s friend and he can be such without any hypocrisy if he is simply an upright and just man.

The state of religious melancholy, with religious insanity, is not uncommonly attended with much loquacity, with talkativeness, which Lachesis is full of. It is commonly among women, very seldom among men, that we find this religious melancholy. Now, this woman is impelled to tell it; she will annoy her intimate friends, day and night, with this story of the damnation of her soul and her wickedness and all, the awful things she has done. If you ask her what things she has committed she will say everything, but you cannot pin her down to the fact that she has killed anybody. If you allow her to go through with her story she will tell you all the crimes in the calendar that she has committed, although she has been a well-behaved and well-disposed woman.

There is another kind of loquacity belonging to Lachesis. The patient is impelled to talk continuously. It is found in another. state in which the patient is compelled to hurry in everything she does and wants everybody else to hurry, With that state of hurry is brought out the loquacity, and this is something far beyond comprehension, until you have once heard it.

There is no use attempting to describe it, it is so rapid, changing from one subject to another. Sentences are sometimes only half finished; she takes it for granted that you understand the balance and she will hurry an. Day and night she is wide awake, and with such sensitiveness to her surroundings that you, would naturally think, from what things she hears and how she is disturbed, by noise, that she can hear the flies walk upon the walls and the clock striking upon the distant steeple.

You do not get all these things in the text, you have to see them applied. But the things I give you that are brought out clinically are those things that have come from applying the symptoms of the remedy at the bedside to sick folks.

"Most extraordinary loquacity, making speeches in very select phrases but jumping off to most heterogeneous subjects."

"One word often leads into the midst of another story."

These states may come on in acute diseases like typhoid, when it will take the usual typhoid delirium, or they may come on in conditions like diphtheria, or in any of the diseases that are characterized by blood poisoning; they may come on in the puerperal state, or may take the form of insanity. It is a long acting remedy, and if it has been abused its effects will last a life time.

In many cases a close connection between the mental symptoms and the heart symptoms will be noticed, especially in young women and girls who have met with disappointment, who have been lying awake nights because of disturbance of the affections, or from disappointment, or from shattered hopes, or from grief.

Prolonged melancholy, mental depression, hysterical symptoms, weeping, mental prostration and despair, with pain in the heart, with a gone sensation or sensation of weakness in the heart, with difficult breathing. She meditates upon suicide, and finally settles back into an apathetic state, in which there is an aversion to, everything, to work, and even to thinking.

I might impress upon your mind the head symptoms if I related the case of a patient who described her symptoms probably more typically than you can find in the books. She was sitting up in bed and unable to lie down; she was worse from lying down, her face was purple, her eyes were engorged, the face puffed and tumid and the eyelids bloated. She sat there perfectly quiet in bed and described the pain as a surging sensation, which came up the back of the neck and head and then over the head.

That is a typical feature of Lachesis. A surging in waves. Waves of Pain that are not always synchronous with the pulse. They may not relate to the flow of blood at all. The surging is aggravated by motion, not so much in the act of motion, but after moving. It is sometimes felt after walking or changing to another place, and sitting down again; that is, a few seconds after the motion is completed the pain begins, and it comes to its height instantly and then gradually subsides into a very steady surging or a more steady ache.

Head: In the head there is a continuous steady ache, which may be aggravated or aroused into a surging which is so violent that it seems as if it would take the life of the patient.

The headache begins in the morning on waking. The milder Lachesis headaches begin in the morning on awaking and wear off after moving about a while. With the headaches and complaints in general there is a momentary vanishing of thought; all sorts of vertigo. Vertigo, with nausea and vomiting. The vertigo inclines the patient to turn to the left.

Lachesis has bursting pains in the head congestive pains with a feeling as if all the blood in the body must be in the head, because, the extremities are so cold and the head pulsates and hammers. This pulsating headache is part of a general pulsation from head to foot. In all arteries and inflammed parts, there is pulsation. The inflamed ovary pulsates, and it feels at times as if a little hammer were hammering upon the inflammed part with every pulsation of the artery. Lachesis has a number of times cured fistula in ano when associated with this feeling as if a hammer continually hammered the little fistulous pipe.

It has cured fissure of long standing when it felt as if the inflamed part were being hammered. Haemorrhoids have been cured when this sensation of hammering was present. So that we see this pulsation in the head is not a special symptom, but is a general symptom, brought out in relation to the head.

Some symptoms are valuable because of the frequency of their association, and when such is the case their concomitant relation. becomes important. The cardiac symptoms are frequently connected with the headache symptoms in Lachesis. It is seldom that you will see Lachesis headaches without cardiac difficulty. A weak pulse or the pulsation felt all over the body, is more or less associated with violent Lachesis headaches.

In the text we find weight and pressure as a strong feature of the Lachesis head symptoms. With almost any complaint of the body, with typhoids, at the menstrual period, during the congestive chill, it seems that the body becomes cold, the extremities become cold, the knees are cold, the feet are cold, and it is impossible to keep them warm, while the face is purple and mottled, the eyes are protruding and engorged, and this awful pain in the head, with a tendency to become unconscious, incoherent speech, difficulty of articulation, and finally actual unconsciousness.

In relation to the head symptoms and mind symptoms and the sensorium in general, the oversensitiveness that is found in Lachesis ought to be mentioned. His symptoms become very intense. The vision becomes very intense; the hearing becomes intense; the sense of touch especially is overwrought. The touch of the clothing becomes very painful, while hard pressure may be agreeable. The scalp becomes so sensitive to the touch of the hand that it is painful, while the pressure from a bandage is agreeable.

Oversensitive to noise, oversensitive to motion in the room, to conversation and to others walking over the floor. By these circumstances the pains are increased. The patient becomes extremely sensitive throughout all the senses of the body.

The oversensitiveness to touch is probably extensively in the skin, because of the fact that hard pressure often gives relief. In one who is suffering from peritonitis, front inflammation of the ovaries or uterus, or any of the abdominal viscera, the skin is so sensitive to. the clothing that contrivances are sometimes necessary to relieve the suffering from, the touch of the bed clothing. Something in the form of a hoop will be found in the bed, or the patient will have the knees drawn up, or with the hands will hold the clothing from touching the body. The ordinary weight of the hand may bring out the soreness that is in the abdomen, which is an entirely different soreness, whereas the clothing touching the abdomen only brings out the oversensitiveness of the skin. The mere touch of the skin with the finger or hand is unbearable.

Eyes: There are many inflammatory and congestive conditions of the eyes.

The eye symptoms are worse after sleep, and the eyes are oversensitive to touch and light. With the eye symptoms we have headaches, because the brain and eyes are so closely associated. In the sore throats, when the spatula or tongue depressor happens to touch the wall of the throat, the tonsil, or the root of the tongue, there is a feeling as if the eyes would be pressed out. Violent pain in the eyes from touching the throat.

Lachesis is a great jaundice medicine, because it produces much disturbance in the liver. Yellowness of the skin and whites of the eyes, and thickening of tissues about the eyes.

"Fistula lachrymalis," which is accompanied by long standing eruptions about the face.

Oversensitiveness of the meatus auditorus externus. Anything introduced into the canal of the ear will cause violent, spasmodic coughing and tickling in the throat. So sensitive is the mucous membrane of the ear that a violent cough, like whooping cough, will come on from touching the mucous membrane of the ear. This only shows the oversensitiveness of reflexes, and the oversensitiveness in general. With the hearing there is the same oversensitiveness that we have spoken of elsewhere. The Eustachian tube becomes closed with a catarrhal thickening, stricture of the Eustachian tube.

Nose: The catarrhal symptoms of the nose are prominent. Frequent bleeding of the nose and body, watery discharge from the nose. Always taking cold in the nose. Stuffing up of the nose, with disturbance of smell. Oversensitiveness to smell, and oversensitiveness to odors, finally loss of smell.

Lachesis has inflammatory conditions, very chronic in character, with crusty formations in the nose, sneezing, watery discharges from the nose and catarrhal headaches. Sometimes the headache goes off when the catarrhal discharge comes, and when the catarrhal discharge stops the headache comes on. Violent headache with discharge, with sneezing and coryza. Congestive headaches with coryza.

This catarrhal condition has led to the use of Lachesis in syphilis. It is sufficiently similar to cope with the severe forms of nasal syphilis; syphilis where it has affected the nasal mucous membrane, producing crusts and finally affecting the bones. Fetid oezena; very offensive discharges from the nose. Bleeding from the nose need not surprise you, because Lachesis is a hemorrhagic remedy.

The blood from the nose or any part, when it dries or clots, looks like charred straw or becomes black. Parts bleed easily. Copious and prolonged uterine hemorrhage, copious and prolonged menstruation, bleeding front the nose, vomiting of blood, hemorrhage from the bowels in typhoids.

"Great sensitiveness of the nostrils and lips, swelling of the lips, great swelling and tumefaction of the nose in old cases of syphilis."

The nose swells up and becomes purple. The nasal bones are very sore, soreness upon sides of the nose. Lachesis is an especially useful medicine in old drunkards who have red nose, and in heart affections with red nose. A red knob on the end of the nose, a strawberry nose.

Face: The face is purple and mottled, the eyelids are tumid, very much puffed; not bloated as in oedematous subjects, but puffed. There is not the pitting upon pressure that we find in oedema, although Lachesis has that, but there is a puffiness peculiar to Lachesis, the face looks swollen and inflamed, due to a venous stasis, so that the face is purple and mottled.

The nose is tumid, yet it will not remain pitted upon pressure. The lips feel as if inflamed, yet are not inflamed, simply sensitive to pressure. The face has also an oedematous appearance in which there is pitting upon pressure, in cardiac affections, in cases of Bright's disease. On the other hand the face becomes very pale, pale and cold; the skin covered with scaly eruptions. Eruptions that bleed easily, with crusty eruptions, with vesicular eruptions. Eruptions that fill with blood, bloody vesicles and large blood blisters, such as occur sometimes in burns, with burning. The face becomes jaundiced and very sallow. At times it takes on the appearance also of a chlorosis.

If you have once seen the chlorotic color, it need not be described. It is a condition of anemia, with yellowish pallor, ash colored or grey, intermingled with a sort of greenish color, so that the ancients often referred to it as green sickness. Again the face becomes livid and puffed like the bloated aspect of drunkards, the mottled purple appearance of drunkards who have been drinking for years, until they are bloated and broken down and have a besotted aspect. You see that in Lachesis.

In Lachesis we have a remedy for erysipelas and gangrenous affections, and about the affected part there is the Lachesis appearance, that is the mottled, purplish appearance. Lachesis has become clinically a marked remedy for erysipelas and for gangrene. As provers do not follow up remedies until they produce these things, we have to gather them from the poisonous effects and clinical observation.

Mouth: In Lachesis there is oozing of blood around the teeth, the gums bleed easily. Dry crusts appear upon the teeth in zymotic diseases, often black formations, sordes, and the tongue takes part in the appearance of the mouth and becomes slick. This occurs in typhoid conditions when there is a total loss of assimilation, the appetite is entirely gone, the stomach will not take food, and when food is put into the stomach it is rejected. There is also paresis of the tongue. The tongue seems to be like leather in the mouth, it is moved with great difficulty. And the speech is like that of one half intoxicated; he is unable to articulate.

The tongue swells and is protruded very slowly. It is dry and catches on the teeth and seems to have lost its stiffness. Seems like a rag, or as if the muscles did not act upon it so that it cannot be protruded, or if it is protruded it trembles and quivers and jerks and catches on the teeth. Again it is swollen, it is denuded of its papillae, and smooth, shiny and glassy as if varnished.

In the mouth there is a soapy appearance of the saliva. The saliva runs into the mouth copiously and the patient will often lie with the head over the side of the bed, and the saliva dripping into a pan or commode. The saliva is stringy and can be pulled out of the mouth in strings; white mucus or saliva.

This is not an uncommon feature in diphtheria, in sore throat, in inflammation of the tongue and mouth and gums, and in inflammation of the salivary glands. When this mucus is thick, tough, yellow, stringy and ropy it is like Kali bichromicum. You will often find in severe sore throat that the patient will lie and gag; and cough, and attempt with difficulty to protrude the tongue to expel the saliva from the mouth.

Very often the pain is so severe in the root of the tongue that he cannot expel the saliva by the tongue and he will lie with the open mouth over a commode, or with a cloth over the pillow, to receive the thick, ropy saliva. In such a state with sore throats, especially those that commence on the left side and go to the right, you hardly need to question longer, for it is the aspect of Lachesis.

This state of affairs would lead to Lachesis in ordinary inflammatory conditions of the tongue and in cancerous affections of the tongue. Lach. has in its nature the tendency to formation of malignant scabs and malignant ulcers, such as we find in epithelioma. It has cured a number of cases of epithelioma. It has been a very useful remedy in lupus. It is an important remedy in syphilitic sore throat, in syphilitic ulceration of the throat, tongue and roof of the mouth with this copious, stingy saliva.

Pharynx: The muscles of the pharynx become paralyzed and will not act, and hence the food will collect in the pharynx, that is, the bolus to be swallowed goes to the pharynx and stops, and then a tremendous effort at swallowing, with gagging and coughing and spasmodic action of the chest, takes place in order to carry on respiration, and he will not again attempt it. This state often occurs with diphtheria.

I have a number of times seen it brought about by the physician, who has, instead of giving just enough Lachesis, high enough and similar enough to the disease to cure, given it as low as he could get it, the 8 th or 10 th, dissolved it in water and fed it all through the diphtheritic state.

When you come across cases that have been treated in this way you need not be surprised if a post-diphtheritic paralysis comes on, because Lachesis will produce it. It may cure the diphtheria, but it will leave its poisonous effects which will last that patient a lifetime. Every spring the symptoms of Lachesis will crop out. In all the circumstances of aggravation described the symptoms of Lachesis will crop out if he has once been poisoned by it.

In the sore throat we have a combination of symptoms. Lachesis has produced this state, going from left to right; but with the sore throat there is a sensation of fullness in the neck and throat, difficult breathing, pallor or plethoric appearance of the face, choking when going into sleep, the peculiar kind of saliva and aggravation of the throat symptoms from warm drinks.

There is not always an aggravation of the pain itself from warm drinks, but the patient is often unable to swallow warm fluids. The swallowing of warm fluids often causes choking, and after a swallow of warm tea is taken the patient will clutch at the throat and it seems as if he would suffocate. He says,

"Oh I do not give me any more warm drinks."

Something cold will relieve. The dyspnoea and the distress about the throat is increased by swallowing something warm.

Now, in the sore throats of Lycopodium, warmth often benefits, but it is also true in some cases of Lycopodium sore throat, they want cold drinks and cold feels good to the throat.

Very often in the more acute symptoms of Lachesis a warm drink in the stomach is hurtful and causes nausea and suffocation and increases the choking and palpitation and the fullness in the head, whereas in the chronic cases of Lachesis, those that have been poisoned years before, there will be a sensation of nausea and tendency to vomit from taking a drink of cold water and then lying down.

The nausea comes on after lying down, that is, let the patient take a drink of ice cold water and go to bed and nausea will come on. Such a state is peculiar to Lachesis. It has been a later observation of those who have long before proved Lachesis. The symptoms of Lachesis have sometimes to be taken years after.

Lachesis has ulcers in the throat. It has aphthous patches, it has red and grey ulceration, it has deep ulceration. The tendency to ulceration upon the margins of mucous membranes is peculiar to Lachesis.

Also ulceration upon the skin, where the circulation is feeble. It seems that the pain in the throat is particularly marked between the acts of swallowing, and the pressure of the bolus going over the inflamed tonsils relieves the pain.

Always choking when swallowing, choking and gagging in the throat.

The cough is a choking cough and produces a sensation of tickling. This is like the Bell. cough. Bell. antidotes a Lach. cough, it has a cough so much like Lach. that no one can tell them apart.

Again the throat takes on extreme dryness in Lach., and this dryness is without thirst, dryness with aversion to water. Much inclination to swallow; the tendency is to continuously swallow, yet it is painful. Empty swallowing is more painful, than the swallowing of solids. Some Lach. patients suffering from cardiac affections are annoyed with constriction of the throat, choking in the throat when anything warm is swallowed, and sometimes when going into a warm room, choking and palpitation of the heart.

Tendency to chronic sore throat or recurrent sore throat and ulceration with every recurring sore throat. Liquids, of course, you will see, are analogous to empty swallowing, and empty swallowing causes more pain than the bolus which presses upon the sore throat, because it is of the nature of a slight touch. The slight touch increases the soreness and pain in the throat. Slight pressure of the collar increases the pain in the throat. With the sore throat the muscles and glands about the neck become painful, inflamed and swollen, and very tender to the touch. With the sore throat, very commonly, there is pain in the base of the brain or in the back of the head, and soreness of the muscles of the back of the neck, which is often relieved by lying on the back and aggravated by lying on either side.

If you look into the throat it has a mottled, purplish appearance. Put all these things together, with the copious flow of tenacious saliva, and you will be able to manage cases of diphtheria that commence on the left side and spread to the right, whether the membrane is scanty or copious.

Tonsilitis with suppuration of the tonsils, when the left tonsil becomes inflamed and after a day or two the right one becomes inflamed and swollen, and they both finally go on to suppuration, or when one swells and suppurates and the other swells and suppurates. Diphtheritic appearances of the throat, spreading from left to right. The pharynx is full of thick, white, ropy mucus in the morning; must hawk out a mouthful of mucus in the morning.

Abdomen: The abdomen is distended with flatus. The abdomen is tympanitic in typhoid condition, much rumbling in the distended abdomen. The clothing cannot be tolerated, not even the slightest touch of the clothing, and yet it may require hard pressure to bring out soreness that is deep in the abdomen. This state is as it is in inflammation of bowels, ovaries and uterus, the patient lies on the back with the clothing lifted from the abdomen.

Violent labor-like pains, menstrual colic, present in typhoid, in puerperal fever, in malignant scarlet fever, in the more malignant affections of zymotic forms of the continued fever.

Lach. has a series of liver troubles with jaundice; congestion of the liver, inflammation of the liver, enlarged liver and the nutmeg liver. Cutting like a knife in the region of the liver. Vomiting of bile; vomiting of everything taken into the stomach. Extreme nausea; continuous nausea with jaundice. White stool. It has cured cases with gall stone.

"Cannot endure any pressure about the hypochondria."

In the chronic state the sensitiveness of the skin is so great over the abdomen, and about the waist and hips, that the wearing of the clothing creates pain, great restlessness and uneasiness, the patient grows increasingly nervous and finally goes into hysterics. Sensitiveness over the lower abdomen; can scarcely allow her clothes to touch her.

Female: It seems strange at first reading that Lachesis can be such a common remedy at the menstrual period.

It is also laid down as a remedy for the climacteric period. Now if you will study the cases of many women at the climacteric period you will find that many of them have the flushes of heat and the surgings in the head and the great circulatory disturbances that are found under Lachesis. This is also true of the complaints, the headaches, etc., that come in women at the climacteric period and at the menstrual period.

The Lachesis symptoms are strong in women during menstruation. There is violent headache, boring pain in the vertex, nausea and vomiting during menses.

The discharge in the female, either as a menstrual flow or as a hemorrhage, is black blood. Pain in the left ovarian region, or going from left to right. Induration of one or both ovaries. It has cured suppuration of the ovaries. The uterine region is very sensitive to touch, to the slightest contact of the clothing; in inflammation of the ovaries, pains in the ovaries and uterus going from left to right. Pains in the pelvis going upwards to the chest, sometimes a surging of pain going upwards, grasping the throat. Labor pains surge up, with clutching at the throat, or the labor pains cease suddenly, with clutching at the throat.

The menstrual pains increase violently until relieved by the flow. The menstrual sufferings are before and after the flow, with amelioration during the flow. The menstrual flow intermits one day and then goes on for one day, and during the intermission there is likely to be pain or headache.

Menorrhagia with chills at night and flushes of heat in the

daytime. During the menstrual period violent headache, especially at such times as the flow slackens up.
It is a general feature of Lachesis to be relieved by discharges.
Catamenia flow but one hour every day; on stopping, violent pains follow in region of left ovary, alternating with gagging and vomiturition.
It is especially useful at the menopause, because of the flushes of heat. Uterine hemorrhage, fainting spells, suffocation in a warm room; orgasm of blood most violent. Complaints during pregnancy.
Inflammation of the veins of the leg. Varicose veins, blue or purple, extreme sensitiveness along the veins; sensitive to the slightest touch, though relieved by pressure.
The study of Lachesis is only a commentary on some of its important parts.

Lachesis

(Loves amusement & Great contradiction)

1. Frivolous
2. Desires amusement
3. Playful
4. Aversion to study
5. Desires to travel
6. Desires to wander
7. Living in contradiction
8. Love and Hate very strongly
9. Joking and sarcastic personality
10. No sense of duty
11. Wants to show that he is rich. Keeps up the appearances.

They can be very immoderate, but they also have very much self-control

He drinks lots of alcohol and suddenly followed by a period of absolutely non-drinking.

She can trust someone completely and at the same time be very suspicious.

Argentum Nitricum When Sick stays in bed and makes loud noise and complains a lot.

Opium When sick, he does not care in the beginning but later on gets very serious

Lachesis When sick she shuns bed, can’t even sit. Complains a lot and makes troubles to the people around her.

Psorinum Desires to stay in bed all the time, Complains a lot and makes troubles to the people around her.

Hyocyamus and Lachesis both: Very Inquisitive (Wants to go to the bottom of the things)

| **Lachesis Constituion/Personality** | By: sammy<br>Malaysia | September 23 2006 |

Lachesis (Venom from the Surucucu snake)

This remedy is made of the poison of the Surucucu,the Bushmaster, a very aggressive and poisonous snake, with the Latin name Trigonocephalus Lachesis.

In many cultures the snake symbolizes the instinctive forces in us, our "beastly" and emotional part. The snake in circle-form with the tail in his mouth also symbolizes the circle of life and death, creative force, rebirth, immortality and totality. In fairy-tales a snake or dragon is often the guard of a cave (symbol of the unknown, the unconsciousness), the snake as protector of our secret life. The image of the snake gives us a better understanding of the complex character of the Lachesis personality.

Lachesis characters are passionate people with a strong life force, who are clearly aware of their instinctive side; they are intense emotional and sensual. Like the opposites of life and death Lachesis shows a strong duality and like two sides of a coin both polarities are present in the same person at the same time. These people are a living contradiction: they can be very immoderate, but they also have very much self-control, for instance times of drinking lots of alcohol are suddenly followed by a period of absolutely non-drinking. They can love and hate very strongly, they can trust someone completely and at the same time be very suspicious. It is "as if he has two wills" (Kent) and both opposite moods are fighting for the supremacy inside the person.

And there is another internal war going on: the fight between the spiritual part - in search for a higher personal development - and their sensuality. Lachesis characters feel that if they let their instinctive side free, it is very easy to do something in contradiction with their moral and social standards. Often they choose to chain their "inner beast", but their suppressed side will always be ready to take over and they never know when. Gino Vannelli describes this psychological war in his song "Moon over madness": * (partly reproduced)

"There she lies, a vision in the dark
Invader of my heart
Look at me, behaving like a fool
Possessed
Damned if I'll be doomed
By this woman 'neath the moon over madness.

Shall I kiss the mouth, stroke the hair
Undress her - do I dare
Or bite into the vein above her
Heaving breast

Ah, the sun best come up soon
There's no telling with the moon
Over madness.

Shall I tear into her skin
Let the beast inside me win
I'm so uncertain
Or shall I fight my heart no more
Ease my lover to the floor
And loose my burden.

What I'd give to know just what I am
A monster or a man
An angel born of Hell, or simply
Human flesh
One of which is in this room
Wondering 'neath the moon over madness."*

(Note that in the second stanza Vannelli speaks of the sun (symbol for our conscious, controlled part) better come up to take over the reign from the moon (symbol of our uncontrolled unconsciousness and our emotions).

Lachesis often feels controlled or ruled by super-human powers. They can hear voices that command them to steal. Or they feel a 'devil' inside who scolds and rages beyond their control. Or they feel being led by God, performing a special mission. Lachesis people are very religious. A good solution for their inner struggle between spirituality and sensuality is a combination of both, for instance like in tantra, sex magic or wicca.

Like the aggressive Surukuku and the guarding fairy-tale snake Lachesis characters will passionately defend themselves. They have a lot of energy, are in for challenges, and competition, opposition and heavy discussions are fuel for their fighting spirit. They like to try out their barriers. Mentally they are practical, realistic, quick-witted, intelligent and critical. They are sharp, sarcastic and insulting without really intending to be insulting; it is more a result of their honesty. An abundance of original ideas pops up from their philosophical minds. They can manipulate and read between the lines. Lachesis can be very fearful and suspicious. Relationships usually are possessive, protective, with heavy emotional outbursts and often jealousy. Speech is very important. Passionate, fascinating speakers, who can stumble over their own waterfall of words. They like power and a social position at the top.

Lachesis cannot stand the pressure of tight clothes, especially not around their neck or waist. Lachesis has complaints on the left side (being the 'emotional' side) of the body, or starting on the left side of the body. Often heart -complaints and blood circulation problems, like hammering headache, hemorrhoids, hot flushes and hot perspiration (it is a well-known remedy for menopause ailments and PMS). Wounds and ulcers bleed easily. Women feel worse or act different the days before menstruation. Many throat complaints. There is a tendency to malignancy. And of course Lachesis is a good remedy against most snakebites.

All symptoms, especially the mental, are worse after sleep and in warmth (spring, summer). Coffee makes them feel better. Lachesis gets ailments from long lasting grief, sorrow, fright, vexation, jealousy, disappointed love or suppression. A famous homoeopath called Lachesis complaints "the prize for the unlived life".

*From the CD "Yonder tree" of Gino Vannelli, 1995 /

"wisdom in your body is deeper than your deepest philosophy" (Nietszche)

| **Re:Lachesis** | By: Denise<br>Colorado | December 25 2009 |
|---|---|---|

Wow the way it was described in here of the nature of the snake was so FASCINATING. Brilliantly said!! Along with everything else. Amazing... I have strong feelings that people talk about me or think negative when I don't feel good. Like when I'm tired or just simply have horrible PMS. It's horrible to have these thoughts when not feeling well. I thank the good creator for knowledgeable people to discover these medications. I will certainly give this a try when feeling overwhelmed. Amazing.....

LACHNANTHES TINCTORIA
Spirit-weed
(LACHNANTHES)

Head, chest and circulation are affected. Bridge of nose as if pinched. A remedy for torticollis, rheumatic symptoms about neck. Tuberculosis-light-complexioned people. Early stages, and established chest cases, with much coldness. Produces a desire to talk-a flow of language and the courage to make a speech.

Head.--Right-sided pain, extending down to jaw; head feels enlarged; worse, least noise. Scalp painful. Sleepless. Circumscribed red cheeks; scalp feels sore, as if hair was standing on end; burning in palms and soles. Bridge of nose feels as if pinched.

Cypripedium Pubescens

Feb 5th - Mar 5th

Chest.--Sensation of heat-bubbling and boiling around heart region rising to head.

Back.--Chilliness between the shoulder-blades;; pain and stiffness in back.

Neck.--Drawn over to one side ; in sore throat. Rheumatism of the neck. Stiffness of neck. Pain in nape, as if dislocated.

Skin.--Body icy cold; face yellow; tendency to sweat.

Relationship.--Compare: Dulc; Bry; Puls; also Fel tauri (nape of neck pains, and great tension there).

Dose.--Third potency. Tincture in phthisis, unit doses, once or twice a week, or three drops every four hours.

LACTUCA VIROSA
Acrid Lettuce

This remedy acts principally upon the brain and circulatory system. Delirium tremens with sleeplessness, coldness, and tremor. Hydrothorax and ascites. Impotence. Sense of lightness and tightness affecting whole body, especially chest. Seems to be a true galactogogue. Marked action on extremities.

Mind.--Stupefaction of sense. Great restlessness.

Head.--Dull, heavy, confused, dizzy. Heat of face and headache, with general coldness. Headache, with affections of respiratory organs.

Abdomen.--Sensation of weight, of fullness; borborygmi; abundant emission of wind. Colic in early morning, abdomen tense, relieved somewhat by evacuation and passing of wind.

Chest.--Difficult breathing. Suffocative breathing from dropsy of the chest. Constant tickling cough. Incessant, spasmodic cough, as if chest would fly to pieces. Squeezing sensation in lower chest.

Female.--Promotes catamenia. Increase of milk in breasts (Asafoet).

Sleep.--Restless; impossible to get to sleep. Deep, comatose sleep.

Extremities.--Lame hip down left side; worse walking. Coldness and numbness of feet and legs. Tremor of hands and arms. Cramps in shin bones, extending to toes and side of leg involving calves.

Relationship.--Antidotes: Acet ac; Coff.

Compare: Nabalus-Prenanthes Serpentaria-Rattlesnake root-White lettuce, similar to Lactuca, (chronic diarrhœa, worse after eating, nights and towards morning. Pain in abdomen and rectum; emaciation. Constipation and somnolence; susceptible to aura of others. Dyspepsia, with acid burning eructation. Craving for acid food. Leucorrhœa with throbbing in uterus); Lach; Kali carb; Spiranthes (galactagogue).

Dose.--Tincture.

# LAPIS ALBUS
## Silico-fluoride of Calcium

Affections of glands, goitre, pre-ulcerative stage of carcinoma. Burning, stinging pain in breast, stomach, and uterus. Connective tissue about glands specially affected. Fat anæmic babies with Iodine appetite. Ravenous appetite. Remarkably successful in scrofulous affections, except in malarial cases. Uterine carcinoma. Fibroid tumors with intense burning pains through the part with profuse hæmorrhage. Glands have a certain elasticity and pliability about them rather than the stony hardness of Calc fluor and Cistus.

Ears.--Otitis media suppurativa. Where Silica is indicated progress is hastened by Lapis (Bellows).

Chest.--Persistent pains in mammary region. Glandular hardening.

Skin.--Scrofulous abscesses and sores. Enlargement and induration of glands, especially cervical. Lipoma, sarcoma, carcinoma. Pruritus.

Relationship.--Compare: Silica; Badiaga; Ars iod; Calc iod; Con; Kal iod; Asterias.

Dose.--First to sixth potency.

LAPPA ARCTIUM
Burdock

Very important in skin therapeutics. Eruptions on the head, face, and neck; pimples; acne. Styes and ulcerations on the edge of the eyelids. Profuse and frequent urination. Crops of boils and styes (Anthracin).

Extremities.--Pain in hands, knees, and ankles extending downward to fingers and toes. Pain in all joints. Eruption on extremities.

Female.--Uterine displacements. An exceedingly sore, bruised feeling in uterus, with great relaxation of the vaginal tissues; apparently entire lack of tonicity of pelvic contents. These symptoms all aggravated by standing, walking, a misstep, or sudden jar.

Dose.--Tincture, to third potency.

| **LARCH [Bach Flower Remedy]** | By: Jayashree<br>Calcutta, India | October 7 2006 |

Click picture for many more pictures

LARCH
This individual suffers with poor self confidence, with good ability. Therefore, they experience fear of failure and the personality doesn't unfold but impoverishes. The personality is logical and self limiting and not robust enough to fight off negative feelings. It works well for ALCOHOLICS who do not feel as good as others. Larch is also excellent in treating IMPOTENCY. The person is too focused on the inside instead of tasks in the environment like CERATO and MIMULUS. There is worry and insufficient empowerment to meet life's challenges. Also, one can see alienation from others and may present depression but is alack of joy or courage.

Jayashree Kanoi

LAUROCERASUS
Cherry-laurel

Spasmodic tickling cough, especially in cardiac patients, is often magically influenced by this drug. Lack of reaction, especially in chest and heart affections. Drink rolls audibly through œsophagus and intestines. General coldness, not ameliorated by warmth. Violent pain in stomach with loss of speech. Spasm of facial muscles and œsophagus. Asphyxia neonatorum.

Fever.--Coldness; chills and heat alternate. Thirst, with dry mouth in afternoon.

Respiratory.--Cyanosis and dyspnœa; worse, sitting up. Patient puts hands on heart. Cough, with valvular disease. Exercise causes pain around heart. Tickling, dry cough. Dyspnœa.

Constriction of chest. Cough, with copious, jelly-like, or bloody expectoration. Small and feeble pulse. Threatening paralysis of lungs. Gasping for breath; clutches at heart.

Heart.--Mitral regurgitation. Clutching at heart and palpitation. Cyanosis neonatorum.

Sleep.--Spells of deep sleep, with snoring and stertorous breathing.

Extremities.--Toe and finger nails become knotty. Skin blue. Sprained pains in hips, thighs and heels. Cold, clammy feet and legs. Clubbing of fingers. Veins of hands distended.

Relationship.--Compare: Hydrocy ac; Camphor; Secale; Ammon carb; Ambra.

Dose.--Tincture to third potency. Cherry-laurel water, two to five drop doses.

Good wishes. Milap Singh

Click picture for many more pictures

LECITHINUM
A Phosphorus-containing Complex Organic Body prepared from the yolk of egg and animal brains
(LECITHIN)

Lecithin is important in the vital processes of plant and animal organisms. Lecithin has a favorable influence upon the nutritive condition and especially upon the blood hence its use in anæmia and convalescence, neurasthenia and insomnia. Increasing the number of red corpuscles and amount of hemoglobin. Excellent galactagog, renders milk more nourishing and increases quantity.

Causes an immediate decrease in the excretion of the phosphates. Mental exhaustion and impotency. Tuberculosis, causing marked improvement in nutrition and general improvement. Tired, weak, short breath, loss of flesh; symptoms of general break-down. Sexually weak.

Mind.--Forgetful, dull, confused.

Head.--Aching, especially in occiput-pulsating and ringing in ears. Pain in zygoma; face pale.

Stomach.--Loss of appetite, thirsty, craves wine and coffee; bloated, sore pain in stomach rising toward throat.

Urine.--Scanty, with phosphates, sugar or albumen.

Sexual.--Male power lost or enfeebled. Anaphrodisia and ovarian insufficiency.

Extremities.--Soreness, aching, lack of energy. Tired and weak.

Relationship.--Compare: Phosphor.

Dose.--One-half to 2 grains of crude and potencies. Twelfth potency.

Good wishes. Milap Singh

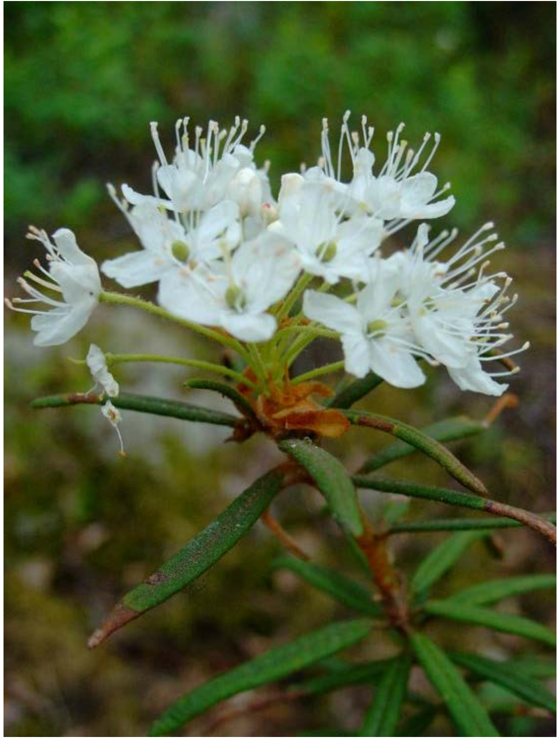
Click picture for many more pictures



Ledum Palustre
Surgeon
This remedy comes up well after the study of Lachesis, for we find in the pathogenesis many features similar to those in Lachesis.

It has the mottled aspect and the same puffed and bloated appearance of the face. It is antidotal to Lachesis, to the poison of insects, to the poison of Apis and to animal poisons. Ledum is a remedy for the surgeon, and is closely associated in traumatism with Arnica and Hypericum. The symptoms very much resemble such as follow certain kinds of injury, for instance an injury from stepping on tacks, from puncturing with needles, wounds that bleed scantily but are followed by pain, puffiness and coldness of the part.

Causation:
Stepping on a nail and it pierces the sole of the foot or the heel, or he receives such a wound in the palm of the hand from a splinter, or he runs a splinter under the nail.
If, after such punctured wounds, the part becomes cold and then pale, paralyzed and mottled think of Ledum. The horse sometimes steps on a nail. If that nail goes through and strikes the margin of the coffin bone, tetanus will follow. It is known to be almost sure death. Put Ledum on the tongue of that horse and there will not be any trouble, for it prevents such conditions.
When tetanus comes on from punctured wounds in the palms or soles, or in other parts, think of Hypericum, or when you have a punctured wound to treat, give Ledum at once and you will prevent tetanus.
When the finger nails have been torn, or the nerves in sentient parts like the ends of the fingers have been torn and lacerated, Hypericum becomes the remedy.
For bruising of various parts, and when the patient feels as if braised all over, no matter how extensively he is bruised, Arnica is generally the remedy.
It may be said, for punctured wounds study Ledum; for lacerated wounds of sentient nerves, study Hypericum; for bruises, study Arnica; for open lacerations and cuts, study Calendula.
The conditions that come from the external, ought to be remedied to a great extent by external means. A solution of Calendula is excellent in conditions that come from the external, and it should be applied externally. When you have lacerated wounds and cuts with knives or other sharp instruments, apply Calendula, because the injury is external without internal effects.

The symptoms that arise from internal cause, treat with internal remedies, and symptoms that arise from external cause, when all that there is of the case is external, treat locally; in other words, for local causes use local means, and for internal or dynamic causes, use internal means.
Let internal wrongs be treated by the homoeopathic remedy and external or local conditions be treated by such soothing dressings as are most comfortable. Always protect surfaces that are exposed, and raw, and bleeding with something of a bland

and superficial character.

Wounds must be dressed with as simple a means as possible, and there is no simpler dressing than Calendula, one part to four or six of water. The tincture will smart too much. Your open wounds will granulate most beautifully under Calendula, and you will have no constitutional effects. When the constitutional state is orderly and there is an open injury let the constitution alone, but put on some soothing application externally. In doing this there is no law to govern the action of the physician.

Air is an irritant to a raw part and will keep up an unnecessary discharge of pus, even from a perfectly healthy sore.

Calendula will keep it protected. The sides of a cut must be drawn together, and if it is perfectly tight it will heal itself by first intention. If it does not, then you may know there is a constitutional condition that you must ferret out and find the remedy for. Local treatment must then be suspended.

These remedies that I have mentioned, to a great extent, cover the management of wounds, and it is simple. Anyone has sense enough to draw together and close up a yawning wound, and to properly dress it. The muscles that naturally draw a wound open have to be overcome by stitches or by strappings. They do not belong to prescribing, they belong to the surgeon.

Coldness:

The Ledum patient is very often subject to what may be called constitutional coldness, coldness to touch, coldness in the lady and coldness in the extremities with hot head, and again we see the other extreme, where the whole body is overheated, and the head also is in a state of great heat. There is throbbing and pulsating all over the body; the skin is purple or is too highly colored; he wants the covers all off at night. It is not uncommon to hear a patient, who has a Ledum headache, say that she wants the head out in the cold air, wants to put it out of the window, does not want any covering upon the head; delights to bathe it with very cold water.

Ledum has a bloated condition of the hands, face, and feet; bloated and purple from the knees down in certain dropsical conditions. With this purple, mottled, bloated condition from the knees to the feet the swelling as big as the skin will allow, and the pain excruciating.

The only relief that patient gets is by sitting, with the feet in a tub of ice cold water. I remember the first time I ever saw this in a patient. He was an old syphilitic, whose nasal bones had been eaten cut by syphilis, and his nose was a flabby piece of skin; it had no stiffening in it. He was a drunkard, and was extremely abusive to his family when drunk.

He had been for several years unwilling to work, having lost his ambition, and he would sit in the house and allow his wife to wait upon him. He had practically become a tramp, only he could not tramp, for this dropsical condition had come on and his feet were so badly swollen and sensitive that he sat in the house day after day. When I first saw him he had before him a good-sized old-fashioned wash-tub, and there he sat with the ice water two-thirds up to his knees and pieces of ice floating around on the top of the water, which he liked to have coming in contact with the skin.

When that ice was out he would put in more. The wife described his sufferings by saying he "suffered agonies something; dreadful."

Ledum took his feet out of the ice water so that he never used it afterwards. It caused the purpleness to disappear, the bloating went out of his feet, and he quit drinking. Ledum cured him of his syphilitic trouble, and he never had a return of that original state.

Pulsatilla and Ledum are the two principal remedies that want the feet in very cold water. But Ledum suited that man.

Bleeding:

Where there are inflamed surfaces the tendency in Ledum is to bleed, and the blood is black. Ledum patients are full-blooded and plethoric, of a robust character. Such plethoric patients bleed easily, have red faces; they are fleshy, strong and of robust constitution. Hemorrhages sometimes occur in the chamber of the eye, hemorrhage of the nose, hemorrhage in cavities, bloody urine. Old painful ulcers that spread, that are mottled round about, in a constitution that always wants to be cold. The ulcers are relieved by cold,

Rheumatism:
This remedy is of a rheumatic nature, rheumatic and gouty. It is a gouty medicine, having complaints in persons who suffer from gout, and have chalk stones in their joints, deposits in the wrists, fingers and toes.
The deposits go from below upwards. The gouty joints become suddenly inflamed and are relieved by cold. Ledum especially singles out the knee; it is suitable in old prolonged cases of inflammation of the kneejoint, of rheumatic knee-joint. You will find such patients sitting with the joint exposed to the cold, fanning the joint, or putting evaporating lotions upon the joint, such as chloroform, or ether, which give relief to the joints while evaporating to dryness.
Rheumatic and gouty extremities with pain and swelling; pain worse from motion, worse at night and from warmth of bed; better from cold applications with copious pale urine. The pains and swelling go upwards and the heart becomes affected.

Face:
The face I have already described as puffy or bloated like the Lachesis face. It is a besotted face and looks very much like the face of an old drunkard. Ledum counteracts the effect of whiskey, and takes away the appetite for whiskey. Ledum is to whiskey what Caladium is to the smoking habit. You can break patients from the habit of smoking so that they go to the other extreme, and have an aversion to it.
It has erysipelas, as you might expect. It has a blue, mottled and puffed and sometimes oedematous appearance. It takes on an acute character and becomes burning. Phlegmonous erysipelas of any part of the body, but particularly of the face, or the injured part.

Urines:
You might naturally suppose that a medicine that has such a gouty nature in it would have more or less kidney symptoms.
"Urination frequent, quantity diminished or increased, stream often stops during the flow."
"Burning in the urethra after urinating."
"Itching redness and discharge of pus."

It has red sand in the urine as marked as Lycopodium. It has great quantities of sandy deposit of various colors. When the patient is feeling at his best, there are great quantities of sandy deposits passing away. When there is little deposit in the urine, the gouty deposits in the joints become marked, and he does not feel so well.

It has another symptom that was verified by Lippe:

Copious clear, colorless urine, light in specific gravity and from its being light or deficient of salts in the urine we have an aggravation of the gouty manifestations.
Remember that the rheumatic tendency spreads upwards from the lower extremities, from the circumference to the centre.
"Menstruation too early, too profuse, bright red; absence of vital heat."

Genitals:
Great coldness of the body at this time, yet the patient wants the cold air. Copious menstrual flow. Old gouty subjects, with mottled face with the puffiness that is not oedema, simply a venous stasis, with copious menstrual flow, with great pain during menstruation.
The uterus is extremely sensitive to touch, and the pelvic organs are. so sensitive that any deep touch becomes painful to the patient. Dysmenorrhoea in gouty subjects. It turns the constitution into order and prevents the after formation of gout. When such cases are very deep-seated, the uterine troubles will be cured in middle life, and the gouty appearance will come separately. The better the internal is, in an incurable disease, the worse the external becomes, and, when this is so the external trouble is essential to health, and so long as the external manifestations are in the extremities, and the joints are being increasingly affected, so long the internal is in a state of order.
When the remedy works in that way, do not change it and try to get something that will drive the external away. So long as the patient is improving and the external is growing worse, that is the right direction. Ledum acts in this direction. Its tendency is to

make the complaints go away from the centre, for its complaints begin in the circumference and go towards the centre. It is sometimes impossible to manage a gouty patient without giving him some sort of explanation.

Lycopodium also keeps conditions coming to the surface. It will send them back to their own place in the externals when they have a tendency to go in. Lycopodium often causes a return of the red sand in the urine.

"Emaciation of suffering parts."

A nerve is injured by a puncture and a slight infection takes place, so that the wound becomes congested, with a mottled, oedematous appearance, and the part becomes cold, just such a condition as Ledum will cure. The nerve that supplies that part takes on an ascending neuritis, pains shoot along the nerve, the muscles that are supplied by that nerve dwindle and the part withers. We have in Pulsatilla a similar state.

"The diseased limb withers."

LEMNA MINOR
Duckweed

A catarrhal remedy. Acts especially upon the nostrils. Nasal polypi; swollen turbinates. Atrophic rhinitis. Asthma from nasal obstruction; worse in wet weather.

Nose.--Putrid smell; loss of smell. Crusts and muco-purulent discharge very abundant. Post-nasal dropping. Pain like a string from nostrils to ear. Reduces nasal obstruction when it is an œdematous condition. Dryness of naso-pharynx.

Mouth.--Putrid taste on rising in the morning. Dry pharynx and larynx.

Abdomen.--Disposition to noisy diarrhœa.

Modalities.--Worse, in damp, rainy weather, especially heavy rains.

Relationship.--Compare: Dulc (damp surroundings and foggy weather). Calc; Teucr; Calend; Nat sulph.

Dose.--Third to thirtieth potency.

Good wishes. Milap Singh

LEPIDIUM BONARIENSE
Cress-Brazilian Cress

Affections of breast, heart, lancinating pains.

With heart symptoms, numbness and pain in left arm, sensation of sinking in pit of stomach.

Left side of head, face, chest, hip to knee, all have lancinating pain.

A streak of pain from the temple to the chin, as if the face were cut with a razor. Burning in throat, roaring in ears. Sensation of a tight girdle around chest, as of a knife piercing the heart. Pain in neck, back, and extremities. Compare: Arnica; Lachesis.

Good wishes. Milap Singh

LIATRIS SPICATA
Colic Root
(LIATRIS SPICATA - SERRATULA)

A vascular stimulant. Increases functional activity of the skin, mucous membranes.

Of use in dropsy due to liver and spleen diseases, also renal dropsy. Here the suppressed urination is most favorably influenced. General anasarca due to heart and kidney disease. Diarrhœa with violent urging and pain in lower part of back. Colic. Locally, applied to ulcers and unhealthy wounds.

A prompt diuretic.

Dose.--1 to 4 drams of tincture of infusion.

Good wishes. Milap Singh

| **Re:LIATRIS SPICATA** | By: garcot<br>Bangalore | March 2 2010 |
|---|---|---|

These days it is grown in gardens and included as one of the garden flowers.

How to grow:

he Gayfeather performs best when it is grown in full sun, but will tolerate a bit of light shade. Liatris does not like soggy soil during the winter months so good drainage is extremely important. Once established, it is fairly drought tolerant.
The Liatris will tend to develop mildew if it has insufficient sunlight and air circulation, so be sure to give it plenty of room.
Gayfeather may be started from seeds sown indoors at 65-75 degrees or directly into the garden in early Spring, but they will not bloom until their second year. Germination takes from 20 to 45 days.
Large clumps should be dug and divided in the Spring, every three to four years. The divisions, or other new plants should be set 15 inches apart, in rich, slightly sandy soil.

More details from paghat's garden:
http://www.paghat.com/liatris.html

Garcot

"wisdom in your body is deeper than your deepest philosophy" (Nietszche)

LILIUM TIGRINUM
Tiger-lily

Manifests powerful influence over the pelvic organs, and is adapted to many reflex states dependent on some pathological condition of uterus and ovaries. More often indicated in unmarried women. The action of the heart is very marked. Pain in small spots (Oxal ac). Rheumatic arthritis.

Mind.--Tormented about her salvation. Consolation aggravates. Profound depression of spirits. Constant inclination to weep. Anxious; fears some organic and incurable disease. Disposed to curse, strike, think obscene things. Aimless, hurried manner; must keep busy.

Head.--Hot, dull, heavy. Faint in warm room. Wild feeling in head.

Eyes.--Hyperæsthesia of retina. Pain, extending back into head;

Picture of this second

facebook join our group +

43,725 Pageviews
Feb 5th - Mar 5th
+
−

lachrymation; and impaired vision. Myopic astigmia. Useful in restoring power to the weakened ciliary muscle (Arg nit).

Stomach.--Flatulent; nausea, with sensation of lump in stomach. Hungry; longs for meat. Thirsty, drinks often and much, and before severe symptoms.

Abdomen.--Abdomen sore, distended; trembling sensation in abdomen. Pressure downwards and backwards against rectum and anus; worse, standing; better, walking in open air. Bearing down in lower part of abdomen.

Urinary.--Frequent urging. Urine milky, scanty, hot.

Stool.--Constant desire to defecate, from pressure in rectum, worse standing. Pressure down the anus. Early-morning urgent stool. Dysentery; mucus and blood, with tenesmus, especially in plethoric and nervous women at change of life.

Heart.--Sensation as if heart were grasped in a vise (Cact). Feels full to bursting. Pulsations over whole body. Palpitation; irregular pulse; very rapid. Pain in cardiac region, with feeling of a load on chest. Cold feeling about heart. Suffocating feeling in a crowded and warm room. Angina pectoris with pain in right arm.

Female.--Menses early, scanty, dark, clotted, offensive; flow only when moving about. Bearing down sensation with urgent desire for stool, as though all organs would escape. Ceases when resting (Sep; Lac c; Bell). Congestion of uterus, prolapse, and anteversion. Constant desire to support parts externally. Pain in ovaries and down thighs. Acrid, brown leucorrhœa; smarting in labia. Sexual instinct awakened. Bloated feeling in uterine region. Sub-involution. Pruritus pudendi.

Extremities.--Cannot walk on uneven ground. Pain in back and spine, with trembling, but oftener in front of a pressing-down character. Pricking in fingers. Pain in right arm and hip. Legs ache; cannot keep them still. Pain in ankle joint. Burning palms and soles.

Sleep.--Unrefreshing, with disagreeable dreams. Unable to sleep, with wild feeling in head.

Fever.--Great heat and lassitude in afternoon, with throbbing throughout body.

Modalities.--Worse consolation, warm room. Better, fresh air.

Relationship.--Compare: Cact; Helon; Murex; Sep; Plat; Pallad.

Antidote: Helon.

Dose.--The middle and higher potencies seem to have done best. Its curative action sometimes is slow in developing itself.

Good wishes. Milap Singh

| **Re: LILIUM TIGRINUM (Tiger Lilly)** | By: Jayashree<br>Calcutta, India | November 28 2006 |
|---|---|---|

It has also helped a lot in Diplopia. That's a personal experience.
When allopaths prescribed prism glasses as they had no treatment for diplopia, a few doses of Lilium Tigrinum helped in getting rid of the problem.

Jayashree Kanoi

| **Re: LILIUM TIGRINUM (Tiger Lilly)** | By: Joe De Livera<br>Sri Lanka | January 7 2008 |
|---|---|---|

I have a patient who suffers from Diplopia and I was interested in your experience with this remedy.

Can you please indicate the potency of Lilium Tigrinum that you used with the dosage ?

| **Re: LILIUM TIGRINUM (Tiger Lilly)** | By: Jayashree<br>Calcutta, India | January 7 2008 |
|---|---|---|

I took in 30 potency as far as I can remember twice a day, {it was in 1994) BUT the Diplopia was an indication of The coming Brain Hemorrhage which was triggered by a high dose of Causticum. It will be better if your patient goes for an MRI and be assured.

© Peter Dyrnda

LIMULUS CYCLOPS
Horse-foot-King-crab
(LIMULUS - XIPHOSURA)

Limulus was introduced by C. Hering and partially proved by him and Lippe. Hering was surprised to see the blood of the King-crab that he dissected, blue, which on investigation, was found to contain copper as he had surmised and which he thought would prove to be another medicine for Cholera. Further provings are necessary to establish this, though symptoms so far observed make this probable. Hering's fertile mind always lead him to pioneer paths into practical therapeutics.

Bodily and mental exhaustion; drowsiness after sea bathing. Gastro-enteric symptoms. Painful fullness of whole right side of body.

Head.--Mental depression. Difficult to remember names, confused with heat of face, rush of blood to face, worse when meditating. Pain behind left eye-ball.

Nose.--Fluent coryza. Sneezing worse drinking water. Constant nasal dropping. Pressure above nose and behind eyes.

Abdomen.--Colic with heat. Cramp-like pain with watery stools. Abdomen hot and constricted. Piles, constriction of anus.

Respiratory.--Husky voice. Dyspnœa after drinking water. Oppression of chest.

Extremities.--Crural neuralgia. Soles of feet ache, feel numb. Pain in right hip-joint. Heels sore.

Skin.--Itching spots and vesicles on face and hands. Burning in palms.

Relationship.--Compare: Asterias; Homarus; Cuprum.

Dose.--Sixth potency.

Good wishes. Milap Singh

LINARIA VULGARIS
Toad-flax-Snap Dragon
(LINARIA)

Acts prominently within the domain of the pneumogastrics. Eructations, nausea, salivation, pressure on stomach. Jaundice, splenic and hepatic hypertrophy. Enteric symptoms and great drowsiness very marked. Cardiac fainting. Enuresis. Rectal symptoms. Tongue rough, dry; throat constricted. Coldness. Confusion in head. Irresistible sleepiness. Symptoms worse walking in open air.

Dose.--Third potency.

Good wishes. Milap Singh

Some Important Facts About Heart Disease

Congenital heart disease is a malformation or type of defect in one of the structure of the heart, or the blood vessels in and around the heart. This damage occurs before you are born. It occurs when the fetus is in the uterus developing. And these issues affect eight to ten out of every one thousand children.

The children may show symptoms at birth, or later in childhood, and sometimes not until they become adults. Roughly five hundred thousand adults have congenital heart disease.

In most people affected by this disease, the cause it not known. But there are some common factors that can be associated with the chance you have of developing heart disease. Among these risk factors are:

If a parent or sibling has congenital heart disease, the children of a family member has double the risk of contracting the disease.

Just Some of The Benefits of Resveratrol

Excess accumulation of Advanced Glycation End products (AGE) can cause cellular damage that can compromise cell integrity and longevity.

* Supports heart health and cardiovascular function.
* Supports brain health.
* Supports immune function.
* Supports joint health.
* Promotes cellular longevity.
* Promotes good health & well-being.
* Delivers antioxidant support.
* Helps increase cellular energy.

LINUM USITATISSIMUM
Common Flax

The application of Linseed poultice has produced in sensitive subjects severe respiratory disturbances, as asthma, hives, etc. Its action in such cases is marked by intense irritation. It has been found to contain small quantity of Hydrocyanic acid, which may account for this intensity. The decoction is of service in inflammation of the urinary passages, cystitis, strangury, etc. Also in diseases of the intestinal tract. It has a place in the treatment of asthma, hay-fever and urticaria. Trismus and paralysis of the tongue.

Relationship.--Compare: Linum Catharticum-Purging flax --(Similar respiratory symptoms, but also colic and diarrhœa).

Dose.--Lower potencies.

Good wishes. Milap Singh

Feb 5th - Mar 5th

Urine.--Tenesmus. Turbid urine, with mucus and red deposit. Pain in region of right kidney. Free and colorless. While urinating, pressure in heart. Cystitis, subacute and chronic.

Respiratory.--Constriction of chest. Violent cough when lying down. Air feels cold when inspired. Pain in mammary glands, which extend into the arms and fingers.

Heart.--Rheumatic soreness in cardiac region. Sudden shock in heart. Throbbing, dull stitch in cardiac region. Pains in heart before menses, and associated with pains in bladder, and before urinating; better, after. Trembling and fluttering in heart, extending to back.

Urinary.--Soreness of bladder; pain in right kidney and ureter. Turbid urine with mucus, scanty and dark, acrid; sandy deposit.

Extremities.--Paralytic stiffness all over. Itching about joints. Rheumatic pains throughout shoulder-joint, arm, and fingers and small joints generally. Pain in hollow of foot, extending to knee. Swelling and tenderness of finger and toe joints; better, hot water. Nodular swellings in joints. Ankles pain when walking.

Skin.--Scabby, tettery eruption on hands, head, and cheeks, preceded by red, raw skin. Dull stitch, ending in itching. Barber's itch (use high). Rough rash all over body, much loose epithelium, tough, dry, itchy skin.

Modalities.--Worse, in morning, right side. Better, rising and moving about.

Relationship.--Compare: Lyc; Ammon phos; Benz ac; Calc; Lithium chlor (symptoms of cinchonism, viz.: Dizzy head, full, bluring of vision Ringing in ears; marked tremors; general weakness; marked muscular and general prostration; no gastro-intestinal effects. Nose sore, heartburn, pain in teeth). Lithium lacticum (rheumatism of shoulder, and small joints relieved by moving about; worse, resting). Lithium benzoicum (deep-seated pains in loins; in small of back; uneasiness in bladder. Cystic irritation. Gallstones. Frequent desire. Diminishing uric acid deposit). Lithium bromatum (cerebral congestion, threatened apoplexy, insomnia and epilepsy).

Dose.--First to third trituration.

Good wishes. Milap Singh

Click picture for many more pictures

LOBELIA INFLATA
Indian Tobacco

Is a vaso-motor stimulant; increases the activity of all vegetative processes; spends its force mainly upon the pneumogastric nerve, producing a depressed relaxed condition with oppression of the chest and epigastrium, impeded respiration, nausea and vomiting.

Languor, relaxation of muscles, nausea, vomiting and dyspepsia are the general indications that point to the use of this remedy, in asthma and gastric affections. Best adapted to light complexioned fleshy people. Bad effects of drunkenness. Suppressed discharges (Sulph). Diphtheria. Catarrhal jaundice (Chionanth).

Head.--Vertigo, and fear of death. Gastric headache, with nausea, vomiting, and great prostration; worse, afternoon until midnight; tobacco. Dull, heavy pain.

Face.--Bathed in cold sweat. Sudden pallor.

Ears.--Deafness due to suppressed discharges or eczema. Shooting pain from throat.

Mouth.--Profuse flow of saliva; acrid burning taste; mercurial taste; tenacious mucus, tongue coated white.

Stomach.--Acidity, flatulence, shortness of breath after eating. Heartburn with profuse flow of saliva. Extreme nausea and vomiting. Morning sickness. Faintness and weakness at epigastrium. Profuse salivation, with good appetite. Profuse sweat and prostration. Cannot bear smell or taste of tobacco. Acrid, burning taste; acidity, with contractive feeling in pit of stomach. Flatulence, shortness of breath after eating. Heartburn.

Respiratory.--Dyspnœa from constriction of chest; worse, any exertion. Sensation of pressure or weight in chest; better by rapid walking. Feels as if heart would stop. Asthma; attacks, with weakness, felt in pit of stomach and preceded by prickling all over. Cramp, ringing cough, short breath, catching at throat. Senile emphysema.

Back.--Pain in sacrum; cannot bear slightest touch. Sits leaning forward.

Urinary.--Deep red color and copious red sediment.

Skin.--Prickling, itching with intense nausea.

Modalities.--Worse, tobacco, afternoon, slightest motion, cold, especially cold washing. Better, by rapid walking; (chest pain), toward evening, and from warmth.

Relationship.--Antidote: Ipec.

Compare: Tabac; Ars; Tart e; Verat; Rosa.

Lobelia syphilitica or cerulea (gives a perfect picture of sneezing influenza, involving the posterior nares, palate, and fauces. Very depressed. Pain in forehead over eyes; pain and gas in bowels, followed by copious watery stools with tenesmus and soreness of anus. Pain in knees. Prickling in soles. Great oppression in lower part of chest, as if air could not reach there. Pain in chest under short ribs of left side. Dry, hacking cough. Breathing difficult. Dull, aching pain over root of nose. Eustachian catarrh. Pain in posterior part of spleen). Lobelia erinus (malignant growths, extremely rapid development; colloid cancer of the omentum; cork-screw-like pains in abdomen; great dryness of skin, nasal and buccal mucous membranes; distaste for brandy; dry, eczematous patches covering points of first fingers. Malignant disease of the face. Epithelioma).

Dose.--Tincture, to thirtieth potency. Locally the tincture is antidotal to Poison-oak. Often the Acetum Lobelia acts better than any other preparation. Lobelia hypodermically acts clinically almost precisely

Good wishes. Milap Singh

LOBELIA PURPURASCENS
Purple Lobelia

Profound prostration of all the vital forces and of the nervous system; respiratory paralysis. Nervous prostration of influenza. Coma. Tongue white and paralyzed.

Head.--Confused and depressed. Headache with nausea, vertigo; especially between eyebrows. Cannot keep eyes open; spasmodic closure of lids.

Chest.--Superficial respiration; heart and lungs feel paralyzed; respiration slow. Heart beats sound to him like boom of a drum.

Eyes.--Impossible to keep open. Drowsy.

Relationship.--Compare: Baptisa; Lobelia cardinalis (debility, especially of lower extremities; oppressed breathing, pleurisy, sticking pain in chest on taking a long breath. Pain in left lung, intermitting pricking during the day).

Dose.--Third potency.

Good wishes. Milap Singh

LYCOPERSICUM
ESCULENTUM
Tomato
(SOLANUM LYCOPERSICUM)

Marked symptoms of rheumatism and influenza. Severe aching pains all over body. Pains left after influenza. Head always shows signs of acute congestion. Hay-fever, with marked aggravation from breathing the least dust. Frequent urination and profuse watery diarrhœa.

Head.--Bursting pain, beginning in occiput and spreading all over. Whole head and scalp feels sore, bruised, after pain has ceased.

Eyes.--Dull, heavy; pupils contracted; eyeballs feel contracted; aching in and around eyes. Eyes suffused.

Nose.--Profuse, watery coryza; drops down throat. Itching in anterior chamber; worse, breathing any dust; better, indoors.

Heart.--Decided decrease in pulse rate with anxiety and apprehensiveness.

Respiratory.--Voice husky. Pain in chest, extending to head. Hoarseness; constant desire to clear throat. Expulsive cough, deep and harsh. Chest oppressed; dry, hacking cough coming on at night and keeping one awake.

Urine.--Constant dribbling in open air. Must rise at night to urinate.

Extremities.--Aching through back. Dull pain in lumbar region. Sharp pain in right deltoid and pectoralis muscles. Pain deep in middle of right arm. Rheumatic pain in right elbow and wrist, and hands of both sides. Intense aching in lower limbs. Right crural neuralgia. Tingling along right ulnar nerve.

Modalities.--Worse, right side, open air, continued motion, jars, noises. Better, warm room, tobacco.

Relationship.--Compare: Bellad (follows well); Eup perf; Rhus; Sanguin; Caps.

Dose.--Third to thirtieth potency.

Good wishes. Milap Singh

©-josef-hlasek
www.hlasek.com/
Lycopodium clavatum a5774

Lycopodium

Lycopodium is an antipsoric, anti-syphilitic and anti-sycotic, and its sphere is broad and deep. Though classed among the inert substances, and thought to be useful only for rolling up allopathic pills, Hahnemann brought it into use and developed its power by attenuation.

It is a monument to Hahnemann. It enters deep into the life, and ultimate changes in the soft tissues, blood-vessels, bones, liver, heart, joints. The tissue changes are striking; there is tendency to, necrosis, abscesses, spreading ulcers and great emaciation.

Generalities: There is a predominance of symptoms on the right side of the body, and they are likely to travel from right to left or from above downward, e. g., from head to chest.

The patient emaciates above, especially about the neck, while the lower extremities are fairly well nourished. Externally there is sensitiveness to a warm atmosphere when there are head and spine symptoms. The head symptoms also are worse from the warmth of the bed and from heat, and worse from getting heated by exertion.

The patient is sensitive to cold and there is a marked lack of vital heat, and worse in general from cold and cold air and from cold food and drinks. The pains are ameliorated from warmth except of the head and spine.

Exertion aggravates the Lycopodium patient in general. He becomes puffed and distressed, and dyspnoea is increased by exertion. He cannot climb, he cannot walk fast. The cardiac symptoms are increased as well as the dyspnoea by becoming heated from exertion. The inflamed parts are sometimes relieved from the application of heat. The throat symptoms are generally relieved from the application of heat, from drinking hot tea or warm soup. The stomach pains are often relieved by warm drinks and taking warm things into the stomach. Nervous excitement and prostration are marked.
In the rheumatic pains and other sufferings the Lyc. patient is ameliorated by motion. He is extremely restless, must keep turning, and if there is inflammation with the aches and pains the patient is better from the warmth of the bed and relieved from motion, and he will keep tossing all night.
He turns and gets into a new place and thinks he can sleep, but the restlessness continues all night. He wants cool air, wants to be in a cool place with head symptoms. It is true that the headache is worse from motion enough to warm the patient up, but not from the motion itself. The headache is worse from lying down and from the warmth of the room, and better in cold air and from motion until he has moved and exercised sufficiently to become heated, when the headache becomes worse. That is quite an important thing to remember concerning Lycopodium, because it may constitute a distinguishing feature.

The head symptoms are worse from warm wraps and warm bed,

The complaints of Lyc. are likely to be worse at a fixed time, viz., from four till eight o'clock in the evening. An exacerbation comes on in the acute complaints and often in the chronic complaints at this time.

The Lyc. chill and fever is worse at this time, and in typhoid and scarlet fever the patient is especially worse from 4-8 P.M. In gouty attacks, in rheumatic fevers, in inflammatory conditions, in pneumonia, in acute catarrhs, which are complaints especially calling for Lycopodium, it is always well to think of this remedy when there is a decisive aggravation from 4-8 P.M.

Stomach: The Lycopodium patient is flatulent, distended like a drum, so that he can hardly breathe. The diaphragm is pushed upwards, infringing upon the lung and heart space, so that he has palpitation, faintness and dyspnoea. It is not uncommon to hear a Lycop. patient say,
"Everything I eat turns into wind."

After a mere mouthful he becomes flatulent and distended, so that he cannot eat any more. He says a mouthful fills him up to the throat. While the abdomen is distended he is so nervous that he cannot endure any noise. The noise of the crackling of paper, ringing of bells or slamming of doors goes through him and causes fainting, like Ant. crud., Borax and Natr. mur.
These general conditions go through all complaints, acute and chronic. There is an excitable stage of the whole sensorium in which everything disturbs. Little things annoy and distress.

The Lyc. patient cannot eat oysters; they make him sick. Oysters seem to poison the Lyc. patient, just as onions are a poison to the Thuya patient.
The Oxalic acid patient cannot eat strawberries. If you ever have a patient get sick from eating strawberries, tomatoes or oysters, and you have no homoeopathic remedies at hand, it is a good thing to remember that cheese will digest strawberries or tomatoes or oysters in a few minutes.

Skin: The skin ulcerates. There are painful ulcer, sloughing ulcers beneath the skin, abscesses beneath the skin, cellular troubles. The chronic ulcerations are indolent with false granulations, painful, burning, stinging and smarting, often relieved by applying cooling things and aggravated by warm poultices. It is somewhat a general in Lycopodium that warm poultices and warmth ameliorates; warm applications ameliorate the pain in the knee, the suppurating condition and the gouty troubles. in an unusually warm bed, and in a warm room hives come out.

The hives come out either in nodules or in long and irregular stripes, especially in the heat, and itch violently. Lyc. has eruptions upon the skin, with violent itching. Vesicles and scaly eruptions, moist eruptions and dry eruptions, furfuraceous eruptions, eruptions about the lips, behind the ears, under the wings of the nose and upon the genitals; fissured eruptions, bleeding fissures like salt rheum upon the hands.
The skin becomes thick and indurated. The sites of old boils and pustules become indurated and form nodules that remain a long time. The skin looks unhealthy, and it will slough easily; wounds refuse to heal. Surface wounds suppurate as if they had contained splinters, and this suppuration burrows along under the skin. Ulcers bleed and form great quantities of thick, yellow, offensive, green pus. Chancres and cancroids often find their similimum in Lyc.

The Lyc. state when deciphered shows feebleness throughout. A very low state of the arteries and veins, poor tone and poor circulation. Numbness in spots. Emaciation of single members. Deadness of the fingers and toes. Staggering and inability to make use of the limbs. Clumsiness and awkwardness of the limbs. Trembling of the limbs.

Mind: The mental symptoms of Lyc. are numerous.

He is tired. He has a tired state of the mind, a chronic fatigue, forgetfulness, aversion to undertaking anything new, aversion to appearing in any new role, aversion to his own work. Dreads lest something will happen, lest he will forget something. A continually increasing dread of appearing in public comes on,

yet a horror, at times, of solitude.
Often in professional men, like lawyers and ministers, who have to appear in public, there is a feeling of incompetence, a feeling of inability to undertake his task, although he has been accustomed to it for many years.

A lawyer cannot think of appearing in court; he procrastinates, he delays until he is obliged to appear, because he has a fear that he will stumble that he will make mistakes, that he will forget, and yet when he undertakes it he goes through with ease and comfort. This is a striking feature also of Silicea. No medicines have this fear so marked as these two.

Lyc. also has a religious insanity, which has a mild and simple beginning, a matter of melancholy. This religious melancholy grows greater and greater until he sits and broods. He has very often aversion to company, and yet he dreads solitude.
"Dread of men and dread of solitude; irritability and melancholy."

This dread of men is not always a state of dread in women. It is a dread of people, and when that is fully carried out in the Lyc. patient you see that she dreads the presence of new persons, or the coming in of friends or visitors she wants to be only with those that are constantly surrounding her does not want to be entirely alone; wants to feel that there is somebody else in the house, but does not want company; does not want to be talked to, or forced to do anything; does not want to make any exertion, yet at times when forced to do so she is relieved.
"Taciturnity, desires to be alone."

Now, let us follow that out a little further. The taciturnity is because the patient does not want to talk, wants to keep silent, yet, as I have said already, very glad to feel there is somebody else in the house and that she is not alone. She is perfectly willing to remain in a little room by herself, so that she is practically alone, yet not in solitude. If there were two adjacent rooms in the house you would commonly find the Lyc. patient go into one and stay there, but very glad to have somebody in the

other.
The Lycopodium patient often weeps in the act of receiving a friend or meeting an acquaintance. An unusual sadness with weeping comes over this patient on receiving a gift. At the slightest joy she weeps, hence we see that the Lyc. patient is a very nervous, sensitive, emotional patient.

Here it is:
"Sensitive, even cries when thanked."
When lying in bed suffering from the lower forms of fevers, there is delirium and even un consciousness. He picks at imaginary things in the air, sees flies and all sorts of little things flying in the air.
"Excessively merry and laughs at simplest things."
A condition of insanity.
"Despondent."
The Lyc. patient wakes up in the morning with sadness. There is sadness and gloom. The world may come to an end, or the whole family may die, or the house may burn up. There seems to be nothing cheering, the future looks black. After moving about a while, this passes off. This state precedes conditions of insanity, and finally a suicidal state comes, an aversion to life. See how this remedy takes hold of the will and actually destroys man's will to live. That which is first in man is his desire to be, to exist, and to be something, if ever so small. When that is destroyed, we see what a wonderful thing has been destroyed. The very man himself wills then not to be. It is a perversion of everything that makes the man, the destruction of his will.
"Apprehensiveness, difficult breathing and fearfulness."
"Anxious thoughts as if about to die."
"Want of self-confidence, indecision, timidity, resignation."
"Loss of confidence in himself and in everything."
"Misanthropic, flies even from his own children."
"Distrustful, suspicious and fault finding."
"Oversensitive to pain; patient is beside himself."

Head: Lyc. is subject to periodical headaches, and headaches connected with gastric troubles. If he goes beyond his dinner hour a sick headache will come on. He must eat with regularity or he will have the headache which he is subject to. This is somewhat like a Cactus headache.

Cactus has a congestive headache which becomes extremely violent with flushed face if he does not eat at the regular time. One distinguishing feature is that with the Lycopodium headache, if he eats something, the headache is better while the Cactus headache is worse from eating. Lyc. and especially Phos. and Psorinum have headaches with great hunger.

At or about the beginning of the attack there is a faint all-gone hungry feeling which eating does not satisfy. Such is the nature of Phosphorus and Psorinum when the appetite and headache are associated.

The Lycopodium headache is < from heat, from the warmth of the bed, and from lying down, > from cold, from the cold air, and from having the windows open. Lean, emaciated boys are subject to prolonged pains in the head. Every time this little fellow takes cold he has a prolonged, throbbing, congestive headache, and from day to day and from month to month he becomes more emaciated, especially about the face and neck.

This same trouble is present when a narrow chested boy has a dry, teasing cough, without expectoration, and emaciates about the neck and face.

This remedy is especially suitable in these withered lads, with a dry cough or prolonged headache. In children who wither after pneumonia or bronchitis, emaciate about the face and neck, take cold on the slightest provocation, suffer with headache from being heated, have nightly headaches, and a state of congestion that affects the mind more or less, in which they rouse out of sleep in confusion.

The little one screams out in sleep, awakes frightened, looks wild, does not know the father and mother, or nurse or family until after a few moments, when he seems to be able to collect his senses and then realizes where he is and lies down to sleep again. In a little while he wakes up again in a fright, looks strange and confused. That repeats itself.

The headaches are throbbing and pressing, as if the head would burst; but this is not so important as the manner in which they come on, the circumstance of their cause, the things that the child does and the fact that they are better from cold, worse from noise and talking, worse from 4 to 8 P.M., and he emaciates from above downward.

These are more important than the quality of the pain that the patient feels, but if he describes the quality of the pain it is spoken of as a throbbing, pressing, bursting or as a fullness.

Upon the scalp we find eruptions in patches, smooth patches with the hair off. Patches on the face and eczematous eruptions behind the ears, bleeding and oozing a watery fluid, sometimes yellowish watery.

The eczema spreads from behind the ears up over the ears and to the scalp. Lyc is a very important remedy to study in eczema of the infant.

Eczema in a lean, hungry, withering child with more or, less head trouble, such as has been described, with a moist oozing behind the cars, red sand in the urine, face looking wrinkled, a dry teasing cough, in a child that kicks the covers of a child whose left foot is cold and the other warm, with capricious appetite, eating much, with unusual hunger at times and great thirst, and yet losing steadily, will often be cured by Lyc.

It will throw out a greater amount of eruption at first, but this will subside finally and the child will return to health. The head in general is closely related to one symptom, viz., red sand in the urine. A long as the red sand is plentiful, the patient is free from these congestive headaches, but when the urine becomes pale and free from the red pepper deposit; then comes the bursting, pressing headache, lasting for days.

It might be said that this is a uraemic headache; but it does not matter what you call it, if the symptoms are present the remedy will be justified. In old gouty constitutions, when the headache is most marked, the gout in the extremities will be > and vice versa.

The headaches is present only in the absence of pain in the extremities. Again, when there is a copious quantity of red sand in the urine the gouty state, either in the head or extremities, will be absent, but whenever he takes cold the secretion seems to slacken up with an < of the pain.

There is another feature of the Lyc. headache related to catarrhal states. The headache is < when the catarrh is slacked up by an acute cold. The Lyc subject often suffers from thick,

yellow discharge from the nose.
The nose is filled with yellow, green crusts, blown out of the nose in the morning and hawked out of the throat. Now, when the patient takes cold the thick discharge to a great extent ceases, and he commences to sneeze and has a watery discharge. Then comes on a Lyc. headache, with great suffering, with pressing pains, with hunger, and finally the coryza passes away, and the thick yellow discharge returns and the headache subsides.
We have many eye symptoms in Lycopodium, but most prominent are the catarrhal affections of the eyes. The symptoms are so numerous, they describe almost any catarrhal condition of the eyes, so that you cannot discriminate upon the eye symptoms alone. Inflammatory conditions with copious discharge, with red eyes, ulceration of the conjunctiva and lids, and granular lids.

Ears: For the ears Lyc. becomes an important remedy, because this selfsame emaciating child, with the wrinkled countenance and dry cough, has had, since an attack of scarlet fever, a discharge from the ears, thick, yellow and offensive, with loss of hearing.
If the suitable remedy be given in a case of scarlet fever, there will be no ear trouble left, because ear troubles do not necessarily belong to scarlet fever. They are not a part of scarlet fever, but are dependent on the constitutional state of the child.
Lyc. has also most painful eruptions of the ears, otitis media, abscess in the ear, associated with eczema about the cars and behind the ears.

Nose: The nose symptoms I have only partly described in association with the head.
The trouble often begins in infancy. The little infant will lie at first with a peculiar rattling breathing through the nose, and finally it will breathe only through the mouth, as the nose is obstructed. This goes on for days and months. The child breathes only through the mouth, and when it cries it has the shrill tone, such as is found when the nose is plugged up. If you look you will see the nose is filled up with a purulent matter and hanging down the

throat is a muco-purulent discharge. Much stuffing up of the nose is a chronic state of Lyc.

The child will go on with this trouble until it forms into great cruse, yellow, sometimes blackish, sometimes greenish, and the nose bleeds. It is most useful in those troublesome catarrhs associated with headaches; in such patients as lose flesh about the neck. It may seem strange and unaccountable that Lyc. can cause emaciation about the neck and shriveling of the face when the lower limbs are in a very good state of preservation. In old chronic catarrhs of adults they must keep continually blowing the nose.

He cannot breathe through the nose at night, as crusts form in all portions of the mucous membranes. Crusty nostrils with eczema, with oozing eruptions about the face and nose. The mucous discharge is almost as thick and tenacious as in Kalium bichromicum.

Face: The face is sallow, sickly, pale, often withered, shriveled and emaciated.
In deep-seated chest troubles, bronchitis or pneumonia, where the chest is filled up with mucus, it will be seen that the face and forehead are wrinkled from pain, and that the wings of the nose flap with the effort to breathe.

This occurs with all forms of dyspnoea. We see something like it in Ant. tart., the sooty nostrils being wide open and flapping. In Ant. tart. the rattling of the mucus is heard across the room and the patient is seen to be in distress, but if you see the patient lying in bed with the nose flapping and the forehead wrinkled, with rattling in the chest, or a dry, hacking cough and no expectoration, you will often find the particulars of the examination confirm your mind that it is a case for Lyc.

In that exsudative stage of pneumonia, the stage of hepatization, Lyc. may save the life of that patient. It is closely related in the period of hepatization to Phos. and Sulph.

The Sulph. patient is cold; there is no tendency to reaction; he feels the load in the chest, and examination of the chest shows that hepatization is marked. He wants to lie still and is evidently about to die. Sulphur will help him.

It does not have the flapping of the nose, nor the wrinkles upon the forehead, like Lyc. In the brain complaints of Stramonium, the forehead wrinkles, and in the chest complaints of Lyc. the forehead wrinkles, and their wrinkles are somewhat alike. You go to a semi-conscious patient suffering from cerebral congestion and watch him; he is wild, the eyes are glassy, the forehead wrinkled and the tendency is to activity of the mind.

That is not Lyc. but Stram. By close observation these practical things will lead you to distinguish, almost instantaneously, between Stramonium in its head troubles, and Lyc. in the advanced stage of pneumonia.
The face is often covered with copper-colored eruptions, such as we find in syphilis, and hence it is that Lyc. is sometimes useful in old cases of syphilis, cases which have affected the nose, with necrosis or caries of the nasal bones, and the catarrhal symptoms already described. About the face also there is much twitching.

You will see by the study of the face that his face conforms to his sensations. lie is an oversensitive patient and at every jar or noise, such as the slamming of a door, or the ringing of a bell, he wrinkles his face. He is disturbed, and you see it expressed upon his countenance. He has a sickly wrinkled countenance, with contracted eyebrows in complaints of the abdomen as well as in chest complaints.

We also see that the jaw drops as in Opium and Muriaticum acid. This occurs in a state marked by great exhaustion and indicates a fatal tendency, It is especially marked in typhoid when the patient picks at the bed clothes, slides down in bed, wants almost nothing, and can hardly be aroused.
It is the expression of the last stage of the disease, a low type of fever, typhoids, septic and zymotic diseases. Under the jaw

there is often glandular swelling, swelling of the parotid and submaxillary glands. The swelling is sometimes cellular and the neck muscles are involved. The tendency is to suppuration of these glands, and swellings about the neck in scarlet fever and diphtheria.
Throat: The next important feature we notice are the throat symptoms.
It was mentioned when going over the general state that the striking feature of Lyc. in regard to direction is that its symptoms seem to spread from right to left; we notice that the right foot is cold and the left is warm; the right knee is affected; if the pains are movable they go from right to left.

Most complaints seem to travel from right to left, or to affect the right side more than the left. This is also true of sore throats; a quinsy affecting the right side will run its course, and when about finished the left tonsil will become inflamed and suppurate if the appropriate remedy be not administered.

The common sore throat mill commence on the right side, the next day both sides will be affected, the inflammation having extended to the left side. This remedy has all kinds of pains in the throat and fauces. It is useful in cases of diphtheria when the membrane commences on the right side of the throat and spreads over towards the left.

Patches, will be seen one day on the right side and the next day on the left side. We have noticed also that complaints in Lyc. spread from above down, so it is with these exudations.

They often commence in the upper part of the pharynx and spread down into the throat. Lyc. has cured many such cases. It is the case sometimes that Lyc. is better lay holding cold water in the mouth, but the usual Lyc. sore throat is better from swallowing warm drinks. It is a feature whereby it is possible to distinguish Lachesis from Lycopodium. Lachesis is better from cold and has spasms of the throat from attempting to drink warm drinks, while Lyc. is better from warm drinks, though sometimes better from cold drinks. Lyc. does not sleep into the suffocation and constriction of the throat and dyspnoea as in Lach. The throat is extremely painful, it has all the violence of the worst cases of diphtheria. It has the zymosis.

Stomach and abdomen: The stomach and abdominal symptoms are intermingled.
There is a sense of satiety, an entire lack of appetite. He feels so full that he cannot eat. This sense of fullness may not come on until he has swallowed a mouthful of food; he goes to the table hungry, but the first mouthful fills him up. After eating he is distended with flatus, and gets momentary relief from belching, yet he remains distended. Nausea and vomiting; gnawing pains in stomach as in gastritis; catarrh burning in ulcers and cancer; pains immediately after eating; vomiting of bile, coffee ground vomit, black, inky vomit.

Under Lyc. apparently malignant cases have their life prolonged. The case is so modified that, instead of culminating in a few months, the patient may last for years. Right hypochondrium swollen as in liver troubles.
Pain in liver, recurrent bilious attacks with vomiting of bile. He is subject to gall stone colic. After Lyc. the attacks come less frequently, the bilious secretion become normal and the gall stones have a spongy appearance as though being dissolved.
Lyc. patients are always belching; they have eructations that are sour and acrid like strong acid burning the pharynx.
"Sour stomach," sour vomiting, flatus, distension and pain after eating, with a sense of fullness.
Awful goneness," or weakness, in stomach, not relieved by eating (Digit.).
The stomach is worse by cold drinks, and often relieved by warm drinks. In the stomach and intestines there is a great commotion, noisy rumbling, rolling of flatus as though fermentation were going on.
Lyc., China and Carbo veg. are most flatulent remedies and should be compared.
The stomach symptoms are worse or brought on from cold drinks, beer, coffee or fruit, and a diarrhoea follows. Old chronic dyspeptics, emaciated, wrinkled, tired and angular patients,

everything eaten turns to wind. Lycopodium is useful in old tired patients with feeble reaction and feebleness of all the functions, with a tendency to run down and not convalesce.
This patient has most troublesome constipation. He goes for days without any desire, and although the rectum is full there is no urging. Inactivity of intestinal canal. Ineffectual urging to stool. Stool hard, difficult, small and incomplete.
The first part of the stool is hard and difficult to start, but the last part in soft or thin and gushing following by faintness and weakness. Lyc. patients have diarrhoea and all kinds of stool.
So you will see from reading the text that the characteristic of Lyc. is not in the stool. Any kind of diarrhoea, if the other Lyc. symptoms are present, will be cured by Lyc. It has troublesome hemorrhoids, but they are nondescript. Any kind of hemorrhoids may be cured by Lyc. if the flatulence, the stomach symptoms, the mental symptoms, and the general symptoms of Lyc. are present, because the hoemorrhoidal symptoms are numerous.

Kidneys: The kidneys furnish any symptoms and may be the key to Lycopodium in many instances.

There seems to be the same inactivity in the bladder as in the rectum. Though he strain ever so much, he must wait a long time for the urine to pass. It is slow to flow, and flows in a feeble stream. The urine is often muddy with brick dust, or red sand deposits, or on stirring it up it looks like the sediment of fermenting cider. We find this state in febrile conditions. In acute stages of disease; where the red sand appears copiously, Lyc. is often the remedy.
This is a very prominent symptom. In chronic symptoms when the patient feels best the red sand is found in the urine Lyc. has retention of urine and suppression of urine. It has "wetting of the bed" in little ones, involuntarily micturition in sleep, involuntary micturition in typhoids and low fevers.

A marked feature of Lyc. and one of the most prominent of all remedies, is polyuria during the night. He must arise many times at night and pass large quantities of urine, although in the daytime the urine is normal. Enormous quantities of urine, very

clear and of light specific gravity.
Male sexual organs: One of the most prominent remedies in impotency.
Persons of feeble vitality, overwrought persons, overtired persons, with feeble genital organs, seldom need Phosphorus, but Lycopod. is a typical remedy where the young man has abused himself by secret vices and has become tired out in his spine, brain and genital organs.
If this patient makes up his mind that he will live a somewhat decent life and marries, he finds that he is impotent sexually, that he is not able to obtain erections, or that the erections are too feeble, or too short, and that he is not a man.
Lyc. has inflammation of the mucous membrane of the urethra, with a gonorrheal discharge. It is anti-sycotic and has troublesome fig warts upon the male and female genitals.

"Moist condylomata on the penis, enlargement of the prostate gland."
Female sexual organs: It is a great friend of the woman in inflammation and neuralgia of the ovaries, and in inflammation of the uterus.
The neuralgia especially affects the right ovary, with a tendency to the left. Inflammation of the ovaries, when the right is more affected than the left. It has cured cystic tumors of the right ovary.

Lycopodium produces and cures dryness in the vagina in which coition becomes very painful. Burning in the vagina during and after coition. It has disturbance of menstruation. Absence or suppression of menses for many months, the patient being withered, declining, pale and sallow, becoming feeble.
It seems that she has not the vitality to menstruate. It is also suitable in girls at puberty when the time for the first menstrual flow to appear has come, but it does not come. She goes on to 15, 16, 17 or 18 without development, the breasts do not enlarge, the ovaries do not perform their function.

When the symptoms agree Lyc. establishes a reaction, the breasts begin to grow, the womanly bearing begins to come, and the child becomes a woman. It has a wonderful power for developing, and in that respect it is very much like Calc. Phos.

"Discharge of flatus from the vagina."
"Varices of the genitals."

Chest: In the respiratory organs Lyc. furnishes a wonderful remedy.
Dyspnoea and asthmatic breathing in catarrh of the chest. The colds settle in the nose, but nearly always go into the chest, with much whistling and wheezing, and great dyspnoea.

The dyspnoea is worse from walking fast, after exertion and from going up a hill. Throbbing, burning and tickling in the chest. Dry, teasing cough.
Dry cough in emaciated boys. After coming out of pneumonia, the dry, teasing cough remains a long time or there is much whistling and asthmatic breathing.

The extremities are cold while whistling and face are hot, with much coughing and troubles in the chest. He wants to go about with the head uncovered, because there is so much congestion in the head.
This patient has a feeble reaction. There is no tendency to repair and the history of the case is that The troubles have existed since an attack of bronchitis or pneumonia. Besides the dry, teasing cough, Lyc. goes into another state in which there is ulceration, with copious expectoration of thick yellow or green muco-pus, tough and stringy. Finally night sweats, with fever in the afternoon from 4 to 8 o'clock, come on. Its use in the advanced stage of pneumonia, in the period of hepatization, with the wrinkled face and brow, the flapping wings of the nose and scanty expectoration, we have already spoken of.

Then it has marked catarrh of the chest with much rattling, especially in infants.
Rattling in the chest flapping of the wings of the nose and inability to expectorate.
The right lung is most affected, or more likely to be affected than

the left, or it is affected first in double pneumonia and troubles that go from one side to the other. Think of Lyc. among the remedies for neglected pneumonia, in difficult breathing from an accumulation of serum in the pleura and pericardium.

I have mentioned sufficiently the gouty tendencies of the limbs and the nerve symptoms. But there is a restlessness of the lower limbs and which comes on when he thinks of going to sleep and this prevents sleep until midnight.
Much like Arsenicum. It is often a very distressing feature.
Numbness of the limbs. Drawing, tearing in the limbs at night; better by warmth of bed and motion. These pains are sometimes found in chronic intermittent fever and are cured by this remedy.
Sciatica that comes on periodically, better by beat and walking.
Varicose veins of the legs. One foot hot the other cold. Oedema of the feet.
It has all manner of fevers, continued intermittent and remittent.
It is especially suitable in old age, and in premature old age, when a person at 60 years appears to be 80 years, broken down, feeble and tired.

It is eminently suited in complaints of weakly constitutions. It is suitable in various dropsies, associated with liver and heart affections. Scabs remain upon the skin, do not separate; they crust over and the crust does not fall, or may become laminated like rupia.
Sulphur, Graph. and Calc. are not longer acting or deeper acting than Lyc. These substances that seem to be so inert in their crude form come out strongest when potentized and form medicines of wonderful use.

| **Lycopodium Constituion** | By: girilal<br>New Jersey USA | September 15 2006 |
|---|---|---|

Lycopodium Constituion

(A Military General)
1. Mildness (Tolerance)

2. Helplessness feeling
3. Yielding disposition

LycopodiumMildness (Tolerance)

PetroleumCan not Tolerate
Helplessness feeling Yielding disposition

Lycopodium & Platina Gets the job done by bullying.
Phosphorus Gets the job done by love and affection.

Lycopodium needs all of these three rubrics. It is close to Pulsatilla and Cocculus.
Other rubrics

1. Aversion to quarrel
2. Cowardice
3. Hard for inferiors, kind for superiors
4. Estranged from Family but kind to strangers (Nux Vomica)
5. Fears dark
6. Fears ghosts (Only Lycopodium)

Lycopodium loves the power. He can do anything to get the power. He is Hard for inferiors, kind for superiors.
These children are often fearful and cowardly, but try not to show it. Inside they feel lack of confidence.
Often raised by parents who constantly put them down and tell them they can not do anything right.
These children boss others around especially children younger than themselves and may even assume the role of class clown.
They are reluctant to try new thing for the fear of failing.
Their food craving is sweets and a tendency towards hypoglycemia (low blood sugar).

| **Lycopodium Constituion/Personality** | By: sammy<br>Malaysia | September 23 2006 |

Lycopodium clavatum (Wolf's Foot)

Wolf's Foot, is a mosslike plant. It exists already for ages on this planet in an almost unaltered form; Lycopodium clavatum has proven to survive many changes in climate and environment.

The homoeopathic Lycopodium-personality shows a great tenacity and a strong adaptability to many circumstances. How do they manage that? Lycopodiums are usually smart and intelligent people. They know the rules, adapt themselves to social standards and they are diplomatic. They are charming in a polite way, like the classical English butler, or like the actor David Niven. They don't really have high ideals or extravagant ways of living. Emotionally they know little ups and downs; in personal matters they prefer to keep a certain distance. They regard arguing a bit beneath one's station; they do not argue because they are convinced that they are right or they do nor argue out of fear of being defeated. They easily forgive and forget.

For Lycopodiums it is very important to keep up the image of getting on well with everybody and being an intellectual person. For that purpose they will gather a lot of knowledge, and they love it to be flattered. This outer appearance of a popular, polite and well-educated person serves as a defense for their inner vulnerability.

The vulnerability of Lycopodium can be understood as a duality between their ambition and their uncertainty. They fancy a good position, although without the final responsibility. They need it to feel important with other people depending on them. What means that they fear competition and criticism. Lycopodiums will do a lot to stay in charge: if they consider it useful they will intrigue, dominate, flatter, ridicule people, become mean or haughty, arrogant, cunning, abusive and quarrelsome; as long as they can 'survive'. They often use humor to stay at a distance, as a survival-mechanism (like Woody Allen). They want nobody to know that deep inside they feel very insecure en helpless. It has to remain secret that they highly fear new things, people and appearing in public. (These are the persons who remain intense nervous before an appearance, even if they have already done it a hundred times.) And they also want no one to know that they have problems with relationships, because they cannot deal with intimacy and responsibility. This can work out as an aversion towards the partner or the children, in having several partners so no one will really come very close, in dictatorial behavior towards the partner, or in having sex with hookers instead of the partner. And last but not least it should remain unnoticed that they have problems with concentrating and memorizing, so in reality it is very hard for them to be the intellectual or great person they desire to be.

Try to imagine their inner state: having problems with the emotional side of life they focus on the intellectual side, but also that is difficult because of a lacking concentration and memory, and at the same time nobody should know because they want to keep up appearances. They wear a big mask to hide an inner feeling of being inadequate. Lycopodiums have an enormous fear of failure and a great fear of undertaking. They prefer being conservative. It is understandable that they prefer it to be surrounded by weaker people, although their dominance is often exercised in a subtle way. At work for instance a Lycopodium-character can act very reasonable and even yielding, but at home he or she can turn out to be a real tyrant. Another way of dealing with their imperfection is simply denying their faults and problems.

These people actually only trust themselves. Their skepticism and suspicion can work out positive - in being practical and not expecting too much of others - but also negative - in under-estimating or denying ones capacities. They can be very greedy.

Lycopodiums often have complaints on the right side (being the rational side) of the body, or starting on the right side. There are many problems concerning sexuality and the genitals. With their fear of intimacy and their fear of failure many Lycopodium-men experience problems with having erections and ejaculations. In

Lycopodium-women often the vagina is too dry for sexual intercourse. They urinate extra at night and there can be red sand in the urine, accompanied by pain in the kidney region. These people experience many problems with the digestion; there are liver or gall problems, gastric affections, a bloated feeling, many eructation, flatulence, constipation or diarrhea, a feeling of fullness in the stomach already after a few mouthfuls of food, a sour taste in the mouth. They prefer sweets, warm food and warm drinks.

Between 16.00 and 20.00 o'clock Lycopodiums often experience a dip in their energy level, with a desire to eat something sweet or sleepiness.

Small baby of about 4 years have inguinal hernia in right sside. Is it curable by homeopathy

| | | |
|---|---|---|
| **Re:Lycopodium** | By: lal_anar | October 28 2014 |

inguinal hernia only fixable via surgery.

i am firm believer of homeopathy without any doubt in curing power of homeopathy.

plz do not spend time taking homeopathy med or listening to homeo drs who claimed that inguinal hernia cured by homeopathy.

LYCOPUS VIRGINICUS
Bugle-weed

Lower the blood pressure, reduces the rate of the heart and increases the length of systole to a great degree. Passive hæmorrhages (Adrenaline 6x).

A heart remedy, and of use in exophthalmic goitre and hæmorrhoidal bleeding. Indicated in diseases with tumultuous action of the heart and more or less pain. Hæmoptysis due to valvular heart disease. Beneficial in toxic goitre used in the pre-operative stage dose, 5 drops of tincture (Beebe).

Head.--Frontal headache; worse, frontal eminences; often succeeded by labored heart. Nosebleed.

Eyes.--Protrusion, pressing, outward, with tumultuous action of heart. Supraorbital pain, with aching in testicles.

Mouth.--Toothache in lower molars.

Heart.--Rapid heart action of smokers. Præcordial pain; constriction, tenderness, pulse, weak, irregular, intermittent, tremulous, rapid. Cyanosis. Heart's action tumultuous and forcible. Palpitation from nervous irritation, with oppression around heart. Rheumatoid, flying pains, associated with heart disease. Cardiac asthma (Sumbul).

Respiratory.--Wheezing. Cough, with hæmoptysis, bleeding small but frequent.

Urine.--Profuse flow of limpid, watery urine, especially when the heart is most irritable; also scanty urine. Bladder feels distended when empty. Diabetes. Pain in testicles.

Rectum.--Bleeding from rectum. Hæmorrhoids.

Sleep.--Wakefulness and morbid vigilance with inordinately active, but weak circulation.

Relationship.--Compare: Ephedra-Teamsters Tea--(in exophthalmic goitre; eyes feel pushed out with tumultuous action of heart); Fucus; Spartein; Cratægus. Adrenaline 6x.

Dose.--First to thirtieth potency.

Good wishes. Milap Singh

I take armor thyroid for low thyroid, but I have very high blood pressure. Can I take Lycopus Virginicus since it helps high thyroid?

| **Re:LYCOPUS VIRGINICUS** | By: udaya kumar<br>-- | July 23 2011 |
|---|---|---|

I wish you started a new thread. Lycopous is indicated in hyperthyroidism as per the symptoms. Exophthalmic(protruding and pressing eye balls) is specific and leading symptom with goitre, Since you have low thyroid I should consider you as having an underactive thyroid gland and therefore hypothyroidism, in the absence of any other symptoms mentioned or readings specified, I have a feeling there is an Hashimoto factor.
Lycopus have prominent heart symptoms and heart symptoms have not been mentioned by you at all. therefore I would not suggest it. You may look towards Iodium.

LYSSINUM
Lyssin-Saliva of Rabid Dog
(HYDROPHOBINUM)

Affects principally the nervous system; aching in bones. Complaints from abnormal sexual desire. Convulsions brought on by dazzling light or sight of running water.

Head.--Lyssophobia; fear of becoming mad. Emotion and bad news aggravate; also, thinking of fluids. Hypersensitiveness of all senses. Chronic headache. Boring pain in forehead.

Mouth.--Constant spitting; saliva tough, viscid. Sore throat; constant desire to swallow, which is difficult; gagging when swallowing water. Froths at mouth.

Male.--Lascivious; priapism, with frequent emissions. No emission during coition. Atrophy of testicles. Complaints from abnormal sexual desire.

Female.--Uterine sensitiveness; conscious of womb (Helon). Feels prolapsed. Vagina sensitive, rendering coition painful (Berberis). Uterine displacements.

Respiratory.--Voice altered in tone. Breathing held for a time. Spasmodic contraction of respiratory muscles.

Stool.--Desire for stool on hearing or seeing running water. Profuse, watery stools, with pain in bowels; worse, evening. Constant desire to urinate on seeing running water.

Modalities.--Worse, sight or sound of running water or pouring water, or even thinking of fluids; dazzling or reflected light; heat of sun; stooping.

Relationship.--Compare: Xanthium spinosum-Cockle--(said to be specific for hydrophobia and is recommended for chronic cystitis in women). Canth; Bell; Stram; Lach; Nat mur.

Dose.--Thirtieth potency.

Good wishes. Milap Singh

Magnesia Carbonica
This remedy has only been partially proved, and comes to us now as Hahnemann left it.
The mental symptoms and symptoms of some portions of the body and particulars have not been fully brought out. The remedy really needs reproving with high potencies upon sensitive provers that the finer shades may be understood. I would not speak of it but for the fact that it relates to a class of cases so very important that you will not be able to get along without it. It is related to the older and deeper psoric sickness. It is deep acting and long acting and permeates the economy as thoroughly as Sulphur.
General features: Some of the most striking general features are: Amelioration from motion; desire for open air, yet very sensitive to cold air; wants to be covered during all stages of fever; daily evening fevers; symptoms recurring every twenty-one days. Sensation of heat and even sweat from eating and drinking warm things; evening thirst.
The salts of Magnesia are not new to the medical profession as

remedies. Especially is the one under consideration so well known in its action upon the intestinal canal that it has for a long time been "my lady's" habitual resort for sour stomach and constipated bowels. Of course, then it should become a very useful remedy for diarrhœa in the hands of a Homœopath, and so it is. The kind of diarrhœa to which it is most applicable is - "Stools green and frothy like the scum of a frog pond." All of the Magnesias are great pain producers, consequently pain relievers, and, as might be expected, the stools of Magnesia carb. are preceded by griping, doubling-up colic. So far as colic is concerned, sometimes it might be difficult to choose between Magnesia carb. and Colocynth, but the stools are not alike. Rheum comes nearest to Magnesia carb., in that both have colic before stool, sour stool and sour smell of the whole body; but with Magnesia the green stool stands first and with Rheum the sourness. The stool of Rheum is oftener dark brownish than green. Chamomilla has green stool with much pain, but the stool is watery, while Magnesia carb. is more slimy. Mercury has the slimy stool which may be green also; but with Mercury tenesmus is the leading symptom, and the mouth symptoms and sweat without relief under it are not like the other remedies. Magnesia carb. has toothache which at first sight seems to simulate that of Mercury. It comes in decayed teeth and is worse at night. There is a finer shade of difference, however, that distinguishes them. Mercury is worse from the warmth of the bed (a general characteristic of Mercury), while Magnesia carb. is worse quiet. The patient is obliged to walk about for relief. This kind of toothache is common among pregnant women, and I have often cured it. (Ratanhia.) Once a severe case of coccydynia, was cured, a case of long standing. The pains were sudden, piercing, causing the patient to almost faint away. Magnesia carb. 200th cured promptly. Lobelia inflata has extreme sensitiveness; sits leaned forward to avoid contact of even soft pillow.

Like other Magnesias it has most violent neuralgic pains, pains along the course of nerves, pains so violent that he cannot keep still, and he moves about and is relieved by motion. The provers felt these pains mostly in the head and face, but clinical experience has demonstrated that it has violent neuralgia everywhere.

We are justified from the proving, in considering it as especially related to the left side of the face; neuralgia in the night; driving him out of bed, keeping him in constant motion. As soon as he stops moving the pain becomes very severe, shooting, tearing and cutting.

It has varied eruptions upon the skin; dry scaly, dandruff-like eruptions upon the skin, very unhealthy hair and nails.

Particularly does it affect the teeth and roots of the teeth. In every change of the weather the roots of the teeth become violently painful, burn, shoot and ache continuously. Toothache before and during menstruation.

During pregnancy she suffers all the time with toothache, tearing pains in the left side of the face, although the roots of the teeth are perfectly sound. The hollow teeth are unusually sensitive, and painful. The teeth are so sensitive that they cannot be manipulated by the dentist.

This is like Ant. crud., but Magnesia carb. especially affects the roots of the teeth, while Ant. crud. affects the dentine more particularly. Sensitiveness of the teeth, so that he cannot bite upon the teeth, and the teeth feel too long. Magnesia carb, and China, when no other symptoms are present, are prominent remedies among the affections of the teeth during pregnancy.

There is a kind of marasmus that you will puzzle over if you do not know this remedy. If we analyze the remedy in general, we will see that it produces a state of the body like that prior to tuberculosis.

He does not undergo, repair, he loses flesh, and the muscles become flabby as if some serious disease were coming. In children of tuberculous parents there is that tendency to go into marasmus. The child's muscles are flabby, the child will not thrive in spite of feeding and medicines. It seems to be laying the foundations for some serious trouble.

Finally, it emaciates and the back of the head begins to sink in, as if from atrophy of the cerebellum. The appetite increases for milk and meat and animal broths, and yet they are not digested, and when the milk is taken it continually passes the bowel in the form of white potter's clay, or like putty.

The stool is soft and of the consistency of putty. If you go through a china factory where the men are forming with their hands, in such wonderful manner, all sorts of beautiful dishes, and moulds, you will see that the original clay, as they are manipulating it, is white. It is a perfect picture of the Mag. carb. stool, composed of putty-like undigested milk.

It has been observed, especially among illegitimate infants, those that have been conceived by clandestine coition, that they have a tendency to sinking in the back of the head. The occipital bone will sink in, and the parietal bones jut out over it, and there will be a depression. That is not an uncommon thing in children that go into marasmus. They are very likely to have a potter's clay stool. It does not run, and it is not hard.

The white, hard stool is quite another symptom, and the soft semi-fluid white stool leads to another class of remedies, but this pasty stool, looking as if it could be moulded into any kind of shape, is a Magnesia carb. stool. The puzzle is to find remedies for the cases that were going into marasmus. A large number of them were clandestine babies. It was a sort of Sheltering Arms for these little ones.

The Mag. carb. baby smells sour like the Hepar baby.

Wash it as you will and it smells sour; the perspiration is sour and the whole baby smells sour. It is not especially the stool.

The stool smells strong and pungent putrid, and very often the whole child has a pungent odor, like an unclean baby, though it be well washed.

The Magnesias produce inactivity of the rectum and anus - a paresis. The stool is large and hard, requiring great straining to expel. It is dry, hard and crumbling. The stool will remain partly expelled and then crumble, breaking up in many pieces. Another stool that is laid down in the books as a most striking condition of Magnesia carb. is green; it is the diarrheic stool, and the green part floats upon the watery portion of the stool.

The stool is often lumpy, and liquid.

The lumps lie in the bottom of the vessel, but floating upon the liquid portion of the stool is the green like the scum of the frog pond. This is recognized as one of the most striking features.

"Stools green, like scum on a frog pond; sour, frothy; with white floating lumps like tallow, bloody, mucous."

Floating like lumps of tallow, is more characteristic of

Phosphorus, and many a time has Dulcamara cured it.

The face of the chronic adult case is pale, waxy, sickly and sallow. and you wonder why this patient will not right up, and will not thrive. She has a sickly countenance, her muscles are lax, she becomes so tired and sweats upon little exertion.

She is disturbed in every change of the weather, and is worse at the beginning of menstruation, She seems to take cold whenever menstruation is coming on. She says:

"I know my menstrual period is coming on, because I have a cold in my head."

Magnesia carb. has coryza every month before the monthly period.

These patients take on an appearance as if going into decline, and yet they go on year after year unable to do anything; not able even to keep house, have a violent craving for meat and an aversion to vegetable food, grow thin and increasingly flabby, muscles relaxed, and with tendency to prolapsus. The walls of the abdomen have a tendency to fall down and to be relaxed, and the rings favor the formation of hernia.

That is the kind of relaxation. The nerves are painful, and the muscles are tired. When you have such a case and have prescribed, and they persist in spite of every remedy, you know that the case does not well indicate a remedy that the conditions are latent and there is a tendency to some grave internal disorder. The organs are threatening to break down; the kidneys, the heart, the lungs, or the brain are about to undergo organic change.

We have a catarrhal state in this remedy, but it is a dry catarrh, not much discharge. An old ulcer will dry up and become shiny and discharge almost nothing. The nose is dry and the eyeballs are so dry that the lids stick together and it is difficult to open the eyes. The skin becomes dry and itches and burns. Tendency to dryness of the mucous membranes and dryness of the skin. Dryness is a marked feature of this medicine.

"Inordinate appetite for meat in children."

The stomach is a troublesome organ. The Magnesia carb. patient is always complaining of a sour stomach; sour eructations. Food comes up sour. There is nausea and coming up in the throat of sour food. Pains in the stomach after eating

an ordinary amount of food; bloated after eating; much flatulence after eating. The stomach digests the food slowly and it becomes sour.
This remedy is especially useful if the history has been a tubercular one. Losing flesh and craving for meat in those who are tubercular, or in those, that are from tubercular parents.
Patients suffering from a dry cough.
Dry cough before the evening chill like Rhus tox. There are persons who have simply this tendency who go along year after year in this withered state, with the little hacking cough, not rousing up into much. Finally some favorable circumstance arises and the tuberculosis comes on rapidly after it has remained in a sluggish state for a long time.
There are a few remedies more likely to be associated with that condition than any others, Arsenicum, Calc. carb., Lycopodium, Magnesia carb. and Tuberc. They fit into this lingering state, this prelude to active phthisis.
They sometimes set a patient thriving, but mind you, these cases are hard cases to manage. They are difficult to find remedies for. Their trouble is so latent, the symptoms do not come out, and sometimes you have to read between the lines.
They are the one-sided cases spoken of by Hahnemann.
In addition to this dry, tickling cough, which is not mentioned in the books, we find
"Cough, spasmodic at night from tickling in the larynx."
"Sleepiness during the day and sleeplessness at night."
When you have seen many of these cases that are threatening to go into phthisis, you will notice that it is a general feature with all of them.
"Doctor, I am so tired in the morning; while I sleep some in the night, in the morning I feel as if I had not slept."
Always tired and relaxed. Most of these subjects are cold and chilly. This, state has not been bought out yet in the remedy, but clinically it relates to cold and chilly patients. Patients who say that they have not much blood.

MAGNESIUM MURIATICUM
Muriate of Magnesia
(MAGNESIA MURIATICA)

A liver remedy with pronounced characteristic constipation. Chronic liver affections with tenderness and pain, extending to spine and epigastrium, worse after food. Especially adapted to diseases of women, with a long history of indigestion and uterine disease; children who cannot digest milk. Evil effects of sea bathing.

Head.--Sensitive to noise; bursting headache; worse, motion, open air; better, pressure, and wrapping up warmly (Sil; Stront). Much sweating of head (Calc, Sil). Facial neuralgia pains, dull, aching, worse damp weather, slightest draft, better pressure heat.

Nose.--Nostrils ulcerated, Coryza. Nose stopped and fluent. Loss of smell and taste, following catarrh. Cannot lie down. Must breathe through mouth.

Mouth.--Blisters on lips. Gums swollen, bleed easily. Tongue feels burnt and scalded. Throat dry, with hoarseness.

Stomach.--Appetite poor, had taste in mouth. Eructations like rotten eggs. Continued rising of while froth into mouth Cannot digest milk. Urine can be passed only by pressing abdominal muscles.

Abdomen.--Pressing pain in liver; worse lying on right side. Liver enlarged with bloating of abdomen; yellow tongue. Congenital scrotal hernia. Must use abdominal muscles to enable him to urinate.

Urine.--Urine difficult to void. Bladder can only be emptied by straining and pressure.

Bowels.--Constipation of infants during dentition; only passing small quantity; stools knotty, like sheep's dung, crumbling at verge of anus. Painful smarting hæmorrhoids.

Female.--Menses black, clotted. Pain in back and thighs. Metrorrhagia; worse at night. Great excitement at every period. Leucorrhœa with every stool and after exercise. Tinea ciliaris, eruptions in face and forehead worse before menses.

Heart.--Palpitation and cardiac pain while sitting; better by moving about (Gels). Functional cardiac affections with liver enlargement.

Respiration.--Spasmodic dry cough; worse forepart of night, with burning and sore chest.

Extremities.--Pain in back and hips; in arms and legs. Arms "Go to sleep" when waking in morning.

Sleep.--Sleep during day; restless at night on account of heat and shock: anxious dreams.

Modalities.--Worse, immediately after eating, lying on right side: from sea bathing. Better, from pressure, motion: open air, except headache.

Relationship.--Antidotes: Camph; Cham.

Compare: Nat m; Puls; Sep; Amm m; Nasturtium equaticum - Water-cress--(useful in scorbutic affections and constipation, related to strictures of urinary apparatus; supposed to be aphrodisiacal in its action. Is also antidotal to tobacco narcosis and sedative in neurotic affections, neurasthenia, hysteria. Cirrhosis of liver and dropsy).

Dose.--5 drops of tincture. Third to 200th potency.

+
-

colored lights before eyes.

Ears.--Severe neuralgic pain; worse behind right ear; worse, by going into cold air, and washing face and neck with cold water.

Mouth.--Toothache; better by heat and hot liquids. Ulceration of teeth, with swelling of glands of face, throat and neck and swelling of tongue. Complaints of teething children. Spasms without febrile symptoms.

Throat.--Soreness and stiffness, especially right side; parts seem puffy, with chilliness, and aching all over.

Stomach.-- Hiccough, with retching day and night. Thirst for very cold drinks.

Abdomen.--Enteralgia, relieved by pressure. Flatulent colic, forcing patient to bend double; relieved by rubbing, warmth, pressure; accompanied with belching of gas, which gives no relief. Bloated, full sensation in abdomen; must loosen clothing, walk about and constantly pass flatus. Constipation in rheumatic subjects due to flatulence and indigestion.

Female.--Menstrual colic. Membranous dysmenorrhœa. Menses too early, dark, stringy. Swelling of external parts. Ovarian neuralgia. Vaginismus.

Respiratory.--Asthmatic oppression of chest. Dry, tickling cough. Spasmodic cough, with difficulty in lying down. Whooping-cough (Corall). Voice hoarse, larynx sore and raw. Intercostal neuralgia.

Heart.--Angina pectoris. Nervous spasmodic palpitation. Constricting pains around heart.

Fever.--Chilliness after dinner, in evening. Chills run up and down the back, with shivering, followed by a suffocating sensation.

Extremities.--Involuntary shaking of hands. Paralysis agitans. Cramps in calves. Sciatica; feet very tender. Darting pains. Twitchings. Chorea. Writers' and players' cramp. Tetanic spasms. Weakness in arms and hands, finger-tips stiff and numb. General muscular weakness.

Modalities.--Worse, right side, cold, touch, night. Better, warmth, bending double, pressure, friction.

Relationship.--Compare: Kali phos; Colocy; Silica; Zinc; Diosc.

Antidotes: Bell; Gels; Lach.

Dose.--First to twelfth potency. Sometimes the highest potencies are preferable. Acts especially well, given in hot water.

MAGNESIUM SULPHURICUM
Epsom Salt
(MAGNESIA SULPHURICA)

The skin, urinary, and female symptoms are most marked. The purgative action of Sulphate of Magnesia is not a quality of the drug, but a quality of its physical state, which renders its absorption impossible. The properties inherent in the substance itself can only be discovered by attenuation (Percy Wilde).

Head.--Apprehensive; vertigo; head heavy during menses. Eyes burn, noises in ears.

Stomach.--Frequent eructations, tasting like bad eggs. Rising of water in mouth.

Urinary.--Stitches and burning in the orifice of the urethra after urinating. Stream intermits and dribbles. The urine passed in the morning copious, bright yellow, soon becomes turbid, and deposits a copious red sediment. The urine is greenish as passed; is of a clear color, and in a large quantity. Diabetes (Phos ac; Lact ac; Ars brom).

Female.--Thick leucorrhœa, as profuse as the menses, with weary pain in the small of the back and thighs, on moving about. Some blood from the vagina between the menses. Menstruation returned after fourteen days; the discharge was thick, black, and profuse. Menses too early, intermit.

Neck and Back.--Bruised and ulcerative pain between the shoulders, with a feeling as of a lump as large as the first, on which account she could not lie upon her back or side; relieved by rubbing. Violent pain in the small of the back, as if bruised, and as before menstruation.

Extremities.--The left arm and foot fall asleep in bed, in the morning after waking.

Skin.--Small pimples over the whole body, that itch violently. Suppressed itch (Sulph). Crawling in the tips of the fingers of the left hand; better on rubbing. Warts. Erysipelas (applied locally as a saturated solution). Dropsy (physiological doses).

Fever.--Chill from 9 to 10 am. Shuddering in back; heat in one part and chill in another.

Relationship.--It is claimed that the addition of a small amount of Magnes. Sulph to the usual hypodermic of Morphine increases the value of the hypodermic from 50 to 100 %.

Physiologic Dosage.--Magnes. Sulph is of diagnostic and therapeutic value in Gallstone colic. From 2 to 4 teaspoonfuls in glass hot water taken at onset of a colicky attack may abort or stop the colic.

Epsom salt is one of the most active saline cathertics, operating with little pain or nausea, especially if pure. It has but little if any effect on intestinal peristalsis, its action causing a rush of fluid into the intestine, which by producing a distention of the bowel produces evacuation. It causes little or no irritation in the intestine. In common with the other salines, it is the classical evacuant to be employed in connection with mercurials and anthelmintics and in cases of poisoning. Epsom salt usually acts within from one to two hours, more quickly if taken in hot water and in the morning before breakfast. The ordinary dose as a mild laxative is a heaping teaspoonful; as a cathartic, two to four teaspoonfuls. The taste may be improved, if necessary, by the addition of a little lemon juice and sugar.

Besides its chief use as a saline cathartic, magnesium sulphate is used to a considerable extent externally in saturated solution as an antiphlogistic and antipruritic in erysipelas, ivy poisoning, cellulitis and other local inflammations. Use on compresses saturated with solution.

Dose.--The pure salt to the third potency. Locally 1:4 in water in septic conditions, erysipelas, orchitis, boils, etc.

MAGNOLIA GRANDIFLORA
Magnolia

Rheumatism and cardiac lesions are prominent features in toe symptomatology of this drug. Stiffness and soreness. Alternating pains between spleen and heart. Patient tired and stiff. Soreness when quiet. Erratic shifting of pains.

Heart.--Oppression of chest with inability to expand the lungs. Feeling of a large bolus of food which distressed the stomach. Suffocated feeling when walking fast or lying on left side. Dyspnœa. Crampy pain in heart. Angina pectoris. Endocarditis and pericarditis. Tendency to faint. Sensation as if heart had stopped beating. Pains around heart accompanied by itching of the feet.

Extremities.--Stiffness and sharp erratic pains; worse in joints. Feet itch. Numbness in left arm. Rheumatic pain in clavicles. Shooting in all limbs.

Modalities.--Worse, damp air, lying on left side; in morning on first rising. Better, dry weather, motion; intermenstrual flow (Ham; Bovista; Bell; Elaps).

Relationship.--Compare: Rhus; Dulcam; Aurum

Dose.--Third potency.

MANCINELLA
Hippomane-Manganeel Apple

Skin symptoms most marked. Dermatitis, with excessive vesiculation, oozing of sticky serum and formation of crusts. To be remembered in mental depressed states at puberty and at climacteric, with exalted sexuality (Hering). Loss of vision. Pain in the thumb.

Mind.--Silent mood, sadness. Wandering thoughts. Sudden vanishing of thought. Bashful. Fear of becoming insane.

Head.--Vertigo; head feels lights, empty. Scalp itches. Hair falls out after acute sickness.

Nose.--Illusions of smell; of gunpowder, dung, etc. Pressure at root of nose.

Mouth.--Feels peppery. Copious, offensive saliva. Taste of blood. Burning of fauces. Dysphagia from constriction of throat and œsophagus.

Stomach.--Continual choking sensation rising from stomach. Vomiting of ingesta, followed by gripping and copious stools. Burning pains and black vomit.

Extremities.--Icy coldness of hands and feet. Pain in thumb.

Skin.--Intense erythema. Vesicles. Fungoid growths. Erysipelas. Large blisters, as from scalds. Heavy, brown crusts and scabs. Pemphigus.

Relationship.--Compare: Croton; Jatropha; Canth; Anacard.

Dose.--Sixth to thirtieth potency.

Manganese deposits in alluvium adjacent to the Red Sea, Sudan

MANGANUM ACETICUM
Manganese Acetate

Manganum causes anæmia with destruction of the red corpuscles. Jaundice, nephritis with albuminuria. Fatty degeneration of liver. Paralysis agitans. Cellulitis, subacute stage, promotes suppuration and hastens regeneration.

Symptoms of chronic poisoning, according to Professor yon Jaksch, were involuntary laughter and involuntary weeping and walking backwards. Strongly exaggerated reflexes and physical disturbances, evidenced by men making fun of each other's gait. Paraplegia progressive; wasting, feeble and staggering gait.

Inflammation of bones or joints, with nightly digging pains Asthmatic persons who cannot lie on a feather pillow. Syphilitic and chlorotic patients with general anæmia and paralytic symptoms often are benefited by this drug. Gout. Chronic arthritis. For speakers and singers. Great accumulation of mucus. Growing pains and weak ankles. General soreness and aching; every part of the body feels sore when touched; early tuberculosis.

Head.--Anxiety and fear; better lying down. Feels large and heavy, with rush of blood; pain from above downward. Field of vision contracted. Stolidy mask-like face.

Mouth.--Nodes on palate. Toothache; worse, anything cold (Coff opposite). Hemming all the time. Low, monotonous voice.

Nose.--Dry, obstructed. Chronic catarrh, with bleeding, dryness; worse in cold damp weather.

Ears.--Feel stopped; cracking on blowing nose. Pain from other parts extends to ears. Deafness in damp weather. Whistling tinnitus.

Alimentary Canal.--Tongue sore and irritable with ulcers or warts. Flatulence; chronic enlargement of liver.

Respiratory.--Chronic hoarseness. Larynx dry, rough, constricted. Tuberculosis of larynx. Cough; worse evening, and better lying down and worse in damp weather. Mucus difficult to loosen. Stitches in larynx extending to ear. Heat in chest. Hæmoptysis. Every cold rouses up a bronchitis (Dulc).

Female.--Derangements of menstruation, amenorrhœa; menses too early and scanty, in anæmic subjects. Flushes of heat at climacteric.

Extremities.--Muscular twitching. Cramps in calves. Stiffness in muscles of legs. Inflammation of bones and joints with insupportable nightly digging pains. Every part of body feels sore when touched. Cannot walk backwards without falling. Tending to fall forward. Walks stooping forward. Legs feel numb.

Wilson's disease. Paralysis agitans. Peculiar slapping gait, walks on metacarpo-phalangeal joint; walks backwards. Ankles painful. Bones very sensitive. Shiny red swelling of joints. Knees pain and itch. Rheumatism of feet. Intolerable pain in skin of lower limbs. Burning spots about joints. Periosteal inflammation. Suppuration of skin around joints.

Sleep.--Languor and sleepiness. Vivid dreams. Sleepy very early in evening.

Skin.--Suppuration of skin around joints. Red, elevated spots. Itching; better, scratching. Deep cracks in bends of elbows, etc. Psoriasis and pityriasis. Burning around ulcers. Chronic eczema associated with amenorrhœa, worse at menstrual period or at menopause.

Modalities.--Worse, cold wet weather, change of weather. Better, lying down (cough)

Relationship.--Compare: Colloidal Manganese (Boils and other staphylococcal infections); Mangan mur (painful ankles, bone-pains); Mangan oxydat (pain in tibia, dysmenorrhœa, colic, and diarrhœa. Easily fatigued and heated; sleepy. Stolid, mask-like facies; low monotonous voice "Economical Speech". Muscular twitching, cramps in calves; stiff leg muscles; occasional uncontrollable laughter. Peculiar slapping gait. Similar symptoms to paralysis agitans, progressive lenticular degenerations and pseudo sclerosis. Workers in Mangan binoxide are frequently affected with bulbar paralysis. Use 3x homeopathically). Mangan sulph (liver affections, excess of bile; a powerful intestinal stimulant); Argent; Rhus; Sulph.

Antidotes: Coff; Merc.

Dose.--Third to thirtieth potency.

girilal

| **Manganese Constituion/Personality** | By: girilal<br>New Jersey USA | September 21 2006 |
|---|---|---|

Manganese is a widespread metal on Earth. It makes connections with many other elements.

Manganum-characters are flexible; they easily adapt themselves to other people. They feel a great need to help and support others. If they cannot help you they become uneasy and restless; there is an inner drive to connect, to relate to people. Manganums also desire appreciation of their helpfulness; they like to be flattered. If their help remains unnoticed or when it is not valued they become bitter and start pitying themselves: " I worked so hard to make him feel well, and in stead of 'thank you' all I get are reproaches!"

These people are friendly and very sympathetic, lending their ears to listen to the difficulties of fellow men. The homoeopathic Manganum is particularly a remedy for the ears and complaints with hearing. The earache gets worse in cold wind and in cold open air, forcing them to use earplugs. Manganums get earache from laughing, swallowing, talking, touch, rubbing, after eating...everything seems to affect the ear. Well-known complaints are earache, impaired hearing, catarrh of the Eustachian tube, inflammation of the ear, itching of the ear or strange noises in the ear. Blowing the nose ameliorates the hearing. Every cold becomes bronchitis.

Manganese is closely related to iron and shows a similar image of anemia. That makes it a good remedy for pale, anemic looking people. Menstruation is often too early and too weak, or the women bleed in between two periods. During menopause there can be flushes of heat.

All symptoms ameliorate by lying in bed. Manganums feel worse in cold or moist weather, at night, and by movements.

EFT for Pregnancy - Asking Good Questions to Relieve Physical Discomfort
EFT is a wonderful tool to use during pregnancy. A pregnant woman can use EFT to neutralize any negative emotions or fears she may have about pregnancy or labor, and if EFT is thoroughly applied, enjoy relief from physical discomforts as well.
Breastfeeding Questions and Answers
Make sure your baby's head and body is properly supported so her mouth can be squarely over the nipple. Ensure that your baby puts the entire nipple and most of the areola in her mouth. Listen for a rhythmic swallowing as she nurses and you will know you are on the right track.

If you still have pain and soreness even after adjusting your nursing style, contact a lactation consultant for individual training. It is well worth the investment for an individual consultation to get your nursing relationship started with the right technique. For immediate nipple relief you can try expressed breast milk on the nipple area after nursing and let nipples air dry. You can also try medical grade lanolin (if you are not allergic to wool) on your nipples. Soothie Gel Pads can be placed directly on your nipples and worn inside your bra for extra cushion and relief.
My breasts are hard and swollen. What can I do to get some relief?

Engorgement occurs in most nursing women about 72 hours after birth. The best solution is to nurse more frequently until your milk production adjusts. Before nursing, apply warm compresses to your breasts and hand express some milk so that your breast is softened enough for your baby to latch on. To help reduce swelling, apply cold compresses after and in-between nursing. Also, wear a supportive nursing bra 24/7 for support of swollen breasts.

As with any breastfeeding problems that cannot be immediately resolved, consult a lactation consultant ASAP. To find a lactation expert near you, visit the International Lactation Consultant Association at http://ilca.org for a referral. Also, see your doctor for treating any persistent breast problems. Unresolved clogged milk ducts or prolonged engorgement can lead to a serious breast infection caused mastitis that needs to be treated with antibiotics.

| **Matchstick Remedy - A free remedy for many things** | By: girilal<br>New Jersey USA | December 23 2006 |
|---|---|---|

Click picture for many more pictures

1: Traveler’s diarrhea

Anyway: I have discovered that matchstick remedy works well in travelers diarrhea and sickness. Anytime visitors come to India from western countries, they get stomach problems within 3-4 days. More one delays in treating it with antibiotics heavy is the price to be paid.

This time my cousins have these problems, they just came from USA, phosphorous came to my mind and in Haridwar one homeopathy store was far away so I used matchstick remedy and drank up the whole water. The problem solved and this time they need not to take antibiotics.

1. Hold a matchstick near a cupful of water, burn it with other matchstick and immediately dip the burning head (make sure it is still in the process of being ignited). Repeat this step with another matchstick.

2. Put the water in a one liter plastic bottle but half empty so we

can shake it up vigorously. It gets difficult to shake water if bottle is almost full. Add two whole unburned matchsticks in the same water.

3. Tear off a part of striking surface of the matchstick and add it to the same water. Close the lid and shake the bottle vigorously for at least 50 times.

4. Medicine is instantly ready. Take a small spoon of water as remedy. Repeat the dose only if needed. You can remove both burned and unburned 4 matchsticks after two days and store the liquid in refrigerator to avoid the fermentation.

5. If remedy has to be stored, filter the water after 2 days. Bone Necrosis cases need this remedy for prolonged period.

Later on I used this remedy on may people with almost perfect results.

girilal

|---|---|---|

Please explain, about how many times, this match stick remedy was repeated?

| **Re: A free remedy for traveler's diarrhea** | By: sajjadakram | August 6 2007 |
|---|---|---|

Excellent.
GIRILAL,
Do you think that Phos in potency will be effective exactly in the same manner?
SAJJAD.

| **Re: A free remedy for traveler's diarrhea** | By: VAISHDW2<br>Akron, Oh, USa | August 6 2007 |
|---|---|---|

I would request that we have a single separate thread for all such remedies so that everyone can put his experience and we can have a database for such tried and tested things.

| **Re: A free remedy for traveler's diarrhea** | By: girilal<br>New Jersey USA | August 9 2007 |
|---|---|---|

Do you think that Phos in potency will be effective exactly in the same manner?

Dear Sajjad

May be or may be not, because with match stick, it comes lots of combo medicines package, like phosphoric acid, phosphorous, Sulphur, Potassium Carbonate (as flame retardant), Potassium Chlorate(oxidizer), carbo veg. etc. etc.

The whole remedy becomes one polycrest like Lycopodium which is a combination of 50 or more things espacially

Phosphorous and Sulphur, in old times Lycopodium spores were used as fireworks on the stages.

I stumbled upon this remedy by accident, my friend had problems in the mountains and I thought of phosphorous and we used a match stick to make the remedy and he got cured. Later on this remedy worked on many other cases, like psoriosis, skin problems, scurvy etc.

girilal

| **Re: A free remedy for traveler’s diarrhea** | By: sajjadakram | August 9 2007 |
|---|---|---|

Dear Girilal,
Thank you for the information.It is great.i will try it for every kind of diarrhoea and in case of success shall post the result here.
sajjad.

| **Re: A free remedy for traveler’s diarrhea** | By: girilal<br>New Jersey USA | September 1 2007 |
|---|---|---|

2: Bone Necrosis

About ten days ago, I met a 60 years old man on the remote mountains near Gangotri. About 6 months ago a accident caused him a broken nose. Nose was mended but he had pain and could feel lose bones there. No treatment worked.

At that place where any medicine can only be brought from Dehradoon (2 days grulling journey). I suggested him to use this match stick remedy because due to the age I suspected bone necrosis.

When we were coming back, luckily we saw that man again with his sheeps. He said he had a significant relief with this remedy.

girilal

| **Re: Match Stick Remedy - A free remedy for many things** | By: baljeet | September 3 2007 |
|---|---|---|

I had stomach cramps for two days. I was taking loperamide and antibiotic. Then this remedy came to my mind but I just licked the match head.

My stomach was calm instantly. No more antibiotics or any other medicines.

| | | |
|---|---|---|
| **Re: Match Stick Remedy - A free remedy for many things** | By: gavinimurthy | September 3 2007 |

Hi Kuldeep

Your 'match stick' remedy may beat Joe's Arnica in popularity. 🙂

I too will give it a try when I have a chance.

Murthy

| | | |
|---|---|---|
| **Re: Match Stick Remedy - A free remedy for many things** | By: Irm | September 4 2007 |

Anytime I used computer till late night or read a book till late at night, I was unable to sleep due to the running of my mind.

A gentleman with some homeopathy knowedge told me to get Phosphorous-1M from India and take a dose when still at computer or book at late at night or after 10PM.

Then I remembered this matchstick remedy which mentioned phosphorous. Long ago I made this remedy but used it first time few days ago. My mind was very calm even calmer than the ordinary days when trying to sleep. Three times I have used this but next time I will try to lick the matchstick head.

Thanks.

| | | |
|---|---|---|
| **Re: Match Stick Remedy - A free remedy for many things** | By: Joe De Livera<br>Sri Lanka | September 7 2007 |

I would like to share with members my experience in the use of the Match Stick Remedy which Girilal has promoted for stomach problems.

I have prescribed this remedy to 6 patients so far and they all confirm that within a few hours their diarrhea had stopped. Some of these patients had been prescribed antibiotics and other drugs by their doctors but they had failed to arrest the diarrhea which sometimes can only be cured by total abstinence from all food and drink and the patient is put on a IV drip.

Many patients also reported that they had slept very deeply after their dose of the remedy which they had taken shortly before sleep.

The match stick remedy has invariably worked in some miraculous manner and it is my hope that other homeopaths too will use it as the patients will never be out of range of a humble match stick which they can get in any part of the world, and report their findings on this Forum.

| | | |
|---|---|---|
| **Re: Match Stick Remedy - A free remedy for many things** | By: gavinimurthy | September 7 2007 |

Hi

I could solve the mystery. 🙂

This is what a match stick contains.

"Safety matches are designed so that the head can be ignited only by striking on a specially prepared surface on the match package. The tip of the safety match contains antimony trisulfide and an oxidizing agent (such as potassium chlorate), again held in place with casein or glue. The difference is the striking surface on the package contains powdered glass for friction, red phosphorus and glue. When the match is struck the heat of friction converts the red phosphorus, which ignites and, in turn, ignites the head of the match."

http://www.energyquest.ca.gov/ask_quester/answers_general.html

There are two types of matches

'Strike any where' matches which are not available in India, and 'safety' matches, which are standard here.

In these safety match heads there is no phosphorous. The red phosphorous is in the side strip.

The compostion of the 'head' varies widely, depending on the manufacturer.

See this link for further details.

http://www.freepatentsonline.com/4060434.html (scroll to the bottom and look for safety matches tables)

However, the bulk of the head material in ALL safety matches is

POTASSIUM CHLORATE..close to 50 Percent.

It is nothing but our Kali chloricum. (Not Kali.mur)

Now read about Kali chloricum in Boericke.

Stomach.--Feeling of weight in epigastric and umbilical region. Flatulence. Vomiting of greenish-black matter.

Stool.--Diarrhœa; profuse, greenish mucus.

No wonder it works for diarrhoea...

Big applause to Girilal/Kuldeep for this wonderful discovery.

Murthy

| **Re: Match Stick Remedy - A free remedy for many things** | By: HomeoEnthusiast<br>-India- | September 8 2007 |
|---|---|---|

Dear friends,
here is more info on KALI CHLORICUM from the following webpage:
(Allen's Encyclopaedia of Materia Medica)
http://www.farmaciasantantonio.it/Homeoint/allen/k/kali-chlc.htm

STOOL. ► Diarrhœa. ► Violent diarrhœa, always liquid, at last after six days consisting only of mucus, continuing till the ninth day, [2]. [160.] ► (Painful diarrhœa), [15]. ► Copious alvine evacuation, which resembled the operation of a full dose of a refrigerant purging salt (after three hours), [17d]. ► Fæces soft, without pain during the evacuation, [3]. ► Stool somewhat thinner than usual, [3]. ► Liquid stool the next morning, [6]. ► Liquid stools with pain in the pelvic region for ten days, [7]. ► Thin liquid stool, [6]. ► Fæces lighter colored than natural for then days, [18a]. ► Fæces often tinged with green, [24]. ► Stool very dry, at last mixed with mucus and blood, [3]. [170.] ► Stool harder than usual, [4]. ► Stool hard and dry, [3]. ► Stool very indolent, delayed; only occurring at 11.30 P.M., [6]. ► Constipation. ► Torpor of the intestines, indicated by costiveness, which was immediately attended with a moderate degree of proctica marisca, continuing third day, [18]. ► The usual evening stool is omitted, [1].

From Kent's Reversed Repertory:
RECTUM
Rectum, aphthous condition of anus (p. 606)
Rectum, constipation (See Inactivity) (p. 606)
Rectum, diarrhœa (p. 609)
Rectum, diarrhœa, food, fat, after (p. 613)
Rectum, diarrhœa, food, rich, after (p. 613)
Rectum, diarrhœa, indiscretion in eating, after the slightest (p. 613)
Rectum, diarrhœa, pastry, after (p. 614)
Rectum, dryness (p. 616)
Rectum, dysentery (p. 616)

Rectum, hæmorrhage from anus (p. 619)
Rectum, pain (p. 623)
Rectum, pain, tenesmus, stool, during (p. 630)
Rectum, urging, desire (See Tenesmus) (p. 633)

STOOL
Stool, bloody (p. 635)
Stool, copious (p. 636)
Stool, dry (p. 637)
Stool, mucous, slimy (p. 639)
Stool, mucous, bloody (p. 639)
Stool, mucous, white (p. 640)
Stool, mucous, white, milk white (p. 640)
Stool, soft (p. 641)
Stool, white (p. 643)

-rams

| **Re: Match Stick Remedy - A free remedy for many things** | By: girilal<br>New Jersey USA | September 8 2007 |
|---|---|---|

Matchstick remedy can be considered as a one-composite remedy. Still I suggest people to use it as if one needs phosphorous but in emergency.

As told by Erm. Please never lick match head. I have done this experiment on myself and some other people has reported that they get typical phosphorous symptoms by directly licking the red-match-stick's head. I tried it two times at different days and I got insomnia for the both days with mind racing.

Please potentize the remedy to at least 2C or higher and if a significant relief has appeared in some chronic case, raise the daily potency to at least 1C by draining out the liquid but leaving some drops in the bottle and filling up the bottle again by about half and shaking it vigorously.

girilal

| **Re: Match Stick Remedy - A free remedy for many things** | By: gavinimurthy | September 10 2007 |
|---|---|---|

I tried it today for minor stomach discomfort, which looked like typical 'aloe' symptoms. Need to go to the toilet in a hurry.

I took the water as advised after going to the toilet once, and there is no further problem.

The match stick has a black head (not the red one as shown in the picture), and the matches in South India have black heads, as standard.

Murthy

| **Re: Match Stick Remedy - A free remedy for many things** | By: HomeoEnthusiast<br>-India- | September 11 2007 |
|---|---|---|

This morning I woke up with a feeling as if I need to urgently pass stool - and so I rushed to the toilet - and it was a diarrhea. (I have this problem for past 2-3 days, the moment I wake up - and the problem usually ends there). But today there was more to come !
The diarrhea continued unabated - when I immediately remembered the Matchstick remedy and I immediately prepared it and drank it all. The problem is solved. No more diarrhea !

Thanx a lot, Girilal, for this wonderful remedy !! (You are receiving several testimonials !!)

-rams

| **Re: Match Stick Remedy - A free remedy for many things** | By: fredandwilmaflinston | September 14 2007 |
|---|---|---|

In May of this year, I used this remedy for my son's dierrhoes problem. It worked. My son had this same complain again in July while he was in boarding school but this time he himself made this remedy. He was cured again and some his friends also used this remedy and all cured.

Beside this testimonial, I have another thing to share that after taking this remedy I felt that my hair loss has stablized. For the last 15 months I was loosing my hairs fast. Anytime I just pulled my hairs very thin and week hairs came in my hands. But now my hair fall is stablized. I can't say if I am getting new haris but no more falling.

| | | |
|---|---|---|
| **Re: Match Stick Remedy - A free remedy for many things** | By: Joe De Livera<br>Sri Lanka | September 15 2007 |

Arnica 30c in the wet dose a teaspoonful taken twice daily usually helps to replace fallen hair.

Arnica Q mixed with either Coconut or Olive oil and a few drops massaged into the scalp also helps.

| **Re: Match Stick Remedy - A free remedy for many things** | By: star | September 19 2007 |

I tried this remedy and then in about three days I noticed that my skin spots (due to infection with taenia versicolor fungus) have gone fade. Should I continue using this water or just wait and watch.

| | | |
|---|---|---|
| **Re: Match Stick Remedy - A free remedy for many things** | By: girilal<br>New Jersey USA | September 24 2007 |

Yes this remedy definetely-definetely affects fungal infections. 3 people reported this thing.

In two cases they took this remedy for other problems but their never ending fungal infections went away.

And in most cases it did not resolve insomnia as Irm reported.

girilal

| | | |
|---|---|---|
| **Re: Match Stick Remedy - A free remedy for many things** | By: girilal<br>New Jersey USA | October 1 2007 |

A friend reported that he added two match heads in his hari oil and his hair health is getting better. Now he has stronger hairs instead of weekening and falling hairs.

No harm in trying and reporting if one feels like having hair-fall problems.

girilal

| **Re: Match Stick Remedy - A free remedy for many things** | By: Pat2006M | October 2 2007 |
|---|---|---|

This homemade match remedy changed my life forever. It was a great introduction into taking remedies without the need of consulting with my former homeopath.

I graduated to phosphorus 30c. The phosphorus 30c gave me a big boost in energy on a permanent basis and it also helped me get some hours of sleep during the night.

For many years, I was getting very little sleep during night hours. The phosphorus caused permanent changes in my sleep pattern for the better.

It has been over a year since I first did this match remedy as suggested by girilal when I was near death from aggrevations while under the care of my former homeopath.

Always love girilal's low potency prescribing. It got me through a crisis in my life.

This remedy is great proof that low potency homeopathy can be very effective.

THANKS GIRILAL, YOU'RE A GREAT HOMEOPATH!!!

| **MEDORRHINUM** | By: Jayashree<br>Calcutta, India | November 30 2006 |
|---|---|---|

Click picture for many more pictures

MEDORRHINUM
The Gonorrhœal Virus

A powerful and deep-acting medicine, often indicated for chronic ailments due to suppressed gonorrhœa. For women with chronic pelvic disorders. Chronic rheumatism. Great disturbance and irritability of nervous system. Pains intolerable; tensive; nerves quiver and tingle. Children dwarfed and stunted. Chronic catarrhal conditions in children. Nose dirty, tonsils enlarged, thick yellow mucus from nostrils; lips thickened from mouth breathing. State of collapse and trembling all over. History of sycosis. Often restores a gonorrhœal discharge. Intensity of all sensations. Œdema of limbs; dropsy of serous sacs. Disseminated sclerosis.

Mind.--Weak memory. Loses the thread of conversation. Cannot speak without weeping. Time passes too slowly (Cannab ind; Arg n). Is in a great hurry. Hopeless of recovery. Difficult concentration. Fears going insane (Mancinella). Sensibility exalted. Nervous, restless. Fear in the dark and of some one behind her. Melancholy, with suicidal thoughts.

Head.--Burning pain in brain; worse, occiput. Head heavy and drawn backward. Headache from jarring of cars, exhaustion, or hard work. Weight and pressure in vertex. Hair dry, crispy. Itching of scalp; dandruff.

Eyes.--Feels as if she stared at everything. Eyeballs ache. Feels as if sticks in eyes. Lids irritated.

Ears.--Partial deafness, pulsation in ears. Quick, darting pains in right ear.

Nose.--Intense itching. Coldness of tip. Posterior nares obstructed. Chronic nasal and pharyngeal catarrhs.

Face.--Pallor, acne, blotches of reddish color. Small boils break out during menses.

Mouth.--Tongue coated brown and thick, blistered; canker sores. Blisters on inner surface of lips and cheeks.

Stomach.--Coppery taste and eructations of sulphuretted hydrogen. Ravenous hunger soon after eating. Very thirsty. Cravings for liquor, salt, sweets, etc, warm drinks. Pernicious vomiting of pregnancy.

Abdomen.--Violent pain in liver and spleen. Rests more comfortably lying on abdomen.

Stool.--Can pass stool only by leaning very far back. Painful lump sensation on posterior surface of sphincter. Oozing of fetid moisture. Intense itching of anus.

Urine.--Painful tenesmus when urinating. Nocturnal enuresis. Renal colic (Berb; Ocim; Pareir). Urine flows very slowly.

Female.--Intense pruritus. Menses offensive, profuse, dark, clotted; stains difficult to wash out, urinates frequently at that time. Sensitive spot near os uteri. Leucorrhœa thin, acrid, excoriating, fishy odor. Sycotic warts on genitals. Ovarian pain, worse left side, or from ovary to ovary. Sterility. Metrorrhagia. Intense menstrual colic. Breasts cold, sore, and sensitive.

Male.--Nocturnal emissions, followed by great weakness. Impotence. Gleet; whole urethra feels sore. Urethritis. Enlarged and painful prostate with frequent urging and painful urination.

Respiratory.--Much oppression of breathing. Hoarse while reading. Pain and soreness through chest and mammæ. Incessant, dry, night cough. Asthma. Incipient consumption. Larynx feels sore. Dyspnœa; cannot exhale (Samb). Cough; better lying on stomach.

Extremities.--Pain in back, with burning heat. Legs heavy; ache all night; cannot keep them still (Zinc). Ankles easily turn when walking. Burning of hands feet. Finger-joints enlarged, puffy. Gouty concretions. Heels and balls of feet tender (Thuja). Soreness of soles. Restless; better, clutching hands.

Skin.--Yellow. Intense and incessant itching; worse night and when thinking of it. Fiery red rash about anus in babies. Copper-colored spots. Favus. Tumors and abnormal growth.

Fever.--Wants to be fanned all the time. Chills up and down back; coldness of legs, hands, and forearms. Flashes of heat in face and neck. Night-sweat and hectic.

Sleep.--Dreams she is drinking (Ars; Phos). Sleeps in knee-chest position.

Modalities.--Worse, when thinking of ailment, from daylight to sunset, heat, inland. Better, at the seashore, lying on stomach, damp weather (Caust).

Relationship.--Compare: (Lactation: Galega; Lactuca). Sulph; Syphil; Zinc.

Dose.--The very highest potencies only of service. Must not be repeated often.

| **Re: MEDORRHINUM** | By: Pat2006M | February 5 2007 |

Why does this read: Gonorrhœal Virus ?

Does this mean this remedy is made from the gonorrhoeal virus?

| | | |
|---|---|---|
| **Re: MEDORRHINUM** | By: gavinimurthy | February 13 2007 |

Yes.

Murthy

| | | |
|---|---|---|
| **Re: MEDORRHINUM** | By: JacobScott<br>England, UK. | February 27 2007 |

Hmm, technically it is the discharge from the infected genitalia, but yes, this necessarily contains the 'virus' too.

"When dealing with absolute truth, there is neither room for emotion, nor individual interpretation of what necessarily is, irrefutable fact."

| | | |
|---|---|---|
| **Re: MEDORRHINUM** | By: MORRASHID<br>Ontario, CANADA | March 2 2007 |

Gonorrhea is caused by a bacterium, Neisseria gonorrhoeae, not by virus.

M. Or-Rashid
Ontario, Canada

MELILOTUS OFFICINALIS
Yellow Melilot - Sweet Clover
(MELILOTUS)

Congestions and hæmorrhages seem to be the special manifestations of this drug. Violent congestive and nervous headaches. Infantile spasms. Epilepsy from blow on head. Pain and debility point to it. Coldness but also increase of temperature; tenderness, and pain. Muscular system depressed. Dreams and emissions.

Mind.--Unable to fix mind. Memory treacherous. Stupor. Wants to run away and hide. Delusions; thinks every one is looking at her, fears to talk loud, and wants to run away, etc.

Head.--Headache with retching, vomiting, sense of pressure over orbits, pallor, cold hands and feet, black spots before eyes. Heavy, oppressed; frontal, throbbing, undulating sensation in brain. Sick headache; relieved by epistaxis or menstrual flow. Fullness all over head. Eyes heavy; blurred sight; wants to close them tightly for relief. Neuralgia around and over right side of head and neck. Scalp sore and tender to touch.

Nose.--Stopped up, dry, must breathe through mouth; dry, hard clinkers in nose; profuse epistaxis.

Face.--Intensely red and flushed, with throbbing carotids (Bell).

Stool.--Difficult, painful, constipated. Anus feels constricted, full, throbs. No desire until there is a large accumulation (Bry; Alum).

Female.--Menses scanty, intermit, with nausea and bearing down sticking pain in external parts. Dysmenorrhœa. Ovarian neuralgia.

Respiratory.--Feels as if smothering, especially from rapid walking. Hæmoptysis. Weight on chest. Tickling in throat with cough.

Extremities.--Pain in knee; wants to stretch leg, but does not relieve. Joints sore. Skin and extremities cold. Numbness and aching in knee-joints.

Modalities.--Worse, rainy, changeable weather, approach of storm, motion; 4 pm.

Relationship.--Compare: Melilotus alba--(White Clover)--practically the same action (Hæmorrhages, congestive headaches, engorged blood vessels, spasms). Amyl; Bell; Glon.

Dose.--Tincture, for inhaling; lower potencies.

MENTHA PIPERITA
Peppermint

Stimulates the cold-perceiving nerves, so just after taking it, a current of air at the ordinary temperature seems cold. Marked action on respiratory organs and skin. Useful in gastrodynia, flatulent cold.

Abdomen.--Bloated, disturbing sleep. Infantile colic. Bilious colic with great accumulation of gas.

Respiration.--Voice husky. Tip of nose to touch. Throat dry and sore, as if pin crosswise in it. Dry cough, worse from air into larynx, tobacco smoke, fog, talking; with irritation in suprasternal fossa (Rumex). Trachea painful to touch.

Skin.--Every scratch becomes a sore. Itching of arm and hand when writing. Vaginal pruritus. Herpes zoster (Ars; Ran bulb).

Relationship.--Compare: Rumex; Laches; Mentha pulegium--European pennyroyal--(pain in bones of forehead and extremities). Mentha viridis-Spearmint--(scanty urine with frequent desire).

Dose.--Tincture, 1 to 20 drops, to thirtieth potency. Locally, in pruritus vaginæ

MENYANTHES TRIFOLIATA
Buck-bean
(MENYANTHES)

A remedy for certain headaches, intermittent fever. Coldness of abdomen. Twitchings. Sensation of tension and compression. Fidgets and urinary difficulties in women. Diabetes.

Head.--Pressing in vertex; better, hard pressure with hand. Pressing-together pain. Weight pressing on brain with every step on ascending. Pain from nape over whole brain; better, stooping, sitting; worse, going upstairs. Cracking in jaw and twitching of facial muscles.

Stomach.--No thirst at any time. Revenous hunger; passing away after eating a little. Desire for meat. Sensation of coldness extending up to œsophagus.

Abdomen.--Distended and full; increased by smoking tobacco. Coldness of abdomen.

Extremities.--Icy coldness of hands and feet. Cramp-like pain. As soon as patient lies down, legs jerk and twitch.

Fever.--Coldness predominates; felt most acutely in abdomen and legs and tip of nose.

Modalities.--Worse, during rest, ascending better, pressure on affected part, stooping, motion.

Relationship.--Compare: Caps; Puls; Calc; Phos ac; Sang.

Antidote: Camph.

Dose.--Third to thirtieth potency.

MEPHITIS PUTORIUS
Skunk
(MEPHITIS)

A great medicine for whooping-cough. In order to insure its full success, it should be given in the lower dilutions from 1x to 3x. Suffocative feeling, asthmatic paroxysms, spasmodic cough; cough so violent, seems as if each spell would terminate life. Child must be raised up, gets blue in face, cannot exhale, Mucous rales through upper part of chest. Patient wants to bathe in ice-cold water.

Mind.--Excited, full of fancies. Can neither sleep nor work.

Eyes.--Pain from overexertion; blur; unable to distinguish letters; conjunctiva red; eyes hot and painful.

Mouth.--Painful jerks in root of teeth. Bloated face. Coppery taste, as after eating onions.

Respiratory.--Sudden contraction of glottis, when drinking or

talking. Food goes down wrong way. False croup; cannot exhale. Spasmodic and whooping-cough. Few paroxysms in day-time, but many at night; with vomiting after eating. Asthma, as if inhaling sulphur; cough from talking; hollow, deep, with rawness, hoarseness, and pains through chest. Violent spasmodic cough; worse at night.

Sleep.--Awakes at night with rush of blood to lower legs. Vivid dream of water, fire, etc.

Relationship.--Compare: Dros; Coral; Sticta.

Dose.--First to third potency. Has a very short action.

Jayashree Kanoi

My child had cough and when taken to the doctor yesterday afternoon, he gave the above Mephtis. By evening cough came down, but slowly in the night it increased more, somehow he slept, got up got ready coughing he went to write maths exam for 1 hour and we brouught him back after his exam. He is in LKG, 4 years, boy. He is having continuous cough even now, and with that fever 100 degree is there now. Last two weeks back he had typhoid, he was given baptisia and other KOF AID syrup, at that time it was mild.

MERCURIUS CORROSIVUS
Corrosive Sublimate

This salt leads all other remedies in tenesmus of the rectum, which is incessant, and is not relieved by the stool. The tenesmus often involves the bladder as well. Bright's disease. Gonorrhœa; second stage, with continuous tenesmus. Destroys the secreting portions of the kidneys. This process is slow, but sure. Albuminuria in early pregnancy (Phosph later and at full term).

Head.--Delirium, stupor. Frontal pain, congestion of head with burning in cheeks. Drawing pain in periosteum of skull.

Eyes.--Pain behind eyeballs, as if forced out. Phlyctenulæ; deep ulcers on cornea. Excessive photophobia and acrid lachrymation. Iritis, ordinary or syphilitic (Give in association with atropin locally for prevention of adhesions). Pain severe at night; burning, shooting, tearing. Little tendency to pus formation. Iris muddy in color, thick, and neither contracts nor dilates. Retinitis albuminuric, ophthalmia neonatorum. Lids œdematous, red, excoriated. Severe burning. Soreness of the eyes.

Nose.--Excessive coryza. Ozæna, with perforation of septum nasi (Kali bich). Rawness and smarting in nostrils. Post-nasal swelling, mucous membrane dry, red, and covered with bloody mucus.

Ears.--Violent pulsations. Fetid pus.

Face.--Swollen. Red, puffy. Lips black, swollen. Sordes. Facial neuralgia within the bones.

Mouth.--Teeth loose. Gums purple, swollen, and spongy. Tongue swollen and inflamed. Salivation. Pyorrhea. Ptyalism. Taste salty and bitter.

Throat.--Red, swollen, painful, intensely inflamed. Uvula swollen. Swallowing painful. Most pain in post-nasal with sharp pains to ears. Burning pain, with great swelling; worse, slight external pressure. All glands about thorax swollen.

Stomach.--Incessant, green, bilious vomiting. Epigastrium very sensitive.

Abdomen.--Bruised sensation; cecal region and transverse colon painful. Bloated; very painful to least touch.

Stool.--Dysentery; tenesmus, not relieved by stool; incessant. Stool hot, bloody, slimy, offensive, with cutting pains and shreds of mucous membrane.

Respiratory.--Pain in larynx as cut with knife. Aphonia. Cough, with bloody expectoration. Pulse rapid and intermittent. Stitches through side of chest.

Urine.--Intense burning in urethra. Urine hot, burning, scanty or suppressed; bloody, greenish discharge. Albuminous. Tenesmus of bladder. Stabbing pain extending up urethra into bladder. Perspiration after urinating.

Male.--Penis and testes enormously swollen. Chancres assume phagedænic appearance. Gonorrhœa; urethra orifice red, swollen; glans sore and hot. Discharge greenish, thick.

Fever.--Chilly from slightest exposure. Profuse perspiration; surface cold.

Modalities.--Worse, evening, night, acids, Better, while at rest.

Relationship.--Compare: Ars; Lach; Leonurus-Mother-wort (Influences pelvic organs, allays spasm and nervous irritability, promotes secretion and reduces febrile excitement. Valuable in suppressed menses and lochia; dysentery; vomiting, frightful pains in abdomen, violent thirst. Tongue dry and cracked). Monsonia--An African plant belonging to the Geraniaceæ--(Used for dysentery in material doses).

Antidote: Calcium sulphide is antidotal to Bichloride poisoning. Use intravenous injection of 7 1/2 grains in 7 1/2 ozs boiled water.

Dose.--Sixth potency. In solution 1:1000, hypodermically injected under conjunctiva in choroditis with progressive myopia. Stops immediately the severe aching pain behind eye-balls (Dr. G. D. Hallet).

MERCURIUS CYANATUS
Cyanide of Mercury

Acute infections, pneumonia, nephritis. Its action is similar to that of the toxines of infections diseases. Great and rapid prostration, tendency toward hæmorrhages, from the different orifices, of dark fluid blood, cyanosis, rapid respiration and heart action, albuminuria and twitching and jerking of muscles. Typhoid pneumonia.

Livid states from great struggling, where suffocation is imminent and paralysis of lung threatening; great sweat.

Affects most prominently the buccal cavity. This, together with marked prostration, gives it a place in the treatment of diphtheria, where it has achieved unquestioned great results. Malignant types, with prostration. Coldness and nausea. Syphilitic ulcers when perforation threatens.

Head.--Great excitement, fits of passion; fury; talkativeness.

Atrocious headache. Eyes sunken; face pale.

Mouth.--Covered with ulcerations. Tongue pale. Free salivation. Fetor of breath. Pain and swelling of salivary glands. Astringent taste. Ulcerations of mouth have a gray membrane.

Throat.--Feels raw and sore. Mucous membranes broken down, ulcerated. Looks raw in spots, especially in public speakers. Hoarseness, and talking is painful. Necrotic destruction of soft parts of palate and fauces. Intense redness of fauces. Swallowing very difficult. Dark blood from nose. Diphtheria of the larynx and nose (Kali bich).

Stomach.--Nausea, vomiting, bilious, bloody; hiccough; abdomen painful, tender to pressure.

Rectum.--Intolerable pain. Redness around anus. Frequent hæmorrhage; stools with tenesmus. Discharge of fetid liquid with gangrenous odor. Black stools.

Urinary.--Amber color, painful, albuminous, scanty. Nephritis with great debility and chilliness. Suppression of urine.

Skin.--Moisture, with icy coldness.

Dose.--Sixth to thirtieth potency. Aggravation is apt to occur from potencies below the sixth

MERCURIUS DULCIS
Calomel

Has marked effect on catarrhal inflammation of ear, and useful in Eustachian catarrh, deafness. Diarrhœa, with soreness of anus. Prostatitis. Remittent bilious attacks. Pallor, flabby bloatedness, and turgid flaccidity. Inflammation with plastic exudate. Especially indicated in systems disposed to remittent bilious fevers; in peritonitis and meningitis with plastic exudate. Dropsies due to combined renal and cardiac diseases, especially with jaundice (Hale). Cirrhosis of the liver, especially in the hypertrophic form. Use 1x (Jousset).

Ears.--Otitis media; closure of Eustachian tube; ear troubles of scrofulous children; membrana tympani retracted, thickened and immovable.

Mouth.--Offensive breath; salivation; sore gums. Ulcers. Tongue black. Constant flow of dark, putrid saliva; very offensive.

Ulceration of throat, with dysphagia. Granular pharyngitis.

Stomach.--Nausea and vomiting. Cyclic vomiting of infants (Cup ars; Iris).

Stool.--Scanty, bloody mucus, with bile, and constant desire, without tenesmus. Dark-green, watery, with griping. Anus sore and burning. Dysentery; small stools of mucus and blood, covered with bile.

Skin.--Flabby and ill nourished. Swollen glands. Phagedenic ulcers. Copper-colored eruptions.

Relationship.--Compare: Kali mur.

Dose.--Third to sixth trituration. For palliative (non-homeopathic) purposes, to secure evacuation of bowels, two or three-grain doses of first decimal trituration, repeated several times every hour.

MERCURIUS IODATUS FLAVUS
Proto-iodide of Mercury

Throat affections, with greatly swollen glands and characteristic coating of tongue. Worse, right side. Chancre; induration remains long time. Swollen inguinal glands, large and hard. Mammary tumors, with tendency to much warm perspiration and gastric disturbances.

Tongue.--Coated thickly; yellow at the base. Tip and edges may be red and take imprint of teeth.

Throat.--Lacunar tonsillitis. When only the superficial part of the tonsil is involved. Cheesy exudates with offensive breath. Swelling begins on right side. Small ulcers on posterior pharynx. Easily detached patches on inflamed pharynx and fauces; worse on right tonsil; much tenacious mucus. Sensation of a lump. Constant inclination to swallow.

Ailanthus Glandulosa

MERCURIUS IODATUS RUBER

Bin-iodide of Mercury

Diphtheria and ulcerated sore throats, especially on left side, with much glandular swelling. Chronic suppurating buboes. Hard chancres. Old cases of syphilis in scrofulous patients. Early stages of cold, especially in children.

Throat.--Fauces dark red; swallowing painful. Phlegm in nose and throat. Disposition to hawk, with sensation of a lump in throat. Stiffness of muscles of throat and neck.

Nose.--Coryza and dull hearing; right side of nose hot. Hawks mucus from posterior nares. Turbinated bones swollen. Boggy mucus membrane of nose and throat; closure of Eustachian tube, opening with a pop.

Mouth.--Gums swollen; toothache; glands swollen. Scalded feeling on tongue. Aphthæ. Profuse saliva. Tongue feels stiff at base, and pains on moving.

Throat.--Diphtheria; submaxillary glands painfully engorged, fauces dark red; worse on left tonsil. Parenchymatous tonsillitis. Will often abort peritonsillitis if given frequently. Cough form elongated uvula, with sore throat, Laryngeal troubles with aphonia.

Skin.--Small fissures and cracks; hard papules; Hunterian chancre; syphilitic ulcers. Bubo. Sarcocele.

Dose.--Third trituration. Mercuric iodide is far more active as a bactericide than the other mercurials, including the chloride.

MERCURIUS SOLUBILIS
Quicksilver
(MERCURIUS - HYDRARGYRUM)

Every organ and tissue of the body is more or less affected by this powerful drug; it transforms healthy cells into decrepit, inflamed and necrotic wrecks, decomposes the blood, producing a profound anæmia. This malignant medicinal force is converted into useful life saving and life preserving service if employed homeopathically, guided by its clear cut symptoms. The lymphatic system is especially affected with all the membranes and glands, and internal organs, bones etc. Lesions produced by mercury very similar to those of syphilis. Very often indicated in the secondary stage of syphilis where there is a febrile chloro-anæmia, rheumatoid pains behind sternum, around joints, etc; ulcerations of mouth and throat, falling of the air, the eruptions and ulcerations of mouth and throat, etc. These are the special conditions and stages to which Mercur is homeopathic and where the 2x will do surprising work. Again, hereditary syphilis manifestations, are within its range; bullæ, abscesses, snuffles, marasmus, stomatitis or destructive inflammations. Tremors everywhere. Weakness with ebullitions and tremblings from least exertion. All Mercury symptoms are worse at night, from warmth of bed, from damp, cold, rainy weather, worse during perspiration. Complaints increase with the sweat and rest; all associated with a great deal of weariness, prostration, and trembling. A human "thermometer". Sensitive to heat and cold. Parts are much swollen, with raw, sore feeling; the profuse, oily perspiration does not relieve. Breath, excretions and body smell foul. Tendency to formation of pus, which is thin, greenish, putrid; streaked with thin blood.

Mind.--Slow in answering questions. Memory weakened, and loss of will-power. Weary of life. Mistrustful. Thinks he is losing his reason.

Head.--Vertigo, when lying on back. Band-feeling about head. One-sided, tearing pains. Tension about scalp, as if bandaged. Catarrhal headaches; much heat in head. Stinging, burning, fetid eruptions on scalp. Loss of hair. Exostosis, with feeling of soreness. Scalp tense; oily sweat on head.

Eyes.--Lids red, thick, swollen. Profuse, burning, acrid discharge. Floating black spots. After exposure to glare of fire; foundrymen. Parenchymatous keratitis of syphilitic origin with burning pain. Iritis, with hypopyon.

Ears.--Thick, yellow discharge; fetid and bloody. Otalgia, worse warmth of bed; at night sticking pains. Boils in external canal (Calc pic).

Nose.--Much sneezing. Sneezing in sunshine. Nostrils raw, ulcerated; nasal bones swollen. Yellow-green, fetid, pus-like discharge. Coryza; acrid discharge, but too thick to run down the lip; worse, warm room. Pain and swelling of nasal bones, and caries, with greenish fetid ulceration. Nosebleed at night. Copious discharge of corroding mucus. Coryza, with sneezing; sore, raw, smarting sensation; worse, damp weather; profuse, fluent.

Face.--Pale, earthy, dirty-looking, puffy. Aching in facial bones, Syphilitic pustules on face.

Mouth.--Sweetish metallic taste. Salivary secretions greatly increased; bloody and viscid. Saliva fetid, coppery. Speech difficult on account of trembling tongue. Gums spongy, recede, bleed easily. Sore pain on touch and from chewing. Whole mouth moist. Crown of teeth decay. Teeth loose, feel tender and elongated. Furrow in upper surface of tongue lengthwise. Tongue heavy, thick; moist coating; yellow, flabby, teeth-intended, feels as if burnt, with ulcers, Fetid odor from mouth, can smell it all over room. Alveolar abscess, worse at night. Great thirst, with moist mouth.

Throat.--Bluish-red swelling. Constant desire to swallow. Putrid sore throat; worse right side. Ulcers and inflammation appearing at every change in weather. Stitches into ear on swallowing; fluids return through nose. Quinsy, with difficult swallowing, after pus has formed. Sore, raw, smarting, burning throat. Complete loss of voice. Burning in throat, as from hot vapor ascending.

Stomach.--Putrid eructations. Intense thirst for cold drinks. Weak digestion, with continuous hunger. Stomach sensitive to touch. Hiccough and regurgitation. Feels replete and constricted.

Abdomen.--Stabbing pain, with chilliness. Boring pain in right groin. Flatulent distention, with pain. Liver enlarged; sore to touch, indurated. Jaundice. Bile secreted deficiently.

Stool.--Greenish, bloody and slimy, worse at night, with pain and tenesmus. Never-get-done feeling. Discharge accompanied by chilliness, sick stomach, cutting colic, and tenesmus. Whitish-gray stools.

Urine.--Frequent urging. Greenish discharge from urethra; burning in urethra on beginning to urinate. Urine dark, scanty, bloody, albuminous.

Male.--Vesicles and ulcers; soft chancre. Cold genitals. Prepuce irritated; itches. Nocturnal emissions, stained with blood.

Female.--Menses profuse, with abdominal pains. Leucorrhœa excoriating, greenish and bloody; sensation of rawness in parts. Stinging pain in ovaries (Apis). Itching and burning; worse, after urinating; better, washing with cold water. Morning sickness, with profuse salivation. Mammæ painful and full of milk at menses.

Respiratory.--Soreness from fauces to sternum. Cannot lie on right side (Left side, Lycop). Cough, with yellow muco-purulent expectoration. Paroxysms of two; worse, night, and from warmth of bed. Catarrh, with chilliness; dread of air. Stitches from lower lobe of right lung to back. Whooping-cough with nosebleed (Arnica) Cough worse, tobacco smoke.

Back.--Bruised pain in small of back, especially when sitting. Tearing pain in coccyx; better, pressing on abdomen.

Extremities.--Weakness of limbs. Bone-pains and in limbs; worse, night. Patient very sensitive to cold. Oily perspiration. Trembling extremities, especially hands, paralysis agitans. Lacerating pain in joints. Cold, clammy sweat on legs at night. Dropsical swelling of feet and legs.

Skin.--Almost constantly moist. Persistent dryness of the skin contra indicates mercurius. Excessive odorous viscid perspiration; worse, night. General tendency to free perspiration, but patient is not relieved thereby. Vesicular and pustular eruptions. Ulcers, irregular in shape, edges undefined. Pimples around the main eruption. Itching, worse from warmth of bed. Crusta lactea; yellowish-brown crusts, considerable suppuration. Glands swell every time patient takes cold. Buboes. Orchitis (Clemat, Hamam, Puls).

Fever.--Generally gastric or bilious, with profuse nightly perspiration; debility, slow and lingering. Heat and shuddering alternately. Yellow perspiration. Profuse perspiration without relief. Creeping chilliness, worse in the evening and into night. Alternate flashes of heat in single parts.

Modalities.--Worse, at night, wet, damp weather, lying on right side, perspiring; warm room and warm bed.

Relationship.--Compare: Capparis coriaccea (polyuria, glandular affections, mucous diarrhœa; influenza); Epilobium--Willow herb--(chronic diarrhœa with tenesmus and mucous discharges; ptyalism, dysphagia; wasting of body and much debility; cholera infantum); Kali hyd (in hard chancre); Mercur acet (Congestion with stiffness, dryness and heat of parts affected. Eyes inflamed, burn and itch. Lack of moisture. Throat dry, talking difficult. Pressure in lower sternum; chancre in urethra; tenia capitis favosa margin of ulcers painful): Mercurius auratus (psoriasis and syphilitic catarrh; brain tumors; lues of nose and bones; ozæna; swelling of testicles); Mercurius bromatus (secondary syphilitic skin affection); Mercurius nitrosus-Nitrate of Mercury--(especially in postular conjunctivitis and keratitis; gonorrhœa and mucous patches, with sticking pains; syphilides); Mercurius phosphoricus (nervous diseases from syphilis; exostoses); Mercurius precipitatus ruber (suffocative attacks at night on lying down while on the point of falling asleep, obliged to jump up suddenly which relieves; gonorrhœa; urethra felt as a hard string; chancroid; phagedenic ulcer and bubo; pemphigus, mucous patches, eczema with rhagades and fissures, barber's itch; blepharitis, internally and externally; leaden heaviness in occiput, with otorrhœa); Mercurius tannicus (syphilides in patients with gastro-intestinal diseases, or, if very sensitive, to ordinary mercurial preparations); Erythrinus-South American Red Mullet Fish--(in pityriasis rubra and syphilis; red rash on chest; pityriasis); Lolium temulentum (in trembling of hands and legs); Mercur cum kali (inveterate colds, acute facial paralysis). Henchera-Alum root--(Gastro-enteritis nausea, vomiting of bile and frothy mucus; stools watery, profuse, slimy, tenesmus, never-get-done feeling. Dose, 2 to 10 drops of tincture).

Compare: Mez; Phos; Syph; Kali mur; Aethiops.

Antidote: Hep; Aur; Mez.

Complementary: Badiaga.

Dose.--Second to thirtieth potency.

girilal

| **Re: Mercurius solubilis/vivis (Mercury / Quicksilver)** | By: girilal<br>New Jersey USA | September 21 2006 |
|---|---|---|

Mercurius solubilis means fluid mercury or quicksilver; mercurius vivis is 'living' mercury: two forms of the homoeopathic mercury who are very much alike and therefore discussed together.

There is a metal mercury, a planet Mercury and a god Mercury, who ofcourse all are interrelated. The strange thing about the metal is that it is liquid on room temperature. It forms drops who react on movement and temperature, dividing themselves into smaller drops and coming together again in bigger drops. Another characteristic is the ease by which the metal mercury merges with other metals and dissolves them, changes them, even gold can be transformed by it. The planet Mercury has the quickest rotation of all the planets in the solar system and it is the closest planet to the sun (the sun is related to the metal gold).

The god Mercury is known as the messenger of the gods, since he travels 'quick'ly with his winged feet from one place to another. Mercury is astrologically associated with travel, communication, speaking and writing, connection, all kinds of flows, and therefore god of boths traders and thieves, alteration, flexibility, rational thinking and knowledge. Please note that Mercury simply transmits whatever there is to transmit, he is the divine and playful child not hindered by any moral or emotional load: he simply brings you the message no matter what the content of that message is. Medical astrology states that Mercury rules all circulatory systems, the blood circulation, the breath and the transfers of the nervous system. Further Mercury rules the bodyly flexibility, the lungs, the arms and hands and the senses as organs of communication. So now we see that we can characterize all Mercuries in three words: swiftness, alteration, connection.

The homoeopathic remedy Mercury suits people with a weak immune-system, together with instability and inefficiency of functions. That's why these people absorb all incoming body messages without sorting; they simply react on anything. Important to know in this remedy is that almost every circumstance aggravates their condition and that there are only a few things that make them feel better! Just like a human thermometer they react on heat, cold, being outside, wet weather, change of weather, bedwarmth, perspiration, exertion, and so on. They are very instable; for instance they want warmth, and next aggravate by that warmth. Also their emotions are instable, laughing alterates with crying, etc. Body functions work inefficient; perspiration for instance serves to cool down the body and therefore should ameliorate someones condition. Not with Mercury: in that case perspiration in itself is a reason for aggravation.

People who need this remedy are usually very closed (drops of mercury close themselves into round closed forms) but not always: I also know them as very communicative persons, but the main thing is that they dislike to talk about meaningless things or to have superficial relationships. The prefer to stay apart or to dissolve into each other and there's nothing in between. Because of their sensitivity they are restless and tensed; very sensitive to criticism and opposition, with possible fits of temper.

The Greek homoeopath G. Vithoulkas has come to the following scheme of Mercurial stages: 1. Mentally slow; slow in answering and in understanding. Though hasty and restless they need more time to fulfill a task then you would expect. 2. Impulsive, there is for instant a desire to beat or destruct, but these impulses are controlled. There can also be a desire to kill, but this usually remains within the desire realm. Inwardly aggression felt as fear of suicide and fear of becoming insane. 3. Suspicion resulting from a feeling of vulnerability. Anyone can be regarded as enemy. They easily feel threatened. 4. Insanity.

Mercury-type children are very vivid and early mature, also sexually. They like to play with their genitals. They often stammer and loose saliva while laying in bed. Later on these children become mentally slow. On the other hand Mercury is a good remedy for children who learn slowly and lack concentration because they react on every impuls around them.

A physical keynote for Mercury is easily sweating, especially at night, but not feeling better by it! Another keynote is that most complaints aggravate at night. And that there is a great tendency to ulceration, yellowish-green pus, ulcers and wounds that won't heal, swollen glands, often returning infections, hard and inflamed body-parts, rheumatic inflammations of joints, swollen tongue and gums, stinking breath, throat complaints, and a lot of saliva. Mercury is well known as a great medicine for throat-nose and ear-complaints, especially inflammations. Other possible complaints are pains in the bones, problems with the digestion, tremors, trembling, burning pain of the ovaries or the womb, burning urine and itching genitals.

People who need this remedy very much like bread and butter and cold drinks. Usually they dislike sweets. And ofcourse they like traveling.

I know that many people don't feel much sympathy for this remedy picture. But please keep in mind that Mercury characters have a hard time with themselves, reacting on everything and having difficulties with recovering. They are simply too open and need more inner 'grid'. In this way the homoeopathic Mercury can work wonders.

Article by Anja Heij

girilal

| **Re:Mercurius solubilis/vivis (Mercury / Quicksilver)** | By: krdeepu<br>Doha | November 9 2008 |
|---|---|---|

A few footnotes from my experience:

Late falling asleep as a result of flow of thoughts. Restless sleep.

Constant (unquencable) thirst for cool drinks, especially after sweating under the sun and may lead to a stomach upset.

Itching palate, as in hay fever.

Overenthusiastic to do something once the decision has been taken to do it.

Children force a large amount of food into their mouth. Do not like to go to school; forsaken feeling.

Despair recovery.

Anxiety with fear over trivial matters, stagefright, nervous and timid (sil).

Itching in the bends of elbows, knees and between toes.

Deepu

| **Re:Mercurius solubilis/vivis (Mercury / Quicksilver)** | By: Michael Leger<br>Madison, WI | November 10 2008 |
|---|---|---|

Another theme in Mercurius is communication, which can be seen in the above descriptions. They can be poor or great communicators - but communication is very important. When well balanced, they can be great teachers - communicating from the g/Gods to humanity.

dddddddddddd

| **Re:Mercurius solubilis/vivis (Mercury / Quicksilver)** | By: udaya kumar<br>-- | December 21 2009 |
|---|---|---|

Mercurius Solubilis and Mercurius are one and the same. Mercurius vivis is marginally different. If the symptoms agree both can be used. When we say Mercurius, Merc Sol. (Mercurius Solubilis) is intended.

--

| **Re:Mercurius solubilis/vivis (Mercury / Quicksilver)** | By: Jayashree<br>Calcutta, India | December 21 2009 |
|---|---|---|

I was told by my late doctor that Merc should not be taken after sunset or the sleep will be affected, i.e. you may not be able to sleep. Was he right??

Jayashree Kanoi

| **Re:Mercurius solubilis/vivis (Mercury / Quicksilver)** | By: garcot<br>Bangalore | December 21 2009 |
|---|---|---|

No. In my experience it is not true. Though it is true, it works better if we take this remedy after Sunset.

Garcot

"wisdom in your body is deeper than your deepest philosophy" (Nietszche)

| **Re:Mercurius solubilis/vivis (Mercury / Quicksilver)** | By: udaya kumar<br>-- | December 21 2009 |
|---|---|---|

Mercury is the most difficult of all metals. It is a founder element in alchemy and in the secret of human being and the universe. It is the only metal which can differentiate and undifferentiate.i.e. it can differentiate into small particles a whole removed from a whole. and then undifferentiate once again into single whole as if nothing had happened. it is the metal which can change gold into useless nothing. and convert other ingredients into gold at the right proportion. No wonder it has tree amorphous states of "There is a metal mercury, a planet Mercury and a god Mercury," as beautifully stated by Girilal and tactfully demonstrated by Michael as " When well balanced, they can be great teachers - communicating from the g/Gods to humanity" .When well balanced is a great observation. Mercury can make you God, mercury can degenerate you into rotten flesh. One has to be careful with that metal in crude form and in homeopathic form. I have taken mercury many times in the evening and night. I have not observed what Jayashree said but may be I shall use it a few times again out of place to see that aspect too and report.

--

| **Re:Mercurius solubilis/vivis (Mercury / Quicksilver)** | By: user123 | December 22 2009 |
|---|---|---|

Nux Vomica patient is worse in the morning when he gets up. So it is advised that Nux Vom should be taken at night. So that when the patient gets up nux has already done it's work and the patient is fine. Merc. is worse at night. Therefore the doctor would have asked to take it before sunset so that the remedy gets sufficient time to work.

|---|---|---|

Hi,

I am a true Mecury picture!

Everytime I get a cold it doesn't 'come out' properly, it will just make me slower than usual, give me horrendous firery throat and glands will flare up... but the cold won't come out... unless I take Mercury!

I suffer from boils too. I would love to know if there is a way to help my body decrease this deficiency ie with good food and exercise as opposed to having to rely on the taking the Homeopathic Mecury. I take 1m to release a cold, otherwise it gets stuck inside!

Thanks so much!
Laura

MERCURIUS SULPHURICUS, DRARG, OXYD, SUB-SULPH Turpethum Minerale--Yellow Sulphate of Mercury (MERCURIUS SULPHURICUS - HYDRARG. OXYD. SUB-SULPH.)

Watery stools, burning in anus. Sore tip of tongue. Œdema of legs. Sneezing from direct rays of sun. Diarrhœa early in the morning; stool bursts out in a hot stream of yellow matter. Intense evacuations, like rice-water. Scanty, clear, scalding urine. Intense dyspnœa; must sit up. Respiration rapid, short; burning in chest. Hydrothorax (Ars). Cardiac pain and weakness.

Relationship.--Compare: Mercur acet (cutting in urethra when last drop is flowing out).

-

Nose.--Sneezing, coryza, interior of nose, excoriated. Post-nasal adenoids.

Ears.--Feel too much open, as if tympanum was exposed to the cold air and it blew into the ear. Desire to bore fingers in.

Eyes.--Ciliary neuralgia after operations. Especially after removal of eyeball. Pains radiate and shoot downward, with cold feeling and stiffness of bone.

Face.--Red. Eruption around mouth, with coryza.

Stomach.--Desire for ham-fat. Burning in tongue, extending to stomach. Mouth waters. Nausea felt in throat; better, eating. Chronic gastritis; burning, corroding pain; nausea, vomiting, chocolate color. Gastric ulcer with much burning.

Abdomen.--Swelling of glands with large abdomen in children. Pressure in inguinal ring. Flatulent colic, with shivering and difficult respiration.

Rectum.--Constipation after confinement. Prolapse of rectum. Diarrhœa, with small, white particles. Green discharges. Constipation, with hepatic and uterine inertia. Constriction of anus; stitches and prolapse of rectum.

Urine.--Red flakes float on top of urine. Hot, bloody Biting, burning in forepart of urethra at the close of micturition. Hæmaturia preceded by cramp pain in the bladder, After urinating, a few drops of blood are passed.

Female.--Menses too frequent, soon, profuse. Leucorrhœa like albumen; very corroding.

Male.--Enlargement of testicles. Violent sexual desire. Gonorrhœa, with hæmaturia.

Respiratory.--Soreness and burning in bones of thorax. Constriction across chest. Cough; worse; eating, irritation lower than can be reached, on taking a warm drink.

Extremities.--Pain in neck and back; worse, motion and at night; intolerant of all touch. Pain and burning in tibia and long bones. Legs and feet go to sleep. Pain in hip and knee.

Skin.--Eczema; intolerable itching; chilliness with pruritus; worse in bed. Ulcers itch and burn, surrounded by vesicles and shining, fiery-red areola. Zona, with burning pain. Bones, especially long bones, inflamed and swollen; caries, exostosis; pain worse night, touch, damp weather (Merc; Syph). Eruptions ulcerate and form thick scabs under purulent matter exudes (Chrysophanic acid).

Modalities.--Worse, cold air; night, evening until midnight, warm food, touch, motion. Better, open air.

Relationship.--Compare: Dirca palustris-Leather wood--(a gastro-intestinal irritant inducing salivation, emesis and purgation; cerebral hyperæmia; neuralgic pains, with depression, palpitation, and dyspnœa); Merc; Phyt; Rhus; Guaiac; Syph.

Antidotes: Kali hyd; Merc.

Dose.--Sixth to thirtieth potency.

**Mimosa pudica**
**Started by: garcot at February 7 2010**

**Replies: 7 & Views: 9434** Font Bottom Of Page **Page 1 of 1** Reply

| | | |
|---|---|---|
| **Mimosa pudica** | By: garcot<br>Bangalore | February 7 2010 |

Description
Mimosa pudica in Goa, India.

The stem is erect in young plants, but becomes creeping or trailing with age. The stem is slender, branching, and sparsely to densely prickly, growing to a length of 1.5 m (5 ft). The leaves of the mimosa pudica are compound leaves.

The leaves are bipinnately compound, with one or two pinnae pairs, and 10-26 leaflets per pinna. The petioles are also prickly. Pedunculate (stalked) pale pink or purple flower heads arise from the leaf axils. The globose to ovoid heads are 8–10 mm in diameter (excluding the stamens). On close examination, it is seen that the floret petals are red in their upper part and the filaments are pink to lavender. The fruit consists of clusters of 2-8 pods from 1–2 cm long each, these prickly on the margins. The pods break into 2-5 segments and contain pale brown seeds some 2.5 mm long. The flowers are pollinated by the wind and insects.[2] The seeds have hard seed coats which restricts germination.[3]
[edit] Plant movement

Mimosa pudica is well known for its rapid plant movement.
Mimosa pudica with leaves closed

Like a number of other plant species, it undergoes changes in leaf orientation termed "sleep" or nyctinastic movement. The foliage closes during darkness and reopens in light.[4]

The leaves also close under various other stimuli, such as touching, warming, blowing, or shaking. These types of movements have been termed seismonastic movements. The movement occurs when specific regions of cells lose turgor pressure, which is the force that is applied onto the cell wall by water within the cell vacuoles and other cell contents. When the plant is disturbed, specific regions on the stems are stimulated to release chemicals which force water out of the cell vacuoles and the water diffuses out of the cells, producing a loss of cell pressure and cell collapse; this differential turgidity between different regions of cells results in the closing of the leaflets and the collapse of the leaf petiole. This characteristic is quite common within the Mimosaceae family. The stimulus can also be transmitted to neighboring leaves. It is not known exactly why Mimosa pudica evolved this trait, but many scientists think that the plant uses its ability to shrink as a defense from predators. Animals may be afraid of such a fast moving plant and would rather go and eat a less active one.[citation needed]
[edit] Taxonomy and nomenclature

Mimosa pudica was first formally described by Carl Linnaeus in Species Plantarum in 1753.[5] The species epithet, pudica, is Latin for "bashful" or "shrinking", alluding to its shrinking reaction to contact.
[edit] Common names

The species is known by numerous common names including

* sensitive plant[6]
* humble plant[6]
* shameful plant[6]
* sleeping grass[7]
* touch-me-not[6]

The Chinese name for this plant (Chinese: 含羞草; pinyin: hánxiū cǎo) translates to "shyness grass".[8] Its Sinhala name is Nidikumba, where 'nidi' means 'sleep'[9]. Its Tamil name is Thottal Sinungi, where 'Thottal' means 'touched' and 'Sinungi' means 'little cry'[10]. Other non-English common names include Makahiya (Philippines, with maka- meaning "quite" or "tendency to be", and -hiya meaning "shy", or "shyness")[citation needed], Mori Vivi[11] (West Indies), and mate-loi (false death)[citation needed] (Tonga). In Urdu it is known as CHui-Mui. In Bengali, this is known as 'Lojjaboti', the shy virgin. In Indonesia, it is known as Putri Malu (Shy Princess). In Myanmar (Burma) it is called 'Hti Ka Yoan' which means "crumbles when touched".

Have a look at this video: http://www.youtube.com/watch?v=Zq3UuHlPLQU&NR=1

Mimosa pudica is identified in Ayurvedic literature as Lajjalu.[16]

In contemporary medicine, Mimosa pudica is being investigated for its potential to yield novel chemotherapeutic compounds. It contains an alkaloid called mimosine which has been found to have potent antiproliferative and apoptotic effects.

|---|---|---|
| **Re:Mimosa pudica** | By: garcot<br>Bangalore | February 8 2010 |

It has been described as

“ sparshaat sankochataam yaati punashcha prasruta bhavet " -a plant which folds itself when touched and spreads its leaves once again after a while.

Properties or guna of lajjalu:

1. Lajjalu has tikta and kashaya rasa (bitter and astringent taste),

2. Has property of cold (sheetha).

3. Balances kapha, pitta.

It has the following medicinal properties,

It arrests bleeding.

Fastens the wound healing process.

Very useful in diarrhea (athisaara) Amoebic dysentery (raktaatisaara) and bleeding piles.

It is mainly used in herbal preparations for gynecological disorders.

It has been said to have medicinal properties to cure skin diseases.

It is also used in conditions like bronchitis, general weakness and impotence.

Usually leaves, flowers, stems, roots and fruits (Punchaangha = 5 parts of plants) are used as medicines. But the root is used mainly used.

Shushrutha has placed this plant in “Priyangwadi and ambhastadi “ gana.

Great information. Here is the USA you can grow your own..sensitive plant indoors year round. Just go to www.sensitiveplant.com
to see another cool video and even a complete book to growing this amazing plant.

| **Re:Mimosa pudica** | By: garcot<br>Bangalore | February 13 2010 |
|---|---|---|

Some knowledge gained from research about the herb Mimosa Pudica:

* The research study was conducted at the Department of Chemistry, Cotton College, Guwahati, Assam, India (dated August 2007).
* The researchers tried to study the potential of the roots of this herb as birth control agents.
* Components present in the roots of the herb were given to experimental rats for 21 days.
* The researchers found that the components present in the roots of the herb changed the timings of the release of many birth associated hormones.
* This lead to extension of the pregnancy period.
* In this way, the researchers concluded that the roots of this herb possess anti-fertility properties.
* The herb is also found to regenerate the peripheral nerves by 30-40% in experimental rats.
* Peripheral nerves are the tissues which pass information to and from the spinal cord to the rest of the body.

Click picture for many more pictures

MIMULUS

This remedy is for THOSE WHO HAVE FEAR along with ROCK ROSE, CHERRY PLUM, ASPEN, AND RED CHESTNUT. There are great archetypal fears on the physical plane, like a hummingbird caught in a colony of rooks. They are based on the harshness of this world and life in this body. Excellent for people of a delicate nature. There is a lack of confidence and courage and fears of enclosed spaces, such as elevators and cancer. They are shy and nervous and worse after any kind of surgery, crowds and exams. Fear of knowledge. These are fears of a concrete origin with lowered vitality with hypochondriacal obsessions from a minor symptom. The state includes CHRONIC DIARRHEA, HIVES, DUODENAL ULCERS, ATOPIC DERMATITIS, PHOBIAS, AND PASSIVE DEPENDENT PERSONALITY. The dreaded personality, event, or thing is seen as a hurdle to be avoided. The individual is shy and tries to hide that fact from others and is hypersensitive to the environment.

Jayashree Kanoi

| **Re:MIMULUS** | By: garcot<br>Bangalore | June 10 2009 |
|---|---|---|

Mimulus Guttatus

Mimulus is the Bach Flower Remedy for known fears. In other words whenever you are frightened of something or you are anxious about something, and you can say what that something is, then Mimulus is the remedy to take. Mimulus fears are everyday fears - fear of public speaking, of the dark, of aggressive dogs, or of illness or pain.

Phobias such as the fear of spiders or of birds are also Mimulus fears, since the cause of the fear can be named. Where the phobia is very great so that the sight of a spider for example causes sheer terror, then Rock Rose might be given as well as or instead of Mimulus. And where the fear is diffuse and there is general anxiety and apprehension without a specific named cause then Aspen is the remedy to consider.

Mimulus is used as a type remedy for people who tend to be nervous, timid and shy generally. Sometimes people of this type may blush easily or stammer, and they will usually avoid social occasions and any event where they will be in the limelight. Mimulus is the remedy to encourage the quiet courage and strength that lies hidden in such people, so that they can face the everyday trials of life with steadfastness.

Dr. Bach's Description: Fear of worldly things, illness, pain, accidents, poverty, of dark, of being alone, of misfortune. The fears of everyday life. These people quietly and secretly bear their dread, they do not freely speak of it to others.

Mimulus Usage: Take two drops in a small glass of water and sip at intervals or take directly under tongue. It can also be used on the pulse points, or moistened lips.

At present, I am trying this remedy on children with known fears by just applying on their pulse points and it seems to help. This information will be updated, once, more good results emerge.

Rgds
Garcot

"wisdom in your body is deeper than your deepest philosophy" (Nietszche)

| **Re:MIMULUS** | By: udaya kumar<br>-- | June 10 2009 |
|---|---|---|

Dear Garcot,
Doctrine of Signatures play and important role here. Why do we say chicken heart. The following symptoms are prominent in that expression:

"Mimulus is used as a type remedy for people who tend to be nervous, timid and shy generally. Sometimes people of this type may blush easily or stammer, and they will usually avoid social occasions and any event where they will be in the limelight. Mimulus is the remedy to encourage the quiet courage and strength that lies hidden in such people, so that they can face the everyday trials of life with steadfastness".

So the three factors we put together are Mumulus -Chicken heart -Doctrine of Singatures. Meaning See the Red flower of Mumulus, The Red colour of cherry., plum, Rock rose, red chestnut, see the red colour prominence. See its relations with blood and heart and therefore chicken heart. Here I would say the centre of action is more than the heart the Adrinals. The pulse aspect seems to have relevance when thinking in those terms of blood and its flow, and direct induction of like colour with like colour. The like cures like seems to match here perfectly.

What do you think of it.

--

| **Re:MIMULUS** | By: garcot<br>Bangalore | June 16 2009 |
|---|---|---|

Hi Udaya,

The flower seems to have colors varying from yellow to orange to red and apparently what is used for bach floweressence is yellow color with some red spots sprinked. I have attached a picture. Red color relating to heart indicates fear in excesses in heart chakra / meridian
and it is an aggravated sadaka pitta
condition?

Like cures like yes, it definitely proves.

"wisdom in your body is deeper than your deepest philosophy" (Nietszche)

| **Re:MIMULUS** | By: udaya kumar<br>-- | June 16 2009 |
|---|---|---|

I am inclined to connect it with Liver -Yellow,
Spleen -Orange, Red -Heart.? It is like a setting sun and its rejuvenation is like a morning sun. In both cases we can find the yellow orange and red. In rejuvenation it is in the order Red, Orange, Yellow and then heat. Yellow is the colour for starting point of heat. as if in the morning sun aurora borealis. In the sluggishness and morbid condition it is like the setting sun the colour reverses here from yellow to orange and then turn to red.

We have a good article here for those who are not familiar with Sadaka Pitta.

MOMORDICA BALSAMICA
Balsam Apple

Griping, colic, pain in back and hypogastrium with painful and excessive menses. Accumulation of flatus in splenic flexure of colon. Dropsy.

Head.--Dizzy, contents of head feel lighter; mist before eyes.

Abdomen.--Rumbling, griping, colicky pains, starting from back, spreading over abdomen.

Female.--Painful and profuse menses; labor-like pains, followed by gushes of blood; pain at small of back coming towards front of pelvis.

Relationship.--Momordica charantia-Indian variety--(more sever symptoms-intestines full of yellow watery fluid, discharged explosively-cramps, thirst, prostration. Choleraic symptoms. Similar to Croton, Elaterium. Use 3x).

Dose.--Tincture. Used also externally as a liniment and poultice for burns, chapped hands, etc.

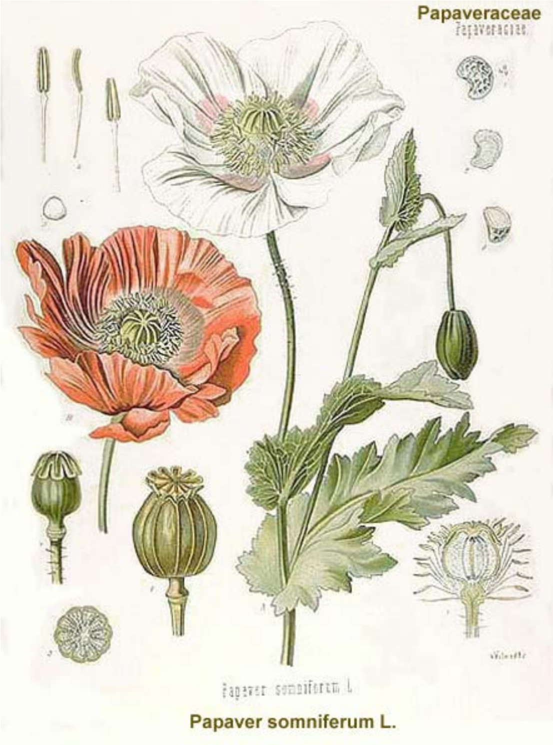
Click picture for many more pictures



MORPHINUM
An Alkaloid of Opium

Morphine bears the same relation to Opium as Atropine to Belladonna-i.e, represents its nervous side. It is less stimulating, less convulsant, and more decidedly hypnotic. Constipates less and affects contractility of the bladder more. It is less diaphoretic and more pruritic.

Mind.--Profound depression. Irritable, fault-finding, hysterical. Shock induced by terror. Dream-like state.

Head.--Vertigo from the least movement of the head. Headache with sensation of being "wound-up". Bursting pain; head drawn back.

Eyes.--Bluish, drooping lids. Itching of eyes. Delusion of vision on closing eyes. Starting, injected; diverging strabismus. Pupils unequally contracted. Look unsteady. Ptosis. Paresis of recti interni.

Ears.--Left ear throbs painfully; better, heat. Seems to hear circulation all over body.

Face.--Dusky red or pallid lividity of face, lips, tongue, mouth or throat.

Nose.--Sneezing in paroxysms. Itching and tingling on end of nose.

Mouth.--Very dry. Tongue dry, brown violet in middle. Thirst. Loss of appetite, with aversion to meat.

Throat.--Dry and constricted. Pharynx paralyzed, swallowing almost impossible; better hot drinks, worse solids.

Stomach.--Nausea incessant and deathly, faintness, constant retching. Vomiting of green fluid. Nausea and vomiting on rising up.

Abdomen.--Distended. Acute pain in abdomen and along spinal column. Tympanitis.

Rectum.--Diarrhœa watery, brown, or black with horrible tenesmus. Constipation; stools large, dry knotty, with tendency to bruise and fissure.

Urinary.--Paresis of bladder. Strangury. Slow and difficult urination. Retention of prostatic hypertrophy. Uræmia, acute and chronic.

Male.--Impotency. Pain in right spermatic cord, (Oxal ac).

Heart.--Alternation of tachycardia and bradycardia. Cardiac muscular tissue is intact, even if severely exhausted. Pulse small, weak, dicrotic.

Respiratory.--Faint and struggling for breath diaphragmatic paralysis; hiccough; dyspnœa, paroxysmal, on first falling asleep (Lach; Grindel). Cheyne-Stokes respiration. Chest tight. Pain in middle of sternum. Dry, hard, teasing, exhausting cough, worse at night. Strangling cough, with viscid mucus sputum; thin, scanty, but sounds loose and abundant.

Back.--Pain along spine. Weakness of loins. Aching across lumbo-sacral region; cannot walk erect (Cimicif).

Extremities.--Staggering gait. Numbness.

Skin.--Livid; purple spots; zoster-like herpes. Itching. Skin lost its elasticity. Urticaria appearing at climaxis.

Nervous.--Restlessness and hyperethesia; trembling, twitching, jerking, convulsions. Extremely susceptible to pain. Pain causes twitching and jerking of limbs. Violent and sudden neuralgic pains and sudden fainting. Delirium, melancholic in character. Neuralgias intensely painful, left supraorbital; right intercostal, better from heat; multiple neuritis. Sore feeling all over. Bed feels too hard. Aggravation after sleep (Lach). Neuralgia after zoster (Mezer).

Sleep.--Yawning, drowsy; prolonged, deep sleep, Sleepless; restless sleep, with frequent startings. Sleepy, but cannot sleep.

Fever.--Chills. Icy coldness. Burning heat; profuse sweat.

Dose.--Third to sixth trituration.

MOSCHUS
Musk

A remedy for hysteria and nervous paroxysms, fainting fits and convulsions, catalepsy, etc. The characteristic condition being aggravation by cold; there is great sensitiveness to air. Much nervous trembling and frequent fainting. Great flatulence. Diseases do not follow a normal course. Coldness. Tension in muscles, skin and mind.

Mind.--Uncontrollable laughter. Scolding. Anxiety with palpitation; starting as if frightened. Sexual hypochondriasis.

Head.--Compressive pain over root of nose. Pressure on top of head. Vertigo on least motion; sensation as if falling from a great height. Scalp sensitive. Sounds in ears as from the report of a cannon.

Stomach.--Desire for black coffee, stimulants. Aversion to food. Everything tastes flat. With stomach symptoms, anxiety in chest.

Primula Obconica

Distended. Faints when eating. Abdomen greatly distended. Spasmodic, nervous hiccough (Hydrocy ac; Sulph ac; Ignat; Cajap).

Male.--Violent desire; involuntary emissions. Impotence, associated with diabetes (Coca). Premature senility. Nausea and vomiting after coition.

Female.--Menses too early, too profuse, with disposition to faint (Nux m; Veratr). Sexual desire, with intolerable titillation in parts. Drawing and pushing in the direction of the genitals; sensation as if menses appear.

Urine.--Profuse urination. Diabetes.

Respiratory.--Tightness of chest, is obliged to take a deeper breath. Sudden constriction of larynx and trachea. Difficult respiration; chest oppressed; hysterical spasm of chest; asthma. Spasm of glottis. Impending paralysis of lungs. Asthma, with intense anxiety, fear, and smothering sensation. Cough ceases, mucus cannot be expectorated. Globus hystericus.

Heart.--Hysterical palpitation. Trembling around heart. Weak pulse and fainting.

Modalities.--Better, in open air, rubbing. Worse, cold. The open air is felt very, very cold.

Relationship.--Compare: Nux mosch; Asaf; Valer; Sumbul; Ign; Castor.

Compatible: Ambra.

Antidotes: Camph; Coff.

Dose.--First to third potency.

MUREX PURPUREA
Purple Fish
(MUREX)

The symptoms of the female sexual organs are most-prominent, and have been clinically verified. Especially adapted to nervous, lively, affectionate women. Patient weak and run down.

Mind.--Great sadness, anxiety, and dread.

Stomach.--Sinking, all-gone sensation in stomach (Sep). Hungry, must eat.

Female.--Conscious of a womb. Pulsation in neck of womb. Desire easily excited. Feeling as if something was pressing on a sore spot in the pelvis: worse sitting. Pain from right side of womb to right or left breast. Nymphomania. Least contact of parts causes violent sexual excitement. Sore pain in uterus. Menses irregular, profuse, frequent, large clots. Feeling of protrusion. Prolapse; enlargement of uterus, with pelvic tenesmus and sharp pains, extending toward breasts; aggravated lying down. Dysmenorrhœa and chronic endometritis, with displacement. Must keep legs tightly crossed. Leucorrhœa green or bloody, alternate with mental symptoms and aching in sacrum. Benign tumors in breasts. Pain in them during menstrual period.

Urinary.--Urine frequent at night; smells like Valerian constant urging (Kreos).

Modalities.--Worse, least touch.

Relationship.--Compare: Plat; Lil; Sep (the latter lacks sexual erethism of Murex).

Dose.--Third to thirtieth potency.

HYDROCHLORIC ACID
HCl
SODIUM HYDROXIDE
NaOH
WHEATON

MURIATICUM ACIDUM
Muriatic Acid

This acid has an elective affinity for the blood, producing a septic condition similar to that found in low fevers with high temperature and great prostration. Patient becomes so weak she slides down the bed. Decomposition of fluids. Involuntary stools while passing urine. Hæmorrhages. Mouth and anus chiefly effected.

Mind.--Irritable and peevish; fretful Loud moaning. Great restlessness. Sad, taciturn; suffers in silence.

Head.--Vertigo; worse lying on right side; occiput heavy as if filled with lead. Sound of voice is intolerable. Pain as if brain were crushed.

Nose.--Hæmorrhage; much sneezing.

Face.--Lower jaw fallen; pimples and freckles; lips raw, dry, cracked.

Mouth.--Tongue, pale, swollen, dry, leathery, paralyzed. Deep ulcers on tongue. Hard lumps in tongue. Epithelioma; edges bluish-red (Carbol ac). Aphthous mouth. Gums and glands swollen. Fetid Breath. Sordes on teeth.

Throat.--Uvula swollen. Ulcers and false membrane. Œdematous, dark, raw. Attempted swallowing produces spasm and choking.

Stomach.--Cannot bear sight or thought of meat. At times, ravenous appetite and constant desire to drink. Achlorhydria and fermentation of food.

Rectum.--Tendency to involuntary evacuations while urinating. Hæmorrhoids most sensitive to all touch; even sheet of toilet paper is painful. Anal itching and prolapsus ani while urinating. Hæmorrhoids during pregnancy; bluish, hot with violent stitches.

Heart.--Pulse rapid, feeble, and small. Intermits every third beat.

Urine.--Cannot urinate without having bowels move at same time.

Female.--Menses appear too soon. Leucorrhœa. During menses, soreness of anus. Ulcer in genitals.

Extremities.--Heavy, painful, and weak. Tottering gait. Pain in tendo-Achilles.

Skin.--Papular and vesicular eruptions, with great itching (Rhus). Carbuncles; foul-smelling ulcers on lower extremities. Scarlet fever, livid, with petechiæ; scanty eruption. Eczema on back of hands.

Fever.--Cold extremities. Heat without thirst. Typhoid types, stupid. Hæmorrhages. Restlessness. Involuntary discharges. Bed-sores. Pulse rapid and feeble. Excessive prostration.

Modalities.--Worse, in damp weather, before midnight. Better, lying on left side.

Relationship.--Compare: Phos ac; Ars; Bapt. Follows well after Bry and Rhus.

Antidote; Bryonia.

Dose.--First to third potency.

MYGALE LASIODORA
Black Cuban Spider

Weakness, palpitation, nervousness, fear, like other spider preparations. Chorea is the principal therapeutic field of this. Sexual symptoms are important.

Mind.--Delirious, restless, sad; fears death; despondent.

Face.--Twitching of facial muscles. Mouth and eyes open in rapid succession. Hot and flushed. Tongue dry and parched; put out with difficulty. Head jerked to one side. Grating of teeth at night.

Stomach.--Nausea, with dim sight. Aversion to food. Excessive thirst.

Male.--Violent erections. Chordee (Kali brom; Camph).

Extremities.--Unsteady gait. Constant motion of whole body. Tremulous. Intense redness in streaks, following course of lymphatics. Twitching of limbs. Restless hands. Convulsive, uncontrollable movements of arms and legs. Limbs drag while walking.

Relationship.--Compare: Agar; Tarant; Cupr, Zizia.

Modalities.--Better, during sleep. Worse, in morning.

Dose.--Third to thirtieth potency.

MYRICA CERIFERA
Bayberry
(MYRICA)

Marked action on the liver, with jaundice and mucous membranes. Persistent sleeplessness. Jaundice.

Mind.--Despondent, irritable, indifferent. Gloomy.

Head.--Scalp feels tight. Headache, with drowsiness; yellow sclerotica; aching in eyeballs. Pressure in vertex and forehead. Dull, heavy aching in temples and forehead on waking in the morning. Pain and stiffness in nape of neck.

Face.--Yellow, Itching and stinging. Creeping sensation.

Mouth.--Tongue furred, with bad taste in mouth, and nausea. Tenacious, thick, nauseous secretion. Tender, spongy and bleeding gums (Merc).

Throat.--Constricted and rough feeling, with a constant desire to swallow. Stringy mucus; detached with difficulty.

Stomach.--Taste bitter and nauseous, with offensive breath. Complete loss appetite, but with a feeling of fullness in the stomach after a hearty meal. Strong desire for acids. Weak, sinking feeling in the epigastrium, approaching nausea; increased after eating; relieved by rapid walking.

Abdomen.--Dull pain in the region of the liver. Complete jaundice, with bronze-yellow skin; loss of appetite. Fullness in the stomach and abdomen. Scanty, yellow, frothy urine.

Stool.--Constant discharge of flatus when walking. Urging to stool, with no other results than the expulsion of a great amount of flatus. Loose, light-colored stool; ash-colored and destitute of bile.

Urinary.--Dark, frothy, scanty, high-colored, biliary.

Sleep.--Disturbed, bad dreams and frequent waking; insomnia.

Extremities.--Staggering gait. Pain under shoulder-blades and back of neck, in all muscles, in hollow of right foot.

Skin.--Yellow and itching. Jaundice. Creeping sensation, as of insects.

Relationship.--Compare: Ptel; Cornus cir; Chelid; Lept; Fagop.

Antidote: Digit (jaundice).

Dose.--Tincture, to third potency.

MYRISTICA SEBIFERA
Brazilian Ucuba

A remedy of great antiseptic powers. Inflammation of skin, cellular tissue and periosteum. Traumatic infections. Parotitis. Fistulas. Carbuncles. Specific action in panaritium. Pain in the finger nails with swelling of the phalanges. Hands are stiff, as if from squeezing something a long time. Coppery taste and burning in throat. Tongue white and cracked. Phlegmonous inflammations. Hastens suppuration and shortens its duration. Often does away with use of the knife. Inflammation of middle ear, suppurative stage. Fistula in ano. Acts more powerfully often than Heper or Silica.

MYRTUS COMMUNIS
Myrtle

The leaves contain Myrtol, an active antiseptic. Chest pains, as found often in consumptives, call for this remedy. Incipient phthisis. Nerve sedative and stimulant to mucous membranes, bronchitis, cystitis and pyelitis.

Chest.--Stitching pain in left breast, running through to shoulder-blade (Illic; Therid; Pix). Dry, hollow cough, with tickling in chest. Worse in the morning. Sensation of burning in left chest.

Relationship.--Compare: Myrtus Chekan (Chronic bronchitis with dense, yellowish sputum, difficult to detach. Copious expectoration keeps patient distressed and coughing).

Dose.--Third potency.

Click picture for many more pictures

NAJA TRIPUDIANS
Virus of the Cobra

Naja produces a typical bulbar paralysis (L. J. Boyd). Causes no hæmorrhage but only œdema, hence the victims of this reptile frequently bear very little sign of external injury a small scratch or puncture being the only indication where the fangs have worked their havoc. The tissue lying beneath the wound is colored dark purple, and a large quantity of viscid blood-like fluid collects in the vicinity of the wound. An intense burning pain at the spot bitten is the first symptom. In man there follows an interval before fresh symptoms occur. The average is about an hour. Once developed, the symptoms follow a rapid course. A feeling of intoxication is produced, followed by a loss of power over the limbs. The patient is bereft of speech, swallowing, and the control over the movement of the lips. The saliva is ejected in large quantities, the respiration gradually becomes slower and slower, and at length ceases. Conscious all time. Is not a hæmorrhagic or septic, medicine like Lachesis and Crotalus. Its action settles around the heart; valvular troubles. Marked surging of blood upwards, marked dyspnœa, inability to lie on left side. Hypertrophy, and valvular lesions. Organs seem to be drawn together. Very susceptible to cold. With heart symptoms, pain in forehead and temples. Diseases, primarily depending upon degeneration of motor cells. Control of sphincters lost.

Mind.--Broods constantly over imaginary troubles. Suicidal insanity (Aur). Depressed. Aversion to talking. Blurred speech. Melancholy. Dreads to be left alone. Fear of rain.

Head.--Pain in left temple and in left orbital region, extending to occiput, with nausea and vomiting. Hay-fever, with dry larynx. Suffocative spells after sleeping (Lach). Eyes staring. Ptosis of both lids.

Ears.--Illusions of hearing; otalgia; chronic otorrhœa, black discharges; smells like herring brine.

Respiratory.--Grasping at throat, with sense of choking. Irritating, dry cough, dependent on cardiac lesions (Spong; Lauroc) Sticky mucus and saliva. Asthmatic constriction in evening. Asthma beginning with coryza.

Heart.--Dragging and anxiety in præcordia. Feeling of weight on heart. Angina pains extending to nape of neck, left shoulder and arm with anxiety and fear of death. With the heart symptoms pain in forehead and temples. Pulse irregular in force. Threatened paralysis of heart, body cold, pulse slow, weak, irregular, tremulous. Acute and chronic endocarditis. Palpitation. Stitching pain in region of heart. Damaged heart after infections diseases. Marked symptoms of low tension (Elaps, Vipera).

Female.--Neuralgia of left ovary; often serviceable in obscure pain in left groin, especially in post-operative cases; seems to be drawn to heart.

Sleep.--Profound, like a log, with stertorous breathing, a typical reptilian state.

Modalities.--Worse, from use of stimulants; better, from walking or riding in open air.

Relationship.--Compare: Serpent poisons generally. Bungarus Fasciatus (Banded Krait). This venom produces a condition like an acute polioencephalitis and myelitis, both symptomatically and histologically. Lach; Crotal; Spig; Spong.

Dose.--Sixth to thirtieth potency.

NAPHTHALINUM
A chemical compound from Coal-tar; Tar Camphor
(NAPHTHALINE)

Coryza, hay-fever, phthisis pulmonalis, also gonorrhœa have been influenced favorably by this drug. Pyelonephritis. Irritation of the periphery of the urinary apparatus. Whooping-cough.

Head.--Lying as if stupefied by a narcotic. Restless. Face pale yellowish hue.

Eyes.--Marked affinity for the eye. It produces detachment of the retina; papillo-retinal infiltration; deposits in patches upon the retina; amblyopia and consecutive amaurosis; sparkling synchisis; soft cataract. Exudation in the retina, choroid and ciliary body. Cataract. Opacity of the cornea.

Urine.--Irresistible desire. Meatus red swollen, and œdema of prepuce. Black urine. Cutting pain down penis. Pain in bladder. Terribly offensive odor of decomposing ammoniacal urine.

Respiratory.--Sneezing; eyes inflamed; painful; head hot. Hay-fever. Spasmodic asthma; better in open air. Soreness in chest and stomach; must loosen clothing. Dyspnœa and sighing inspiration. Emphysema in the aged with asthma. Whooping-cough, long and continued paroxysms of coughing, unable to get a respiration. Acute laryngo-tracheitis. Bronchitis when the spasmodic element is associated with tenacious expectoration and oppression (Cartier).

Skin.--Dermatitis; itching infiltration. Eruptions at corners of mouth and pigmentation around nails.

Non-homeopathic Uses-For worms, and especially pin--worms, one-gramme dose. Externally in skin diseases, five per cent ointment.

Relationship.--Compare: Dros; Corall; Coccus. Terpin hydrat (Whooping-cough, hay asthma and bronchial affections. 1-2 grain doses).

Dose.--Third trituration.

NARCISSUS PSEUDONARCISSUS
Daffodil
(NARCISSUS)

Symptoms of nausea followed by violent vomiting and diarrhœa.

Daffodil bulbs contain an alkaloid the action of which, according to authorities, varies as to whether the alkaloid is extracted from the flowering bulb or from the bulb after flowering. Thus in the former case the alkaloid produces dryness of the mouth, checks cutaneous secretions, dilates the pupil of the eye, quickens the pulse, and slows and weakens the heart contractions. On the other hand, the alkaloid from the bulbs after flowering produces copious salivation, increases cutaneous secretion, contracts the pupil of the eye, produces slight relaxation of the pulse, and slight faintness and nausea.--The Lancet.

A remedy for cough and bronchitis. Continuous cough, Coryza; frontal headache. Convulsive stage of whooping-cough.

Amygdalus Persica -- Peach Tree

The Ultimate Cure for Obesity

From Joe De Livera on 2004-12-25
159 replies 14808 views
This is my Christmas Gift which I would like to share with all who are overweight.

A few months ago I discovered that Natrum Phosphoricum (Nat Phos) 6x which I had given a few friends who came to me complaining of acidity after meals, also had a most unusual reaction on their weight. They discovered that they shed their weight by between 2 to 3 kg per month, on their normal daily regimen of eating and exercise.
They informed me that they passed more water than usual and that they felt much lighter in their bodies and were happy to be

able to use their old garments which they had been compelled to discard over the years.

My discovery may be considered as unbelievable but it is indeed true as anyone who is overweight can discover for him or her self. The use of Nat Phos 6x on a daily basis is quite safe as it constitutes a concentration of only 1/1Millionth of the salt. It promotes Peristalysis in the stomach and gut thereby reducing the build up of acidity in the stomach which leads to heart burn. It has been in use for many years as the ultimate remedy for acidity especially after a heavy meal but it has never been used, as far as I know, to reduce weight. The dose is 3 tablets Nat Phos 6x taken twice daily, or 2 tablets taken thrice daily, preferably after meals.

It is possible that my discovery can be considered as an important milestone in the Materia Medica of Homeopathic Remedies for the treatment of Obesity and I would recommend that those who use this simple remedy will please post their observations on their weight loss on this Forum.

Merry Christmas and a Happy New Year to you all.

Joe De Livera

Dear Joe

Welcome to to your own site. We will build it together.

| **Re: Nat Phos 6x the Ultimate Cure for Obesity** | By: silverman<br>Canada | September 10 2006 |
|---|---|---|

Dear Joe

Nice to see you here. Your Naturm Phos gave me much relief after many years, hope girilal would again tell us how to make it.

Thanks.

| **Re: Nat Phos 6x the Ultimate Cure for Obesity** | By: Joe De Livera<br>Sri Lanka | September 11 2006 |
|---|---|---|

Dear Silverman,

Glad to note that you have been helped by Nat Phos.

It would be of interest to learn how it helped you and if you would oblige by giving your case history, I feel sure that members would like to know how it did.

Regards

| **Re: Nat Phos 6x the Ultimate Cure for Obesity** | By: Joe De Livera<br>Sri Lanka | September 11 2006 |
|---|---|---|

To Silverman

It would be of interest to members to learn precisely how Nat Phos has helped you after many years.

Please indicate your ailment and the dosage you used of NP and what result you observed in which period of time.

| **Re: Nat Phos 6x the Ultimate Cure for Obesity** | By: girilal<br>New Jersey USA | October 19 2006 |
|---|---|---|

Natrum Phosphoricum

Phospho-soda (or any brand name containing Sodium Phosphate) is available as non prescription on all pharmacies for just $3 or 4

I use the one available at Wal-Mart stores ‘Fleet Phospho-soda’ below is the link.

http://phosphosoda.com/consumers/products/phosphosoda.aspx

Add about 1 drops of it in the 1 liter of Mineral water and Naturm Phos (approximately) 6X or 3C is ready.

Use two liter empty soda bottle, half filled and add a drop of Phospho Soda. Shake it vigorously and also bang the bottle on some soft surface for about twenty times.

Do not take more then 3 drops. Best results are seen if taken half hour after the food.

Now I have positively concluded that it really does reduce the weight. Many people have reported it.

girilal

| **Re: Nat Phos 6x the Ultimate Cure for Obesity** | By: jacob<br>Israel | December 31 2006 |

Thanks Joe De Livera, your remedy is working on my friends. Three people lost about 10-18 lbs in 3 months (all in Jerusalem ) but one is still the same so I take it as an exception.

God bless you all and happy new year.

| | | |
|---|---|---|
| **Re: Nat Phos 6x the Ultimate Cure for Obesity** | By: Joe De Livera<br>Sri Lanka | January 1 2007 |

To Jacob

Thank you for confirming that Nat Phos 6x has helped your friends to whom you have recommended it in Jerusalem. It is so very rarely that anyone especially a patient takes the time to confirm that a remedy that I and other prescribers have recommended has helped them in some way. It is now 2 years since I first announced my discovery on the ABC forum on Christmas Day 2004 the day before we suffered from perhaps the worlds greatest natural disaster, the Tsunami where we lost about 50000 lives in Sri Lanka alone.

I have used Nat Phos successfully in many cases here in SL and and since that time many thousands, perhaps hundreds of thousands have used it successfully throughout the world. It is a very safe remedy and can be used without any side effects. I have noticed that it only helps about 80% of those who use it and it is essential that the patient does not use any coffee, cola beverages and any preserved meats that contain Saltpeter as they all antidote the Nat Phos.

I would like to mention that I have also use NP 3x and discovered that in some stubborn cases this works. You may like to recommend this potency to the one who did not respond. You may also like to advise those to whom you recommended the NP that they can reduce the dosage when their ideal weight has been reached. They should however not stop the remedy completely as they may discover that they may put back their weight again.

Thank you for your good wishes for 2007 which I reciprocate.

God Bless you.

Joe

|---|---|---|

This is true with any medicine of the world.

girilal

| **Re: Nat Phos 6x the Ultimate Cure for Obesity** | By: om | February 15 2007 |
|---|---|---|

Hello Everyone,
I would like my sister to start on this, she is 26 yr old 5"6 and weighs about 170 pounds, she needs to loose about 30/35 pounds as per her height. She or rather all of us are quite healthy eater, In our home we dont do much of fried food/junk food/ gluton and fat. She also works out but most of her weight is around stomach.
Now my question is can a person take Nat Phos and Arnica (for hair loss) together or does it have any negitive effects.
Thanks

| **Re: Nat Phos 6x the Ultimate Cure for Obesity** | By: Joe De Livera<br>Sri Lanka | February 16 2007 |
|---|---|---|

I have observed that Nat Phos is a very shy remedy when used for weight reduction if the patient also used other remedies and drugs when it usually does not work.

Your sister is advised to stop using Arnica and all other drugs and must not take Coffee, Sausages, ham and bacon and all canned beverages, especially cola drinks.

She must also exercise to bring out a sweat and should also cooperate by not eating foods especially fats.

2 tablets Nat Phos 6x taken 3 times daily is the recommended dosage for a month and she should report progress in a month to evaluate the dosage which can be reduced thereafter.

| **Re: Nat Phos 6x the Ultimate Cure for Obesity** | By: om | February 16 2007 |

"When dealing with absolute truth, there is neither room for emotion, nor individual interpretation of what necessarily is, irrefutable fact."

| **Re: Nat Phos 6x the Ultimate Cure for Obesity** | By: om | March 12 2007 |
|---|---|---|

I wanted to know if Nat Phos 6x works only in case of obesity, since 30 pounds overweight is not obese will this still work?
I made the wet dose for my sister and using it 2 times a day and after a week her weight was higher by 2 more pounds instead of loosing any weight.
Could be that tablets works better then wet dose?
Thanks

| **Re: Nat Phos 6x the Ultimate Cure for Obesity** | By: Annonymus | March 13 2007 |
|---|---|---|

Thanks: Joe De Livera

| **Re: Nat Phos 6x the Ultimate Cure for Obesity** | By: Joe De Livera<br>Sri Lanka | March 15 2007 |
|---|---|---|

To Om

I have observed over the period of over 2 years since I first discovered that Nat Phos 6x reduces weight, that it usually helps people to reduce weight by up to 1kg per week. It will not work to reduce weight if the patient uses any other drug or coffee, preserved meats like sausages, cola drinks.

I note that it has been classified as a myth by another member in a post immediately above. Murthy who admitted to being grossly overweight at that time, was one of my first subjects to try out Nat Phos in 2005 when he reported that he felt unusually lighter within a week of his first taking it but he later reported that it was not helping him. It was only much later that he admitted to being partial to both coffee and alcohol to which he was addicted. Both drinks will antidote the effects of Nat Phos 6x to reduce weight. In contrast thousands have reported that they have lost weight and the maximum reported was 1 kg per week.

The statistics that I now have prove beyond any doubt that it is very effective and as long as the subject is genuinely interested in losing weight and abides by the simple rules, NP will help him to do so. He is also advised to exercise and to abstain from eating large helpings of food, especially food that is fatty.

Nat Phos 6x cannot be used in the wet dose as it is a Decimal potency at 6x. It is only the Centesimal potencies (c) that can be used in the wet dose which I use exclusively after I was converted to using it by Dr Luc de Schepper in 2005.

There is no doubt that the wet dose is far more effective than the dry pellets that the majority of homeopaths use throughout the world.

**Re: Nat Phos 6x the Ultimate Cure for Obesity** By: Annonymus March 15 2007

**Re: Nat Phos 6x the Ultimate Cure for Obesity** By: Annonymus March 15 2007

Thanks: Joe De Livera

**Re: Nat Phos 6x the Ultimate Cure for Obesity** By: sajjadakram March 15 2007

No need to antidote the correct similimum unless the aggravation is severe.If you are serious to loose weight then come with us,run with us. 😃

sajjad.

**Re: Nat Phos 6x the Ultimate Cure for Obesity** By: Annonymus March 15 2007

Thanks: Joe De Livera

**Re: Nat Phos 6x the Ultimate Cure for Obesity** By: Joe De Livera
Sri Lanka March 16 2007

A member has inquired what the maximum weight loss that I have observed is, and the answer is 25kg. This reduction occurred within the period of a year. The client was 190cm tall and weighed 105kg. He consulted me for his GERD and I had given him my usual remedy Nat Phos 6x. He saw me in a few weeks and informed me that his GERD was OK and that he was able to fit into his old clothes which he had discarded throughout the years due to his increasing girth. This serendipitous observation dated back to 2003 and it was after about a year and many patients later that I shared this news on many Homeopathic Fora on Christmas Dar 2004 the day before the Tsunami which hit Sri Lanka causing the loss of about 50000 lives. I hoped that this news would enable those who were interested in reducing their weight to do so safely.

There are a few rules to be followed for weight reduction when using the therapy that I discovered which must be observed to avoid antidoting the Nat Phos 6x thereby preventing it from reducing weight:

No other drugs or remedies may be used during treatment.
Arnica is an exception.
Foods like sausages, ham and bacon which contained saltpeter.

Coffee and Alcohol.
Reduce intake of food especially fatty food.

The subject was advised to do a regular quota of exercise and not to overeat.

I have a lady in my organization who reduced 12 kg within 6 months and who even today takes just one tablet of NP daily. She was obviously overweight and was being teased by her colleagues for being fat and she was surprised to see for herself that she was perceptibly losing weight every week. She recorded her weight at my request and reported the loss weekly.

As I stated in a post above, I have observed that about 20% of the subjects who use NP for weight reduction do not respond to it. The majority of subjects do however lose weight and if one is serious about doing so, this therapy should be tried as it does not cause any negative side effects and if within a month there is no perceptible loss of weight the therapy can be stopped.

The usual loss of weight is about 1kg weekly and after the ideal weight is achieved the subject is advised to reduce the dosage to just one tablet daily as in the case reported above.

You are advised to visit the link below for the many posts by me and members of the ABC on weight reduction which also includes the first response of the member who posed the question that I have answered above.

| **Re: Nat Phos 6x the Ultimate Cure for Obesity** | By: patti3046<br>Miami | April 2 2007 |

I am logging on to say I started Nat Phos 6x today. I have a lot of weight to lose, but didn't try it before because I was on a lot of medications. I have gotten my diabetes under control, using Arnica, insulin plant, one diabetic medication, and a really strict diet. At one time I was on five different medications. So I am going to start the Nat Phos and go off the last diabetic medication and just monitor my sugar levels. I still am taking an antidepressant, which may interfere, but I don't want to go off everything at once.

So say a prayer for me and I will report back in a few weeks.

NATRIUM ARSENICOSUM
Arseniate of Sodium
(NATRUM ARSENICUM)

A remedy for nasal catarrh, with headache, pain at root of nose, dry and painful eyes. Psoriasis (Ars; Chrysoph ac; Thyroid). Bronchitis of children over seven years. Facilitates the termination of the cold and conserves strength and appetite (Cartier).

Head.--Floating sensation on turning head quickly; aching in frontal region and root of nose, over orbits. Headache; worse pressure and tobacco smoke.

Nose.--Watery discharge; drops into throat. Feels stopped; pain at root. Dry crusts, on removal, leave mucous membrane raw. Post-nasal dropping of thick, bland, yellowish mucus. Crusts in nose.

Ears.--Catarrhal conjunctivitis and blepharitis marginalis. Eyes feel weak, stiffness of balls and tendency of lids to close. Feel heavy and droop. Lachrymation in wind. Agglutination in morning. Dry, painful, burning; soon tire. Œdema of orbital region. Supraorbital pain.

Throat.--Dark, purplish, swollen, œdematous; red and glassy.

Respiratory.--Racking cough, with profuse greenish expectoration. Oppression of chest and about heart, and also larynx. Miner's asthma. Lungs feel as though smoke had been inhaled.

Extremities.--Aching in arms; worse in shoulder. Pain in anterior crural nerves. Joints stiff. Feels tired all over. Knee-joints crack.

Relationship.--Compare: Ars; Kali carb; Apis.

Dose.--Third to thirtieth potency.

NATRIUM CARBONICUM
Carbonate of Sodium
(NATRUM CARBONICUM)

All the Natrums stimulate cellular activity and increase oxidation and metabolish. Great debility caused by summer heat; chronic effects of sunstroke; exhaustion; anæmic; milky, watery skin; very weak ankles, are all peculiar Natrum carbonicum conditions.

Mind.--Unable to think; difficult, slow comprehension. Mental weakness and depression; worries; very sensitive to noise; colds, change of weather. Anxious and restless during thunderstorm; worse from music (Ambra). Marked gayety. Sensitive to presence of certain individuals.

Head.--Aches from slightest mental exertion, worse from sun or working under gas-light (Glon) Feels too large. Oversensitive of hearing. Head aches with return of hot weather. Vertigo from exposure to sun.

Nose.--All troubles of external nose which may attain a morbid size-pimples and puffiness. Constant coryza; obstruction of nose. Catarrh; bad smell of nasal secretion. Many troubles of external nose (Caust). Posterior nasal catarrh. Hawking much mucus from throat; worse, slightest draught.

Face.--Freckles, yellow spots, pimples. Swelling of upper lip. Pale, with blue rings around eyes and swollen lids.

Stomach.--Feels swollen and sensitive. Ill effects of drinking cold water when overheated. Water-brash. Hungry at 5 am. Very weak digestion, caused by slightest error of diet. Averse to milk. Depressed after eating. Bitter taste. Old dyspeptics, always belching, have sour stomach and rheumatism. Dyspepsia relieved by soda biscuits.

Bowels.--Sudden call to stool. Escapes with haste and noise. Yellow substance like pulp of orange in discharge. Diarrhœa from milk.

Female.--Induration of cervix. Pudenda sore. Bearing-down sensation (Sep; Murex). Heaviness; worse, sitting; better by moving. Menses late, scanty like meat-washings (Nitric ac). Leucorrhœal discharge, offensive, irritating preceded by colic.

Respiratory.--Dry cough, when coming into warm room from out of doors. Cough with coldness of left side of breast.

Sleep.--Wakes too early in morning. Amorous dreams. Drowsy during day.

Extremities.--Old sprains. Great weakness of limbs, especially in morning. Easy dislocation and spraining of ankles. Foot bends under (Caust). Soreness between toes and fingers. Heel and tendo-Achilles affected. Capped hands. The hollow of the knee is painful on motion. Icy cold up to knees.

Skin.--Inclination to perspire easily, or dry, rough, cracked skin. Eruption on finger-tips, knuckles and toes. Vesicular eruption in patches and circles. Veins full. Soles of feet raw and sore.

Modalities.--Worse, sitting, from music, summer heat, mental exertion, thunderstorm. Least draught, changes of weather, sun. Better, by moving, by boring in ears and nose.

Relationship.--Compare: Sodii bicarbonas (in vomiting of pregnancy with acetonuria, 30 grains in water spread over twenty-four hours); Nat sulph; Caust; Natr cacodyl (Foul breath and mouth with bad odor. Dry dermatitis of the skin of abdomen. Malignant growths. In phthisis, 5 centigrammes hypodermically, daily. Increase number of red blood corpuscles to double. Also in malignant disease). Arsynal--(Disodium methylarsenate). Introduced by M. A. Gautier, for phthisis in the second stage 4 to 6 centigrammes per day for one week followed by a week's intermission. But much smaller doses, i.e, 1x to 3x are followed by improvement, lessened fever, night sweat and hæmoptysis ceasing.

Antidote: Ars. Camph.

Dose.--Sixth potency.

−

Female.--Feeling as if uterus were pushed up on sitting down (Ferr iod). Feels as if it opened and shut. Violent metrorrhagia. Leucorrhœa and backache. Passive, bearing-down from heavy condition of uterus. Womb is heavy, sodden, with tendency to prolapse. Subinvolution.

Extremities.--Hands swollen every morning. Extreme weakness in ankles and knees.

Relationship.--Compare: Aur mur nat; Calc; Sepia; Heliotropium (uterine displacement, with active bearing-down sensation and loss of voice; membranous dysmenorrhœa).

Antidote: Pulsat; Guaiacum.

Dose.--Fifteen to twenty drops of Labarraque's solution in water. Third attenuation made with dilute alcohol, lower with water.

Jayashree Kanoi

NATRIUM MURIATICUM
Chloride of Sodium
(NATRUM MURIATICUM)

The prolonged taking of excessive salt causes profound nutritive changes to take place in the system, and there arise not only the symptoms of salt retention as evidenced by dropsies and œdemas, but also an alteration in the blood causing a condition of anæmia and leucocytosis. There seems also to be a retention in the tissues of effecte materials giving rise to symptoms loosely described as gouty or rheumatic gout. The provings are full of such symptoms (Dr. Stonham) A great remedy for certain forms of intermittent fever, anæmia, chlorosis, many disturbances of the alimentary tract and skin. Great debility; most weakness felt in the morning in bed. Coldness. Emaciation most notable in neck. Great liability to take cold. Dry mucous membranes. Constrictive sensation throughout the body. Great weakness and weariness. Oversensitive to all sorts of influences. Hyperthyroidism. Goitre. Addison's disease. Diabetes.

Feb 5th - Mar 5th

Mind.--Psychic causes of disease; ill effects of grief, fright, anger, etc. Depressed, particularly in chronic diseases. Consolation aggravates. Irritable; gets into a passion about trifles. Awkward, hasty. Wants to be alone to cry. Tears with laughter.

Head.--Throbs. Blinding headache. Aches as if a thousand little hammers were knocking on the brain, in the morning on awakening, after menstruation, from sunrise to sunset. Feels too large; cold. Anæmic headache of school-girls; nervous, discouraged, broken down. Chronic headache, semi-lateral, congestive, from sunrise to sunset, with pale face, nausea, vomiting; periodical; from eyestrain; menstrual. Before attack, numbness and tingling in lips, tongue and nose, relieved by sleep. Frontal sinus inflammation.

Eyes.--Feels bruised, with headache in school children. Eyelids heavy. Muscles weak and stiff. Letters run together. Sees sparks. Fiery, zigzag appearance around all objects. Burning in eyes. Give out on reading or writing. Stricture of lachrymal duct with suppuration. Escape of muco-pus when pressing upon sac. Lachrymation, burning and acrid. Lids swollen. Eyes appear wet with tears. Tears stream down face on coughing (Euph). Asthenopia due to insufficiency of internal recti muscles (Gels and Cup acet, when due to external muscles). Pain in eyes when looking down. Cataract incipient (Secale).

Ears.--Noises; roaring and ringing.

Nose.--Violent, fluent coryza, lasting from one to three days, then changing into stoppage of nose, making breathing difficult. Discharge thin and watery, like raw white of egg. Violent sneezing coryza. Infallible for stopping a cold commencing with sneezing. Use thirtieth potency. Loss of smell and taste. Internal soreness of nose. Dryness.

Face.--Oily, shiny, as if greased. Earthy complexion. Fevers-blisters.

Mouth.--Frothy coating on tongue, with bubbles on side. Sense of dryness. Scorbutic gums. Numbness, tingling of tongue, lips, and nose. Vesicles and burning on tongue, as if there was a hair on it. Eruptions around mouth and vesicles like pearls on lips. Lips and corners of mouth dry, ulcerated, and cracked. Deep crack in middle of lower lip. Tongue mapped (Ars; Rhus; Tarax). Loss of taste. Large vesicle on lower lip, which is swollen and burns. Immoderate thirst.

Stomach.--Hungry, yet loose flesh (Iod). Heartburn, with palpitation. Unquenchable thirst. Sweats while eating. Craving for salt. Aversion to bread, to anything slimy, like oysters, fats. Throbbing in pit. Sticking sensation in cardiac orifice.

Abdomen.--Cutting pain in abdomen. Distended. Pain in abdominal ring on coughing.

Rectum.--Burning pains and stitching after stool. Anus contracted, torn, bleeding. Constipation; stool dry, crumbling (Am m; Mag m). Painless and copious diarrhœa, preceded by pinching pain in abdomen.

Urine.--Pain just after urinating (Sars). Increased, involuntary when walking, coughing, etc. Has to wait a long time for it to pass if others are present (Hep; Mur ac).

Male.--Emission, even after coitus. Impotence with retarded emission.

Female.--Menses irregular; usually profuse. Vagina dry. Leucorrhœa acrid, watery. Bearing-down pains; worse in morning (Sep). Prolapsus uteri, with cutting in urethra. Ineffectual labor-pains. Suppressed menses (Follow with Kali carb). Hot during menses.

Respiratory.--Cough from a tickling in the pit of stomach, accompanied by stitches in liver and spurting of urine (Caust; Squilla). Stitches all over chest. Cough, with bursting pain in head. Shortness of breath, especially on going upstairs (Calc). Whooping-cough with flow of tears with cough.

Heart.--Tachycardia. Sensation of coldness of heart. Heart and chest feel constricted. Fluttering, palpitating; intermittent pulse. Heart's pulsations shake body. Intermits on lying down.

Extremities.--Pain in back, with desire for some firm support (Rhus; Sep). Every movement accelerates the circulation. Palms hot and perspiring. Arms and legs, but especially knees, feel weak. Hangnails. Dryness and cracking about finger-nails. Numbness and tingling in fingers and lower extremities. Ankles weak and turn easily. Painful contraction of hamstrings (Caust). Cracking in joints on motion. Coldness of legs with congestion to head, chest, and stomach.

Sleep.--Sleepy in forenoon. Nervous jerking during sleep. Dreams of robbers. Sleepless from grief.

Skin.--Greasy, oily, especially on hairy parts. Dry eruptions, especially on margin of hairy scalp and bends of joints. Fever blisters. Urticaria; itch and burn. Crusty eruptions in bends of limbs, margin of scalp, behind ears (Caust). Warts on palms of hands. Eczema; raw, red, and inflamed; worse, eating salt, at seashore. Affects hair follicles. Alopecia. Hives, itching after exertion. Greasy skin.

Fever.--Chill between 9 and 11 am. Heat; violent thirst, increases with fever. Fever-blisters. Coldness of the body, and continued chilliness very marked. Hydræmia in chronic malarial states with weakness, constipation, loss of appetite, etc. Sweats on every exertion.

Modalities.--Worse, noise, music, warm room, lying down about 10 a m;, at seashore, mental exertion, consolation, heat, talking. Better, open air, cold bathing, going without regular meals, lying on right side; pressure against back, tight clothing.

Relationship.--Complementary to Apis; Sepia; Ign.

Compare: Aqua marina-Isotonic plasma. Marine plasma is a sea water taken some miles from shore and some depth below surface, filtered and diluted with twice as much pure fresh water. It acts primarily on the blood, as in intoxications, scrofulous conditions, enteritis. It disintoxicates in cancer (administered subcutaneously in the treatment of diseases of skin, kidneys and intestines, gastro-enteritis, and tuberculosis). Scrofulous affection of children. Lymphadenitis. Lupus, eczema, varicose ulcers. A great "blood purifier and vitalizer. " Potentized sea-water in weakness, lack of reaction; symptoms worse seaside (Goitre). Sal marinum sea salt, (indicated in chronic enlargements of glands, especially cervical. Suppurating glands. It appears likely to become a most useful remedy as an auxiliary, if not as a principal, in the treatment of diseases in patients of a strumous diathesis. Also useful in constipation). Natrum selenicum (laryngeal phthisis with expectoration of small lumps of bloody mucus and slight hoarseness). Natrum silicum (hæmophilia; scrofulous bone affections; given intravenously every 3 days for senile pruritus); (Dolichos. Fagopyr). Ignat; Sep; Thuja; Graph; Alum.

Antidote: Ars; Phos; Spir nit dulc.

Dose.--Twelfth to thirtieth and higher. The very highest potencies often yield most brilliant results. And in infrequent dosage.

girilal

| **NATRIUM MURIATICUM Constituion** | By: girilal<br>New Jersey USA | September 18 2006 |
|---|---|---|

Natrum Muricatum (Sea salt)
(Objective, reasonable and hopeful)

1. Objective and reasonable
2. Hopeful
3. Dwells on the past
4. Ailments from disappointment, old (New Ignatia)
5. Ailments from shame.

6. Delusion that she looks wretched.
7. Delusion pitied.
8. Aversion man/woman
9. Gets angry when consoled.

Sulphur Gets nervous with music (palpitations) + Soon regrets after getting angry
Crocus Sativa Cheerful from music + immediately regrets after getting angry
Natrum Mur. Music makes him/her better + late repentance after getting angry
Ignatia Weeps from music + late repentance after getting angry
Aconite Cannot stand music, everything frightens him.

Natrum Mur. Gets angry when consoled

Ignatia Consolation makes her angrier.

Gelsemium Likes consolation

The main feeling of Natrum Muricatum child is feeling rejected and unloved, and then withdrawing to avoid being hurt again. These children tend to be shy, introverted and rarely present behavior problem. They cry alone not wanting to be embarrassed in public. They tend to be confident to parents and friends. Headaches, allergies and cold sores are the main problem. They often crave salt, and are averse to slimy foods and fat.

girilal

| **More about NATRIUM MURIATICUM Constituion/Personality** | By: girilal<br>New Jersey USA | September 22 2006 |
|---|---|---|

The sea is salt and salt are your tears; salt is used to preserve your food. Natrium muriaticum, being the homoeopatic salt, is a medicine for preserved and frozen grief and suppressed emotions. People who need this remedy often have had a grief too big to work through, so they stored it somewhere in their personality, consciously or unconsciously. They don't want to talk about it and often weeping is impossible for them. They feel deeply hurt inside. In order to prevent further attacks on their soul they build an emotional ivory tower around themselves. This means that it are quite vulnerable, closed people who find it difficult to show their emotions and who keep other people at a certain distance.

Natrium muriaticum-characters have something fine; usually it are sensitive, polite and very helpful people who will do anything to avoid hurting others, because they know so very well what it means to be denied or to feel damaged. They don't accept help from others, they value their independence and they dislike consolation or advice, because that can irritate them. If someone has caused them serious grief, they can completely erase this person from their lives. Forgiving is out of the question. Like salt-pillars these people have something fixed over them like rigid ideas, unchangeable decisions or fixed opinions. ("This is how I feel about it!" Discussion closed)

In Natrium muriaticum emotional pain has become a scar, a damaged part that will remain forever. And like people consider a scar a part of their body, Natrium muriaticum considers his grief to be an irremovable part of his life; somehow he has decided that this past will accompany him forever. That explains why he cannot accept sympathy or consolation.

Since the past seems to be filled with grief, disappointment or rancour, Natrium Muriaticum focuses very much on his hopes and ideals for a better future. Often they try to make this world a better place in their role of teacher, adviser, counselor or they stand up against injustice.

These people like sad, beautiful music or sad movies. They can cry about the grief depicted in these movies, but not about their own grief. Natrium muriaticum can suffer from a severe mental exhaustion as well as a physical exhaustion. They show a nervous tension. They can experience severe hopelessness and depression.

The Sun, our big source of life force, melts down the salt. So Natrium muriaticum-personalities develop many complaints in the sun and in warm surroundings: headaches, migraine, herpes zoster around the mouth, and their symptoms aggravate during daytime. And of course suppressed emotions cause health-problems, like headaches, skin-eruptions or high blood pressure. Often their bodies hold up moist (oedema, inability to sweat, no menstruation, severe constipation or not enough urinating).

At the seashore they feel better or much worse. (The sea symbolizes the water-element: our feelings and emotions). They have a preference for salty food and fish. Open air and cold water make them feel better.

| **Re: NATRIUM MURIATICUM (Table salt)** | By: dr dutta | October 7 2006 |
|---|---|---|

I am posting a girilal's post from other forum.

How to make Natrium Muricatum at home

I have used this homemade remedy on my patieces with great success.

Dissolve 1 tea spoon of salt in a cup of water.

Add about 1 drops of it in the 1 liter of Mineral water and Naturm Muricatum (approximately) 7X or 4C is ready.

To make further high potency, drain out the bottle (assuming couple of dropso of liquid are still hanging in the bottle, fill it up again and shake/bang it vigorously several time.

Use two liter empty soda bottle, half filled and add a drop of Phospho Soda. Shake it vigorously and also bang the bottle on some soft surface for about twenty times.

Do not take more then 3 drops. Best results are seen if taken half hour after the food.

| **Re: NATRIUM MURIATICUM (Table salt)** | By: Joe De Livera<br>Sri Lanka | September 18 2007 |

I would like to record the case of a patient who was a Type II Diabetic who had been advised by her doctor to reduce her intake of salt in her food and she was on an almost salt free diet. She was taking Metformin twice daily and discovered shortly after she started on my Arnica 30c therapy that she was able to reduce the drug to the minimum as the Arnica seemed to be able to control and stabilize her Blood Sugar.

She discovered that she got violent cramps of her calf muscles two or three times at night and had to stand up to relieve the pain. I conjectured that these cramps were due to the lack of salt in her diet and gave her Nat Mur 3x to replace the lack of salt in her system. She reported that this stopped her cramps immediately and she takes 2 tablets every night before sleep. She informed me that she is dependent on her Nat Mur without which she cannot sleep soundly as her cramps return if she forgets to take them.

| **Re: NATRIUM MURIATICUM (Table salt)** | By: girilal<br>New Jersey USA | September 19 2007 |
|---|---|---|

Dear Joe, this is Very informative. If she uses homemade sea water to 3X she may see more wonders. Sea water is a one composite remedy, it not only contains Nat. Mur. but almost all compounds of magnesium plus more.

girilal

| **Re: NATRIUM MURIATICUM (Table salt)** | By: Joe De Livera<br>Sri Lanka | September 19 2007 |
|---|---|---|

Dear Girilal

Your suggestion of giving her potentized sea water is interesting but the problem will be to get pure uncontaminated sea water which will not be easy around Colombo. The problem is that our sewers discharge directly into the sea and the sea water will not be safe for any homeopathic purpose.

My patient suffered from frequent attacks of Cellulitis some years ago and she had been hospitalized on 3 occasions within the space of about 2 years when she developed a high temperature on each occasion after her lesions which usually were infected had to be treated with Augmentin which left her in a very bad state upon discharge from hospital. She was desperate for some drug to prevent her frequent episodes of Cellulitis but her doctors could only treat the disease after it was established as they did not have any to prevent it.

It was then that I thought of my favourite remedy Arnica and gave her the 6c potency in the dry dose purely on an experimental basis as I had never used it before to treat this disease. I was pleasantly surprised to discover that Arnica helped her to overcome her Cellulitis as the familiar signs of the onset of this ailment never returned and she can be considered cured. I believe that Arnica promotes the flow of blood throughout the body and especially in the capillaries under the skin which in the case of this patient could have been blocked in some manner which resulted in her frequent attacks of Cellulitis. I also use Arnica 6c to treat chronic cases of Eczema and have had remarkable success in curing this disease which many skin specialists, ayurvedic physicians and even homeopaths had failed to cure.

My patient who is now 81 years of age takes Arnica 30c on a daily basis and this helps her with her Diabetes and also keeps her Cellulitis under control.

I have recorded the use of Arnica in this somewhat unorthodox manner to cure both Cellulitis and Eczema on many Homeopathic Forums in the hope that others who read this case history may also choose to use Arnica in the manner that I have , spite of the fact that its usuage does not conform to the norms of classical homeopathy.

|---|---|---|

Unless we use the original Sea salt which is a rarity these days, ( in tamil we say kal uppu), it may not be give the best results. The original sea salt, infact contains about 96 different minerals, where as the table salt which we use contains, only a dead NaCl ( unusable with loads of aluminium due to preparation and packaging techniques used) and non of the natural other minerals. The question is, how to get the pure Sea salt? The sea salt was never expected to be pure. It is this way today and as well as many years ago.

Regards
Garcot

all the contributors especially girilal,

can himalayan salt be used to make this remedy?

Can dr dutta please explain what salt he used to make the remedy?

thx

bambi

Helping others without any expectations is a special blessing from the Supreme.

| **Re:NATRIUM MURIATICUM (Table salt)** | By: garcot<br>Bangalore | September 26 2009 |
|---|---|---|

Himalyan salt, if at all, what the promoters claim is true,

It can be definitely be potentised to one's benefits.

Best salt, as I had mentioned earlier, is the sea salt prepared naturally by drying and using after purifying removing impurities. Also, please remeber, it would work better than Nat.mur available at homeopathic stores, as the seasalt or the himalayan salt also contains 84 other minerals. This includes, potassium,calcium,magnesium etc, hence we are potentising whole gamut of minerals whose benefits also, we would receive.

Best
Garcot

| **Re:NATRIUM MURIATICUM (Table salt)** | By: bambi | September 30 2009 |
|---|---|---|

thank you garcot.

When making this as a remedy at home, should one first prepare the saturated solution by heat dissolving? Then take 3 drops and dilute in one liter of water by vigorous shaking.

Generally this is what I have noticed in girilal's method of making the remedies. However he does not indicate anything about saturating any element before making a remedy. Since this is a salt easily soluble in water, I am curious if saturation is needed or not.

Please suggest.

thx

bambi

SODIUM NITRATE
N.W. 25 KGS
G.W:25.2KGS
MADE IN CHINA

NATRIUM NITRICUM
Nitrate of Sodium
(NATRUM NITRICUM)

A Rademacherian remedy for inflammations. Hæmoptysis. Hæmaturia. Purpura hæmorrhagica. Hæmorrhagic Variola. Drowsiness. Pains of tabes. Influenza. Hemoglobinuria. Uric acid diathesis. Asthma with urine supersaturated with solids. Anæmia and hydræmia. Exhaustion, must rest frequently when walking.

Head.--Dull. Indisposed to mental and bodily exertion. Pressing inward pain. Otalgia. Inward pressing in malar bones. Nosebleed.

Stomach.--Sour risings. Aversions to coffee. Flatulence, with pressure in pit of stomach and pain in chest; worse motion, better eructation.

Abdomen.--Abdominal muscles painfully contracted towards the spine. Distended. Difficult stool; feels as if more remained to pass.

Heart.--Pain in region of heart. Pulse slower and softer.

Dose.--Second trituration, also watery solution; 1 dram of salt to 8 oz water. Dram doses.

Jayashree Kanoi

Fleet
PHOSPHO-SODA
oral saline laxative
Ginger-lemon flavor
For bowel cleansing prior to medical procedures or relief of occasional constipation
1.5 Fl Oz (45 mL)

NATRIUM PHOSPHORICUM
Phosphate of Sodium

Natrum phosphoricum is the remedy for conditions arising from excess of lactic acid, often resulting from too much sugar. Ailments, with excess of acidity. Sour eructations and taste. Sour vomiting. Yellow, creamy coating at the back of the roof of mouth and tongue. Inflammation of any part of the throat, with sensation of a lump in throat. Flatulence, with sour risings. Colic, with symptoms of worms. Cracking of joints. Jaundice (1x trit). Oxaluria.

Mind.--Imagines, on waking at night, that pieces of furniture are persons; that the hears footsteps in next room. Fear.

Head.--Feels dull in the morning, full feeling and throbbing.

Eyes.--Discharge of golden-yellow, creamy matter from the eyes. Dilation of one pupil. Whites of eyes dirty yellow.

Ears.--One ear red, hot, frequently itchy, accompanied by gastric derangements and acidity.

Nose.--Offensive odor. Itching of nose. Naso-pharyngeal catarrh, with thick, yellow, offensive mucus.

Face.--Paleness of bluish, florid appearance of face.

Mouth.--Canker sores of lip and cheeks. Blisters on tip of tongue, with stinging in evening. Thin, moist coating on the tongue. Yellow, creamy coating at the back part of the roof of the mouth. Dysphagia. Thick, creamy membrane over tonsils and soft palate.

Stomach.--Sour eructations, sour vomiting, greenish diarrhœa. Spits mouthful of food.

Male.--Emissions without dreams, with weakness in back and trembling in limbs. Desire without erection. Gonorrhœa.

Female.--Menses too early; pale, thin, watery. Sterility, with acid secretions from vagina. Leucorrhœa; discharge creamy or honey-colored, or acid and watery. Sour-smelling discharges from uterus. Morning sickness, with sour vomiting.

Extremities.--Rheumatism of the knee-joint.

Back.--Weariness; aching in wrists and finger-joints. Hamstrings sore. Synovial crepitation. Rheumatic arthritis.

Skin.--Yellow. Itching in various parts, especially of ankles. Hives. Smooth, red, shining. Erysipelas. Feet icy cold in daytime, burn at night. Swelling of lymphatic glands.

Relationship.--Compare: Natrum lactic (rheumatism and gout; gouty concretions, rheumatism with diabetes); Natrum nitrosum (angina pectoris. Cyanosis, fainting, copious liquid stools at night; throbbing and fullness; faintness, nervous pain in head, nausea, eructations, blue lips). Natrum silicofluoricum-Salufer--(a cancer remedy; tumors, bone affection, caries, lupus, ethmoiditis. Must be used carefully); Nat selen (chronic laryngitis and laryngeal phthisis; hoarseness of singers, expectorate small lumps of mucus with frequent clearing of throat); Nat sulphurosum (diarrhœa, with yeasty stools); Nat sulphocarbol (pyæmia; purulent pleurisy, 3 to 5 grains every three hours); Nat telluricum (breath has odor of garlic; nightsweats of phthisis) calc; Robin; Phos. In oxaluria 1x four times daily prevents formation of calculi; keeps the oxal of lime in solution (Schwartz).

Dose.--Third to twelfth trituration. In Jaundice 1x. Non-homeopathically, Phosphate Soda used hypodermically for Morphine habit, by Dr. M. J. Luys. Phosphate Soda, 75 gr daily, for constitutional iodism, thyroidism and Grave's disease.

| **Re: NATRIUM PHOSPHORICUM** | By: Milap Singh<br>Bangalore, India | October 2 2006 |
|---|---|---|

I am putting this post on the instructions of girilal:

Natrum Phosphoricum

Phospho-soda (or any brand name containing Sodium Phosphate) is available as non prescription on all pharmacies for just $3 or 4

I use the one available at Wal-Mart stores ‘Fleet Phospho-soda’ below is the link.

http://phosphosoda.com/consumers/products/phosphosoda.aspx

Add about 1 drops of it in the 1 liter of Mineral water and Naturm Phos (approximately) 6X or 3C is ready.

Use two liter empty soda bottle, half filled and add a drop of Phospho Soda. Shake it vigorously and also bang the bottle on some soft surface for about twenty times.

Do not take more then 3 drops. Best results are seen if taken half hour after the food.

Now I have positively concluded that it really does reduce the weight. Many people have reported it.

Good wishes. Milap Singh

| **NATRIUM PHOSPHORICUM constituion/personality** | By: dr dutta | October 7 2006 |

NATRIUM PHOSPHORICUM constituion/personality

Mind.--Imagines, on waking at night, that pieces of furniture are persons; that the hears footsteps in next room. Fear, Seeing dead bodies in dreams (only Nat. Phos)

Most important thing it to note that when people take Nat. Phos in low potency for gerd acidity problems most of them complain seeing dead bodies in their dreams.

In that case discontinue the remedy for two days but take a high potency dose of it.

THIS IS A COPY OF THE FIRST ANNOUNCEMENT OF MY DISCOVERY ON THE ABC THAT NAT PHOS REDUCED WEIGHT THAT I MADE ON CHRISTMAS DAY 2004, THE DAY BEFORE THE TSUNAMI THAT DEVASTATED SRI LANKA.

The Ultimate Cure for Obesity

From Joe De Livera on 2004-12-25
159 replies 14808 views

This is my Christmas Gift which I would like to share with all who are overweight.

A few months ago I discovered that Natrum Phosphoricum (Nat Phos) 6x which I had given a few friends who came to me complaining of acidity after meals, also had a most unusual reaction on their weight. They discovered that they shed their weight by between 2 to 3 kg per month, on their normal daily regimen of eating and exercise. They informed me that they passed more water than usual and that they felt much lighter in their bodies and were happy to be able to use their old garments which they had been compelled to discard over the years.

My discovery may be considered as unbelievable but it is indeed true as anyone who is overweight can discover for him or her self. The use of Nat Phos 6x on a daily basis is quite safe as it constitutes a concentration of only 1/1Millionth of the salt. It promotes Peristalysis in the stomach and gut thereby reducing the build up of acidity in the stomach which leads to heart burn. It has been in use for many years as the ultimate remedy for acidity especially after a heavy meal but it has never been used, as far as I know, to reduce weight. The dose is 3 tablets Nat Phos 6x taken twice daily, or 2 tablets taken thrice daily, preferably after meals.

It is possible that my discovery can be considered as an important milestone in the Materia Medica of Homeopathic Remedies for the treatment of Obesity and I would recommend that those who use this simple remedy will please post their observations on their weight loss on this Forum.

Merry Christmas and a Happy New Year to you all.

Joe De Livera

| **Re: NATRIUM PHOSPHORICUM** | By: Pat2006M | October 29 2007 |
|---|---|---|

Is it suppose to be 1 drop or 3 drops in a liter of water?

| **Re: NATRIUM PHOSPHORICUM** | By: girilal<br>New Jersey USA | December 16 2007 |
|---|---|---|

3 drops in a liter of water. Or two drops in half liter of water.

I prefer half empty one liter water bottle. Half empty bottle can be shaken up vigorously.

girilal

| **Re: NATRIUM PHOSPHORICUM** | By: meg_123 | February 12 2008 |
|---|---|---|

This worked real magic to me. Just three dollars and I only used two drops of it. Wonder.

| **Re: NATRIUM PHOSPHORICUM** | By: libby800 | February 12 2008 |
|---|---|---|

Thanks, I am already assured. Hope I find it at CVS.

| **Re:NATRIUM PHOSPHORICUM** | By: reachvn | March 2 2009 |
|---|---|---|

Girilalji,

i wnat to consult you regarding the dosage of Nat Phos 6x, made with the Fleet Phospho soda method. Can you please let me know what is the dose if i make it as per your instructions? how much should be taken after a meal? 3 drops? i am kind of confused. thanks

| **Re:NATRIUM PHOSPHORICUM** | By: bom2105 | July 24 2009 |
|---|---|---|

Fleet Oral Phospho Soda has been banned in Canada. Can you please suggest an alternative?

| **Re: NATRIUM PHOSPHORICUM** | By: Joe De Livera<br>Sri Lanka | July 24 2009 |
|---|---|---|

I was never in favour of substituting Fleet Phospho Soda for Nat Phos 6x to be used for weight reduction and am glad to note that it has been officially banned in Canada.

Nat Phos 6x is a Biochemic remedy sold in Homeopathic pharmacies and is relatively cheap. There does not seem to be any justification to use the substitute even though only 2 drops are used in a liter of water.

The dose I recommend is 2 tablets taken immediately after each of 3 meals daily. The reduction of weight reported by users is around 1kg per week.

Exercise and controlled eating habits are also part of the therapy if one is serious about losing weight.

Here is a copy of my first announcement if Nat Phos that I made on Christmas Day 2004

| **Re:NATRIUM PHOSPHORICUM** | By: Grover | November 21 2011 |
|---|---|---|

No weight reduction even after two weeks of treatment.

| **Re:NATRIUM PHOSPHORICUM** | By: sonjaxfactor<br>Missouri(USA) | December 30 2011 |
|---|---|---|

Does Folliculinum counteract Nat Phos 6x? Or vice verse?

| **Re: NATRIUM PHOSPHORICUM** | By: Joe De Livera<br>Sri Lanka | December 31 2011 |
|---|---|---|

To Grover

If you are taking any drugs or other remedies and do not exercise and do not control your food intake, Nat Phos cannot help you.

It has helped hundreds of thousands of Obese patients and you can read their records on this forum and on the ABC forum.

However it must be noted that Nat Phos is only effective for about 80% of the patients who take it and you may be in this category.

Are you taking Arnica 30c in the Wet dose with the Nat Phos? This too helps in weight reduction

| | | |
|---|---|---|
| **Re: NATRIUM PHOSPHORICUM** | By: Joe De Livera<br>Sri Lanka | December 31 2011 |

To Sonjaxfactor

I cannot answer your question because I have not come across Folliculinum which may not be a commonly known Homeopathic remedy.

If you wish to use Nat Phos for weight reduction you must stop all other drugs.

| | | |
|---|---|---|
| **Re:NATRIUM PHOSPHORICUM** | By: sonjaxfactor<br>Missouri(USA) | January 5 2012 |

thanks Joe De Livera

| | | |
|---|---|---|
| **Re:NATRIUM PHOSPHORICUM** | By: ssoraia | March 1 2012 |

Can it be bought without having to buy the phospho soda (fleet)? IF so, what is the potency?

| | | |
|---|---|---|
| **Re: NATRIUM PHOSPHORICUM** | By: Joe De Livera<br>Sri Lanka | March 6 2012 |

I advice you NOT to experiment with Phos Soda as it can cause problems.

Order the Nat Phos 6x Biochemic Cell salt from any Homeopathic pharmacy or Health Food Store.

| | | |
|---|---|---|
| **My bro got headche and fever after using NATRIUM PHOSPHORICU** | By: Addi | May 9 2012 |

Hi! my brother who gets gastric problem in his stomach,and wind comming out every time,hands and feet burning,acidity,headche,some time constipation,he feels hungry so soon,he gets urine many time and after doing urine he feels again urine.His urine report was normal,when he awakes up in the morning his tongue seems yellow,he used "Natrium

Phosphoricum 6x"(five tablets three time in a day before food) two days as a result he got headche and fever actually my bro is too weak so what should he do now?kindly guide us , thank you

Click picture for many more pictures

NATRIUM SALICYLICUM
Salicylate of Sodium
(NATRUM SALICYLICUM)

Has an extensive range of action affecting the head, ear, throat, kidneys and liver and on metabolism. Hæmorrhages, especially epistaxis. Produces marked effects upon the internal ear, with vertigo, deafness, noises in ears and loss of bone conduction, hence, its use in Meniere's disease. One of the best remedies for the prostrating after-effects of influenza. Lassitude, drowsiness, listlessness, tremor. Incipient dementia. Increases the quantity of bile. Follicular tonsillitis.

Head.--Perfectly rational periods, alternate with manifestations of insanity of a somber character. Vertigo; worse, raising head. All objects seem to move to the right. Dull headache and confusion. Fibrositis of the scalp.

Eyes.--Retinal hæmorrhage, albuminuric retinitis with hæmorrhage. Iridocychitis due to traumatism with infection, and in sympathetic disease secondary to it (Dr. Gradel).

Ears.--Tinnitus of a low tone. Deafness. Auditory vertigo.

Chest.--Dyspnœa; breathing noisy, shallow, panting; pulse irregular. Complete loss of voice.

Skin.--Œdema, urticaria, red in circumscribed patches. Tingling and itching. Pemphigoid eruption.

Relationship.--Compare: Lobelia purpurascens (drowsiness; dizzy headache between eyebrows; cannot keep eyes open; tongue-white-feels paralyzed as also do the heart and lungs intense prostration of all vital forces; deadly chill, without shivering; useful for the low, nervous prostration of grippe); Gaulth; China. Pyrus malus-Crab apple tree--(Labyrinthine vertigo. Dr. Cooper).

Dose.--Third potency.

Non-Homeopathic Uses.--In acute articular rheumatism, lumbago, sciatica, etc. Usual doses, ten to twenty grains every three hour. Must be used carefully, as it is often destructive of kidney tissue. Ordinary allopathic doses allay the pain of dysmenorrhœa and promote menstrual flow.

NATRIUM SULPHURICUM
Sulphate of Sodium-Glauber's Salt
(NATRUM SULPHURICUM)

A liver remedy, especially indicated for the so-called hydrogenoid constitution, where the complaints are such as are due to living in damp houses, basements, cellars. They are worse in rainy weather, water in any form. Feels every change from dry to wet; cannot even eat plants growing near water, nor fish. Always feels best in warm, dry air. Clinically, it has been found a valuable remedy for spinal meningitis, head symptoms from injuries to head, mental troubles therefrom. Every spring, return of skin affections. Tendency to warts. Fingers and toes affected. Chronic gout (Lycop).

Mind.--Lively music saddens. Melancholy, with periodical attacks of mania. Suicidal tendency; must exercise restraint. Inability to think. Dislikes to speak, or to be spoken to.

Head.--Occipital pain. Piercing stitches in ears. Vertigo; relieved by sweat on head. Bursting feeling on coughing. Hot feeling on top of head. Bursting feeling on coughing. Hot feeling on top of head. Boring in right temple, preceded by burning in stomach. Ill-effects of falls and injuries to the head, and mental troubles arising therefrom. Dreams of running water.

Ears.--Sticking pain, earache, lightning-like stitches in damp weather.

Nose.--Nasal catarrh, with thick, yellow discharge and salty mucus. Coryza. Epistaxis. Ethmoiditis.

Eyes.--Conjunctiva yellow. Granular lids. Photophobia (Graphites).

Mouth.--Slimy, thick, tenacious, white mucus. Bitter taste, blisters on palate.

Throat.--Thick, yellow mucus, drops from posterior nares.

Stomach.--Vomits sour. Brown, bitter coating on tongue. Yellow complexion. Thirst for something cold. Bilious vomiting, acid dyspepsia, with heartburn and flatulence.

Abdomen.--Duodenal catarrh; hepatitis; icterus and vomiting of bile; liver sore to touch, with sharp, stitching pains; cannot bear tight clothing around waist, worse, lying on left side. Flatulency; wind colic in ascending colon; worse, before breakfast. Burning in abdomen and anus. Bruised pain and urging to stool. Diarrhœa yellow, watery stools. Loose morning stools, worse, after spell of wet weather. Stools involuntary, when passing flatus. Great size of the fecal mass.

Urine.--Loaded with bile. Brisk-dust sediment. Excessive secretion. Diabetes.

Female.--Nosebleed during menses, which are acrid and profuse. Burning in pharynx during menstruation. Herpetic vulvitis. Leucorrhœa yellowish-green, following gonorrhœa in female. Leucorrhœa with hoarseness.

Male.--Condylomata; soft, fleshy excrescences; greenish discharges. Gonorrhœa; discharge thick, greenish; little pain.

Respiratory.--Dyspnœa, during damp weather. Must hold chest when coughing. Humid asthma; rattling in chest, at 4 and 5 am. Cough, with thick ropy, greenish expectoration; chest feels all gone. Constant desire to take deep, long breath. Asthma in children, as a constitutional remedy. Delayed resolution in pneumonia. Springs up in bed the cough hurts so; holds painful side (Bry). Pain through lower left chest. Every fresh cold brings on attack of asthma.

Back.--Itching when undressing. Violent pains in back of neck, and at base of brain. Piercing pain between scapulæ. Spinal meningitis; opisthotonos.

Extremities.--Swelling of axillary glands. Inflammation around root of nails. Burning in soles; œdema of feet; itching between toes. Gout. Pain in limbs, compels frequent change in position. Run-arounds. Pain in hip-joints, worse left, worse, stooping. Stiffness of knees, cracking of joints. Rheumatism, worse in damp cold weather.

Skin.--Itching while undressing. Jaundiced, watery blisters. Sycotic excrescences; wart-like red lumps all over body.

Modalities.--Worse, music (makes her sad); lying on left side; dampness of basement, damp weather. Better, dry weather, pressure, changing position.

Relationship.--Compare: Natrum succinate (5 gr every 3 hours. Catarrhal jaundice). Malaria officinalis-decomposed vegetable matter--(Has evident power to cause the disappearance of the plasmodium of malaria. Malarial cachexia. General sense of weariness. Spleen affections. Malaria and rheumatism. Functional hepatic diseases. Sixth potency and higher).Natrum choleinicum-Fel Tauri Depuratum--(constipation; chronic gastric and intestinal catarrh; cirrhotic liver; diabetes; nape of neck pains; tendency to sleep after eating; much flatus; ascites); Momordica-Balsam Apple--(Colic, dysmenorrhœa with gushes of blood). Pulmo vulpis-Wolf's lung (persistent shortness of breath causing a paroxysm of asthma on the slightest motion. Strong, sonorous bubbling rales. 1x trit). Peumus Boldus-Boldo--(atonic states of stomach and intestinal canal; liver states following malaria. Burning weight in region of liver and stomach, bitter taste, languor; abscess of liver; asthma, bronchitis, catarrh, œdema of lungs); Natrum iodat (Incipient rheumatic endocarditis; chronic bronchitis, rheumatism and tertiary syphilis. Chronic catarrhal affections, arteriosclerosis. Here various symptoms, as angina pectoris, vertigo, dyspnœa become less marked after continued use of 5-10 grs, 3 times a day). Natrum hyposulph (liver-spots, locally and internally); Sulp; Thuja; Merc.: stilling.

Complementary: Ars; Thuja.

Dose.--First to twelfth trituration.

NICCOLUM METALLICUM
Metallic Nickel
(NICCOLUM)

Periodical nervous sick headaches, with asthenopia, weak digestion, constipation. Catarrh. Suits debilitated, nervous, literary patients, with frequent headaches, dyspepsia and constipation.

Head.--Cracking in cervical vertebræ when moving the head. Pain on top as from a nail. Pressure on vertex, in morning; worse till noon and in warm room. Stitches. Objects appear too large. Migraine; first on left side. Twitching of upper lip.

Nose.--Violent sneezing; stopped up. Nasal catarrh, with redness and swelling at tip of nose. Acute pain at root of nose, extending to vertex and through temples.

Throat.--Sore, right side with great tenderness; soreness to touch externally. Strangulated feeling.

Gastric.--Gone, empty feeling in epigastrium, without desire for food. Acute gastralgia with pains extending to shoulder. Thirst and intense hiccough. Sour, fetid secretions ooze from molar teeth. Diarrhœa and tenesmus after milk.

Female.--Menses late, scanty, with great debility and burning in eyes. Profuse leucorrhœa; worse, after urinating (Mag mur, Plat); also worse after menses.

Respiratory.--Hoarseness. Dry, hacking cough, with stitches in chest. Obliged to set up and hold head. Must put arms on thighs, when coughing.

Skin.--Itching all over, worse on neck, not relieved by scratching.

Modalities.--Worse, periodically, every two weeks; yearly, forenoon. Better, in evening.

Dose.--Third trituration.

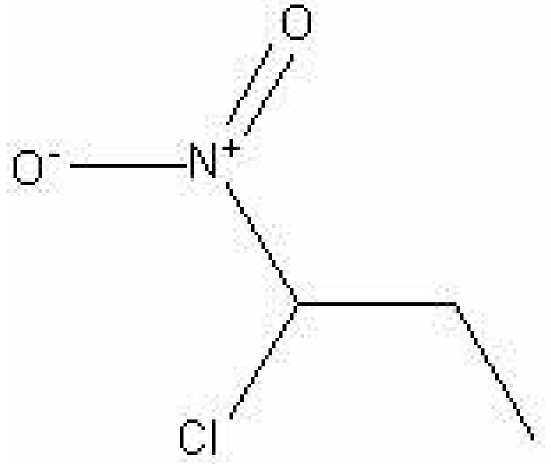
NITRI SPIRITUS DULCIS
Sweet Spirits of Nitre



Sensorial apathy in low fevers when there is stupor, difficulty of arousing patient, is met by this remedy. Dry skin, nausea, flatulence. Salty taste. Ill-effects of salt (halophagia) (Ars; Phos). Catching cold in stormy weather. Acute nephritis following Scarlet fever. Dropsy. Is an excellent diuretic.

Face.--Prosopalgia, with photophobia. Burning in cheeks, and vomiting, followed by lassitude. Boring in facial bones; in angles of lower jaw. Very sensitive to cold.

Respiratory.--Very rapid breathing by going only a short walk. Painful constriction beneath sternum.

Modalities.--Worse, from mental disturbance, during winter and spring.

Relationship.--Increases the action of Digitalis.

Compare: Phos ac; Lycop.

Dose.--A few drops of the pure spirits in water every two or three hours.

| **PITUITARY MACRO-ADENOMA.** | By: fameshow | January 14 2015 |

Please let me know the homeopathic remedies to treat a Pituitary Macro-Adenoma that measures 2.2 x 1.6 x1.5 cm on a male, late 40's. I don't drink, smoke, no precessed sugars or fats, no sodas, etc.
I'm currently taking Chanderprhaba Vati, Ashwaghanda, Tulsi, Kanchannara Guggul and Guggul.
I also add Gogi berries, Pomegranate, Noni, Mangosteen, Cholrella and Spirulina into my green vegetable juices and consume distilled water.
Please ask ANY question before prescribing to make sure we're in the right track. Thanks a lot!!!!!!!!!

NITRIC ACID
SAWDUST

Sawdust used on the spillage of nitric acid releases dangerous fumes of nitrogen oxides which are recognized from their brown to yellow colour

NITRICUM ACIDUM
Nitric Acid

Selects for its special seat of action the outlets of the body where the mucous membrane and skin meet; these pain as from splinters. Sticking pains. Marked improvement of all symptoms while riding in a carriage. Acts best on the dark complexioned and past middle life. Syphilis, after abuse of Mercury. Pains appear and disappear quickly (Bell). Hydrogenoid constitution. Sycotic remedy.

Blisters and ulcers in mouth, tongue, genitals; bleed easily. Fissures, with pain during stool, as if rectum were torn. All discharges very offensive, especially urine, feces, and perspiration. Persons who have chronic diseases, and take cold easily and disposed to diarrhœa. Excessive physical irritability. Cachexia, due to syphilis, scrofula, intermittent fever with liver involvement and anæmia, etc. Gravel; arthritis. Capillary bleeding after curettage.

Mind.--Irritable, hateful, vindictive, headstrong. Hopeless despair. Sensitive to noise, pain, touch, jar. Fear of death.

Head.--Sensation of a band around head. Headache from pressure of hat; full feeling; worse from street noises. Hair falls out. Scalp sensitive.

Ears.--Difficult hearing; better by riding in carriage or train. Very sensitive to noise, as the rattle of wagons over pavements (Coff; Nux). Cracking in ears when chewing.

Eyes.--Double vision; sharp, sticking pains. Ulceration of cornea. Gonorrhœal ophthalmia, photophobia, constant lachrymation. Syphilitic iritis.

Nose.--Ozæna. Green casts from nose every morning. Coryza, with sore and bleeding nostrils. Tip red. Stitches, as of a splinter in nose. Caries of mastoid. Nosebleed, with chest affections. Chronic nasal catarrh, with yellow, offensive, corrosive discharge. Nasal diphtheria, with watery and exceedingly excoriating discharge.

Mouth.--Putrid breath. Salivation. Bleeding of gums. Painful pimples on the sides of the tongue. Tongue clean, red and wet with center furrow. Teeth become loose; gums soft and spongy. Ulcers in soft palate, with sharp, splinter-like pains. Salivation and fetor oris. Bloody saliva.

Throat.--Dry. Pain into ears. Hawks mucus constantly. White patches and sharp points, as from splinters, on swallowing.

Stomach.--Great hunger, with sweetish taste. Longing for indigestible things-chalk, earth, etc. Pain in cardiac orifice. Dyspepsia with excess of oxalic acid, uric acid and phosphates in urine and great mental depression. Loves fat and salt (Sulph).

Abdomen.--Great straining, but little passes, Rectum feels torn. Bowels constipated, with fissures in rectum. Tearing pains during stools. Violent cutting pains after stools, lasting for hours (Ratanh). Hæmorrhages from bowels, profuse, bright. Prolapsus ani. Hæmorrhoids bleed easily. Diarrhœa, slimy and offensive. After stools, irritable and exhausted. Colic relieved from tightening clothes. Jaundice, aching in liver.

Urine.--Scanty, dark, offensive. Smells like horse's urine. Cold on passing. Burning and stinging. Urine bloody and albuminous. Alternation of cloudy, phosphatic urine with profuse urinary secretion in old prostatic cases.

Male.--Soreness and burning in glans and beneath prepuce. Ulcers; burn and sting; exude, offensive matter.

Female.--External parts sore, with ulcers (Hep.: Merc; Thuja). Leucorrhœa brown, flesh-colored, watery, or stringy, offensive. Hair on genitals falls out (Natr m, Zinc). Uterine hæmorrhages. Menses early, profuse, like muddy water, with pain in back, hips and thighs. Stitches through vagina. Metrorrhagia after parturition.

Respiratory.--Hoarseness. Aphonia, with dry hacking cough, from tickling in larynx and pit of stomach. Soreness at lower end of sternum. Short breath on going upstairs (Ars; Calc). Cough during sleep (Cham).

Extremities.--Fetid foot-sweat, causing soreness of toes, with sticking pain; chilblains on toes. Sweating of palms, hands; cold, blue nails. Offensive sweat in axillæ at night.

Skin.--Warts, large jagged; bleed on washing. Ulcers bleed easily, sensitive; splinter-like pains; zigzag, irregular edges; base looks like raw flesh. Exuberant granulations. Black pores on face, papules worse on forehead.

Modalities.--Worse, evening and night, cold climate, and also hot weather. Better, while riding in carriage (Reverse: Cocculus).

Relationship.--Complementary: Ars; Calad; Lac can; Sepia.

Inimical: Lach.

Compare: Merc; Kali; Thuja; Hepar; Calc.

Dose.--Sixth potency. As the nitric acid patient begins to improve skin symptoms may appear for a time, a favorable indication.

|---|---|---|

Nitric Acidum

(Perseverance)
1. Perseverance
2. Objective reasonable.
3. Hopeful
4. Obstinate in execution of his plans.

Nitric Acidum Objective reasonable, hopeful and obstinate in execution of his plans
Drosera Objective not reasonable, hopeful and obstinate in execution of his plans

Nitric Acidum and Drosera both stick to a Doctor or a medicine. Nitric Acidum patient has a reasonable objective. ("I read it some where and am totally convinced etc." but Drosera patient has no reasonable objective, he sticks to a doctor or medicine or anything else without a logic or reasonable objective.

## NITROMURIATICUM ACIDUM
Aqua Regia
(NITRO-MURIATIC ACID)

Almost a specific in Oxaluria. Removes the distressing skin symptoms resembling psoriasis. Three to five drops three times a day. So-called bilious conditions; torpid liver, hepatitis and early cirrhosis of liver. More adapted to hepatic torpor and gastric catarrh common in hot and damp climates and aggravated by meat eating and alcohol (Hale). Constricted anus. Gravel.

Mouth.--Gums bleed easily. Ptyalism. Constant drooling at night (Merc). Cankers; small, superficial ulceration over inside of mouth and tongue. Metallic taste (Cupr met).

Stomach.--Sour eructations, with empty hungry feeling in

Solidago Virgaurea

+
-

stomach; not relieved by eating. Salivation, worse at night.

Stool.--Constipated, with ineffectual urging. Sphincter constricted. Anus moist and sore.

Urine.--Cloudy. Burning in urethra. Oxaluria.

Dose.--Five to ten drops, well diluted.

NUPHAR LUTEUM
Yellow Pond-lily

Produces nervous weakness, with marked symptoms in the sexual sphere.

Male.--Complete absence of sexual desire; parts relaxed; penis retracted. Impotency, with involuntary emissions during stool, when urinating. Spermatorrhœa. Pain in testicles and penis.

Stool.--Entero-colitis. Yellow diarrhœa; worse in the morning. Diarrhœa during typhoid.

Relationship.--Compare: in sexual weakness; Agnus; Kali brom; Lycop; Selen; Yohimbin. In diarrhœa: Chelid; Gambog; Sulph, Nymphea odorata-Sweet Water Lily--(early morning diarrhœa, backache); acrid leucorrhœa, offensive ulcers; bronchorrhœa; ulcerative sore throat.

Dose.--Tincture to sixth potency.

NUX MOSCHATA
Nutmeg

Marked tendency to fainting fits, with heart failure. Cold extremities, extreme dryness of mucous membranes and skin. Strange feeling, with irresistible drowsiness. Indicanuria. General inclination to become unconscious during acute attacks. Lypothymia (Ignatia). Staggers on trying to walk.

Mind.--Changeable; laughing and crying. Confused, impaired memory. Bewildered sense, as in a dream. Thinks she has two heads.

Head.--Vertigo when walking in open air; aches from eating a little too much. Feeling of expansion, with sleepiness. Pulsating in head. Cracking sensation in head. Sensitive to slightest touch in a draught of air. Bursting headache; better hard pressure.

Eyes.--Objects look larger, very distant, or vanish. Motes before eyes. Mydriasis.

Nose.--Oversensitive to smell; nosebleed, dark blood; dry, stopped up.

Mouth.--Very dry. Tongue adheres to roof of mouth; but no desire for water. Saliva like cotton (Berb). Toothache in pregnancy. Tongue numb, paralyzed. Dryness of throat.

Stomach.--Excessively bloated. Flatulent dyspepsia. Hiccough, and craving for highly-seasoned food. Retrocession of gout to stomach.

Abdomen.--Paralytic weakness of intestines. Enormously distended. Stool is soft, and yet is unable to expel it, even with long straining (Alum). Faintness during or after stool. Protruding piles.

Female.--Uterine hæmorrhage. Menses too long, dark, thick. Leucorrhœa muddy and bloody. Suppression, with persistent fainting attacks and sleepiness (Kali c). Variableness of menstruation irregularity of time and quantity.

Respiratory.--Loss of voice from walking against the wind (Hep). Cough when getting warm in bed.

Heart.--Trembling, fluttering. Sensation as if something grasped heart. Palpitation; pulse intermits.

Extremities.--Pain in right hip to knee; worse, motion, especially going upstairs. Rheumatism from getting feet wet, from exposure to draughts. Rheumatism relieved by dry, warm clothes. Fatigue on slight exertion.

Sleep.--Great drowsiness (Indol). Complaints cause sleepiness. Coma.

Fever.--Chill begins in left hand (Carbo). Chilliness and heat without thirst; want of perspiration. Dry skin and of inner parts, also of eyes, nose, lips, mouth, tongue, throat, etc.

Modalities.--Worse, cold moist wind, cold food, cold washing, lying on painful side, motion, jar. Better, warmth, dry weather.

Relationship.--Oleum myristicae-Oil of Nutmeg--(as a remedy for boils, felons, poisonous ulcers, it has been used in the 2x potency); Ornithogalum (flatulence, swollen feeling across lower chest; whenever she turns in bed, feels as if a bag of water turned also; gastric ulcer and cancer). Myristica Sebifera (phlegmonous inflammations, hastens suppuration; powerful antiseptic. Ulcerative tendency in all tissues. Said to act more powerfully than Hepar and Silica).

Compare: Nux v; Puls; Rhus; Ign; Asaf.

Antidotes: Camph; Gels; Valer.

Dose.--First to sixth potency.

| **Nux Vomica** | By: Jayashree<br>Calcutta, India | September 16 2006 |
|---|---|---|

Click picture for many more pictures

Nux Vomica
Antidote: Everywhere in this remedy we observe the striking oversensitiveness of the patient; it is brought out in all the symptoms.
Irritable; oversensitive to noise, to light, to the least current of air, to his surroundings; extremely touchy in regard to his food; many kinds of food disturb, strong foods disturb; he is aggravated by meat; craves stimulants, pungent, bitter, succulent things, something to brace him up.
Oversensitive to medicines. One reason why there are so many Nux patients is because people have been overdrugged by the old school. When a patient comes from the old school and had prescribing, having had stimulants and tonics to brace him up, wine and stimulants of all sorts, it is sometimes impossible to get reliable symptoms, to get the patient settled down, until we give Nux as an antidote.
It is useful in those overdrugged by tea, coffee, wine. Old coffee drinkers become sensitive, oversensitive to noise, their symptoms are flitting; they do not give their symptoms well. Such patients will do well for a few days on Nux; some of their

symptoms will drop out and they will settle down.

Mind: The mental state is varied, but they all show oversensitiveness irritable, touchy, sensitive conditions.

They are never contented, never satisfied; disturbed by their surroundings, and the become irritable, so that they want to tear things, to scold. Impulses are strongly marked at times. The woman has impulses to destroy her husband or to throw her child into the fire; the impulse is intermingled with violent temper, cannot be contradicted or opposed; if a chair is in the way he kicks it over; if, while undressing, a part of his clothing should catch on a button he would pull it off because he is so mad at it. (Like Nit. ac.).

An uncontrollable state of irritability; it is a weakness and is accompanied by physical weakness; a lack of balance. For example, a business man has been at his desk until he is tired out, he receives many letters, he has a great many irons in the fire; he is troubled with a thousand little things; his mind is constantly hurried from one thing to another until be is tortured. It is not so much the heavy affairs but the little things. He is compelled to stimulate his memory to attend to all the details; he goes home and thinks about it; be lies awake, at night; his mind is confused with the whirl of business and the affairs of the day crowd upon him; finally brain fag comes on.

When the details come to him be gets angry and wants to get away, tears things up, scolds, goes home and takes it out of his family and children. Sleeps by fits and starts; wakens at 3 A.M., and his business affairs crowd on him so that he cannot sleep again until late in the morning when he falls into a fatiguing sleep and wakens up tired and exhausted. He wants to sleep late in the morning.

Melancholy, sadness, but all the time he feels as if he could fly to pieces, jerks things about, tears things up; wants to force things his own way. Driven by impulses to commit acts that verge upon insanity - the destruction of others. Natr. sul. has a strong impulse to destroy himself. Arg. nitr., also, particularly by jumping from a height, but he avoids placing himself in such a position.

He is oversensitive to the open air, to a draft of air; always chilly, always taking cold and it settles in the nose and extends to the chest.

Skin oversensitive to touch, to draft. Full of pains and aches. He sweats easily on the slightest provocation. Brain fag, fatigue, neuralgias; on the verge of insanity and this goes on to convulsions. Convulsions of single muscles and those of the whole body; muscular twitchings; weakness, trembling, and paralysis. This paralytic weakness and disordered state of the activity of the muscles and nerves are prominent.

Another state running through Nux is that actions are turned in opposite directions. When the stomach is sick, it will empty its contents with no great effort ordinarily, but in Nux there is retching and straining as if the action were going the wrong way, as if it would force the abdomen open; a reversed action; retches, gags, and strains and after a prolonged effort he finally empties the stomach.

The same condition is found in the bladder. He must strain to urinate. There is tenesmus, urging. The bladder is full and the urine dribbles away, yet when he strains it ceases to dribble. In regard to the bowels, though the patient strains much, he passes but a scanty stool.

In the diarrhea at times when he sits on the commode in a perfectly passive way, there will be a little squirt of stool, and then comes on tenesmus so that he cannot stop straining, and when he does strain there comes on the sensation of forcing back; the stool seems to go back; a kind of anti-peristalsis.

In constipation the more he strains the harder it is to pass a stool. In diarrhea and dysentery there is straining without relief, but as soon as he passes a little stool there is relief. In dysentery, Merc. has the constant urging; Merc. cor. tenesmus with great desire to urinate.

Pains: The reversed action of the various functions shows the spasmodic nature of this remedy. Pains shoot from the rectum up; burning.

Neuralgias about the eyes, face, and head; neuralgic headaches the pains stick, and tear; they cause weeping, fainting; they burn and sting. Pains in the head and face and in the extremities, that sting and tear, but especially draw. Sensation of tension in the muscles. A drawing in the back like a pulling or tension in the muscles.

The pain feels as if drawing, a spasm of the muscles; a drawing pain in the back; drawing pain in the back of the neck, forcing the patient to let the head go back; drawing pain down the spine; lumbago. Backache worse as soon as she lies down (pregnancy) as if it would break (Bry., Phos - as if broken, Kali c.) must get up and walk.

Neurities with great soreness of skin. Pains in the regions of the kidneys and liver. Pains draw so that he cannot turn over in bed, and the only way he can get over is to lift himself up by his hands and then turn over and lie down. Drawing pains in the sacrum and hips; drawing pains in the sacrum in connection with dysentery. Rending pains in the bowels and every pain causes desire for stool. Such is the characteristic of all the abdominal pains.

Drawing pains in the extremities causing spasms in the calves, feet, and toes. Cramps in the abdomen cause desire for stool; after pains in the form of cramps urge to stool; menstrual colic, with urging to stool; pains in the stomach, after eating, urge to stool. After much straining no stool passes, but after going several times a small stool passes with relief. It is scanty and with reversed peristaltic action.

Oversensitive to stimulants. It ii a routine remedy in men trying to sober up; even in delirium tremens. Old debauchees, broken down with stimulants sexual excesses and the worry and fret of business; they work half an hour and then go out and get a drink, and this goes on until finally they must give up, go home and go to bed. He is on the verge of insanity, irritable, fatigued, sweats much, is aggravated. from the air, sensitive to noise and light; broken down. He must have Nux, rest and no stimulants.

In those drinking too much tea, coffee and stimulants, they stay awake day and night until the end must come; there is tension in all the nerves; he feels as if he must fly, as if he could no longer hold together; his muscles and hands tremble; there is jerking of the limbs on going to sleep and in sleep.

Full of anxiety, despair, and hypochondriasis; "oversensitive to impressions; "all the senses are in this condition; cannot bear reading or conversation; irritable, and wishes to be alone."

Everybody displeases or does something to annoy him.

Everybody that attempts to soothe only angers him. He dreads the business affairs of the day. Finally this state comes on: "he quarrels, reproaches, scolds, insults from jealousy, mingled with unchaste expressions; soon afterwards howls and weeps aloud."

Patient is broken down sexually because he is unusually endowed with sexual desires and he indulges until broken down; sexually exhausted, impotent. Mental erethism but relaxation on intromission. Driven to suicide.

Nux is an old dyspeptic, lean, hungry, withered; bent forward; premature age; always selecting his food and digesting almost none; aversion to meat, it makes him sick; craves pungent, bitter things, tonics. Weak stomach; after meals pain in the stomach, nausea, retching; stomach sinks in; withers and loses flesh.

Nose: Tendency to take cold; gets coryza.

Colds settle in the nose, throat, chest and ears. Takes cold from the least provocation; perspires easily and the least current of air causes headache with coryza. If he is in a heated room and is disturbed in his equilibrium he gets a coryza.

Cepa coryza is also worse in a warm room. Much stuffing up of the nose in the house at night; nose feels completely filled up, particularly out of doors, but fluent in doors; thin, watery discharge during the day. Sensitive to the least draft; sneezing caused by itching in the nose. This itching goes to the throat and trachea.

Cough; burning in the air passages; all the mucous membranes in a state of irritation; nasal tone to voice; loss of voice; sore throat; tickling cough. Dry, teasing cough with great soreness of the chest, like Bry., the head feels as if it would split.

Coryza goes to the chest. Grippe with fever and bone pains; must pile on clothing; the only relief is by keeping unusually hot, yet a warm room aggravates the coryza before the fever comes on; but after the fever comes on he must have heat; aggravated even from the movement of air under the bed clothes; lifting the covers aggravates the pains, cough, etc.

Sharp fever and sweat, or a hot sweat like Opium (but Opium in a hot sweat wants the covers off, while Nux cannot raise the covers). Chills and fever; heat and sweat intermingled. In chills the fingers and hands are cold, and purple; cold from head to foot; the chill begins in the extremities or back, and extends over the whole body and, the patient must be covered up. Shortly there is a reaction and heat and sweat come on, but he must be covered through all the stages. Thirst is not a marked feature; sometimes it is found in the heat.

Tendency to jaundice in all the febrile states. Sclerotics become yellow. Skin becomes very yellow. Old intermittents with yellow skin. Runs close to Bry. in abdominal complaints with jaundice. Nux suffers from a disordered stomach. A stasis of the portal system is present, portal congestion; stasis in hoemorrhoidal veins with hemorrhoids; constipation; dysentery; paralysis of the rectum.

Stomach symptoms like Puls.; worse in the morning; foul mouth in the morning also like Puls. Bursting sensation in the head as if a stone crushed the vertex after disordered stomach.

Full of paralytic conditions. The bowels are in a state of excitement but this passes away and the time comes when the faeces remain in the rectum with no warning. This extends to the bladder, so that it becomes full of urine which cannot be voided; dribbling of urine in old men with large prostrate, or in gonorrhea.

Paralysis of the extremities; of the face; one arm; one hand; single muscles; facial paralysis not uncommonly cured by Nux. The sticking pains in paralysis are important.

At times false plethora, with flushed face; excitement of face blushing; great weakness and exhaustion, with irritability and the mental condition. When under no exertion with nothing to think of, patient appears to be well, but the thought of doing something exhausts him in a moment.

Headache from sweating; in wine drinkers; in those staying out at night; from night watching. The greatest relief in headaches as from perfect quiet. Headaches as if a stone pressed upon the vertex.

Most symptoms better from heat, but the head is worse from heat. Acne from eating cheese. It has most violent convulsions with opisthotonos; convulsions of all the muscles of the body, with purple face and loss of breath from the movements; conscious or semi-conscious during the whole spasm, aware of the sufferings and contortions which are horrible; worse from the slightest draft of air; tickling of the feet; the merest touch of the throat causes gagging.

It is given as a routine remedy for loss of appetite. It will increase the appetite but do dangerous work to the patient.

"Aversion to meat, usual food and drink, and customary tobacco and coffee, to water, ale, food just eaten."

Abdomen: Pains particularly of the abdomen; pains cutting, causing the patient to bend double, with nausea from overeating; bearing down; spasmodic pains in the abdomen, often extend into the limbs, but more often towards the rectum; colicky pains which urge to stool and urination; renal colic, especially when each pain shoots to the rectum and urges to stool.

Renal colic is caused by a stone in the ureter, which by its irritation causes a spasmodic clutching of the circular fibres of that canal; the proper medicine relaxes these fibres and the pressure from behind forces these calculi out at once.

The same is true of gall stone colic. The remedy that ameliorates, or some of its cognates, will overcome the tendency to form stones. Healthy bile dissolves gall stones in the sac; healthy urine does the same to a stone in the pelvis of the kidney.

Nux runs close to Bry. in abdominal complaints with marked yellowness of the skin. Bry. is worse from motion and not better from heat - Nux is both and is more suited to portal congestion, the neuralgias, etc.; is worse from slightest pressure (Coloc. is better from the slightest pressure, Mag. ph. is better from pressure and heat).

Bry. indicated more in peritonitis, lies with limbs drawn up.

Hemorrhoids, portal congestion, cutting pains to rectum causing urging to stool.

Cupr. has cutting pains from front to back as if transfixed.

Abdomen sunken in Nux, while in Calc. and Sepia it is engorged. Inula resembles Nux; has colic with urging to stool and to urinate.

"Milk sours on the stomach."

"Heat in the head when eating."

Bad effects from coffee, alcoholic drinks, debauchery. Sensation of phlegm in the throat; worse from eating. Aloe has diarrhea from leaving off beer. Nux has diarrhea from leaving off alcoholic drinks.

Sensation of a lump in the stomach (Bry.). In chronic cases Sepia is more apt to be indicated and follows Nux well, but quarrels with Bry.; associate this with the pressure in the vertex and you have the typical Nux condition.

Sensation of stone comes an hour after eating, showing that there has been an attempt at digestion, but in Abies nig. it comes at once. Kreos. pains do not begin until three hours after eating and then the food is vomited.

It is closely related to Sulphur and often antidotes the overaction of Sulphur. It seldom goes to the bottom and antidotes the constitutional action of Sulphur, but it will remove its exaggerated action, its superficial action.

Women: Menses too soon; too long; flow copious; more strikingly prolonged; flows and dribbles just enough to stain the linen, starting up now and again with clots.

One menstrual flow is prolonged into another. This will be accompanied with the mental state; excitable; oversensitive to medicines.

"Menses too early and too profuse; occur too soon and last too long; flow dark."

At times attended with violent pains, cramps in the uterus, extending over the body, ameliorated from heat and pressure; aggravated by the slightest current of air or cold; pains and spasms ameliorated by the hot water bottle, clothing, and heat.

Labor pains with soreness like Arnica, urging, etc. Bearing down as if contents would protrude, with teasing to urinate and urging to stool. The flow may be scant and fitful. Itching of the vulva is prominent.

Full of hysterical manifestations. Europeans develop symptoms more often calling for Nux in their hysterical manifestations, while Americans oftener need Ignatia.

Has troublesome asthma. Useful in persons who say they have asthma from every disordered stomach. They may go free for a year after Nux is given, and then they eat something that disagrees, and they sit up all night with asthma. They need Nux.

Asthma associated with cough; rattling in the chest; chest fills up with mucus; cough with gagging, retching; appears as if he had

taken a fresh cold.
Coryza every time he disorders his stomach. I have a patient who has a coryza every time she eats sausage; there is no cure for her because she places her coffee, wine, and social matters above her health. She can eat steak; some cannot eat any meat. After a disturbed stomach coryza which goes to the chest and then asthma comes on.
Palpitation and excitement of the heart and circulation. Much throbbing, Worse in the morning - mentally and physically. The coryza and some head symptoms are worse from the warmth of the bed like Merc., yet worse uncovering; worse from eating and from- motion; head is worse from heat.
Pressure and sense of weakness in, the left inguinal ring - hence cures hernia in babies (Lyc., right side). Arn. relieves soreness, etc. Conium also - it competes with Nux in sense of goneness in the groin.
Chills are riot better from any amount of covers; Ign. chills are better uncovering. In intermittents, the chill and heat intermingle, the heat is short and dry, and followed by hot, sweat and intense heat worse in the morning, but the chill comes at any time.

| **Nux Vomica Constituion/Personality** | By: girilal<br>New Jersey USA | September 17 2006 |
|---|---|---|

Nux Vomica
(The business man)

1. Anxiety about business
2. Businessman, worn out businessman
3. Generous to strangers but not so generous to family
4. Makes fun of others (Only Nux Vomica)
5. Cannot tolerate his own insult (Ignatia)
6. Litigious
7. Enjoys doing financial calculations.
8. Mischievous, teasing, lies a lot.
9. Finds faults in others.
10. Arrogant

Nux Vomica
Does not bargain
Not weeping
Not feeling alone
Is not forsaken
Consolation aggravates
Greedy but generous to strangers
Injustice Can not support
Judgmental
Makes fun of others
Ambition for fame
Ambition for money
Music aggravates

Pulsatilla
Hard bargainer
Weeping
Feeling alone
Feels forsaken
Loves to be consoled
Greedy
Worries about his health. He reads medical books, journals.

| **How to make Nux Vomica** | By: Milap Singh<br>Bangalore, India | September 17 2006 |
|---|---|---|

Low potency Nux Vomica works linka magic on the anal piles. I make this medicine at home. Seeds of Nux Vomica are easily available in India, Pakistan, Thailand and Malaysia but it is little tricky to obtain it from the vendors because one can make deadly homicidal poison from seeds, anyway it is quite difficult to make poison.

Seeds are very hard and extremely bitter; it is the bitterest thing on the earth. To make poison seeds must be soaked in water for several days and water must be drained several times a day. In weeks seeds become soft and all bitterness is drained.

Inner tiny core of the nuts is used to make poison. It is extremely deadly.

But seeds are quite safe in a layman’s hands and easy to make medicine.

How to make Nux Vomica:

In many local languages it is called “kuchla”

Soak just one nut in 1 liter water for a week. Some alcohol is also needed or water would fermentate in few days.

(few drops as a medicine can be used anytime after soaking of the nut)

After a week, put water and nut in blender and liquefy it. Let it rest for one days and then filter the water in a cloth.

This makes Nux Vomica about 4c or 8x potency.

Or one can buy Mother Tincture from Homeopathy stores and put just one drop in one liter of water. Make sure to shake the liquid vigorously.

I have resolved more case of Piles with this homemade Nux Vomica than any other medicine.

Good wishes. Milap Singh

| **Re: Nux Vomica** | By: JacobScott<br>England, UK. | February 22 2007 |
|---|---|---|

Hmm, I am intertested Mr Singh, 1/. How can a material substance, which has not been through either the process of sucussion or serial dilution be considered a Homoeopathic remedy, let alone a 4c or 8x? 2/. Nux Vomica in material doses is EXTREMELY poisonous, and actually contains strychnine, just 1 nut is enough to kill a small child, so do you therefore think it is advisable to not only be instructing people (incorrectly I might add) how to make Homoeopathic preparations from it, but also advising them to actually drink the water in which the alkaloids of the crude substance will be dissolved in high quantities?

I look forward to reading your response.

-Jacob.

"When dealing with absolute truth, there is neither room for emotion, nor individual interpretation of what necessarily is, irrefutable fact."

| **Re: Nux Vomica** | By: Jayashree<br>Calcutta, India | February 27 2007 |
|---|---|---|

Dear Jacob,
In this forum the USP is to heal... The crude medicines may balk the conventional Homeopath, but the masses are helped and that's what matters.

Jayashree Kanoi

| **Re: Nux Vomica** | By: JacobScott<br>England, UK. | February 27 2007 |
|---|---|---|

Dear Jayashree, I think the purpose of us all is to heal...
but, re: 'helped', this is debatable. What may appear to be provide cure when applied using non-classical approaches, may indeed only be causing supression, which would be responsible for the dissapearance of the symptoms being addressed, something all 'classical' Homoeopaths are very much aware of.

Best wishes.

-Jacob.

"When dealing with absolute truth, there is neither room for emotion, nor individual interpretation of what necessarily is, irrefutable fact."

| **Re: Nux Vomica** | By: girilal<br>New Jersey USA | February 17 2008 |
|---|---|---|

Nux Vomica seed can be obtined but it usually sold to professionals only because lethal homisidal poison can be made. Some tribes still use this as arrow poison. The area of function of this poison is respiratory muscles.

Upon hit by arrow, resperatory muscles paralyzes. Creature tries extreme hard to breath hence lungs collapse.

This is the very nature of Nux Vomica, it works upon nerualogical level, if asthma is due to neurological level, this medicine is the total cure. But used low potency in asthma patients it helps about half patients.

Now the poison -- it is not easy to obtain poison from Nux Vomica. Poison is called strychenine. Ignatia, Curaree Wooraree etc too have this poison.

Nux Vomica seed (little potato like) is so bitter, bitterest thing on the earth. Just one licking, and vomitting occur. So it is difficult to make poison, that is situated in the very core of the nut. It is pure strychenine.

For arrow poison tribals just soak the very hard seeds for some days in water and take out inner core and apply the paste on the arrow tips, in one has a wound on the fingers, touching the core past could be lethal.

But for homiciday purposes, it is very difficult to make a poison because it is extreme bitter. So seads are soaked in water bucket and each day bucket is drained off and new water is filled. This process is repeated for weeks and when no more bitter only then core is accessed.

It is safe to use whole nut. Just break the nuts in half with hammer and chisal and dip them in water, some liquer is also needed because fermentation occur very fast.

Just two drops of this liquid in a cup of water is a wonder medicine.

girilal

| **Re:Nux Vomica** | By: Denise<br>Colorado | December 20 2009 |
|---|---|---|

I've been having allot or irritability, get agitated easily, odors I cannot stand, very impatient, during PMS times it get's worse. I've been having this for a long time. When I decided to practice celibacy, this seems to be there all the time. Before, when I had a partner-it wasn't as bad, but still there.

I get strange fear thoughts. If I feel good, I can control these thoughts but they are still there. Having turned to Christ, helps out tremendously. I can get angry very easily, irritated, always feel in a hurry, very impatient. I want other people to hurry, especially at the grocery store. Public speaking I don't like, unless I know everybody. I can't be in places where there is to many people. I think people look at me or talk about me. Strange huh. For love and affection, I like to be consoled at difficult times in my life. I was never like this in my twenties. I was always an independent person. Knowing I have Christ to lean against, it's made a world of difference knowing whom are creator is. I just can't shake this irritating behavior, I know this really isn't ME! HELP!! How much Nux Vomica should I take? Will this help?

| **Re:Nux Vomica** | By: udaya kumar<br>-- | December 21 2009 |
|---|---|---|

Use Nux in the evening one dose at 30C potency after Sun set and use Sulphur 30C in the morning. Continue it for three days. Are you averse to bathing in cold water?

--

| | | |
|---|---|---|
| **Re:Nux Vomica** | By: Denise<br>Colorado | December 22 2009 |

I prefer warm water. But if you suggest cold water, I'll do anything to feel better. I very easily get cold during the winter time. During the summer time, I sweat more than the average person. I actually sweat alllllllot. Which concerns me. Thanks so much for your advice.

| | | |
|---|---|---|
| **Re:Nux Vomica** | By: user123 | December 22 2009 |

But if you suggest cold water, I'll do anything to feel better.

Such suggestions generally are not made. There is nothing implied to this effect in what Udaya Kumar has said. He wants to know your thermal preference.

| | | |
|---|---|---|
| **Re:Nux Vomica** | By: udaya kumar<br>-- | December 22 2009 |

Dear Denise,
Could you kindly start a new thread as I do not want to continue in this Nux Vomica thread as it involves more medicines. At the same time please give your complete picture by clicking patient present the whole picture above this box. with best wishes.

--

| | | |
|---|---|---|
| **Re:Nux Vomica** | By: Denise<br>Colorado | December 22 2009 |

I'll continue in Sulphur with the whole picture. Thanks!

Oak

Is the remedy for strong, steady people who never give up under adversity. Instead they plod on with determination, and never consider resting until they are past the point of exhaustion. Because they are so steady they often have many people relying on them, and their sense of duty is strong, so that they can feel frustrated and unhappy if illness or exhaustion get in the way of discharging duties.

So much is positive about the Oak person, but the negative side is the stubborn refusal to rest or sit back when the need for rest is obvious to all around. The remedy is used to help the Oak remain strong in adversity and not crack under the strain, while at the same time a different wisdom is learned, so that the person in this state can learn when not to strive.

Dr Bach's description
For those who are struggling and fighting strongly to get well, or in connection with the affairs of their daily life. They will go on trying one thing after another, though their case may seem hopeless. They will fight on. They are discontented with themselves if illness interferes with their duties or helping others. They are brave people, fighting against great difficulties, without loss of hope or effort.

**Okra / Ladies Finger / Bhindi**
**Started by: Jayashree at November 28 2006**

**Replies: 5 & Views: 15075** Font Bottom Of Page **Page 1 of 1** Reply

| **Okra / Ladies Finger / Bhindi** | By: Jayashree<br>Calcutta, India | November 28 2006 |
|---|---|---|

Click picture for many more pictures

A guy, suffering from constipation for the past 20 years and recently from acid reflux, didn't realise that the treatment could be so simple --- Okra! Some 2 months ago, he started eating 6 pieces of Okra and, since then, has not taken any other medication. Now, his blood sugar has dropped from 135 to 98 and his cholesterol and acid reflux are also under control.From the research of Ms. Sylvia Zook, PH.D (nutrition), University of Illinois. "Okra is a powerhouse of valuable nutrients, nearly half of which is soluble fiber in the form of gums and pectins. Soluble fiber helps to lower serum cholesterol, reducing the risk of heart disease. The other half is insoluble fiber which helps to keep the intestinal tract healthy, decreasing the risk of some forms of cancer, especially colo-rectal cancer. Nearly 10% of the recommended levels of vitamin B6 and folic acid is also present in a half cup of cooked okra.Okra is a rich source of many nutrients, including fiber, vitamin B6 and folic acid. The guy got the following numbers from the University of IllinoisExtension Okra Page: Okra Nutrition (half-cup cooked okra)* Calories = 25* Dietary Fiber = 2 grams* Protein = 1.5 grams* Carbohydrates = 5.8 grams* Vita! min A = 460 IU* Vitamin C = 13 mg* Folic acid = 36.5 micrograms* Calcium = 50 mg* Iron = 0.4 mg* Potassium = 256 mg* Magnesium = 46 mgThese numbers should be used as a guideline only. If you are on a medically-restricted diet, you should consult your physician and/or dietician. Ms Sylvia W. Zook, Ph.D. (nutritionist) has very kindlyprovided the following thought-provoking comments on the many benefits of this versatile vegetable.

1. The superior fiber found in okra helps to stabilize blood sugar as it curbs the rate at which sugar is absorbed from the intestinal tract.

2 Okra's mucilage not only binds cholesterol but bile acid carrying toxins dumped into it by the filtering liver. But it doesn't stop there...

3. Many alternative health practitioners believe all disease begins in the colon. The okra fiber, absorbing water and ensuring bulk in stools, helps prevent constipation. Fiber in general is helpful for this but okra is one of the best, along with ground flax seed and psyllium. Unlike harsh wheat bran, which can irritate or injure the intestinal tract, okra's mucilage soothes, and okra facilitates elimination more comfortably by its slippery characteristic many people abhor. In other words, this incredibly valuable vegetable not only binds excess cholesterol and toxins (in bile acids) which cause numerous health problems, if not evacuated, but also assures their easy passage from the the body. The veggie is completely non-toxic, non-habit forming (except for the many who greatly enjoy eating it), has no adverse side effects, is full of nutrients, and is economically within reach of most.

4. Further contributing to the health of the intestinal tract, okra fiber (as well as flax and psyllium) has no equal among fibers for feeding the good bacteria (probiotics).

5. To retain most of okra's nutrients and self-digesting enzymes, itshould be cooked as little as possible, e.g. with low heat or lightly steamed. Some eat it raw too.

In Bengal, most poor people boil the okra with their rice and eat it with salt.

| **Re: Okra / Ladies Finger / Bhindi** | By: girilal<br>New Jersey USA | November 29 2006 |

Okra works like Aloe Vera. Both contain Silica but in the final cooking state to become Silicates and hence not much use as Silicea.

In USA natives Red Indians always used Okara as medicine then it travelled to all world. In USA it is also called Gamboli. Soup is made by boiling its cut pieces.

In Indian Sub-Continent, it is mostly cooked by frying or sauting with salt and spices and its sticky layer is killed so is not medicinal any more.

I personally like to make its tea. Cut its pieces and drop these in hot water and after some time water becomes thicker. Same way Aloe tea can be made.

Both Aloe Vera and Okara fresh herbal tea are sold in all over South American countries.

Gr8 PW !!

There is only one religion....called mankind.
There is only one law....the law of Karma

There is only one God....He is everywhere and with everyone and knows everything.

| **Re: Okra / Ladies Finger / Bhindi** | By: Dr Hasmukh Shah | January 5 2007 |
|---|---|---|

Yes on my visit to USA I have tasted Gamboli Soup in New York City's delicatseen, it was OK and felt weird because we always fried okara but makes sense.

Then at home I tried its soup by just boiling it, it was great.

| **Re: Okra / Ladies Finger / Bhindi** | By: Joe De Livera<br>Sri Lanka | May 19 2013 |
|---|---|---|

I noticed that no one has recommended the use of Okra to help with reducing the Blood Sugar level of Diabetics.

I have prescribed it for the last few years to patients with my default remedy Arnica 6c in the Wet dose and many have reported that Okra has helped them to control their BS level.

A tender pod is cut into small 1 inch sections and left in a glass of water overnight which is consumed the morning after.

A quarter teaspoonful of Cinnamon powder brewed into a tea and taken twice daily also help as does the same dose of Turmeric brewed into a tea.

| **Re:Okra / Ladies Finger / Bhindi** | By: Pat2011 | May 19 2013 |
|---|---|---|

okra is believed to be probiotic. The lack of friendly bacteria in the digestive system leads to a large variety of diseases and symptoms. We lose the bacteria with antibiotics that we not only take with prescriptions but what we take via cow's milk and beef that are loaded with antibiotics. Pollution and stress also destroys the friendly bacteria (probiotics) on contact. Without the friendly bacteria (probiotic), all the organs become moldy and will stop functioning properly and will also cause hormonal imbalance. The brain makes hormones that it uses to tell the other organs how to function. Without the friendly bacteria, the brain loses the ability to produce the proper hormones in order to tell the other organs how to function.

| OLEANDER | By: Jayashree<br>Calcutta, India | December 1 2006 |
|---|---|---|

Click picture for many more pictures

OLEANDER
Rose-laurel
(NERIUM ODORUM)

Has a marked action on the skin, heart and nervous system, producing and curing paralytic conditions with cramp-like contractions of upper extremities. Hemiplegia. Difficult articulation.

Mind.--Memory weak; slow perception. Melancholy, with obstinate constipation.

Head.--Vertigo and diplopia, when looking down. Vertigo, when looking fixedly at an object, and on rising in bed. Pain in brain, as if head would burst. Numb feeling. Dull, unable to think. Indolence. Eruption on scalp. Humid, fetid spots behind ears (Graph; Petrol) and occiput, with red, rough, herpetic spots in front. Corrosive itching on forehead and edge of hair; worse, heat.

Eyes.--Can see objects only when looking at them sideways. Eyes water on reading. Double vision. Sensation as if eyes were drawn back into the head.

Face.--Pale, sunken, with blue rings around eyes (Phos ac).

Stomach.--Canine hunger, with hurried eating, without appetite. Thirst. Empty belching. Vomiting of food; greenish water. Throbbing in pit.

Abdomen.--Borborygmus, with profuse, fetid flatus. Gnawing around navel. Ineffectual urging. Undigested feces. Stool passes when emitting flatus. Burning pain in anus.

Chest.--Oppression as from a weight; asthmatic when lying down. Palpitation, with weakness and empty feeling in chest. Dyspnœa. Obtuse stitches in chest.

Extremities.--Weakness of lower limbs. Paralysis of legs and feet. Want of animal heat in limbs. Cold feet. Painless paralysis. Constant cold feet. Swelling, burning stiffness of fingers. Veins and hands swollen. Œdema. Stiffness of joints.

Skin.--Itching, scurfy pimples; herpes; sensitive and numb. Nocturnal burning. Very sensitive skin; slightest friction causes soreness and chapping. Violent itching eruption, bleeding, oozing; want of perspiration. Pruritus, especially of scalp, which is sensitive.

Modalities.--Worse, undressing, rest, friction of clothes.

Relationship.--Compare: Con; Nat m; Rhus; Caust; Lathyr. Oleander contains Oleandrin and also Nerein which latter is said to be closely related if not identical with Digitalin. The pulse becomes slower, more regular, more powerful. Diuresis; palpitation, œdema and dyspnœa of valvular disease disappear.

Antidotes: Camph; Sulph.

Dose.--Third to thirtieth potency.

OLEUM ANIMALE AETHEREUM

Dippel's Animal Oil
(OLEUM ANIMALE)

Acts on the nervous system, especially on pneumo-gastric region. Useful in migraine and neuralgia of spermatic cord. Burning pains and stitches. "Pulled upward" and "from behind forward" pains.

Head.--Tearing pain, with sadness and irritability; worse after dinner; relieved by rubbing. Itching, burning vesicles; better, friction. Malar bones feel pulled forcibly upward. Migraine with polyuria.

Eyes.--Smarting in eyes; misty vision. Glistening bodies before eyes. Lachrymation when eating. Short-sighted. Twitching of lids (Agar).

Nose.--Watery, excoriating discharge; worse in open air.

Face.--Feels drawn. Cramp-like pains. Twitching of lips. Malar bone feels pulled upward. Toothache, better pressing teeth together.

Mouth.--Bites cheek while eating (Caust). Tongue feels sore. Greasy feeling in mouth.

Throat.--Sore, dry, constricted. Air feels cold.

Stomach.--Sensation as if water were in stomach; of coldness, of constriction, and of burning; better, eructations.

Abdomen.--Flatulence and rumbling. Ineffectual urging stool, with burning in anus. After stool, bruised pain in abdomen.

Urine.--Polyuria. Greenish urine, frequent and urgent want to urinate, with tenesmus and scanty emission. Itching in urethra.

Male.--Desire increased; ejaculation too soon. Pain along spermatic cord to testicles. Testicles feel seized and pulled forcibly upward; worse, right. Pressure in the perineum. Prostatic hypertrophy.

Female.--Early and scanty menstruation; flow black.

Respiratory.--Chest feels constricted. Asthma from suppressed foot-sweat. Oppression. Stitches in breast from behind forward.

Extremities.--Sprained feeling in small of back. Cracking of vertebræ on raising head (Aloe, Nat c, Thuj). Restlessness. Rheumatic pain in shoulders. Fish-brine odor of sweat of heels.

Modalities.--Worse, after eating, from 2 to 9 pm. Better, by rubbing, eructation, open air.

Relationship.--Compare: Puls; Ars; Silic; Sepia.

Antidotes: Camph; Op.

Dose.--Third to thirtieth potency and higher.

OLEUM JECORIS ASELLI
Cod-liver Oil

Internally, a nutrient and a hepatic and pancreatic remedy (Burnett). Emaciation, lassitude, scrofulous diseases, rheumatic affections. Atrophy of infants; emaciation with hot hands and head; restless and feverish at night. Pains in liver region. Tuberculosis in the beginning.

Chest.--Hoarseness. Sharp stitching pains. Burning spots. Dry, hacking, tickling cough, especially at night. Whooping-cough in miserable, scrofulous children. Here give drop doses, increasing daily one drop up to twelve, then descend in the same way (Dahlke). Soreness through chest. Hæmoptysis (Acalypha; Millef). Palpitation, accompanies other symptoms. Yellowness. Children who cannot take milk.

Extremities.--Aching in elbows and knees, in sacrum. Chronic rheumatism, with rigid muscles and tendons. Burning in palms.

OLEUM SANTALI
Oil of Sandalwood

The action in the urinary and sexual spheres is most utilizable, especially in gonorrhœa. It is also a stimulating, disinfectant expectorant. Two or three drops on sugar will frequently relieve the hacking cough, when but little sputum is expectorated.

Male.--Painful erections; swelling of the prepuce. Thick, yellowish, muco-purulent discharge. Deep pain in perineum.

Urine.--Frequent, burning, smarting swelling, and redness of meatus. Stream small and slow. Acute aching in kidney region. Sensation of a ball pressing against the urethra; worse, standing. Gleet, with profuse, thick discharge; chronic cystitis.

Dose.--Two to ten m in capsules.

Photo by J. L. Hansen

OLIVE

This remedy show total exhaustion of mind and body after a great strain or nursing the sick. LOWERED KIDNEY FUNCTION is seen and LOWERED OXYGEN LEVELS IN THE BLOOD as well as TOXIC INTESTINAL FLORA and ALCOHOLISM. The Olive state is always a call to humility, and a challenge to deal with one's vital energy as well. This remedy will help to deal with stress with stamina and joy. The remedy belongs to the group LACK OF INTEREST IN PRESENT CIRCUMSTANCES along with CLEMATIS, HONEYSUCKLE, WILD ROSE, WHITE CHESTNUT, CHESTNUT BUD, and MUSTARD. There is weariness of mind, body, and emotions, and rest and recuperation are called for. Apathy can be present, one starts a task and doesn't finish it. Those in social services or suffering from prolonged illness.

ONOSMODIUM VIRGINIANUM
False Gromwell
(ONOSMODIUM)

Want of power of concentration and co-ordination. Vertigo, numbness and muscular prostration. Marked association of head and eye symptoms, with muscular tiredness and weariness.

A remedy for migraine. Headaches from eyestrain and sexual weakness. It produces diminution of sexual desire in both sexes; hence its homeopathicity, in sexual neurasthenia. Depressed or lost sexual life in women. Neuralgic pains. General prostration. Acts as if born tired.

Head.--Loss of memory. Nose feels dry. Confused. Dull, heavy, dizzy, pressing upward in occiput. Occipito-frontal pain in morning on waking, chiefly left side. Pain in temples and mastoid (Capsic).

Eyes.--Vision blurred; optic disc hyperæmic, and retinal vessels enlarged. Strained feeling in eyes; worse, using eyes. Eyes heavy and dull, muscular asthenopia; ocular muscles tense. Internal eye muscles paretic. Pain in eyeballs between orbit and ball, extending to left temple.

Throat.--Severe dryness. Discharge from posterior nares. Raw, scraping. Stuffed feeling in posterior nares. Symptoms worse by cold drinks.

Abdomen.--Craving for ice-water and cold drinks; wants to drink often. Abdomen feels bloated

Back.--Pain in dorsal and lumbar regions. Numbness and tingling in feet and legs.

Chest.--Sore, aching in breasts; feels swollen and sore. Pain in heart; pulse, rapid, irregular, weak.

Male.--Constant sexual excitement. Psychical impotence. Loss of desire. Speedy emissions. Deficient erections.

Female.--Severe uterine pains; bearing-down pains; old pains return. Sexual desire completely destroyed. Feels as if menses would appear. Aching in breasts. Nipples itch. Menses too early and too prolonged. Soreness in uterine region. Leucorrhœa, yellow, acrid, profuse.

Extremities.--Pain in back. Tired and numb feeling in legs, popliteal spaces, and below knees. Staggering gait. Sidewalk seems too high. Pain in left scapular region. Great muscular weakness and weariness.

Modalities.--Worse, from motion, jar, and tight clothing. Better, when undressed, when lying down on back, from cold drinks, and eating.

Relationship.--Compare: Nat mur; Lilium; Gels; Ruta.

Dose.--Thirtieth attenuation.

Jayashree Kanoi

| **Re:ONOSMODIUM VIRGINIANUM** | By: garcot<br>Bangalore | June 5 2011 |
|---|---|---|

It really works to build strong muscles and eliminate any weakness in muscles over long periods of inactivity.

Best
Garcot

# OPIUM
## Dried Latex of the Poppy (PAPAVER SOMNIFERUM)

Hahnemann says that it is much more difficult to estimate the action of Opium than of almost any other drug. The effects of Opium as shown in the insensibility of the nervous system, the depression, drowsy stupor, painlessness, and torpor, the general sluggishness and lack of vital reaction, constitute the main indications for the drug when used homeopathically. All complaints are characterized by sopor. They are painless, and are accompanied by heavy, stupid sleep, stertorous breathing. Sweaty skin. Dark, mahogany-brown face. Serous apoplexy-venous, passive congestion. Want of sensitiveness to the action of medicines. Reappearance and aggravation from becoming heated. Opium lessens voluntary movements, contracts pupils, depresses higher intellectual powers, lessens self-control and power of concentration, judgment; stimulates the imagination, checks all secretions except that of the skin. Want of susceptibility to remedies even though indicated. Diseases that

Ferrum Metallicum (iron Metal)

Picture of this second

facebook join our group +

43,725 Pageviews
Feb 5th - Mar 5th
+
−

originate from fright.

Mind.--Patient wants nothing. Complete loss of consciousness; apoplectic state. Frightful fancies, daring, gay, bright. Unable to understand or appreciate his sufferings. Thinks he is not at home. Delirious talking, with wide open eyes.

Head.--Vertigo; lightness of head in old people. Dull, heavy, stupid. Delirium. Vertigo after fright. Pain in back of head; great weight there (Gels). Bursting feeling. Complete insensibility; no mental grasp for anything. Paralysis of brain.

Eyes.--Half-closed, dilated; pupils insensible, contracted. Ptosis (Gels; Caust). Staring glassy.

Face.--Red, bloated, swollen, dark suffused, hot. Looks intoxicated, besotted (Bapt; Lach). Spasmodic facial twitching, especially corners of mouth. Veins of face distended. Hanging down of lower jaw. Distorted.

Mouth.--Dry. Tongue black, paralyzed bloody froth. Intense thirst. Blubbering op lips. Difficult articulation and swallowing.

Stomach.--Vomiting, with colic and convulsions. Fecal vomiting. Incarcerated hernia. Hungry; no desire to eat.

Abdomen.--Hard, bloated, tympanitic. Lead colic during colic, urging to stool and discharge of hard feces.

Stool.--Obstinate constipation; no desire to go to stool. Round, hard, black balls. Feces protrude and recede (Thuj; Sil). Spasmodic retention of feces in small intestines. Stools involuntary, black, offensive, frothy. Violent pain in rectum, as if pressed asunder.

Urine.--Slow to start; feeble stream. Retained or involuntary, after fright. Loss of power or sensibility of bladder.

Female.--Suppressed menses from fright. Cessation of labor-pains with coma between paroxysms. Threatened abortion and suppression of lochia, from fright, with sopor. Horrible labor-like pains in uterus, with urging to stool.

Respiratory.--Breathing stops on going to sleep; must be shaken to start it again (Grindelia). Hoarse. Deep snoring; rattling, stertorous breathing. Difficult, intermittent, deep, unequal respiration. Heat in chest; burning about heart. Cough, with dyspnœa and blue face; with bloody expectoration.

Sleep.--Great drowsiness (Gels.; Nux mosch). Falls into a heavy stupid sleep. Profound coma. Loss of breath on falling asleep (Grind). Coma vigil. Picking at bedclothes. Very sleepy, but cannot go to sleep. Distant noise, cocks crowing, etc, keep him awake. Child dreams of cats, dogs, black forms. Bed feels so hot cannot lie on it. Pleasant, fantastic, amorous dreams. Shaking chill; then heat, with sleep and sweat. Thirst only during heat.

Fever.--Pulse full and slow. Heat extending over body. Hot perspiration. Fever characterized by stupor, snoring respiration, twitching of limbs, intense thirst and sleepiness. General low temperature with inclination to stupor.

Back and Extremities.--Opisthotonos. Swollen veins of neck. Painless paralysis (Oleand). Twitching of limbs. Numbness. Jerks as if flexors were overacting. Convulsions; worse from glare of light; coldness of limbs.

Skin.--Hot, damp, sweating, Constant desire to uncover. Hot perspiration over whole body except lower limbs.

Modalities.--Worse, heat, during and after sleep (Apis; Lach.). Better, cold things, constant walking.

Relationship.--Compare: Apis; Bell; Gels; Nux mosch; Morphinum (extreme susceptibility to pain; twitching; tympanities; much itching); Codein (dry, teasing, incessant cough; twitching of muscles, especially those of eyelids);

Eschscholtzia-Cal California Poppy--(a harmless soporific).

Antidote: Acute Opium poisoning. Atropin and Black Coffee. Chronic Opium poisoning. Ipecac; Nux; Passiflora. Berberis is useful to counteract opium habit.

Dose.--Third to thirtieth and 200th potency.

Non-Homeopathic Preparations and Uses.--Palliative only in great pain, sleeplessness, peritonitis, and to check excess secretion in diarrhœa, diabetes, etc.

Opium (crude).--Official dose, 1 grain.

Laudanum (tincture)-Dose, 5 to 20 drops. Extract of Opium 1/4 to 1 grain.

Paregoric-Tinctura Camphora Composita. Contains in each dram 1/4 grain of Opium equal to 1/30 grain of Morphine. Dose 1/2 to 1 fluid dram for adults. For an infant 3 to 5 drops.

Dover's Powder consists of Opium, Ipecac and Sulphate of Potash. It contains 10% each of Opium and Ipecac. Dose 5 to 15 grains.

Morphine-1/8 to 1/4 grain.

Magendie's solution-16 grains to 1 oz or 5 drops equal to 1/6 grain.

Codein-1/2 to 1 grain.

Apomorphia-1/20 to 1/10 grain hypodermically.

girilal

Opium

(Serious person who is Scared to cross the limit)

1. Indifference of suffering
2. Fears, that his disease will cross his limit.
3. Fears that expenses will cross his limit.
4. Ailments, from fright, from sight of an accident.
5. Anguish, Shock from injury
6. Content & Quiet wants nothing
7. Courageous, ignores all his is ailments and pain
8. Fearlessness
9. Blames himself for his folly
10. Sharp eyes, perceives by eyes.

Belladonna is not serious, he is smiling but Opium is not smiling.

Belladonna is irresponsible but Opium is not.
If all rubrics match with Belladonna but smile is missing and subject is damn serious Opium is the remedy.

“I am taking this medicine for long time but no improvement; I am scared that this treatment is costing me a lot of money, It is too much now and I got to do something about it”.
“I am taking this medicine for long time but no improvement; I am scared that this problem will go out of my hand now, my disease will go worse, it is too much and now I got to do some thing about it”.

Argentum Nitricum When sick stays in bed and makes loud noise and complains a lot.
Opium When sick, he does not care in the beginning but later on gets very serious
Lachesis When sick she shuns bed, can’t even sit. Complains a lot and makes troubles to the people around her.
Psorinum Desires to stay in bed all the time, Complains a lot and troubles the people around her.

Opium Sharp ears, see thought ears. Perception by ears and anticipates result and anticipates the result. Watchful for any

sound
Phosphorus Sharp eyes, listens through eyes. Perception by eyes and anticipates result. Watchful for every gesture.

ORNITHOGALUM
UMBELLATUM
Star of Bethlehem

To be considered in chronic gastric and other abdominal indurations, possibly cancer of intestinal tract, especially of stomach and Cæcum. Center of action is the pylorus, causing painful contraction with duodenal distention.

Depression of spirits. Complete prostration. Feeling of sickness keeps patient awake at night.

Stomach.--Tongue coated. Agonizing feeling in chest and stomach, staring from pylorus with flatus that rolls in balls from one side to the other, loss of appetite, phlegmy retchings and loss of flesh. Gastric ulceration even with hæmorrhage. Pains increased when food passes pyloric outlet. Vomiting of coffee-ground-looking matter. Distention of stomach. Frequent belching of offensive flatus. Painful sinking across epigastrium.

Dose.--Single doses of mother tincture and await action.

## The True Story of Oscillococcinum

Jan Willem Nienhuys

Whenever the flu season nears, prudent consumers get immunized against the most virulent strains of flu that are expected. This is especially recommended for people who are elderly or have chronic lung disease, diabetes, or various other chronic diseases. In France, however, lots of people arm themselves against this by taking Oscillococcinum. What a strange name! Where does it come from, and what does it mean?

Oscillococcinum was discovered by Joseph Roy (1891-1978) [1], a French physician who was on military duty when the Spanish flu hit the world in 1917. He examined the blood of victims and found a strange microorganism: a bacterium that consisted of two unequal balls that performed a quick vibratory motion. Roy called them "oscillococci" and thought they could vary much in size. Sometimes they shrunk so much that he couldn't see them with his microscope. But they could also grow and get one or two more balls.

Next Roy discovered these bacteria in the blood and the tumors of cancer patients, in syphilitic ulcers, in the tubercles of tuberculosis patients and in the pus of gonorrhea sufferers. Also people who had eczema, rheumatism, mumps, chickenpox and measles turned out to harbor this "universal germ."

It is not clear today what Roy saw through the eyepiece of his microscope. But one thing is certain: he did not see the causes of those diseases. Rheumatism, eczema, and most forms of cancer are not caused by microbes, and mumps and measles are caused by viruses, which can't be seen with an ordinary microscope. Moreover, no other bacteriologist has ever reported seeing Roy's special cocci again.

Roy thought he had made a new and thrilling discovery on the road to the cure for cancer. He even wrote a book about it. In his time, many people doubted the idea that every disease has its own cause (such as its own microbe). Such skeptics embraced Roy's discovery.

Roy thought immediately of a homeopathic application. The fundamental teaching of Samuel Hahnemann (1775-1843) is that disease is a disturbance of "life force" and that specific causes for diseases do not exist. Possibly vague environmental factors may play a role, he thought, and his idea was that scabies and syphilis were such factors, which he called "miasmas." Hahnemann first published his views in 1796. Other parts of Hahnemann's views were that diseases can be cured if one imparts to the patient an artificial disease that produces similar life force disturbances as the real disease. The short-lived artificial disease will drive out the real disease and then the patient is cured. The remedies act by their spiritual power and this spiritual nonphysical power can be imparted to alcohol or milk sugar by a process of shaking or rubbing, just like iron can be made magnetic by rubbing it with a magnet.

Roy's finding fit perfectly with the homeopathic view that diseases do not have specific causes, and he thought that his

discovery could be adapted to treat cancer homeopathically. Just take any abundant source of oscillococci, and after homeopathic reinforcement, it will become a panacea. Now oscillococci occur virtually everywhere, but for reasons nobody knows Roy took as source the muscovy duck, which French cooks use to prepare duck breast. These cooks call the animal Canard de Barbarie, but biologists know it as Cairina moschata. Completely in line with the unscientific traditions of homeopathy, Oscillococcinum is denoted in Latin with the wrong name, "Anas Barbariae, Hepatis et Cordis Extractum," even though Anas ducks are quite different from Cairina ducks.
Preparation

Since 1925, Oscillococcinum has been prepared as follows. Into a one litre bottle, a mixture of pancreatic juice and glucose is poured. Next a Canard de Barbarie is decapitated and 35 grams of its liver and 15 grams of its heart are put into the bottle. Why liver? Doctor Roy writes: "The Ancients considered the liver as the seat of suffering, even more important than the heart, which is a very profound insight, because it is on the level of the liver that the pathological modifications of the blood happen, and also there the quality of the energy of our heart muscle changes in a durable manner." Maybe the French tendency to call any form of not well-being a "crise de foie" ("bilious attack") had also something to do with it. After 40 days in the sterile bottle, liver and heart autolyse (disintegrate) into a kind of goo, which is then "potentized" with the Korsakov method.

Semyon Nicolaevich Korsakov (1788-1853) was a modest landowner in the village Tarusovo near Moscow [2]. After 1813, he held a not-too-demanding desk job in the Ministry of Internal Affairs, enabling him to dabble in lay medicine. In about 1829, he converted to homeopathy and invented a quicker way of preparing high dilutions. The glass containing the remedy is shaken and then just emptied and refilled, and the dilution factor is assumed to be 1:100.

In ordinary homeopathy one has to use a new clean glass for every dilution, so the Korsakov method is very cost-effective. In preparing Korsakov potencies, distilled water is used rather than alcohol (sometimes only after the 30th dilution), which saves a lot of money if one has to repeat the dilution step 200, 1000 or even 50,000 times. Oscillococcinum's manufacturer (Boiron) uses "ultrapure water" from the first step on. Oscillococcinum is designated as "200K" -- which means that the original amount is subjected to 200 Korsakov dilutions -- and the resulting fluid is used to moisten small 5 milligram balls of milk sugar. Some packages have been labeled "200CK." ("C" is the abbreviation for centesimal, which means 1-to-100 dilution, and "CK" stands for "centesimal Korsakovian." ) Other packages have been labeled 200C," which does not specify which dilution method was used.

Korsakov's first name is often incorrectly transcribed as Semen, and some biographers use the nonexistent first name Iseman or Isemen. In German transcription he is Simon Korsakoff. Various myths say that he was a nobleman or count, a physician with or without PhD, the czar's personal physician, or even a general who invented the Korsakov method on the battlefield. None of this is true. Hahnemann addressed him as "Monsieur le comte de Korsakoff" in a time that foreigners customarily used noble titles for any Russian who could speak French. Korsakov's method gained Hahnemann's approval in 1832.

Dubious Claims

The good doctor Roy thought that his concoction worked against cancer, syphilis, scabies and tuberculosis, but Boiron only recommends it for "flu-like states" and asks just over a dollar per gram for it. Hundreds of thousands of French buy this energetically advertised nonsense product. It is recommended for prevention (one dose per week in the flu season) and as cure. And, contrary to classical homeopathic usage, one has to gobble up a one-gram doses, rather than take a single 5 mg ball as a lifetime dose.

There's no logical reason to believe that anything in duck liver or heart will be an effective flu remedy. But even if there were some magic substance, the manufacturing process guarantees that it will not be in the finished product. The laws of chemistry indicate that after the 12th dilution, it is unlikely that a single molecule from the original organs will remain. Moreover, at "200C" (or "200K" or "200 CK") the concentration of the original substance would be 1 part in 100200, which is a 1 followed by 400 zeroes. A 1 followed by 100 zeroes is called a googol. The estimated number of particles in the universe that we can see is a googol, give or take a few zeroes. So in order for one of the original molecules to be present in a container of Oscillococcinum, the mass of that container would have to be about a googol googol googol times our world, which would be incomprehensibly larger than the visible universe.

How, then, could anyone conclude that Oscilloccinum is effective? Homeopathic theory holds that if large amount of a substance can produce symptoms in healthy people, infinitesimal amounts can cure diseases with those symptoms. The alleged effects are determined through experiments (most done over 100 years ago) in which people ingest the substances and report what they experience afterward. These reports have been compiled into huge books that supposedly provide the "drug picture" of each substance. The books, called materia medica, are said to comprise "all the recorded mental, general and local (particular) symptoms and signs, modalities, pathological changes and test findings" for each substance." [4]

Oscillococcinum's drug picture illustrates irrationality to the nth degree. I received it after I complained about an ad. A Dutch Boiron representative responded that the drug picture supported the company's claims of curative powers. The drug picture alleged that oscillococcinum can can help:

Diabetics who are afraid when during a thunderstorm their husband seems to be late, while they have a feeling of electric currents through their varicose veined legs, anal itch and itchy bumps on their wrist, that they keep trying to wash off in a maniacal way, especially when they have a runny nose and stubbornly resist advice not to worry.

The list of relevant individual symptoms included:

Tuberculosis patients sensitive to chilling.

Luetic patients having obsessive ideas.

General symptoms: Lean, pale, chronic invalidity, weakness, need for fresh air even when afraid of cold. Stiffness, shivering, feeling too hot, headache, weakness, repeating shakes descending down the body. Feeling of electric current running through the diseased part. Bitter and grayish secretions, not much.

Aggravates: when you think about it, by moisture, fog, changes of weather, in the night, when resting, after eating eggs or drinking milk.

Improves: in free air, at the seaside, by heat, resting, after evacuations.

Sleep: sleepless with agitation during the night.

Mental symptoms: Latent anxiety, especially when someone doesn't return on time) fear, unquietness without clear cause. Impatience, improves when one is busy. Quick speech and understanding. Futility, tendency to be maniacal. Pettyness. Can't stand disorder, fear of dirt and pollution. Urge to often wash hands. Afraid to shake hands for fear of contagion. Stubbornness. Depressed, thinks back of his past fear of thunderstorms.

Local symptoms: Clouding of the senses. Sudden vertigo. Pain in the right of the head, with repeated shaking. Heavy feeling in the head. Sudden feeling of decoupling in the head. Headache in the front of the head, also occipital, worse in the morning than in the evening, better when one blows the nose. Pain in the maxillary region. Feeling of something running across the face on the right half. Feeling of a bug that runs over the face during the night.

That's about half. The rest include:

Violent needle-like pain in the ears; flu-like state; runny nose; yellow conjunctiva; dry painful cough; wet cough with mucopurulent expectoration; whole tongue putrid; vomit; pain in the appendix region; abdominal cramp followed by fetid smelling diarrhea; persistent obstipation; full feeling in the belly; anal itch, worse in the warmth of the bed, with or without hemorrhoids; itch after antibiotics; hyperglycaemia; painful micturation; cloudy urine; sugar in urine; fetid and yellow leucorrhea; hypotension; hypertension; varicose veins; phlebitis; ulcerations in the legs, painful in the night; chronic streptococcal eczema; feelings of electric shocks in the lower leg; little bumps that itch on the inside of the wrist.

Do you believe that any product can provide such wide range of benefits? I certainly do not!

Welcome to the H&M Forum. I note that you are located in Afghanistan and would like to know if Homeopathy is popular in your country.

Thank you for copying the article on Oscillococcinum by J W Nienhuys on the H&M Forum. I read it first on Google but did not remember to copy it on this Forum where it would be read by members.

I have used this remedy in the 200c potency to treat cases of Flu with fever and have observed that the fever responds in about 3 hours.

I have experimented with this remedy in the wet dose which I have promoted for some years but discovered that the fever did not respond in the manner expected. The dry dose invariably works very quickly.

I would like to add that Bacillinum 200 which I use to treat Catarrh and also to help build up resistance to frequent colds especially in children, does not also work in the wet dose. Here too the dry dose works in a manner that is unbelievable and relieves the Catarrhal symptoms overnight.

Pyrogen can be used instead of Oscillococcinum.

Pyrogen means: A substance that gives fever. Paracetamol or

Acetaminophen etc. are antipyretic drugs.

But Pyrogen must not be confused with just antipyretic.

It is made by rotten raw meat, potentized.

| **Re: Oscillococcinum, a famous homeopahty remedy for flu.** | By: saima | December 26 2007 |

Yes it is not effective but it is a famous brand name and it is always lying on the pharmacy shelf so many people have done experiments with it and found useful. Those people had no other homeopathy advise or medicines available.

| **Re: Oscillococcinum, a famous homeopahty remedy for flu.** | By: udaya kumar<br>-- | January 4 2008 |

Streptococcinum, Staphilococcinum, Oscillococcinum.

Nosodes should be used with caution. Out of place and overdosing can cause artificial diseases which may not respond to any known medicine. While this is not the case with homeopathic medicines other than nosodes. To induce a serum is principle behind vaccination and prevention and cure when the same(not similar) disease conditions are prevailing. Homeopathically however, this has been accredited with also the job of curing SIMILAR conditions. Homeo do not treat diseases. I believe, Facts nerrated at para 6 is at variance with the fundamental teachings of Samuel Hahnemann. Widespread indiscriminate use of oscillococcinum by laymen may prove harmful. Name probably has its origin because of the oscillation. with due regards to every ones opinion.

Oscillococcinum (commonly shortened to Oscillo) is a homeopathic alternative medicine marketed to relieve influenza-like symptoms. It is one of the most popular homeopathic preparations, particularly in France.

OSMIUM
The Element

Irritation and catarrh of respiratory organs. Eczema. Albuminuria. Pain in trachea. Increases and gives odor to local perspiration. Causes adhesion of the nail fold.

Head.--Feels as if a band around head. Falling off of hair (Kali carb; Fluor ac).

Nose.--Coryza, with full feeling in nose. Nose and larynx sensitive to air. Small lumps of phlegm from posterior nares.

Eyes.--Glaucoma; with iridescent vision. Violent supra and infra-orbital neuralgia; violent pains and lachrymation. Green colors surround candle-light. Conjunctivitis. Increase in intra-ocular tension, dim sight, photophobia.

Respiratory.--Acute laryngitis; cough and expectoration of tough,

OVI GALLINAE PELLICULA
Membrane of Egg-shell

Sudden pains. Bearing-down sensation. Intolerance of bands on wrist, arms, waist, etc. Backache and pain in left hip. Debility. Pain in heart and left ovary.

Relationship.--Compare: Calc; Naja; Ova tosta-Tosta præparata-Roasted egg-shells-Calcarea ovorum--(leucorrhœa and backache. A feeling as if the spine were broken and wired, or tied together with a string. Pain of cancer. Warts). Also Egg Vaccine for Asthma. Much interest is shown in Dr. Fritz Talbot's method to cure one form of asthma in children by the use of egg vaccine. Asthma due to susceptibility of the proteid substance in eggs can be cured by immunizing against egg poisons by repeated doses of egg white. After the skin has been cleansed with soap and alcohol the egg-white is rubbed into a slight scratch.

OXALICUM ACIDUM
Sorrel Acid

Although certain oxalates are constant constituents of vegetable food and of the human body, the acid itself is a violent poison when taken internally, producing gastro-enteritis, motor paralysis, collapse, stupor and death. Influences the spinal cord, and produces motor paralysis. Pains very violent, in spots (Kali bich) worse, motion, and thinking of them. Periodical remissions. Spasmodic symptoms of throat and chest. Rheumatism of left side. Neurasthenia. Tuberculosis.

Generals:
This remedy has been greatly neglected.
It will cure many heart complaints that are treated with vague, crude, unproved remedies with indifferent results. The violent action upon the heart racks the whole system. Trembling, convulsions, loss of sensation; numbness of the body and limbs; blueness of the lower limbs, fingers and lips; paralysis of the

limbs are symptoms showing how violently this remedy takes hold of the body, affecting the heart, spinal cord and brain. Symptoms are worse from exertion and motion. The patient is sensitive to cold air. Symptoms come on in paroxysms. Palpitation alternates with loss of voice.

Pains:
No remedy produces more violent pains; cutting, shooting, stitching, tearing pains in many parts; sores and bruises all over the body; burning in forehead, stomach, abdomen, throat, urethra, hands and feet; painful spots on the scalp, sore to, touch, also in other places.
The body is mottled in places. Complaints come on from eating sour fruits, such as strawberries, cranberries, apples, rhubarb, tomatoes, grapes; also from eating sugar and starchy foods. Wine and coffee disagree.
The symptoms, and especially the pains, come on or are worse when thinking about them. At times there is great excitement and exhilaration again there is loss of memory and dejection; maniacal conduct; aversion to conversation. Fainting during stool. There is marked hyperemia of the brain and surging of blood from body to head; flashes of heat mount upward; he becomes dizzy and there is vanishing of sight.

Head:
The head feels empty; dull aching in the head; in forehead and vertex; the brain burns; headache in spots; pressing pain in small spots; pressing pain behind ear; the headaches are worse from wine, lying, after sleep, and on rising and better after stool. Sore tender spots on the scalp. Type blurs when reading; vanishing of sight; small, especially linear objects seem larger and more distant; pain eyes, especially the left; bleared eyes. Epistaxis with vanishing of sight.

Eyes:
Severe pain in eyes; feel expanded. Hyperæsthesia of retina. Face is pale and blue; sunken expression; heat in face; face covered with cold sweat; drawing pain with rigidity near the angle of lower jaw-first in left, then in right.

Ulcers on gums; gums bleed and are painful in spots; sour taste in the mouth; tongue sore, red, dry, burning, swollen, with white coating; there is loss of taste; aphthae in the mouth; much thick mucus compels him to constantly clear the throat; swallowing is painful in the morning; pain in throat; chronic sore throat.

Stomach:
Appetite increased; wanting, with loss of taste; thirst.
Pain in stomach better after eating; gnawing in stomach better after taking soup. After eating, eructations, nausea, pains at the navel, colic, rumbling in bowels, urging to stool, weakness.
Sugar increases the pain in stomach; wine makes headache worse; coffee acts violently on the heart and causes diarrhea; heartburn worse in the evening; eructation, sour, tasteless, after eating. Nausea and vomiting; nausea during pregnancy; thirst and colic after diarrhea; nausea and cramp in calves after stool.

Abdomen:
Paroxysmal pains in abdomen in the night, relieved by passing flatus; burning in stomach and throat; extreme tenderness of stomach; inflammation of stomach and intestines; empty feeling relieved by eating.
Cramping pains in abdomen. Burning in the abdomen. Stitching pains in abdomen and in the liver. Great pain in the region of the umbilicus, worse evening and night; worse from motion. Sore pains about the navel. The pains in abdomen come on or are worse when thinking of them. Obstructed flatus in the splenic flexure of the colon, causing pain in left hypochondrium.
Stitching pains in liver, relieved by deep breathing.
Cramping pains in abdomen, worse at night with vomiting; worse from motion and from eating sugar. Chronic inflammation of the bowels. Extreme tenderness of the abdomen; chronic morning diarrhea with cramping about the navel; tenesmus, renewed urging on lying down. Coffee brings on diarrhea; stools watery; of mucus and blood; stools involuntary. The tenesmus during stool causes pain in head; constipation with difficult stool and the straining causes headache.

Kidneys:

The renal region is painful and tender. Frequent urination; copious; urine containing oxalate of lime; soreness of whole urinary tract; the urine causes soreness and burning of the urethra; when urinating there is pain in the glans penis; incontinence of urine in sleep; all the urinary symptoms are worse when thinking about them.

Tearing pains in the spermatic cords, worse from motion; marked tenderness in testes which become painful when walking. Strong, sexual desire and erections when in bed; seminal emissions and sexual weakness; shooting pains along the spermatic cords.

Loss of voice with cardiac complaints; palpitation alternating with loss of voice; larynx sore, raw, with tickling and clutching; mucus forms in the larynx when talking; must constantly clear the larynx when talking; white mucus in the larynx; hawks up thick yellow and white mucus.

In complaints of the heart there is most difficult breathing. In feeble, nervous women there is paroxysmal breathing; violent rapid respiration with intervals of normal breathing; jerking inspiration and sudden, forced expiration in angina pectoris; dyspnoea with constriction in the larynx that is very painful; with wheezing and oppression of chest worse thinking of it.

Cardiac cough on slight exertion; choking feeling in larynx; tickling in larynx while walking in cold air.

Sharp, shooting pains in left lung, heart and left hypochondrium. With inability to breathe during perfect rest; soreness in chest; pain in middle of chest through to the back. Dullness in lower part of left lung.

Stitching tearing pains behind the sternum going to shoulders and arms; worse on left side; with blueness of nails and lips; cold sweat paralysis of lower limbs; spasmodic respiration (compare Latrodeatus mactans).

Violent palpitation in rheumatic subjects, worse when thinking about it. Pulse irregular, intermittent, fast; cold sweat, blue nails, great weakness. It cures many cardiac complaints endocarditis, pericarditis, valvular insufficiency, etc. Fluttering heart.

Pain under point of scapula, between shoulders, extending downward to small of back; stitches in chest, extending to scapula; violent aching pain in back, and down the thighs,

relieved by change of position.
This symptom is an exception as the pains are generally worse from motion., Benumbing pains in the small of back better after stool.
Numbness, pricking, causing a cold sensation with weakness in spine. Weakness in loins and hips extending to lower limbs; pains shoot up back to head.
Cold chills in lower part of back followed by evening fever, coming every day. Motion brings on many pains in spine with much drawing in muscles of back; paralysis from inflammation of spinal cord; limb stiff; paroxysms of dyspnoea.

Heart:
Palpitation and dyspnœa in organic heart disease; worse, when thinking of it. Pulse feeble. Heart symptoms alternate with aphonia, angina pectoris; sharp, lancinating pain in left lung coming on suddenly, depriving of breath. Præcordial pains which dart to the left shoulder. Aortic insufficiency.
Numbness in shoulders to finger tips; sharp lancinating pains in arms; right wrist feels sprained; pain in right metacarpus and fleshy part of right thumb with heat and numbness; hands almost helpless; hands cold as if dead; fingers and nails blue in heart complaints; pains in the points of flexed fingers.
Twitching of muscles of shoulder; arm and fingers. The legs are stiff, numb and weak; lower limbs cold, blue and paralyzed. Violent pains in lower limbs. Burning in feet and hands. Rheumatism of joints.
Frightening dreams; wakens with palpitation, cold sweat and pain in limbs; sleepy during day but distressing sleep at night; feels better after passing flatus. Violent pains in stomach keep him awake.
Chilliness; shaking chill, cold body. Heat from slight exertion; flashes of heat then cold sweat; shaking chill in evening followed, by internal heat and external sweat, hands cold. Cold sweat of face, hands and feet.

Skin:
Sensitive, smarting and soreness, worse shaving; mottled, marbled in circular patches. Perspires easily.

Modalities:
Worse, left side; slightest touch; light; shaving. Aroused about 3 am with gastric and abdominal pain. All conditions made worse by thinking about self.

Relationship:

Compare:
Ars; Colch; Arg; Pic ac; Cicer arietinum-Chick-pea--(Lithiasis, jaundice, liver affections; diuretic). Scolopendra-Centipede--(terrible pains in back and loins, extending down limbs; return periodically, commencing in head, to toes. Angina pectoris. Inflammation, pain and gangrene. Pustules and abscesses). Cæsium--(Pain in lumber region and testicle. Headache, darting through temples. Diarrhœa and colic. Languor).
Lime Water-Antidote to poisoning of Oxal acid.

Dose:
Sixth to thirtieth potency.

Jayashree Kanoi

| **OXALICUM ACIDUM** | By: girilal<br>New Jersey USA | October 2 2006 |
|---|---|---|

OXALICUM ACIDUM

Occurrence in nature

Oxalic acid and oxalates are abundantly present in many plants, most notably fat hen (lamb's quarters) and sorrel. The root and/or leaves of rhubarb and buckwheat are listed being high in oxalic acid.

Foods that are edible, but that still contain significant concentrations of oxalic acid include - in decreasing order - star fruit (carambola), black pepper, parsley, poppy seed, rhubarb stalks, amaranth, spinach, chard, beets, cocoa, chocolate, most nuts, most berries, and beans. The gritty feel one gets in the mouth when drinking milk with rhubarb desserts is caused by precipitation of calcium oxalate. Thus even dilute amounts of oxalic acid can readily "crack" the casein found in various dairy products.

Leaves of the tea plant (Camellia sinensis) are known to contain among the greatest measured concentrations of oxalic acid relative to other plants. However the infusion beverage typically contains only low to moderate amounts of oxalic acid per serving, due to the small mass of leaves used for brewing.
Bodily oxalic acid may also be synthesized via the metabolism of either glyoxylic acid or unused ascorbic acid (vitamin C), which is a serious health consideration for long term "megadosers" of vitamin C supplements. 80% of kidney stones are formed from calcium oxalate.

Some Aspergillus species produce oxalic acid, which reacts with blood or tissue calcium to precipitate calcium oxalate.[6] There is some preliminary evidence that the administration of probiotics can affect oxalic acid excretion rates [7] (and presumably oxalic acid levels as well.) Oxalic acid can also be present in the body due to the consumption of ethylene glycol ("antifreeze"), which is metabolized into oxalic acid.
Safety

Oxalic acid irritates the lining of the gut when consumed, and can prove fatal in large doses. The LD50 for pure oxalic acid is predicted to be about 378 mg/kg body weight, or about 22 g for a 60 kg human.

Uses

In household chemical products such as Bar Keeper's Friend, some bleaches, and rustproofing treatments.

- In wood restorers where the acid dissolves away a layer of dry surface wood to expose fresh material underneath.

- As a mordant in dyeing processes.

- Vaporized oxalic acid is used by some beekeepers as an insecticide against the parasitic Varroa mite.

girilal

| **Re: OXALICUM ACIDUM** | By: silverman<br>Canada | October 2 2006 |
|---|---|---|

Yes the picture of colocacia is correct to represent Oxalicum Acidum. It contains Calcium Oxalate.

One of my friend's child chewed a tiny part of the leaf and got severely sick.

| **Re: OXALICUM ACIDUM** | By: shyam<br>Indore India | October 2 2006 |
|---|---|---|

In India, A variety of Colocacia is used as vegetable. We call it Arbi. In English it is called Taro.

Leaves contain high quantity of oxalic acid and calcium oxalates. Leaves are also cooked or fried. After cooking oxalic acid is neutralized but if a leaf is chewed raw, it makes the whole mouth and gut burn, one feels needles are piercing in mouth and gut.

Few time I needed Oxalic Acidum Medicine and I made it at home with Taro/Arby leaves but using one drop of its juice in a liter of water in a plastic bottle. Results were amazing.

Feb 5th - Mar 5th

Stomach.--Eructations with colicky pains. Epigastrium tender.

Rectum.--Sphincter seems relaxed. Stools slip from anus, like lumps of jelly, mushy.

Urine.--Urging to urinate when thinking of it. Profuse flow. Pain in kidneys (Berberis).

Male.--No desire or ability. Pain in testicles and along spermatic cord and down thighs.

Extremities.--Pain along ulnar nerve. Numb feeling about spine. Staggering gait. Loss of co-ordination. Patellar tendon reflex lost. Pains come and go quickly, but muscles remain sore and stiff.

Sleep.--Restless, dreams of quarrel.

Modalities.--Worse, thinking of symptoms (mono-maniac tendency). Worse, every other day. Better, after sleep.

Relationship.--Compare: Astrag; Lathyr; Oxal ac; Baryta (Loco plant is rich in Baryta). Lolium.

Dose.--Third potency and higher.

PAEONIA OFFICINALIS
Peony
(PAEONIA)

The rectal and anal symptoms are most important. Chronic ulcers on lower parts of body, leg, foot, toe, also breast, rectum.

Head.--Rush of blood to head and face. Nervous. Vertigo when moving. Burning in eyes and ringing in ears.

Rectum.--Biting, itching in anus; orifice swollen. Burning in anus after stool; then internal chilliness. Fistula ani, diarrhœa, with anal burning and internal chilliness. Painful ulcer, oozing offensive moisture on perineum. Hæmorrhoids, fissures, ulceration of anus and perineum, purple, covered with crusts. Atrocious pains with and after each stool. Sudden, pasty diarrhœa, with faintness in abdomen.

Chest.--Sticking pain in left chest. Heat in chest. Dull shooting from front to back through heart.

Extremities.--Pain in wrist and fingers; knees and toes. Weakness of legs, inhibiting walking.

Sleep.--Terrifying dreams, nightmare.

Skin.--Sensitive, painful. Ulcers below coccyx, around sacrum; varicose veins. Ulcers in general, from pressure, bedsores, etc. Itching, burning, as from nettles.

Relationship.--Compare: Glechoma-Ground Ivy--(rectal symptom). Hamam; Sil; Aesc; Ratanh (great constriction of anus; stools forced with great effort).

Antidotes: Ratanh; Aloe.

Dose.--Third potency.

Good wishes. Milap Singh

PALLADIUM METALLICUM
The Metal
(PALLADIUM)

An ovarian remedy; produces the symptom-complex of chronic Oophoritis. Useful where the parenchyma of the gland is not totally destroyed. Acts also on mind and skin. Motor weakness, averse to exercise.

Mind.--Weeping mood. Love of approbation. Pride; easily offended. Inclined to use violent language. Keeps up brightly when in company, much exhausted afterwards, and pains aggravated.

Head.--Feels as if swung backward and forward. Temporo-parietal neuralgia with pain in shoulder. Pain across top of head from ear to ear; worse after an evening's entertainment, with irritability and sour eructations. Sallow complexion.

Abdomen.--Shooting pain from navel to pelvis. Sensation as if intestines were bitten off. Intestines feel strangulated. Soreness of abdomen, swelling in right groin. Flatulency.

Female.--Uterine prolapse and retroversion. Subacute pelvic peritonitis, with right-sided pain and backache; menorrhagia. Cutting pain in uterus; relieved after stool. Pain and swelling in region of right ovary. Shooting or burning pain in pelvis and bearing-down; relieved by rubbing. Soreness and shooting pain from navel of breast. Glairy leucorrhœa. Menstrual discharge while nursing. Stitches in right breast near nipple. It is indicated in that gynæcological condition where the disease had its inception in the right ovary, the uterine prolapse and retroversion, the subacute pelvic peritonitis and concomitant symptoms being secondary (F. Aguilar, M. D).

Extremities.--Pruritus. Tired feeling in small of back. Fleeting, neuralgic pains in extremities, Heavy and tired in limbs. Darting pain from toes to hips. Rheumatic pain in right shoulder; in right hip. Sciatica.

Relationship.--Complementary; Plat.

Compare: Arg; Helon; Lil; Apis.

Dose.--Sixth to thirtieth potency.

girilal

| **PALLADIUM Constituion/Personality** | By: girilal<br>New Jersey USA | September 22 2006 |
|---|---|---|

Palladium The metal Palladium is found together with Platinum and has to be separated from it. Palladium shares many characteristics with her 'sister' Platinum. Important distinctions between both remedies are:

Platinum

- despises others
- is hyper-sexual, and very religious
during the non-sexual periods
- often complaints on the left ovary
without relief from pressure

Palladium

- great need for company
- longing for appreciation of others
- often complaints on the right ovary
with amelioration from pressure

Palladium-personalities are constantly seeking for confirmation. They need a lot of people around them to feel appreciated. They are longing for a good opinion of others and desire to be flattered. Palladiums will do anything to make a good impression. A very good example is Mrs. Hyacinth Bucket in the television-series 'Keeping up Appearances'.

Behind all this lies a great lack of self-confidence, with the delusion of being not appreciated. They compensate their fear of being unnoticed and neglected with finding themselves very important, being vain, selfish and narcissistic, and considering themselves to be entitled to anything. So they need a big audience. When in company Palladium-characters feel very good and are quite cheerful, but when they are alone they feel very tired and all their complaints and pains return.

They often have the delusion of being taller than they really are, or the feeling of growing taller when walking. These people are easily offended and irritated. The feeling of being neglected makes them cry hysterically, scold and tremble with anger. They dwell on past disagreeable occurrences.

This remedy is mostly known for its healing action on the right ovary, when pain or complaints on the right ovary ameliorate from pressure and lying down and get worse from movements.

Often the uterus is affected too. Palladium heals shooting, neuralgic pains in several parts of the body.

Ailments get worse because of bad news, emotions, disapproval or exertion. Palladiums feel much better in company, getting attention, by pressure on the painful body-parts or after sleep.

## Pancreas

**Started by: M.A. Rana at March 2 2010**

**Replies: 15 & Views: 18570** Font Bottom Of Page **Page 1 of 1** Reply

| **Pancreas** | By: M.A. Rana | March 2 2010 |
|---|---|---|

Dear Doctors.
Patient 58 having Sugar from last 12 years. now enjoying good health after having Homeopathic treatment. The sugar level was 90 but now-a-days it is 120. Doctors have discovered that his Pancreas is not working at night and this is the reason his BFS is high at morning. I try to read about Pancreatinum but no reference is available at your site. Would you please write some thing on it. I have already requested to patient to provide symptoms of and after awaking up. Iris culd also play big role on it.
Thanks.

This is God who bless Life & health but no one else

| **Re:Pancreas** | By: girilal<br>New Jersey USA | March 3 2010 |
|---|---|---|

It can be tried. There is a way to make best pancriatum.

Go to a butcher shop and obtain a pancreas of a chicken. It is called pitta of chicken and it is always removed and discarded.

Best if used home rooster's pancreas, instead of the cultivated one but just try whatever you can find.

People report amazing results. Mix it in glycerine and make it 1C, then dilute it in alcohol to 6C or just potentize it to 6C straight.

You will know the effect in a day. If just any effect, good or bad or ugly or whatever. I suggest, potentize further or obtain highest potency available from market.

girilal

| **Re:Pancreas** | By: M.A. Rana | March 6 2010 |
|---|---|---|

Dear Mr. Girilal
Thanks for your useful information. Kindly elaborate little more or in details of the method given above. Should we cut pancreas and dip or use as is.
Thanking you in advance.

This is God who bless Life & health but no one else

| **Re:Pancreas** | By: girilal<br>New Jersey USA | March 6 2010 |
|---|---|---|

This is a usual folk remedy, diabetics are told to eat Chicken Pancreas once a while and no wonder it works but for a duration. Pancreas is so foul tasting so people usually avoid it at any cost.

Just take a whole chicken pancreas and crush it in blender in glycerene. The reason to use glyverene is because it dissolves lipids and enzymes. Let the liquid stay for two days and then shake it extremely well with a spoon.

Then you can potentize it with water. Add hundred times water in some bottle (make sure bottle remains half empty so you can shake it very well).
Then discard most of the liquid but keep 1/100th part. This makes 2C. Then add about 100 times water again and repeat. You can do it infinitely, but make at least 6C. Try it for 2 weeks. If there is any effect. Then take a daily dose but raise the

potency by 1C each day in water. But if you want to preserve a certain potency, then make the last batch in Alcohol.

|---|---|---|
| **Re:Pancreas** | By: udaya kumar<br>-- | December 6 2010 |

Dear Ranaji,

Pancreatinum the basic symptom is pain in stomach one hour after eating. If night problem is there, I think Lycopodium should work better. I would certainly suggest starting with Thuja and Natrum Mur before indciated medicines are given.

| **Re:Pancreas** | By: AMKhan<br>Middle East | December 20 2010 |

Dr. Giri Lal and Mr. M. A. Rana

As you mentioned Pancreas as called in Hindi Pitta. But Pancreas is called as Tilli and Galblader is called as Pitta. What is the correct Pancreas (Tilli) of Galblader (Pitta) ? My sugar is higher in fasting and would like to make this EXCELLENT medicine.
Thanks.

| | | |
|---|---|---|
| **Re:Pancreas** | By: udaya kumar<br>-- | December 20 2010 |

Pancreas is not called Pitta in Hindi. Pitta means only Bile.
Pancrease is neither called Tilli
Neither Gall bladder is called pitta.

Gall Bladder is Pittaashay
Pancreas - Agnya-ashay or Paachak granthi
Spleen - Plihaa or Tilli

Pitta or Pitha is one of the tridoshas and it is the imbalance of the fire in the body. Fire creates energy and jadaragni is the fire in the abdomen which has its source in pancrease as the energy transformation takes place in pancrease through insulin production. Therefore it is Agnyaashay or agnyaashaya(m). as in different vernacular languages.

--

Evidence of Internet Sex Addiction in Custody Evaluations
The facts about Internet sex addictions are alarming. It would appear that it's becoming epidemic. It's destroying our families and everyone would agree our children should not be exposed to it.
A recent study indicates one-third of divorce litigation is caused by online affairs.
Statistics show more than 72,000 sexually explicit sites on the

web and an estimated 266 new xxxx sites being added each day. These sites alone generate a revenue of $1 billion dollars each year.

According to an MSNBC survey one in 10 respondents said they are addicted to sex and the Internet, according to an online survey of 38,000 Internet users.

Take a Look Into What Your Teen Is Doing Online With Computer Forensic Examinations

As if our teen children did not already have enough places to get in trouble that we as parents have to continuously monitor and worry about, the cyber highways of the Internet have created even countless other areas for teenagers to misbehave in. Not only do we need to monitor their behavior to ensure that they are not up to things they should not be doing, but much of the monitoring that all parents should take part in is for the safety of our kids.

PARAFFINUM
Purified Paraffin
(PARAFFINE)

Valuable in uterine affections. Particularly serviceable in constipation. Knife-like pains. Pains extend from one part to another, and alternate. Pain in stomach alternates with pain in throat and spine.

Head.--Left side of head and face suffer most; pains stinging and twisting. Pain as if a nail were driven in left side of vertex. Twisting in left ear.

Eyes.--Vision dim; black specks before. Lids red. Sensation as if there were fat on the eyes.

Mouth.--Tearing, twisting pain in teeth down to lower jaw. Full of saliva; feels sticky; bitter taste.

Stomach.--Hungry all the time. Pain across stomach. Pain in stomach alternates with pain in throat and spine, extends to chest with belching. Fixed pain in left hypochondrium, as if parts were being twisted. Palpitation with stomach pains.

Abdomen.--Pain in lower abdomen, extending to genitals, rectum and coccyx; better, sitting.

Rectum.--Frequent desire for stool. Obstinate constipation in children (Alumina; Nyctanthes). Chronic constipation, with hæmorrhoids and continual urging to stool, without result.

Female.--Menses too late, black, abundant. Milky leucorrhœa. Nipples pain when touched, as if sore inside. Stabbing pain in mons veneris. Very hot urine with burning pains in vulva.

Extremities.--Pain in spine extending to inguinal region and in both loins, when ascending the stairs. Feeling of electric shocks in all joints. Wrenching pain in calves, extending into toes, in joints. Feet swollen with tearing in ankles and soles.

Skin.--Burns, even of third degree, with sloughing and sepsis. Wash with sterile water and dry and spray with paraffin, and cover with thin layer of cotton. Useful also in frost bites.

Relationship.--Compare: Naphthalin; Petrol; Kreos; Eupion.

Dose.--Lower triturations and thirtieth potency.

Good wishes. Milap Singh

PAREIRA BRAVA
Virgin-vine
(CHONDRODENDRON TOMENTOSUM)

The urinary symptoms are most important. Useful in renal colic, prostatic affections, and catarrh of bladder. Sensation as if bladder were distended, with pain. Pain going down thigh.

Urinary.--Black, bloody, thick mucous urine. Constant urging; great straining; pain down thighs during efforts to urinate. Can emit urine only when he goes on his knees, pressing head firmly against the floor. Feeling of the bladder being distended and neuralgic pain in the anterior crural region. (Staph.) Dribbling after micturition. (Selen.) Violent pain in glans penis. Itching along urethra; urethritis, with prostatic trouble. Inflammation of urethra; becomes almost cartilaginous.

Relationship.--Compare: Parietaria (renal calculi; nightmare, patient dreaming of being buried alive); Chimaphila (chronic catarrhal congestion following cystitis; acute prostatitis; feeling of a ball in perineum when sitting); Fabiana, see Pichi (dysuria; post-gonorrhœal complications; gravel; vesical catarrh); Uva; Hydrang; Berber; Ocim; Hedeom.

Dose.--Tincture, to third potency.

Good wishes. Milap Singh

PARIS QUADRIFOLIA
One-berry

Head symptoms marked and verified. Sensation of expansion and consequent tension. Coldness of right side of body, left hot. Catarrhal complaints, stuffed feeling at root of nose. Disorder of sense of touch.

Mind.--Imaginary foul smells. Feels too large. Garrulous, prattling, vivacious.

Head.--Sensation as if scalp were contracted and bones scraped. Soreness of top of head; cannot brush hair. Aches, as from pulling a string from eyes to occiput. Occipital headache, with a feeling of weight. Head feels very large, expanded. Scalp sensitive. Numb feeling on left side of head.

Eyes.--Affections of the eyebrows. Eyes feel heavy, as if they were projected; sensation of a string through eyeballs. Expanded, as though lids did not cover.

Face.--Neuralgia; hot stitches in left malar bone, which is very sore. Has relieved in inflammation of the antrum, where eye symptoms co-existed.

Mouth.--Tongue dry when awaking-Coated white, without thirst, with bitter or diminished taste.

Respiratory.--Stuffed condition and fullness at root of nose. Periodical, painless hoarseness. Cough as from vapor of sulphur in trachea. Constant hawking, on account of viscid, green mucus in larynx and trachea.

Extremities.--Sense of weight and weariness in nape of neck and across shoulders. Neuralgia, beginning in left intercostal region, and extending into left arm. Arm becomes stiff, fingers clenched. Neuralgia of coccyx; pulsating, sticking, when sitting. Fingers often feel numb. Numbness of upper limbs. Everything feels rough.

Relationship.--Compare: Pastinaca-Parsnip--(Loquacity; delirium tremens; illusions of vision; intolerance on milk; Roots used dietetically, cooked in water or as broth or as salad for consumptives and "kidney stones"). Sil; Calc; Nux; Rhus.

Incompatible; Ferr phos.

Antidote: Coff.

Dose.--Third potency.

Good wishes. Milap Singh

PARTHENIUM HYSTEROPHORUS
Bitter-broom
(PARTHENIUM - ESCOBA AMARGO)

A Cuban remedy for fevers, especially malarial. Increased flow of milk. Amenorrhœa and general debility. Cheyne-Stokes breathing. After Quinine.

Head.--Aches, extending to nose; feels swelled; pain in frontal eminence. Eyes heavy; eyeballs ache. Ringing in ears. Pain at root of nose; feels swollen. Aching in teeth. Teeth feel on edge; too long. Disordered vision. Tinnitus and pain in ears.

Abdomen.--Pain in left hypochondrium. Spleen affections.

Modalities.--Worse, after sleep, sudden motion. Better, after rising, and walking about.

Relationship.--Compare: China; Ceanoth; Helianth.

PENTHORUM SEDOIDES
Virginia Stonecrop
(PENTHORUM)

A remedy for coryza, with rawness and wet feeling in nose. Throat feels raw. Chronic disorders of mucous membranes, with irritability. Chronic post-nasal catarrh; chronic pharyngitis, mucous membrane purple and relaxed. Posterior nares feel moist and raw; nose and ears feel full. Aphonia, hoarseness, relaxed vocal cords. Hypersecretion of mucous membranes. Itching of anus and burning in rectum. Trouble in pharyngeal vault and Eustachian tube.

Nose.--Constant wet feeling in nose, which no amount of blowing will relieve. Discharge thick, pus-like, streaked with blood. Post-nasal catarrh of puberty.

Dose.--Not very active, and better adapted to chronic affections; its use should be persisted in for some time. Lower potencies.

Relationship.--Compare: Penthororun often follows Pulsat. Sang; Hydr.

Good wishes. Milap Singh

PAY at the PUMP
Minerva, Ohio
LINCOLN L HIGHWAY

PETROLEUM
Crude Rock-oil

Strumous diathesis, especially the dark type, who suffer from catarrhal conditions of the mucous membranes, gastric acidity and cutaneous eruptions.

Very marked skin symptoms, acting on sweat and oil glands; Ailments are worse during the winter season. Ailments from riding in cars, carriages, or ships; lingering gastric and lung troubles; chronic diarrhœa. Long-lasting complaints follow mental states-fright, vexation, etc. Chlorosis in young girls with or without ulceration of the stomach.

Mind.--Marked aggravation from mental emotions. Loses his way in streets. Thinks he is double, or some one else lying alongside. Feels that death is near, and must hurry to settle affairs. Irritable, easily offended, vexed at everything. Low-spirited, with dimness of sight.

Head.--Sensitive, as of a cold breeze blowing on it. Feels numb, as if made of wood; occiput heavy, as of lead (Opium). Vertigo on rising, felt in occiput, as if intoxicated, or like sea-sickness. Moist eruption on scalp; worse, back and ears. Scalp sore to touch, followed by numbness. Headache, must hold temples to relieve; provoked by shaking while coughing. Use thirtieth.

Eyes.--Loss of eyelashes. Dim sight; far-sighted; cannot read fine print without glasses; blenorrhœa of lachrymal sac; marginal blepharitis. Canthi fissured. Skin around eyes dry and scurfy.

Ears.--Noise unbearable, especially from several people talking together. Eczema, intertrigo, etc, in and behind ears, with intense itching. Parts sore to touch. Fissures in meatus. Dry catarrh, with deafness and noises. Ringing and cracking in ears. Chronic Eustachian catarrh. Diminished hearing.

Nose.--Nostrils ulcerated, cracked, burn; tip of nose itches. Epistaxis. Ozæna, with scabs and muco-purulent discharge.

Face.--Dry; feels constricted, as if covered with albumin.

Stomach.--Heartburn; hot, sharp, sour eructation. Distention. Feeling of great emptiness. Strong aversion to fat food, meat; worse, eating cabbage. Hunger, immediately after stool. Nausea, with accumulation of water in mouth. Gastralgia when stomach is empty; relieved by constant eating (Anac; Sep). Ravenous hunger. Must rise at night and eat (Psorin). Odor of garlic.

Abdomen.--Diarrhœa only in the daytime; watery, gushing and Itching of anus. After cabbage; with empty feeling of stomach.

Male.--Herpetic eruption on perineum. Prostate inflamed and swollen. Itching in urethra.

Female.--Before menses, throbbing in head (Kreos). Leucorrhœa, profuse, albuminous (Alum; Bor; Bov; Calc p). Genitals sore and moist. Sensation of moisture (Eup purp).

Itching and mealy coating of nipple.

Respiratory.--Hoarseness (Carbo; Caust; Phos) dry cough and oppression of chest; worse, cold air. Dry cough at night, coming deep from chest. Croup and laryngeal diphtheria.

Heart.--Sensation of coldness (Carb an; Nat mur). Fainting, with ebullitions, heat and palpitation.

Back.--Pain in nape of neck, stiff and painful. Weakness in small of back. Coccyx painful.

Extremities.--Chronic sprains. Fetid sweat in axillæ. Knees stiff. Tips of fingers rough, cracked, fissured every winter. Scalding sensation in knee. Cracking in joints.

Skin.--Itching at night. Chilblains, moist, itch and burn. Bed-sores. Skin dry, constricted, very sensitive, rough and cracked, leathery. Herpes. Slightest scratch makes skin suppurate (Hepar). Intertrigo; psoriasis of hands. Thick, greenish crusts, burning and itching; redness, raw; cracks bleed easily. Eczema. Rhagades worse in winter.

Fever.--Chilliness, followed by sweat. Flushes of heat, particularly of the face and head; worse at night. Perspiration on feet and axillæ.

Modalities.--Worse, dampness, before and during a thunder-storm, from riding in cars, passive motion; in winter, eating, from mental states. Better, warm air; lying with head high; dry weather.

Relationship.--Compare: Carbo; Graph; Sulph; Phos.

Complementary: Sepia.

Antidotes: Nux; Coccul.

Dose.--Third to thirtieth and higher potencies. Material doses

often better.

Petroleum

(A meek wife)
1. Cowardice opinion
2. No courage to express own opinion
3. Very angry inside and trembling with excitement
4. Helplessness feeling
5. Yielding disposition

Ms. Margaret:
She cannot say anything to her husband. “If I say anything to him he does not like me and goes to sleep alone, so I keep quiet but I get very angry and I even tremble because of my anger”.

Ms. Pauli
She does not say anything with anger, if she says, instantly she says sorry and regrets. Then she gets very scared and of her in-laws and husband, about what they will think or say. She gets very nervous.

Only in Children

If the child is wild give petroleum.

girilal

| **Re: PETROLEUM** | By: dr dutta | January 31 2008 |
|---|---|---|

My neighbour came to India from UK there he has started gasoline delivery business. In just two years in the petroleum business his mind picture is ditto as stated above. A very meek person, helpless and yielding disposition.

| **Re: PETROLEUM** | By: garcot<br>Bangalore | April 28 2008 |
|---|---|---|

Giri,

Why it is mentioned, material doses are better? Does it have a better proving with material doses than high potencies?

Any experience with patients you have dealt, who did well with psoriasis of hands with the above symptoms of skin ( MM) in high potencies?

Thanks
Garcot

PHELLANDRIUM AQUATICUM
Water Dropwort
(PHELLANDRIUM)

The respiratory symptoms are most important, and have been frequently verified clinically. A very good remedy for the offensive expectoration and cough in phthisis, bronchitis, and emphysema. Tuberculosis, affecting generally the middle lobes. Everything tastes sweet. Hæmoptysis, hectic and colliquative diarrhœa.

Head.--Weight on vertex; aching and burning in temples and above eyes. Crushing feeling in vertex. Vertigo, dizzy when lying down.

Eyes.--Ciliary neuralgia; worse any attempt to use eyes: burning in eyes. Lachrymation. Cannot bear light. Headache; involving nerves going to eye.

Female.--Pain in milk ducts; intolerable between nursing. Pain in nipples.

Chest.--Sticking pain through right breast near sternum, extending to back near shoulders. Dyspnœa, and continuous cough, early in morning. Cough, with profuse and fetid expectoration; compels him to sit up. Hoarseness.

Fever.--Hectic; profuse and debilitating perspiration; intermittent, with pain in arms. Desire for acids.

Extremities.--Tired feeling when walking.

Relationship.--Compare: Con; Phyt; Sil; Ant iod; Myosotis arvensis.

Dose.--Tincture, to sixth potency. In phthisis not below the sixth.

Good wishes. Milap Singh

Coca-Cola
CLASSIC

Phosphoricum Acidum
Drowsy, apathetic; unconscious of all surroundings but can be aroused to full consciousness.
Chronic effects of grief; hair turns gray; hopeless, haggard look.
Grows too fast and too tall; young persons with growing pains in bones.
Great physical and mental weakness from ovarian or sexual excesses.
Very profuse, watery, or milky urine.
Headache of school girls from eye strain, or overuse of eyes, occipital. Chest, weak from talking or coughing; cough, purulent, offensive expectoration, and pains in chest. Salty expectoration in proving.
The leading characteristic of this remedy lies in its effects upon the sensorium. "He lies in a stupor or in a stupid sleep, unconscious of all that is going on around him, but when aroused is fully conscious." This is Phosphoric acid in its intensest degree, as found in typhoid fever, in which it is one of

our best remedies. But it is not alone here that the sensorial depression appears. It may he found in a lesser degree, in the results of depressing emotions, like grief at the loss of a friend, lover, property or position, and the effect seems to be even deeper rooted than in those cases which call for Ignatia. (See also Lachesis.) The subject seems stupefied with grief. There is not, the nervous twitching of Ignatia, but a settled despair, general weakness or prostration. The hair turns gray, and a weary, worn and haggard, hopeless look obtains. I have succeeded in curing such a case when Ignatia failed. In such a case the patient sometimes complains of a pain like a crushing weight on the vertex, or, again, of pain in the occiput or nape of the neck, and with both they appear physically weak, or exhausted, want to lie down, don't want company, or to be noticed or spoken to. We often find this sensorial depression in connection with the effects of onanism or excessive coition. The patient is disturbed by the culpability of his indulgence, grieves over it, is inclined to sink into despair. This is true of both sexes, and the depression is much worse if the patient is growing too fast, or is overtaxed mentally or physically. With Calcarea carb. they grow too fat, with Phosphoric acid too fast and tall. We have in Phosphoric acid a remedy for the headache of students, especially of those who are growing, too fast. It is a sin to keep such young people bowing down to hard study, and while it is true that youth is the time to get an education it is also true that it is the time when too great a strain in that direction may utterly wreck and forever incapacitate a mind which might, with more time and care, have been a blessing to the world.

Now Phosphoric acid, properly exhibited, may be of incalculable benefit in such cases. It will sometimes be a choice between Phosphoric acid and Natrum muriaticum or Calcarea phos., the other symptoms must decide.

Opium surpasses them all in its stupefying powers, and the face, breathing and general appearance, is not at all, like Phosphoric acid.

In regard to the use of Phosphoric acid in typhoids, there are no other remedies exactly like it in its depressing effect on the sensorium. Arnica has its apathy or indifference; but the Arnica depression is more profound, as is also that of Baptisia, for they

both go to sleep while answering a question, showing how overpowering is the stupor. Then with the former we have petechiæ or ecchymosis, which is not found under Phosphoric acid, and under the, latter the tendency to, decomposition of the fluids as found in the terribly offensive stools and urine.
Rhus tox, and Hyoscyamus are very stupid also, but in other respects are very different. The description of these remedies is found under each, as we have written of their use in typhoids.
Nux moschata ought also to be mentioned in this connection.

Mind: "Mental enfeeblement" is the thought that will come into the mind when considering what the Phosphoric acid patient says, does and looks.
The mind seems tired. When questioned he answers slowly or does not speak, but only looks at the questioner. He is too tired to talk or even think. He says:
"Don't talk to me; let me alone."
This state is found in both acute and chronic diseases. He is so tired in mind, perfectly exhausted.
In chronic diseases when brought on from long study; prolonged worry in business men; in feeble school girls, when become relaxed from very little effort. In acute diseases he, especially in typhoid fever, is averse to speaking or answering questions. He merely looks. Finally he rouses up and says:
"Don't talk to me, I am so tired."
He cannot think what he wishes to say, cannot frame his answers to questions. Another cause is sexual excesses in young men, or in those guilty of secret vice. Weakness; lack of reaction; state of stupor, with impotency; mental prostration, and as if the spine had given out.
In every case we find the mental symptoms are the first to develop. The remedy runs from the mental to the physical, from the brain to the muscles.
This is so striking that it is contrasted with Muriaticum acid. in the latter remedy the muscular prostration comes first, and the mind seems clear until long after the muscles are prostrated. In Phosphoric acid the muscles seem strong after the mind has given out. The patient seems vigorous physically.
He says he is all right physically, can work, can exercise even

violently; but the mind is tired, there is mental apathy, he can not add up a column of figures, can not read the newspaper and carry the trend of thought, can not connect circumstances. He forgets the names of those in his family; a business man forgets the names of his clerks; he is in confusion. Yet he can exercise, can go out and walk; the weakness in the muscles will come later.

Phosphoric acid has also great physical weakness; so tired in the back; so tired in the muscles; so tired all over; a paralytic weakness. Later there is sexual impotence; aversion to coition; loss of sexual desire; no erections; penis becomes relaxed in the midst of an embrace and he cannot finish the act, (Nux v.)

Ailments from business cares; prolonged grief; young women suffering from unrequited affection, or from the loss of a loved one. Some suffer more intensely than others; some seem more philosophical.

"Ailments from care, grief, sorrow, chagrin, homesickness or disappointed love; particularly with drowsiness; night sweats towards morning; emaciation."

The patient pines and emaciates, grows weaker and weaker, withered in the face; night sweats; cold sweat down the back; cold sweats on the arms and hands more than on the feet; cold extremities; feeble circulation, feeble heart; catches cold on the slightest provocation and it settles in the chest; dry, hacking cough; catarrhal conditions of the chest; tuberculosis; pallor with gradually increasing weakness and emaciation.

During this weakness there is vertigo. Vertigo while lying in bed seems like floating while lying in bed. Limbs seem to be lifted up while the head does not seem to move, as if the limbs were floating. Congestive headaches; in school girls from slight exertion of the mind and use of the eyes. Periosteal pains; bones ache as if scraped ameliorated by motion; when lying the pain shifts to side lain on.

Modalities: Most of the complaints are ameliorated from keeping warm, from absolute quiet, from being alone at peace. There is aggravation of the complaints from exertion, mental or physical, from being talked to. Morning headaches. He must lie down with the headaches. Headache aggravated from being talked to. He is sensitive to cold weather. He is sensitive to a warm room.

< bad news, depressing emotions; masturbation or sexual excess, draft; wind; snowy air; > after short sleep.

In the headache the pain often begins in the back of the head and spreads to the top of the load; feels as if a crushing weight were on the top of the head; worse from motion, talking and light.

"Pressure as from a weight in head from above downward."

These headaches are associated with mental weakness, brain-fag; so tired and exhausted. Vertigo with ringing in the ears and glassy eyes.

Its use in low fevers must be studied. The complaints come on slowly, slow decline, slowly increasing prostration. Such appearances as are found in advanced typhoid. It has the prostration, tympanitic abdomen, dry, brown tongue, sordes on the teeth, gradually approaching unconsciousness; little thirst increasing to intense thirst with craving for much water during perspiration; wants to be let alone; looks at the questioner with glassy eyes as if slowly comprehending the question; pupils contracted or dilated; eyes sunken; hippocratic countenance; continued fever; bleeding from the nose, lungs, bowels; hemorrhage from any mucous membrane; sunken about the eyes; discolored lips, covered with sordes, becoming very black; prostration gradually increasing.

From the beginning the mental state been most marked and finally comes the muscular weakness, which increases until the jaw drops and it seems that the patient must die of exhaustion.

Such states of weakness may come on from hemorrhages (China was the routine remedy among the older homoeopaths). It checks the hemorrhage and causes a rally, prevents the dropsy. There is a state like anemia; pale lips and tongue; face, hands and feet waxy.

Pains and aches all over the body, ameliorated from motion and 'worse from cold. The pains seem deep-seated, often along the nerves, but especially along the long bones, as if the bones were scraped; as if a rough instrument were dragged over the bones. The pains are commonly worse at night. Severe bone pains.

The stomach refuses to do its work. The food remains in the stomach and sours. Sour vomiting. Old dyspeptics with brain-fag. Complaints from acid drinks, cold drinks and rich foods. Singing sensation in the abdomen after a normal stool.

In most of the complaints of Phosphoric acid a marked feature is milky urine. Sometimes it is milky when passed; milky flakes in the urine. At times the male urethra seems to clog up and examination will show these little milk-like-flakes. The urine becomes milky on standing, like flour, chalk or phosphate deposits stirred up in it.

Diarrhea: Diarrhea WHITE, watery, painless, with rumbling; meteorism; but not so much weakness as would be expected.

In Phosphoric acid there is often an amelioration of complaints by their ending in a diarrhea. Copious, thin, watery stool. From the quantity it would seem that the patient would be exhausted. Child with copious, watery, stool in summer; so copious that the napkin seems of no use; the stool runs all over the mother's dress and on the floor forming great puddles; the stool is almost odorless, thin and watery, and the little one smiles as if nothing were the matter. The mother wonders where it all comes from, and yet the child seems well.

The Phosphoric acid diarrhea often ameliorates many of the symptoms and the patient feels better. Chronic diarrhea, copious, thin and watery, whitish gray, and the patient feels comfortable, free and, happy. If the diarrhea slacks up the patient is worse and on come symptoms of tuberculosis, weakness, prostration, brain-fag.

Some patients say they ate never comfortable unless they have diarrhea. Podophyllum is the very opposite. Take the same child; the stool is very copious and runs all over the floor, the mother wonders where it all comes from, but the stool is offensive, a horrible stench, and the patient looks as if dying; mouth and nose drawn, countenance hippocratic; almost unconscious.

There is painless stool in both, but Phosphoric acid has not the great prostration. In Phosphoric acid the stool is whitish gray, like dirty white paint; in Podophyllum it is yellow. Gratiola has a similar state of prostration, but the fluid is green water; when seen it looks like light shining through a green glass, sometimes thicker, like green-bile.

Abdomen: much bloated, tympanitic; great soreness of the bowels as if in a typhoid state.

"White or yellow, watery diarrhea, chronic or acute, without pain or any marked debility or exhaustion".

It is uncommon for the stool to be yellow when watery. It is yellow when it is mushy; when watery it is light colored, sometimes milky. When yellow it is like corn meal mush, pappy; as in the typhoid state, thin like thin mush.

"Diarrhea; not prostrating; after catching cold during heat of summer; water; chronic; violent, bilious or mucous of twenty months standing; has the appearance of an old man; from acids in young persons who grow too rapidly; after eating, undigested; greenish white; painless."

When we have a diarrhea from adds we sometimes find symptoms running to Phosphoric acid. In the diarrhea from sour wine, such as claret, from acids, vinegar, lemons, be sure to study Antimonium crudum. This is a very striking feature of that remedy. Useful in cholera.

Male sexual organs. Sexual weakness, prolonged exhaustion, impotency; masturbators; nightly pollutions with great exhaustion,

"Prostatorrhoea; immediately after every erection discharge of prostatic fluid."

Even when passing a soft stool the prostatic fluid is discharged.

Falling-out of the hair is a striking feature; falling of the hair from the genitals, whiskers, eyebrows, head. It is closely related to Natrum, mur. and Selenium in falling out of the hair. Selenium has falling out of the hair from the head, eyebrows and lashes, beard and genitals, from all over the body. Natrum mur. causes the hair to become very thin; during confinement the hair falls from the genitals.

Phosphoric acid produces a troublesome leucorrhoea; yellow, mostly after menses, with itching; profuse, yellow; thin, acid mucus; with chlorosis."

It suits the woman who has been nursing her child a long, time, or nursing twins, and who gives much milk. She becomes tired and weakly. Loss of fluids, blood; prolonged nursing, and weakness from such causes.

The tendency of the Phosphoric acid patient at the end of the brain fag and weakness is to run into chest troubles. If a diarrhea comes on then the chest trouble is averted. Most awful results will ensue from the use of astringents, or any remedy that does not correspond to the patient, that will stop that diarrhea. He goes into tuberculosis, difficult respiration; coughs and suffers in the chest, and the trouble culminates in structural changes in the lungs.

The indications for Phosphoric acid are seldom found in the tissue changes, but they will be found in the early states of the patient, the nervous conditions, the milky urine and the diarrhea, which have existed a long time. Chest complaints are acute; typhoid pneumonia; low forms of fever ending in chest troubles; not unlike Phosphorus.

Prolonged pneumonia with the mental symptoms, lack of reaction, infiltration at the end of pneumonia. Haemoptysis.

Prolonged fever ending in feeble heart, with palpitation and the. mental symptoms. Palpitating during sexual excitement.

Tendency to abscesses after a prolonged fever.

Limbs and joints become affected. Pain in the hip joint. Pains in the long bones between the joints, better by motion. Old gouty constitution. Tissues become weak. Red spots appear wherever the flesh is thin over the bones, and these spots become inflamed and form open ulcers.

After fever, abscesses in the muscles, and state of molecular weakness about the ankles; over the tibia where the flesh is thin.

Phosphoric acid has a special relation to the periosteum. Periostitis.

Pains in the tibia at night. Bone feels as if scraped. Cold hands and hot feet. Ulcers on the legs with watery, offensive discharge.

Boils, abscesses, pustules and other moist eruptions.

Suppurating eruptions; tissues become weak.

Nervous state; marked indifference; weak and trembling; fainting; great nervous exhaustion; hysterical affections.

Creeping, tingling and crawling all over the body, especially where there is hair, as if in the roots of the hair; formication; especially in those debilitated from sexual excesses.

"Formication over whole body."

Sore spots in the spine; lame back. Backache.

"Itching between the fingers or in the bend of joints or on

hands."
Herpes; eczema, erysipelas. Large purple spots form on the skin, an extravasation of blood front the capillary veins; ecchymoses.
Ulcers on the skin; carbuncles; warts; chilblains; wens; corns with stinging and burning, and parts become black; feeble circulation in the skin. Skin withered, old and gray, and the patient emaciates.

| **How to make Phosphoric Acid.** | By: girilal<br>New Jersey USA | September 30 2006 |
|---|---|---|

Although it is more commonly known for its use in the production of agricultural fertilizers, phosphoric acid is used in some everyday foods and beverages.

It is a medium strength acid with a low molecular weight of 98.00. Used as a flavoring agent, phosphoric acid is found in some cheeses, jams and jellies, and beer, but it is widely used in carbonated drinks, such as Coca-Cola and Pepsi.

The phosphoric acid content of Coca-Cola has been determined to be about 106.0 mg/L and in Pepsi about 106.9 mg/L. The addition of phosphoric acid lowers the pH of carbonated drinks making them more acidic. This is a potential problem in dental care, since it has been shown that acidic solutions weaken the enamel and mineral structure of teeth.

Coka Cola/ Pepsi contains 3C or 6x homeopathy grade phosphoric acid.

| **Re:Phosphoricum Acidum** | By: garcot<br>Bangalore | February 21 2009 |
|---|---|---|

After eating heavy carnivarous food, if one has difficulty digesting the same, about 50 ml of Coke consumed, helps well in easing the digestion. In excess, it causes tremendous increase in acidity, which can be verified by a saliva or urine pH test with a simple pH strip. Interestingly, for the blood pH to move and settle back to normal levels of 7.3, it takes a couple of days.

So using coke with care and occational use of small quantities may prove beneficial.

Garcot

Phosphorus
The complaints of Phosphorus are most likely to arise in the feeble constitutions, such as have been born sick, grown up slender, and grown too rapidly. Its complaints are found in such as are emaciated, and in those who are rapidly emaciating; in children who are going into marasmus, and in persons who have in them the foundation of consumption fairly well laid. Delicate, waxy, anemic and emaciated subjects. In persons who are vehement, irascible.
This expresses the person's disposition somewhat as well as his internal constitutional state. Internally he is in a turmoil. Subject to violent pulsations, complaints from electric changes in the atmosphere; violent palpitations and orgasms. In chlorotic girls who have grown too rapidly and have suddenly taken on weakness, pallor, green sickness, with menstrual difficulties.

Ebullitions and congestions. Hemorrhagic constitutions.

Blood: Small wounds bleed much; the prick of the needle will bubble forth much bright red blood.

Hemorrhage from small wounds, from the nose, from the lungs, from the stomach, from the bladder and from the uterus.

Bleeding from ulcerations. False granulations that bleed.

Purpura hoemorrhagica. Black and blue spots.

Blood settles beneath the conjunctiva, or beneath the skin anywhere.

Bloody saliva; evidences of disorganized blood, or that the blood seems to become fluid. Small bruises take on broad blue spots.

Blows much blood out of the nose. Petechiae all over the body, such as are found in typhoid fever, low forms of continued fever with hemorrhages. Fungous growth. Fatty degeneration is a marked feature of Phosphorus, and can be found in the liver, heart or kidneys.

General dropsical condition. Bloating of the hands and feet, especially dropsical conditions after scarlet fever. The mucous membranes are all pale, such as is found after bleeding or in low forms of disease. A marked state of anemia and relaxed condition of the muscles. Muscles flabby. Fatty degeneration of the muscles.

The genitals hang down. In the woman, relaxation of the pelvic organs, prolapsus and other displacements. Stiffness is a marked feature of Phosphorus. Stiffness on beginning to move. Limbs stiff like a foundered horse, especially in the morning. Rheumatic stiffness in all the limbs. Phosphorus has tearing, drawing pains in the limbs. Drawing, tearing pains in affected parts. Phosphorus complaints are worse in cold weather.

The patient himself, generally considered, is sensitive to cold. All his complaints are worse from cold and cold applications, and better from beat and warm applications, except the complaints of the head and stomach, which are ameliorated from cold as will hereafter be described. Phosphorus has been very useful in weak, relaxed conditions of the joints following sprains, when the symptoms agree.

Necrosis is another feature of Phosphorus, especially of the lower jaw, but may be useful in necrosis of any of the bones.

Exostoses of the skull with tearing pains. Tearing, boring pains,

especially at night. Phosphorus has cured polypi of the nose and cars. Scrofulous and glandular swellings. Glands enlarge, especially after contusions like Bellis.
Glandular affections of weak, pale, sickly individuals, such as suffer from diarrhea, such as suffer from exhaustive conditions, abscesses, fistulous openings, with hectic fever. Abscesses with copious discharge of yellow pus. Malignant growths are greatly restrained by the use of Phosphorus, when the symptoms agree. Burning pains are observed everywhere. Burning in the brain, burning in the skin. Burning in the stomach, in the chest, and in various parts.
The Phosphorus patient is very sensitive to all external impressions slight odors, noises, touch. Slight causes lead to exhaustion of either body or mind. Trembling throughout the body from slight causes, using the bands, from slight exertion, from debility, from coughing. Weakness prevails in a marked degree, finally becoming paralysis or paralytic weakness such as occurs in most forms of typhoid fever, with sliding down in bed, trembling and jerking of the muscles. Paralysis with formication and tearing in the limbs.
Paralysis that comes with apoplexy. Jerking and twitching of the muscles such as has been found in paralysis. Spasms of the paralyzed parts. Tearing, drawing, burning pains throughout the body.
The Phosphorus patient wants to be rubbed. He is generally better after sleep. Always wants to rest. Always tired. The Phosphorus patient undergoes great excitement.
Tremulousness. Wild thoughts. Excitability, keeping him awake at night. Violent imaginations.
Mind: Excitability even to ecstasy and clairvoyance.
The mind may be overactive or may be extremely passive with loss of memory. Irritability of mind and body and great prostration of mind after slight mental effort, and of the body afar slight physical exertion.
Anxiety, gloomy forebodings. Fear that something will happen. Anxious at twilight. Anxious when alone. Apprehensiveness. Apprehensive during thunder storms, which brings on many complaints; palpitation, diarrhea and trembling. Trembling of the whole body.

Attacks of indigestion from fear. Fear in the evening, fear of death. Fear of strange old faces looking at him from the corner. Full of strange, insane imaginations. On the border land of insanity. Inability to sustain a mental effort. Fear of apoplexy. Reflecting brings on headache and difficult breathing associated with apprehensiveness or sinking at the pit of the stomach. His fear seems to begin 'at the pit of the stomach.

Apathy or indifference; indifferent to his friends and surroundings. Indifferent to his children. Answers no questions, takes no notice of his family and things about him, answers slowly, thinks sluggishly, seems dazed or in a stupor. Everything looks dark, he is weary of life, gloomy and says nothing.

Dejected; a most marked case of hypochondriasis. Weeping, sad, hysterical; will uncover the body and expose his person.

Violent, loquacious; delirium. Delirium of low forms of fever, or delirium of mania a potu.

Maniacal attacks come on during sleep with fury and extreme violence, so that no one dares approach him, and this progresses to imbecility, silliness, weak brain, idiocy. Brain fag from mental overwork and constant strain of eyes. Vertigo is a very common symptom throughout all of the complaints of Phosphorus. Staggering while walking as if intoxicated. Vertigo when in the open air; vertigo after eating; vertigo in the evening. Heaviness and confusion in the head and things go round; great weakness of the head.

All of these mental symptoms are worse in the dark; worse when alone; sometimes worse from music; worse from excitement; worse from playing the piano.

Head: The headaches of Phosphorus are congestive and throbbing.

The blood mounts to the head. The headaches are ameliorated from cold and worse from heat, worse from motion, and better from rest, worse lying down. The patient is often compelled to sit upright, with great pressure upon the head and cold applications. The face is flushed and hot; burning in the brain. The warm room, warm surroundings, warm food, putting the hands into warm water will increase the headache. The complaints of the head like the complaints of the stomach are worse from heat, warm applications and from warm food, and better from cold things; while the complaints of the body are better from warmth and, worse from cold.

The headaches are most violent and are often attended with hunger or preceded by hunger; headaches with vomiting, red face, and scanty urine; uraemic headaches; violent neuralgic pains darting, tearing, shooting through the head; pressing pains in the head. Periodical headaches, headaches brought on from mental exertion.

Great heat in the head and stiffness in the muscles of the face and jaws. This is sometimes attended with coldness in the back of the head. Shocks through the brain. The headaches are worse from noise, from light; apoplectic congestion of the head. It has cured acute hydrocephalus and hydrocephaloid symptoms.

Chronic inflammation of the meninges of the brain; softening of the brain; imbecility; insanity. Violent head pains; atrophy of the brain; medulla oblongata. The scalp is covered with dandruff; the hair falls out in patches, leaving bald places here and there. Great heat in the scalp; tension in the scalp and face and forehead as if bound by a bandage. Scaly eruptions on the bald places of the head; exostoses on the skull.

The complaints of the head are brought on from becoming overheated. Sensation as if the hair were pulled; great soreness of the scalp; must let the hair hang down during headaches.

Eyes: The eye symptoms are very numerous; burning, redness, congestion, enlargement of the blood-vessels.

Objects look red and often blue in the field of vision, or objects sometimes look green and gray as is observed in incipient cataract. Colors, also, appear black before the eyes. Vision is vague; the eyes give out while reading; sees better in the morning, in the twilight.

The eye symptoms, like Phosphorus in general, have amelioration after rest. Momentary blindness like fainting; seems to suddenly become blind; paralysis of the optic nerve; blindness after electric shocks, or after a stroke of lightning. It has cured glaucoma. It has cured inflammation of the retina in Bright's disease.

It has cured opacity of the vitreous humor. It has cured paralytic weakness of the various muscles of the eyes. It has cured paralysis of the third pair of nerves where there is falling of the lids; sub-acute inflammation of the eyes.

Burning, redness, and smarting ameliorated from cold applications. The eyelids twitch and tremble; swelling of the eyelids; dropsical swelling of the eyelids; great darkness around the eyes; great circles around the eyes. It is a very useful remedy in malignant growths involving the eye, restraining very much the progress of the disease.

The eye symptoms like the head and mind symptoms are such as often come on in brain workers; working under a bright light causing much determination of blood to the head in which the eyes as well as other parts suffer.

Ears: Phosphorus has a peculiar deafness.

One of the most striking features of Phosphorus is inability to understand the articulations of the human voice. Hearing is difficult. He sometimes feels as if there were something over the ears; as if the ears were covered, obstructing the waves of sound.

Violent itching in the ears; congestion of the external ear; itching, tearing, throbbing, burning pains within the ear, It has cured polypi in the ears.

Nose: The nose symptoms are also very numerous; inveterate nasal catarrh.

He takes cold in the nose, but the most common seat of the Phosphorus cold is in the chest, and most of his difficulties begin in the chest, but Phosphorus cures nasal catarrh and coryza.

There is painful dryness in the nose; constant sneezing and running from the nose of bloody water.

Frequent alternations of fluent and stopped-up conditions of the nose; coryza with sore throat; stoppage of the nostrils; much sneezing and stopping of the nose alternating with dryness of the nose in scarlet fever; nostrils filled with green mucus; a copious nasal discharge of greenish-yellow, blood-streaked mucus, worse in the morning; bad odor from the nose; frequent blowing of blood from the nose; copious hemorrhage from the nose of bright red blood; swelling of the nose, redness and shining; very sensitive to touch; necrosis of the bones of the nose.

It has cured polypi of the nose, especially bleeding polypi. Fan-like motion of the nose, like Lycopodium.

Face: The Phosphorus patient presents a sickly face, earthy, sunken and pale, such as we find in consumption and those about to go into consumption those suffering from deep-seated constitutional conditions; haggard, anemic.

The color is changeable; swollen, oedematous face; puffed under the eyes; lips and eyelids swollen. Again, red spots upon the checks, which appear in hectic fever; the hectic blush.

Tension of the skin and of the face; tearing, shooting pains all through the face and about the eyes, from the temples and vertex down to the zygoma. Jerking, tearing pains in the teeth.

The pains of the teeth are often ameliorated by warmth, while those of the head are ameliorated by cold. The pains of the teeth are worse when talking and eating, and worse after eating

It has violent neuralgias of the face involving the jaw and temples, with hot, bloated face, worse from talking and from eating.

It has caries of the lower jaw, with great heat, burning and fistulous openings. Neuralgia of the face and teeth; has to be wrapped up at night; worse in windy weather.

The countenance is sickly, sunken, declining, as if a serious sickness was coming.

The lips are parched, dry and bleeding. The lips become black, brown and cracked as in low forms of fever, and with necrosis of the lower jaw. Inflammation of the parotid gland, especially when it suppurates or there are fistulous openings. Rapid decay of the teeth. The gums bleed and settle away from the teeth.

Phosphorus is very useful for the bright red hemorrhage after the extraction of teeth. The tongue is swollen and speech is difficult. It is difficult to articulate. The taste in the mouth is bitter or sour, especially sour after taking milk; sometimes salty or sweetish; bitter after eating.

Taste of hydrogen sulphide in the morning. The tongue is coated like fur; sometimes chalky-white, sometimes yellow; dry, cracked and bleeding; sordes on the teeth. Crusts form upon the mucous membranes of the mouth, gums, lips and tongue. The tongue is swollen and the papillae are engorged.

Throat: Dryness of the mouth and throat; sore, excoriated mucous membranes of the mouth and throat.

The mouth may be covered with thrush, as in nursing sore mouth; bloody erosions of the mouth; nursing sore mouth. Much watery saliva and bloody saliva flows from the mouth. The saliva is copious, tasting sweetish, saltish or foul. The mucous membranes of the throat are like those of the mouth. Great dryness, roughness, rawness, excoriation, bleeding, and inflammation of the tonsils; inflammation of the throat; sensation of cotton in the throat; sensation of velvet in the throat.

The tonsils are much swollen. Intense pain in the throat and burning in the throat that extends into the oesophagus. Inability to swallow any nourishment because of paralysis of the oesophagus or acute inflammation of the mucous membranes of the throat and oesophagus; constriction of the oesophagus.

In Phosphorus there is violent hunger and very soon after eating the hunger returns again. Must eat during the chill. Must get tip in the night to eat. Feels faint and is driven to eat. Ravenous hunger during headache; he knows that the headache is coming on because of his violent hunger; in periodical headaches.

The hunger is often spasmodic, because at times there is aversion to food. Again, he wants to eat and as soon as the food is offered he does not want it. Thirst is one of the most constant features of Phosphorus.

In acute and chronic complaints there is violent thirst; thirst for ice-cold drinks. Wants something refreshing; is ameliorated momentarily by drinking cold things, but the thirst appears as soon as the water gets warm in the stomach. Vomiting comes on as soon as the water becomes warm in the stomach, but there are many conditions where the ice-cold water agrees. Unquenchable thirst. When the water is vomited there is always unquenchable thirst. He wants cold food as well as cold drinks; refreshing, spicy things, juicy things; desire for wines and sour things. Phosphorus often cures the violent' longing in inebriates for alcohol.

It simply resembles the congestion of the mucous membrane of the stomach. Aversion to sweets, to meat, to boiled milk, to salt fish, to beer, to puddings, to tea and coffee.

Many of the complaints of Phosphorus are ameliorated by eating. The nervous symptoms of Phosphorus drive the patient to eat and he feels better for a little while, and then he must eat again or the nervous symptoms will come on. Often he can sleep better after eating and cannot go to sleep until he eats something.

Stomach: The stomach symptoms are numerous: pains, nausea, vomiting, burning.

The stomach symptoms are ameliorated by cold things and aggravated by warm things. The nausea and vomiting are brought on by putting the hands into warm water, from being in a warm room, from warm things and from taking warm things into the stomach. The nausea of pregnancy is cured when the woman cannot put the hands into warm water without bringing on vomiting. Another marked feature of Phosphorus is eructations of food.

The food is eructated by mouthful until the stomach is emptied of the last meal. Constant nausea except when something cold is in he stomach. As soon as water becomes warm in the stomach it comes up. This very much resembles the vomiting and nausea of Chloroform, and Phosphorus is a great friend to the surgeon because he can nearly always antidote the stomach affections of Chloroform by Phosphorus. Vomiting of blood and violent vomiting of sour fluids; vomiting of bile and mucus; vomiting of black substances, coffee-ground substances. Awful sinking, gone feeling in the stomach.

This sometimes comes at 11 o'clock like Sulphur. Pressing pains, burning pains, tearing pains in the stomach; pain in the stomach after eating; sensitiveness in the pit of the stomach; inflammation of the stomach. It has been a very useful remedy in cancer of the stomach, with coffee-ground vomiting and burning; coldness, as if freezing, in the pit of the stomach; paroxysms of knife-like pains in the stomach.

The pains in the stomach are ameliorated by ice-cold things for a moment; spasmodic contractions of the stomach; hemorrhage from the stomach; vomiting of great quantities of clotted blood; long-standing dyspepsia; much flatulence; regurgitation of food; distended stomach and abdomen; ulceration of the stomach.

The liver furnishes us many symptoms of Phosphorus. Congestion of the liver, fullness, pain, hardness, fatty degeneration of the liver, hyperemia of the liver. Phosphorus is one of the most useful liver remedies; hard, large liver. With the stomach and liver symptoms there is commonly jaundice.

Abdomen: Very sensitive abdomen, painful to touch, rolling and rumbling.

Sensation of emptiness in the abdomen; sunken feeling in the abdomen. The abdomen feels as if relaxed; hanging down sensation and sensation of great weight in the abdomen.

Tympanitic abdomen such as occurs in typhoid fever.

A marked feature in Phosphorus is the peculiar gurgling which begins in the stomach and gurgles along down through the intestines, attended with involuntary stool. This occurs in typhoid fever. The gurgling that occurs in Arsenicum is down the oesophagus.

Flatulence; colic; rending, tearing, cutting pains throughout the abdomen; stitching pains in the abdomen; violent neuralgic pains in the abdomen; inflammation of the bowels, of the peritoneum; appendicitis. Yellow, brown spots on the abdomen; petechiae over the abdomen during typhoid fever.

Phosphorus is rich in symptoms of the rectum and stool; involuntary discharges from the bowels; copious emission of fluids; foetid, gushing stools; horribly offensive, yellow, watery stools. The patient lies as if dying, the stools passing involuntarily; stools of white mucus; stools of slime intermingled with little specks like tallow; involuntary oozings from the constantly wide open anus.

Hemorrhage from the bowels in typhoids, in low forms of disease; bloody discharges like meat washings, involuntary, on every motion. Burning in the rectum during stool. Protrusion of the rectum; protrusion of hoemorrhoidal tumors. Sharp, stitching pains from the coccyx up the spine to the base of the brain drawing the neck backward, and this symptom occurs during stool. It has occurred during involuntary stool.

After stool painful cramps in the rectum; burning in the anus; violent tenesmus; sinking feeling in the abdomen; obliged to lie down; exhaustion and fainting. The copious diarrhea is like the profuse flow of water from a hydrant. It is useful in cholera times and in cholera morbus. It is a useful medicine for chronic diarrhea with soft, thin stools. It has been a very useful remedy in cholera infantum. It has also cured dysentery with bloody mucus, scanty stools with violent tenesmus. It also cures inveterate constipation.

The stool is hard, long, and slender, described in the books as like that of a dog. Alternating diarrhea and constipation in old people. Spasms of the rectum. Paralysis of the bowel, so that it is impossible to strain at stool, Hemorrhage from the bowels. It has cured polypi of the rectum; inflammation of the rectum. It has many times cured bleeding, protruding hemorrhoids; hemorrhoids that burn. It has cured fissures of the anus. Among many of these bowel symptoms the anus feels as if wide open.

Kidneys: Phosphorus is a useful remedy in diseases of the kidneys, especially diabetes, with sugar in the urine when there is great thirst for ice-cold things and ice-cold water. Gradual emaciation; gradual weakness; considerable heat of the head; coldness of the extremities, and sugar in the urine. Phosphorus will cure fatty degeneration of the kidneys. Renal calculi. No desire to pass urine though the bladder is full.

There is a paralytic weakness which resembles the paralytic weakness throughout all the muscles of the body. He is unable to strain to pass the urine because such straining increases pain in the region of the bladder.

Profuse, pale, watery urine; frequent and scanty or completely suppressed urine. Turbid, whitish urine; curdled like milk. Albuminous urine. Involuntary urination during sleep.

Tearing in the urethra; twitching and burning in the urethra. Periodical sick headaches sometimes are preceded by scanty urine and sometimes by a copious watery flow of urine.

Men: The male sexual organs furnish many symptoms of Phosphorus.

Violent sexual desire driving him frantic. Erections frequent and painful day and night. Seminal emissions at night even without lascivious dreams. Sexual debility from the inordinate use of table salt. Impotence after excessive excitement and secret vice, preceded by over-excitement of the sexual organs.

Frequent discharges day and night of thin, slimy, colorless fluid from the urethra. Sexual abuse with spinal disease. Discharges of prostatic fluid during a hard stool. Chronic urethral discharges due to hypertrophy of the prostate gland gleety discharge, Swelling and soreness of the testes and cord; inflammation of the testes and cord. It has cured hydrocele following gonorrhea.

Women: In the woman it is equally useful.

Phosphorus has cured many cases of sterility supposed to depend upon violent sexual excitement. Violent sexual excitement with aversion to coition. Violent pain in the ovaries extending down the inner side of the thighs during menstruation caused by inflammation of the ovaries.

Inflammation of the uterus during menstruation and during pregnancy or during pyoemia. Copious hemorrhages from uterus, bright red, clotted blood after confinement, during menstruation or during the climacteric period. Frequent and profuse hemorrhages from the uterus caused from cancerous affections.

The menstrual period is too early, flow bright red, lasting too long, is copious; during the menstrual period ice-cold feet and hands; nausea; pain in the back, as if broken; blue rings around eyes; loss of flesh; much fearfulness. It has also menstrual suppression in consumptives with cough, bleeding from the nose, and spitting of blood. Violent sexual excitement driving to secret vice.

Copious yellow leucorrhoea with great weakness; leucorrhoea instead of menses; white, watery leucorrhoea, acrid, excoriating; milky leucorrhoea, copious when walking. The leucorrhoea is so excoriating that blisters form upon the genitals. Burning and smarting in the vagina. Stitching pains upward from the vagina into the pelvis. While there is violent sexual excitement during coition there. is lack of sensation in the vagina, as if it were numb.

Condylomata appear like fig warts and excrescences about the genitals and in the, vagina. Bleeding warts. Erectile tumors on the external genitals.

Dropsical swelling of the labia. Cauliflower excrescences with much bleeding. Painful, hard, large nodosities in the female mammary glands. Fibroid tumors of the breast. Fibroid tumors of the uterus with copious hemorrhages

During pregnancy and lactation violent sexual desire; vomiting of pregnancy. Much prostration, sinking, and trembling, puerperal convulsions; pain in the back, as if it would break. Increased secretion of milk out of season. Inflammation of the mammary glands with much heat, weight, and suppuration. Erysipelas of the breasts or of the genitals.

Larynx: Inflammation of the larynx with hoarseness in the morning; husky voice; great sensitiveness of the larynx to touch and cold air; pain and burning in the larynx on talking; weakness in the vocal cords; violent tickling of the larynx while talking; constriction and spasms of the larynx; constant irritation to cough in the larynx; tuberculous condition of the larynx; bleeding; loss of voice; cannot speak a word on account of pain in the larynx; sensation of velvet in the larynx; rawness and smarting in the larynx.

Phosphorus has cured many cases of croup, membranous croup, when all the symptoms were present. Every change of weather, from becoming overheated, and colds settle in the larynx, producing loss of voice and hoarseness, especially in public speakers and singers. Hoarseness and loss of voice; great dryness in the larynx and all of the air passages. Hard, dry, rasping cough that shakes the whole body from irritation in the larynx.

The irritation travels down the air passages, affecting the trachea, along with difficult respiration; asthmatic breathing; clutching in the larynx; suffocation; dyspnoea; spasms and constrictions of the chest.

Violent, stridulous inspiration in the evening on falling asleep; fear of suffocation; labored breathing. Paralysis of the lungs; fullness in the chest after eating, much irritation in the larynx; difficult breathing; scraping of mucus from the larynx after eating.

Chest: In the chest, Phosphorus produces oppression; anxiety, weakness and constriction going along with its chest complaints. Heaviness as if a great weight were lying upon the chest. With the cough, bronchitis, pneumonia and cardiac symptoms there is always more or less constriction of the chest as if bound, or as if bandaged, or as if tied tight with a string.

Tightness felt over the sternum, and with all complaints great weakness of the chest; pressure as of a weight over the middle of the sternum; feeling of a rush of blood to the chest with or without violent pulsations. Sensation of heat in the chest mounting to the head; flushes of heat in the chest extending upward. Stitching pain in the chest; spasmodic pains in the chest; violent stitching pains in the left side of the chest better by lying on the right side. These are pains likely to occur ig pleurisy or in pleurisy with pneumonia.

Complaints of chest, worse in cold air. Rawness in the trachea extending into the lungs; burning in the chest; acute pain in the lower part of the lungs; violent pain in the chest with coughing. The patient is compelled to hold the chest with the hand. Inflammation of the lungs with anxiety, oppression, and expectoration of bright red blood.

The Phosphorus patient suffers from copious hemorrhages from the lungs in phthisical conditions, in inflammation, inflammation of the bronchial tubes with intense fever and violent shaking cough; the body trembles with the cough; tearing pains in the sternum with the cough; suffocation and constriction of the chest. Pain in the larynx. The expectoration may be blood-streaked or rust-colored as it is in pneumonia. It may be purulent. In the later stages it becomes thick, yellow, sweetish. Phosphorus is a useful remedy in old bronchial catarrhs, in complaints that date from pneumonia or from bronchitis. Every cold settles in the chest. The lungs seem to be weak. Again, in hepatization during pneumonia with hard, dry, hacking cough; in hepatization of the lungs during pneumonia Phosphorus, Sulphur and Lycopodium are the most frequently indicated medicines.

Phosphorus is often the remedy to follow Arsenic when Arsenic has been suited to the restlessness, prostration, and anxiety that comes to a place where because of hepatization it is capable of accomplishing no more toward the cure of a case. If, then, the patient has thirst for ice-cold water, constriction of the chest, dry, hacking cough, paralytic weakness of the lungs, and expectoration of blood or frothy mucus Phosphorus is the best remedy.

In pneumonia, there may be burning in the chest, burning in the head, hot cheeks, and fever; gesticulation and delirium; violent thirst for ice-cold water; fan-like motion of the nose; difficult breathing; catchy inspiration; lying on the back with the head thrown far back; short, dry cough.

The carotids pulsate. Rawness in the chest; bruised feeling in the chest; pains are cutting; burning or sharp and tearing in the lungs when coughing. Suffocation, or inspiration almost impossible, especially at the beginning of hepatization when the face becomes livid and the features pointed with cold sweat and quick, hard pulse. Frothy expectoration in low forms of pneumonia known as typhoid pneumonia.

Threatened paralysis of the lungs. Again, Phosphorus is a useful remedy when tuberculosis is about to make its appearance, in persons who are narrow-chested, slender, and of feeble vitality. All colds settle in the chest. After each cold, much rattling, hard cough that shakes the whole body, in persons who are feeble, pale, sickly, and disposed to hemorrhages.

Cough comes on in cold air. Emaciation; emaciation of the chest and neck. Along with these conditions comes hectic fever in the last stages of phthisis; intense fever, red face, and night sweats; fever coming on in the afternoon and lasting until after midnight. A powder of Phosphorus very high will reduce this fever and make the patient comfortable until death. In all incurable cases after the fever has been reduced, Phosphorus should not be given, as it will intensify the fever and do just what it was given to avoid. It is not uncommon for a crisis to follow the administration of Phosphorus. Prolonged sweat and diarrhea, these should never be interfered with as they will soon stop of their own accord and the patient will be left in a state of quietude.

Phosphorus is a dangerous medicine to give very high in some cases of phthisis, in the last stages of phthisis. In this case they should have received Phosphorus when they were yet curable. In these cases Phosphorus 30 th may sometimes be used with safety and it will act as a test in doubtful cases to see whether reaction can be brought about. In such cases where reaction can be brought about the administration later of a still higher potency may be found useful, but in the beginning with Phosphorus in phthisical cases far advanced it is better not to go higher than the 30 th or 200 th.

Phosphorus very low will act as a poison in really Phosphorus cases and the only safety some patients have had who have received Phosphorus so very low was due to the fact that the Phosphorus was not similar enough to either kill or cure.

Heart: Phosphorus has violent palpitation; worse from motion, and from lying on the left side especially in the evening; worse at night on waking, with orgasms of blood in the chest, accompanied by much suffocation.

Tightness in the chest and palpitation over the body; pressure in the region of the heart. Phosphorus has cured endocarditis. Phosphorus has cured enlargement of the heart and dilatation and also fatty degeneration. With fatty degeneration where there is much venous stagnation, puffiness of the face, particularly under the eyelids, Phosphorus is often the remedy.

In all of these cardiac affections thirst for very cold water will always be present. Internal heat; he wants something cold to cool his insides.

Violent orgasms of blood in the chest from every excitement, from worry, and from anticipation. Phosphorus has many neuralgic pains upon the outer chest and yellow brown spots.

Back and spine: There are many symptoms in the back; stiffness in the back and in the back of the neck, between the shoulders, and in the small of the back.

Stiffness on rising from a seat. Sensation of intense heat in the back running up the back. The patient complains of a hot spine. Soreness in places up and down the spine; soreness to touch between the! shoulders; pulsations in various places in the back and in the whole spine.

The coccyx is sensitive to pressure; pain in the coccyx as if ulcerated, preventing motion. Pain in the back during menstruation and during confinement as if the back would break. Spinal affections and inflammations, Weakness of the limbs after mental exertion, prolonged physical exertion, being overheated, sunstroke and sexual excesses; paralytic weakness. Myelitis; softening of the spine; progressive spinal paralysis.

Phosphorus has been a useful remedy in locomotor ataxia, palliating many of the symptoms; the pains; restoring the reflexes. Phosphorus is often suitable and restrains the progress in multiple sclerosis where there is much weakness and trembling of the extremities. Phosphorus has cured caries of the vertebrae in scrofulous children. Phosphorus is a broad remedy in various diseases of the spine.

Limbs: In the limbs we have paralytic weakness extending to

both arms and legs, with trembling and numbness; paralysis of one or of both lower extremities or of the upper extremities with trembling and numbness.
The hands and arms become very cold. The limbs emaciate and the veins become distended; the arms burn; periodical constriction of the fingers; numbness increasing to complete insensibility of the fingers; finger tips feel numb and insensible. Great restlessness in the lower limbs; weariness in the lower limbs; weakness in the lower limbs, especially observed on walking, unsteady and trembling gait; paralysis of the lower limbs. Acute inflarnmation of the joints of the knees and hip joint.

Burning, tearing pains in the limbs from exposure to cold, Rheumatism of the joints and muscles; stiffness of the joints on becoming cold. All complaints of the limbs are ameliorated by heat, while complaints of the head and stomach are ameliorated by cold. The complaints of the chest are ameliorated by heat. The lower limbs are covered with foetid sweat, The lower limbs are gangrenous. Inflammation of the periosteum of the tibia. Ulcers upon the lower limbs; feet icy-cold.
The Phosphorus patient wants to lie down; exhausted; he is unable to walk; staggers when walking from weakness and from vertigo. A gradual progressing weakness creeps over him; weakness; trembling; faintness.
Jerking and twitching of the muscles; spasms of the paralyzed parts. Epilepsy; convulsions; neuralgic pains of the various parts of the body and of the limbs especially, ameliorated by heat. It has cured multiple neuritis.
Sleep: Restless sleep; starts in sleep; feels in the morning as if he has not kept enough, yet most of the complaints and aches are ameliorated by sleep, especially the head symptoms; walks in his sleep.
He sleeps on the right side. Lying on the left side causes anxiety and pain in the heart and palpitation. Late falling to sleep in the evening; lies awake thinking about the affairs of the day and borrowing trouble. Phosphorus is a usual remedy in low forms of typhoid fever on the symptoms previously mentioned.
Skin: There are many eruptions in Phosphorus.
The eruptions are dry and scaly; dry furfuraceous herpes; blood

blisters; purple spots; yellow spots on the chest and abdomen; formication and itching in the paralyzed parts; numbness of the skin; irregular brown spots upon the body; psoriasis of the knees, legs, elbows, and eyebrows; hives and blood boils; phlegmonous inflammation.
Chronic suppurating openings with hectic fever; fistulous openings; ulcers bleed on appearance of the menses; deep eating ulcers; indolent ulcers; malignant ulcers.
Very useful in cancerous ulcers that bleed and take on fungous appearance and in low forms of scarlet fever where the rash is very dusky or disappears and suppuration begins in various places about the neck or upon the extremities or upon the ends of the fingers and there is violent thirst for cold water, purple appearance in the throat, and dry, hacking, shaking cough.

Phosphorus

(He wins everybody's heart)

1. Affectionate
2. Returns affection
3. Mildness
4. Wants to attract people
5. Happy from his life.

Opium
Sharp ears, sees thought ears. Perception by ears and anticipates result. Watchful for any sound

Phosphorus
Sharp eyes, listens through eyes. Perception by eyes and anticipates result. Watchful for every gesture.

Lycopodium & Platina Gets the job done by bullying.

Phosphorus Gets the job done by love and affection.

Affectionate + Hypocrisy + Adulterous + Desires to be in lime light = Phosphorous
Fears to be alone
Fears dark
Fears insects and bugs

Fears thundershowers (Shuts windows and doors and puts a cloth on the eyes)

Fears death

| **Re:Phosphorus** | By: Aida<br>Lithuania | December 18 2011 |

1. Age/Sex/Country/Climate:
Almost 2yars old, girl.
Lithuania, Now it's winter time. The weather is very wet. Lot's of rain.Windy. Temperature outside it's about 2Celcius degrees.

2. Current complain - from how long:
Two days ago she got horse. (Last week we had some kind of infection but it got better).

The very similar symthtoms are repeating every two weeks for the third time on this autumn. First time the diagnosis were abstructional bronchit. But we got better with Drossera 6, Amonium Carb 6, Husteel

3. Current medicine you are taking:
Tradicional (when it's not possible to get to our homeopath doctor. And if I recognice the symthoms I always give homeopathy remedy. (We have only couple homeopathy doctors in our district. They are very busy and can't take us every time we need.)
Now we take Drossera 6, Phosphorus 30 (that's what we have).
Inhale with steam of salty water(she starts to cough more at the inhaling time).
4. Sign & Symptom of disease:
Horse voice, much worse in the evening. During the day was better.
White tongue with yeallow spots(was yesterday)but today they're gone the tongue became a bit better the same as some red pimples;
Wet cough with whistle(during the day the whistle were much better, evening got worse again);
Garggle in her chest when she coughs;
White thrush in her genitalies gots since last spring. It passes and returns; Now she says it hurts.(I've used clotrimazoll mouse when she complains that it hurts).
Labium is red.
Bad smell from her mouth (even when she feels ok).When she is awake after nap(and not only) you can smell acid.
Less apetite.
She went to the bathroom 4 times in an hour before she got asleep. She drank 250g of tea during this time.
She does't like to stay alone. It was not like this before. Awakes couple time per night with whistle, gargling cough. Comes to our bed every night(almost always).
No fever.
5. Breif medical history:
She got e'coli bactery last spring (March). The urinary tract infection and pneumonia. The temperature went till 40,5. She

had anthybiotics for 7days. First of all they couldn't hear anything wrong but in the hospital picture showed some mist in her lungs. The doctor said the blood test showed almost sepsis. The temperature kept very high for the 5 days very high.
Her abdomen is really huge since she was born. The doctor in the hospital (tradicional medicine) says it doesn't look normal but the tests didn't show anything wrong. The liver were a bit bigger but there was an infection time.
After the hospital she's got sick seven times (even during the summer time).
When the teeth were growing she always had sneeze and when she was coughing i could hear whistle and gargles in her chest. All the teeth were growing with the temperature except the first one. It showed when she was 3 weeks.

6. Family Back Ground:
I think a lot of women in our family have weak urinary tract and respiratory. Her grandgrandmother died from liver cancer. Her grandmother had breast cancer but she is fine now.

7. Education and Nature of Profession of Patient:
Goes to the kindergarden (from october) and Yamaha Musician School since she was 5 months.

8. Desires and aversion of food:
She drinks a lot. Now less apettite. Compared with what she usualy is. She doesn't like the food she use to like before. She could eat 2 big bananas at once and in a half an hour bowl of porridge. She drinks a lot of tea (likes sweet tea). But she is not verry in love with sweets.

9. Mind-behavior, anger, irritability, hurry..etc.:
Very calm, gentle, funny, happy. Wants a lot of love and attention.But she knows how to ask for it. If she wants something she will get it either way. Everybody says, she doesn't have any nerves.Everybody wants to hold her. She likes dancing, singing, drawing. It's very rare when she plays by herself.
She likes to comunicate a lot. After an hour (sometimes even

less) she can take stranger to her playing place. Especially men. She likes to play with my hair before sleep. I feeded with my breast till 1year and 3month. She eat every 3 hours (always on time)and it always took one hour (for one eating) even at night.

10. What makes it worse and what makes it better:
I think drinking make her cough more wet and easy.

11. Thirst/Tongue/diabetic...:
She drinks a lot. Her tongue is a little white. No one doctor said about any changes of sugar.

PHYSOSTIGMA VENENOSUM
Calabar Bean

This remedy and its active principle, Eserine, form a valuable addition to Materia Medica. Stimulates heart, raises blood pressure, and increases peristalsis. Causes contraction of the pupil and of the ciliary muscles. Induces a condition of short-sightedness. Spinal irritation, loss of motility, prostration, with very sensitive vertebræ Fibrillary tremors. Rigidity of muscles; paralysis. Depresses the motor and reflex activity of the cord and causes loss of sensibility to pain, muscular weakness, followed by complete paralysis, although muscular contractility is not impaired. Paralysis and tremors, chorea. Meningeal irritation, with rigidity of muscles. Tetanus and trismus. Polymyelitis anterior. Eserine is used locally to produce contraction of pupil.

Head.--Constant pain on top; vertigo, with constrictive feeling of head. Pain over orbits; cannot bear to raise eyelids. Cerebro-spinal meningitis; general tetanic rigidity. Spastic conditions of the face-muscles.

Eyes.--Night-blindness (Opposite: Bothrops); photophobia; contraction of pupils; twitching of ocular muscles. Lagophthalmus. Muscæ volitantes; flashes of light; partial blindness. Glaucoma; paresis of accommodation; astigmatism. Profuse lachrymation. Spasm of ciliary muscles, with irritability after using eyes. Increasing myopia. Post-diphtheritic paralysis of eye and accommodation muscles.

Nose.--Fluent coryza; burning and tingling of nostrils; nose stuffed and hot. Fever-blisters around nostrils.

Mouth.--Tongue feels sore on tip. Feeling as if a ball came up throat.

Throat.--Strong heart-pulsation felt in throat.

Stomach.--Great pain immediately after eating. Sensitive to pressure in epigastric region. Pain extends into chest and down arms. Gastralgia; chronic constipation.

Female.--Irregular menstruation, with palpitation. Congestion of eyes. Rigid muscles.

Heart.--Feeble pulse; palpitation; spasmodic action, with feeling pulsation through the whole body. Beats of heart distinctly perceptible in chest and head. Fluttering of heart felt in throat. Fatty degeneration (Cup ac).

Extremities.--Pain in right popliteal space. Burning and tingling in spine. Hands and feet numb. Sudden jerking of limbs on going to sleep. Tetanic convulsions. Locomotor ataxia. Numbness in paralyzed parts, crampy pains in limbs.

Relationship.--Compare: Eserine-the alkaloid of Physostigma--(slows action of heart and increases arterial tension; in ciliary spasm and spasmodic astigmatism due to irregular action of ciliary muscles; blepharo-spasms; pupils contracted. Twitching of lids, soreness of eyeballs, blurring of vision after using eyes, pains around eyes and head). Used locally to contract the pupil. Eserine contracts the pupils dilated by Atropin, but not those dilated by Gelsemium. Internally 6x.

Eserin Salicylate (post-operative intestinal paralysis; meteorism. Hypodermically 1/60-1/40 gr).

Compare also: Muscarin; Conium; Curare; Gels; Thebainum (tetanus); Piperazinum--(Uric acid conditions. Pruritus. Gout and urinary calculi. Constant backache. Skin dry, urine scanty. Rheumatic urthritis. Give one grain daily in carbonated water. First and second decimal trituration three times a day).

Antidote: Atropia. In full medicinal doses will relieve most of the effects of physostigmine.

Dose.--Third potency. The neutral sulphate of Eserine is instilled into the eye, from one-half to four grains to one ounce distilled water, to induce contraction of pupil, in mydriasis, injuries to the eye, iritis, corneal ulcers, etc.

Good wishes. Milap Singh

**PHYTOLACCA DECANDRA**
**Started by: Milap Singh at December 13 2006**

**Replies: 3 & Views: 12707** Font Bottom Of Page **Page 1 of 1** Reply

| | | |
|---|---|---|
| **PHYTOLACCA DECANDRA** | By: Milap Singh<br>Bangalore, India | December 13 2006 |

Click picture for many more pictures

PHYTOLACCA DECANDRA
Poke-root
(PHYTOLACCA)

Aching, soreness, restlessness, prostration, are general symptoms guiding to Phytolacca. Pre-eminently a glandular remedy. Glandular swellings with heat and inflammation. Has a powerful effect on fibrous and osseous tissues; fasciæ and muscle sheaths; acts on scar tissue. Syphilitic bone pains; chronic rheumatism. Sore throat, quinsy, and diphtheria. Tetanus and opisthotonos. Decrease of weight. Retarded dentition.

Mind.--Loss of personal delicacy, disregard of surrounding objects. Indifferent to life.

Head.--Vertigo on rising. Brain feels sore. Pain from frontal region backward. Pressure in temples and over eyes. Rheumatism of scalp; pains come on every time it rains. Scaly eruption on scalp.

Eyes.--Smarting. Feeling of sand under lids. Tarsal edges feel hot. Fistula lachrymalis (Fluor ac). Abundant lachrymation, hot.

Nose.--Coryza; flow of mucus from one nostril and from posterior nares.

Mouth.--Teething children with irresistible desire to bite the teeth together. Teeth clenched; lower lip drawn down; lips everted; jaws firmly set; chin drawn down on sternum. Tongue red tip, feels rough and scalded; bleeding from mouth; blisters on side. Mapped, indented, fissured, with yellow patch down center. Much stringy saliva.

Throat.--Dark red or bluish red. Much pain at root of tongue; soft palate and tonsils swollen. Sensation of a lump in throat (Bell; Lach). Throat feels rough, narrow, hot. Tonsils swollen, especially right; dark-red appearance. Shooting pain into ears on swallowing. Pseudo-membranous exudation, grayish white; thick, tenacious yellowish mucus, difficult to dislodge. Cannot swallow anything hot (Lach). Tension and pressure in parotid gland. Ulcerated sore throat and diphtheria; throat feels very hot; pain at root of tongue extending to ear. Uvula large, dropsical. Quinsy; tonsils and fauces swollen, with burning pain; cannot swallow even water. Mumps. Follicular pharyngitis.

Abdomen.--Sore spot in right hypochondrium. Rheumatism of abdominal muscles. Colic at navel. Burning griping pains. Bruised feeling through epigastrium and abdomen. Constipation of the aged and those with weak heart. Bleeding from rectum.

Urine.--Scanty, suppressed, with pain in kidney region. Nephritis.

Female.--Mastitis; mammæ hard and very sensitive. Tumors of the breasts with enlarged axillary glands. Cancer of breast.

Breast is hard, painful and of purple hue. Mammary abscess. When child nurses, pain goes from nipple all over body. Cracks and small ulcers about nipples. Irritable breasts, before and during menses. Galactorrhœa (Calc). Menses too copious and frequent. Ovarian neuralgia of right side.

Male.--Painful induration of testicles. Shooting along perineum to penis.

Heart.--Feeling as if heart leaped into throat (Pod). Shock of pain in cardiac region alternating with pain in right arm.

Respiratory.--Aphonia. Difficult breathing; dry hacking, tickling cough; worse at night (Mentha; Bellad). Aching pains in chest, through mid-sternum; with cough. Rheumatism of lower intercostals.

Back.--Aching pains in lumbar region; pains streaking up and down spine into sacrum. Weakness and dull pain in region of kidneys. Back stiff, especially in morning on rising and during damp weather.

Extremities.--Shooting pain in right shoulder, with stiffness and inability to raise arm (see Heart). Rheumatism pains; worse in morning. Pains fly like electric shocks, shooting, lancinating, shifting rapidly (Puls; Kali bich). Pain in under side of thighs. Syphilitic sciatica. Aching of heels; relieved by elevating feet. Pains like shocks. Pain in legs, patient dreads to get up. Feet puffed; pain in ankles and feet. Neuralgia in toes.

Fever.--High fever, alternating with chilliness and great prostration.

Skin.--Itches, becomes dry, shrunken, pale. Papular and pustular lesions. Most useful in early stages of cutaneous diseases. Disposition to boils, and when sloughing occurs. Squamous eruptions. Syphilitic eruptions. Swelling and induration of glands. Venereal buboes. Scarlatina-like rash. Warts and moles.

Modalities.--Worse, sensitive to electric changes. Effects of a wetting, when it rains, exposure to damp, cold weather, night exposure, motion, right side. Better, warmth, dry weather, rest.

Relationship.--Compare: Tincture of Phytolacca Berry (sore throats and in the treatment of obesity); Bry; Rhus; Kali hyd; Merc; Sang; Arum triph.

Inimical: Mercur.

Antidotes: Milk and salt; Bellad; Mezer.

Dose.--Tincture, to third potency. Externally for mastitis.

Good wishes. Milap Singh

| **Re:PHYTOLACCA DECANDRA** | By: Rima<br>New Jersey, USA | June 12 2012 |
|---|---|---|

hi. is there a standard of how strong to make the tincture? and exactly what is "to third potency"? I have pokeweed growing in my yard that i can use. thanks

| **Re:PHYTOLACCA DECANDRA** | By: ellian | November 13 2012 |
|---|---|---|

Wow thanks for sharing this, I'm always interested natural health things like this.

| **Re:PHYTOLACCA DECANDRA** | By: killpain | May 14 2013 |
|---|---|---|

I have strted taking phytolacca berry since last three weeks.In the first week the weight decreased by 2 kg but in consequent weeks in has incresed and is back to staring point i.e 88 kgs Please help

| **Picricum Acidum** | By: Jayashree<br>Calcutta, India | September 21 2006 |
|---|---|---|

Click picture for many more pictures

Picricum Acidum
This is a comparatively new remedy, but has already, developed some valuable therapeutic powers. In the first place, it attacks the vital force, as is manifested by an excessive languor or persistent tired feeling all over the body, which is generally accompanied with corresponding weakness of mind, indifference, and want of will power, and a desire to lie down. There is great heaviness of the legs, can hardly lift them from the ground, tired, aching feeling in the back with some burning (Phosphorus and Zinc met.) at times low down. Even the brain is fagged and the slightest exertion or mental effort brings on headache. This headache is oftenest found in students, overworked business men, and in persons depressed by grief or other emotions.
It oftenest locates in occipito-cervical region (Nat. mur., Silicea). < especially by mental exertion. In short, this remedy presents a perfect picture of nervous prostration. I found this remedy very useful in apparent failure of brain power in an old man who had always been strong up to within a year or so of the time he

called on me. He complained of heaviness in the occiput and inability to exert the mind to talk or think, and general tired "played out" feeling. I feared brain softening but I gave him Picric acid 6th trit. and it promptly cured him. This remedy has strong points of resemblance to Phosphoric acid and Phosphorus in its effects upon the sexual organs especially of the male. There is strong sexual desire with terrible erections, which is followed by corresponding weakness or complete impotence. There seems to be no doubt that it is destined to become one of our most valuable remedies for brain, spinal, and general nervous prostration, especially if connected with or arising from sexual excesses. It may be studied along with Gelsemium, Phosphoric acid, Phosphorus, Argentum nitricum, Sulphur, Alumina and Silicea and all those remedies affecting the brain, cord, and general nervous system.

Mind: The weakness of body and mind is the first impression wrought upon the mind of the reader who goes carefully over this proving.

It is progressive, passing from weariness to paralysis. The evidences of softening of brain and cord are strong. He, soon becomes sensitive to heat and desires the cool air which ameliorates his head and bodily condition.

Cold air and cold bathing are grateful to him. He is sensitive to wet weather. Numbness of many parts, trembling, lassitude, heaviness, must lie down, worse from least exertion are marked features. Loss of sleep, mental, worry, mental labor, are the exciting causes of symptoms. Extreme indifference.

It is a typical brain-fag remedy with indifference and lack of will power, aversion to talk, think, or perform any mental exertion. He is quickly prostrated from the least mental work, and it brings on many complaints, such as soreness and lameness, diarrhea, burning along the spine, general weakness and heaviness of limbs and back. He loses all interest in things; becomes irritable from any mental exertion.

Head: In young school children we have a common use for this very valuable but neglected remedy. When the child begins to learn the alphabet, headaches come, and return with every repeated effort, often with dilated pupils. After every examination at school come these violent headaches. A young man at school with the following symptoms was cured promptly.

Student's headache, vertigo when remaining standing, heaviness in the head, epistaxis, dilated pupils, congestion of conjunctiva, inability to bear artificial light, loss of appetite, bitter taste in mouth, vomiting, jaundice. Vertigo from mental exertion, lameness from stooping, walking, ascending, from raising the head from the pillow, can not sit up, soon nausea comes from it. It is often associated with the head pains, For headaches of students, teachers, professional men, and overworked business men, it is a most useful remedy. For headaches with great nervous weakness from grief and de pressing emotions, it has been often overlooked.

It has violent pain in vertex, forehead and occiput, extending down the spine with much heat. Congestive headaches. The head must be cool, it is worse from warm room, and wrapping up the head or body, and better from rest of mind and body. The headaches often begin and increase with the day, and are better by sleep at night. The patient is wholly incapacitated in the daytime, but comfortable from rest and sleep during the night. Extreme prostration often comes with these headaches. Extreme sexual excitement often comes with the headache as with many of its "complaints," but it is not an essential concomitant.

Eyes: The eye symptoms are due to loss of tone in the eye muscles of such as are suffering from brain fag. Looking, reading We print and exertion of vision will bring on the headache and eye symptoms (Onosmodium).

Sensation of sand in the eye, smarting, acrid tears, sparks, fag before the eyes, near sighted, dim vision, objects confused, pupils dilated, severe pain over eyes. Thick mucus in eyes. The symptoms from the eye arc worse from artificial light.

Small boils and pustules in external auditory canal.

Digestion: Eructations, abortive, sour.

Nausea in the morning worse on rising and moving about. There is evidence of liver trouble, and the patient is jaundiced. Rumbling in the abdomen, diarrhea from mental exertion. Yellow, watery or thin faecal, oily stool; smarting after stool; stool like yellow cornmeal gruel. Great weakness after stool, in debilitated persons.

Urine contains sugar and albumen, Urine of high specific gravity. Urine heavy with urates, uric acid, phosphates, and poor in sulphates. Dribbling after urination. Weakness of the bladder. Great waste of phosphates.
In the proving it turns the normal sexual sphere into lust, and salacity with violent erections, especially during the night. It has many times cured these symptoms even when of long standing. Pain in occiput and spine, heaviness of limbs and sexual excitement. Where great restlessness of feet is present the Zincum Picricum acts better. It cures impotency and spermatorrhea when the mind is unable to control the lustful state.
Burning heat in the spine from mental or physical exertion. Weakness of the spine and heaviness of the limbs, especially the lower limbs. The back is so tired that he cannot sit up erect, he must slide down in the chair or lie down. He is relieved while lying. It has been very useful in myelitis, with the weak limbs and a sensation as if body and limbs were bandaged or constricted; also with anesthesia of legs and as if he had on elastic stockings.
In locomotor ataxia where there are tormenting erections and emissions as soon as he falls asleep, Many cases of spinal weakness have been cured by this remedy.
Weakness of the lower limbs with trembling, numbness and constriction. Formication and prickling as from needles. Marked coldness of the feet. Physical exertion greatly intensifies all these symptoms after long rest he is ameliorated.
Tired after least exertion in limbs and whole body; excessive lassitude. Great muscular weakness. Sleepiness in day-time and sleepless at night, especially after mental labor.

Jayashree Kanoi

| **Re: Picricum Acidum** | By: passkey<br>spain | September 27 2006 |
|---|---|---|

This remedy was a breakthrough for me in the treatment of "Bad Backs"and I have cured many golfers of spinal problems with this remedy.

I have also treated cases of burn and scald injury .Full details may be found in the 2nd vol of Dr J. Clarke,s Dictionary of the Materia Medica.

Thery in Paris in 1898 discovered and developed its use in burns.

It has been used to deal with diabetes and fig warts.

Pine

Is for people who blame themselves for something they feel they have done in the past, some neglect of a parent, some fault in themselves, something they have left undone, and for those who reproach themselves that, even though they may have been successful in their work, they should have done better. They are never, as Dr Bach writes in "The Twelve Healers", content with their own efforts or the results. They also at times tend to claim responsibility for the mistakes made by others.

They are perfectionists and set themselves high standards, and this may cause them to over-work and strain to do better, and when the strain becomes too much for the physical body, they blame themselves for the ensuing illness as they feel they are failing in their duty to others, to their work and the family responsibilities. This guilt-complex takes so much of the joy out of their lives and they become despondent and begin to despair.

They can often feel so guilty about some minor matter that these thoughts fill their minds and they are always asking for forgiveness.

Dr Bach said that this feeling of guilt and self-reproach was a waste of time, for the faults of the past are but experiences to teach us not to make the same mistakes again. A lesson once learnt will guide us happily through any same experience in the future. The positive aspect of Pine is seen in those who acknowledge their faults but do not waste time dwelling on them, having learnt from them to avoid repetition. They are those who are willing to take responsibility and bear the burdens of others if it will truly help them, but having the wisdom to know this is not always the best way of helping. They have great powers of perseverance and are humble about these gifts.

The above is an extract from The Bach Centre Newsletter, which appears three times a year.

Dr Bach's description
For those who blame themselves. Even when successful they think that they could have done better, and are never content with their efforts or the results. They are hard-working and suffer much from the faults they attach to themselves. Sometimes if there is any mistake it is due to another, but they will claim responsibility even for that.

PINUS SILVESTRIS
Scotch Pine

Has been found of real use in the treatment of weak ankles and tardiness in walking, in scrofulous and rachitic children. Emaciation of lower extremities. Pinus sylvestris combines rheumatic, bronchial and urticarious symptoms; the chest seems thin and to give way.

Extremities.--Stiffness; gouty pain in all joints, especially finger-joints. Cramps in calves.

Skin.--Nettle-rash. Itching all over, especially about joints and on abdomen. Nose itches.

Relationship.--Compare: Pinus Lambertina-Sugar Pine--(constipation, amenorrhœa, abortion). Pinus Lambertina sap is a decided carthartic. Delayed and painful menstruation.

Also, Abies can; Abies nig.

Dose.--Tincture, to third potency.

Good wishes. Milap Singh

PIPER METHYSTICUM
Kava-kava

The intoxication produced by Kava is of a silent and drowsy character with incoherent dreams, loss of muscular power.

Urinary and skin symptoms have been verified. Marked modality. Arthritis deformans. Colic with flatulence.

Mind.--Very sensitive. Exaltation of mind. Amelioration of pains for a time by diverting attention. Restless desire to change position.

Urine.--Increased. Burning during micturition, gonorrhœa, and gleet. Cystitis. Chordee.

Skin.--Scaly. Fall of scales leaves white spots, which often ulcerate. Leprosy. Ichthyosis.

# PITUITARIA GLANDULA (PITUITARY GLAND)

Pituitary exercises a superior control over the growth and development of the sexual organs, stimulates muscular activity and overcomes uterine inertia. Its influence over unstriped muscular fiber is marked. Cerebral hæmorrhage.
Will check hæmorrhage and add absorption of clot. Uterine inertia in second stage of labor where os is fully dilated. High blood pressure, chronic nephritis, prostatitis. Ten drops after meals (Dr. Geo. Fuller). Vertigo, difficult mental concentration, confusion and fullness deep in frontal region. Use 30th potency.

Relationship.--Pituitrin--(Is a vaso-constrictor and parturient. Used chiefly for its action on the uterus either to aid in childbirth or to check bleeding after delivery. In doses of 1 c.c.m. intravenously to stimulate labor pains, expulsive period only. Contra indicated in myocarditis, nephritis and arteriosclerosis. A

| **Re: PITUITARIA GLANDULA** | By: Jayashree<br>Calcutta, India | January 19 2007 |

My late Doctor had prescribed this for Height increase. He gave it in the 30 potency and said only 3 Doses. Never to be repeated. My niece for whom he prescribed this is today 5'4". She was sure t be short. Yes her father is 6'plus but mother is 5'minus. He also said that the best time is puberty as then he growth hormones are at their optimum.

PINE TAR
DANGER
HARMFUL OR FATAL IF SWALLOWED
NET CONTENTS: .946 L (1 Quart)

PIX LIQUIDA
Pine-tar

Tar and its constituents act on various mucous membranes.

Its skin symptoms most important. A great cough medicine. Bronchial irritation after influenza (Kreosot; Kali bich). Scaly eruptions. Much itching. Constant vomiting of blackish fluid, with pain in stomach. Alopecia (Fluor ac).

Chest.--Pain at a spot about the third left costal cartilage where it joins the rib. Rales through the lungs, and muco-purulent sputum; offensive odor and taste. Chronic bronchitis.

Skin.--Cracked; itches intolerably; bleeds on scratching. Eruptions on back of hands.

Relationship.--Compare its constituents: Kreosol; Petrol; Pinus; Eupion; Terebinth; Carbolic acid.

Dose.--First to sixth potency.

Good wishes. Milap Singh

PLANTAGO MAJOR
Plantain

Has considerable clinical reputation in the treatment of earache, toothache, and enuresis. Sharp pain in eyes, reflex from decayed teeth or inflammation of middle ear. Eyeball very tender to touch. Pain plays between teeth and ears. Pyorrhea alveolaris. Depression and insomnia of chronic Nicotinism. Causes an aversion to tobacco.

Head.--Periodical prosopalgia, worse 7 am to 2 pm, accompanied with flow of tears, photophobia; pains radiate to temples and lower face.

Ears.--Hearing acute; noise painful. Sticking pain in ears. Neuralgic earache; pain goes from one ear to the other through the head. Otalgia, with toothache. Loud noises go through one.

Nose.--Sudden, yellowish, watery discharge.

Mouth.--Teeth ache and are sensitive and sore to touch. Swelling of cheeks. Salivation; teeth feel too long; worse, cold air and contact. Toothache, better while eating. Profuse of saliva. Toothache, with reflex neuralgia of eyelids.

Stool.--Wants to defecate; goes often, but cannot bad, can hardly stand. Diarrhœa, with brown watery

Urine.--Profuse flow; nocturnal enuresis (Rhus arom; Caust; Bellad).

Skin.--Itching and burning; papulæ. Urticaria, chilblains (Agar; Tamus).

Relationship.--Compare: Kalm; Cham; Puls.

Dose.--Tincture, and lower potencies. Local use in toothache in hollow teeth, otorrhœa, pruritus, and Poison-oak. Incised wounds.

Good wishes. Milap Singh

PLATANUS OCCIDENTALIS
Sycamore-Buttonwood

Tarsal tumors. Apply the tincture. Both acute and old neglected cases, where destruction of tissue occurred and cicatricial contraction caused marked deformity of lid, restored to practically normal conditions. Acts best in children. Must be used for some time. Ichtyosis.

Good wishes. Milap Singh

PLATINUM METALLICUM
The Metal
(PLATINA)

Is pre-eminently a woman's remedy. Strong tendency to paralysis, anæsthesia, localized numbness and coldness are shown. Hysterical spasms; pains increase and decrease gradually (Stannum). Tremulousness.

Mind.--Irresistible impulse to kill. Self-exaltation; contempt for others. Arrogant, proud. Weary of everything. Everything seems changed. Mental trouble pressed menses. Physical symptoms disappear as mental symptoms develop.

Head.--Tense, pressing pain, confined to a small spot. Cramplike, squeezing pain. Constriction about forehead and right temples. Numbness, with headache.

Eyes.--Objects look smaller than they are. Twitching of lids (Agar). Eyes feel cold. Cramp-like pain in orbits.

Ears.--Feels numb. Cramp-like twinges. Roaring and rumbling.

Face.--Prosopalgia, with numb feeling in malar bones, as if the parts were between screws. Pain at root of nose, as if squeezed in a vise. Coldness, creeping, and numbness, in whole right side of face. Pains increase and decrease gradually (Stann).

Stomach.--Fermentation, much flatulence; constriction; ravenous hunger; persistent nausea, with anxiety and weakness.

Abdomen.--Painter's colic. Pain in umbilical region; extending through to back. Pressing and bearing down in abdomen; extending into pelvis.

Stool.--Retarded; feces scanty; evacuated with difficulty. Adheres to rectum, like soft clay. Sticky stool. Constipation of travelers, who are constantly changing food and water. Stool as if burnt.

Female.--Parts hypersensitive. Tingling internally and externally (Kali brom; Orig). Ovaries sensitive and burn. Menses too early, too profuse, dark-clotted, with spasms and painful bearing-down, chilliness, and sensitiveness of parts. Vaginismus. Nymphomania. Excessive sexual development; vaginismus. Pruritus vulvæ. Ovaritis with sterility. Abnormal sexual appetite and melancholia.

Extremities.--Tightness of thighs, as if too tightly wrapped. Numb and weary sensation. Feel paralyzed.

Sleep.--Sleeps with legs far apart (Chamom).

Modalities.--Worse, sitting and standing; evening. Better, walking.

Relationship.--Compare: Rhodium; Stann; Valer; Sep. Compare, also: Platinum muriaticum (this remedy has achieved beneficial results after Iodide of Potash failed to cure in syphilitic affection; violent occipital headaches, dysphagia, and syphilitic throat and bone affections; caries of bones of feet); Plat mur nat (polyuria and salivation); Sedum acre (sexual irritability, relieves irritation of nerve centers and gives rest).

Antidote: Puls. Platina antidotes the bad effects of lead.

Dose.--Sixth trituration to thirtieth potency.

girilal

| **PLATINUM Constituion/Personality** | By: girilal<br>New Jersey USA | September 22 2006 |
|---|---|---|

Most homoeopatic books describe the metal Platinum as mainly a remedy for women. I myself know several male Platinums, and I would like to start this homoeopatic picture with one of them:

Mr. K. Birkenstock, manufacturer of healthy hippie-sandals, dismissed in 1975 150 of his 1700 employees, because they dared to ask for better working-conditions. These 150 employees were all active members of a trade union, requesting equal payment for men and women. Mr. Birkenstock wrote them this: " You will all quite rightly be treated as lepers and despised. And that is the least thing that should be done right here. With your incorrect, disgusting behaviour you have placed yourself outside the community." Once when the press asked who had bought his sandals, the manufacturer effortless named a number of prominent persons: "Boris Becker, Steffi Graf, Madonna, Bill Clinton, Norman Schwarzkopf, Clint Eastwood..."

This patriarch clearly shows the arrogance and haughtiness of Platinum, the super-importance of the ego ("Now look what celebrities have all bought my product") and the scorn of his fellow men.

Several esoteric studies associate the metal Platinum with the planet Maldek, also known under the names Nibiru, Lucifer or Phaeton. A 6000 years old map depicts this planet between Mars and Jupiter, where nowadays we find the circle of asteroids. Psychics like the Austrian Jakob Lorber have explained that the inhabitants of Maldek possessed a technically high -developed civilization, with advanced knowledge on computers, space travelling, nuclear power and genetic manipulation. They considered themselves greater than God and as a result of an atomic experiment their planet exploded. You may find this a vague story, but it gives a better understanding of the homoeopatic Platinum personality.

Platinums are arrogant and haughty; they overrate themselves and despise other people. They consider themselves better than 'the herd, the plebes'. These people feel that they don't belong to their own family, they often think that they belong to the nobility, or that they are in a strange country. They enjoy exaggerating their own qualities and importance. They are proud, vain, narcissistic, and desire to be flattered. The funny thing is that their megalomania also has a physical component: the delusion that the body or a part of the body is enlarged, or the feeling that things look faraway and small (as if you look at them from a high place). Well -hidden behind this super-ego however lies a forsaken feeling, the idea of being alone on this world, of not being appreciated. Platinum-people lack self-confidence when it comes to making contact with other people. Every injury to their self-respect results in ailments.

Platinums are hypersexual. Already from their youth they show strong sexual impulses. But sexual arousal causes complaints, because the sexual organs are extremely sensitive, what results in very painful sexual intercourse, vaginism, itching and numbness in the genitals, or genitals too sensitive to touch. This remedy is well known for healing (left) ovary problems. Menses are too early, too profuse and too long lasting. Platinums sleep naked and with their legs wide open.

Knowing that Platinum-characters pretend to be important and that they are very sexual, it is not so difficult to understand that for them often sex means power. The sexual relationship is unsatisfying because the partner can never fulfill their needs. Platinums then react in two ways: 1. Celibacy and maybe join a religious sect. Several sexual relationships, nymphomania/satyriasis. Times of nymphomania alternate with times of religiousness and celibacy. During their sexual periods they are less haughty. Suppressed sex causes ailments.

Often Platinums feel pangs of death, or they fear that their loved one will not return (remember their forsaken feeling). Usually they do not want to have children. They have many delusions about devils and stupid people.

Their physical complaints point at an over-sensitive nervous system, like feelings of constriction, spasms, trembling, numbness and cramps. The left side of the body is more affected. They feel worse by emotions, touch and sex. Walking outside ameliorates, and warmth relieves the cramps.

PLUMBUM METALLICUM
Lead

The great drug for general sclerotic conditions. Lead paralysis is chiefly of extensors, forearm or upper limb, from center to periphery with partial anæsthesia or excessive hyperasthesia, preceded by pain. Localized neuralgic pains, neuritis. The blood, alimentary and nervous systems are the special seats of action of Plumbum. Hematosis is interfered with, rapid reduction in number of red corpuscles; hence pallor, icterus, anæmia. Constrictive sensation in internal organs.

Delirium, coma and convulsions. Hypertension and arteriosclerosis. Progressive muscular atrophy. Infantile paralysis. Locomotor ataxia. Excessive and rapid emaciation. Bulbar paralysis. Important in peripheral affections. The points of attack for Plumbum are the neuraxons and the anterior horns. Symptoms of multiple sclerosis, posterior spinal sclerosis. Contractions and boring pain. All the symptoms of acute. Nephritis with amaurosis and cerebral symptoms. Gout (Chronic).

Mind.--Mental depression. Fear of being assassinated. Quiet melancholy. Slow perception; loss of memory; amnesic aphasia. Hallucinations and delusions. Intellectual apathy. Memory impaired (Anac; Baryta). Paretic dementia.

Head.--Delirium alternating with colic. Pain as if a ball rose from throat to brain. Hair very dry. Tinnitus (Chin; Nat salic; Carbon sulph).

Eyes.--Pupils contracted. Yellow. Optic nerve inflamed. Intraocular, suppurative inflammation. Glaucoma, especially if secondary to spinal lesion. Optic neuritis, central scotoma. Sudden loss of sight after fainting.

Face.--Pale and cachetic. Yellow, corpse-like; cheeks sunken. Skin of face greasy, shiny. Tremor of naso-labial muscles.

Mouth.--Gums swollen, pale; distinct blue lines along margins of gums. Tongue tremulous, red on margin. Cannot put it out, seems paralyzed.

Stomach.--Contraction in œsophagus and stomach; pressure and tightness. Gastralgia. Constant vomiting. Solids cannot be swallowed.

Abdomen.--Excessive colic, radiating to all parts of body. Abdominal wall feels drawn by a string to spine. Pain causes desire to stretch. Intussusception; strangulated hernia. Abdomen retracted. Obstructed flatus, with intense colic. Colic alternates with delirium and pain in atrophied limbs.

Rectum.--Constipation; stools hard, lumpy, black with urging and spasm of anus. Obstructed evacuation from impaction of feces (Plat). Neuralgia of rectum. Anus drawn up with constriction.

Urinary.--Frequent, ineffectual tenesmus. Albuminous; low specific gravity. Chronic interstitial nephritis, with great pain in abdomen. Urine scanty. Tenesmus of bladder. Emission drop by drop.

Male.--Loss of sexual power. Testicles drawn up, feel constricted.

Female.--Vaginismus, with emaciation and constipation. Induration of mammary glands. Vulva and vagina hypersensitive. Stitches and burning pains in breasts (Apis; Con; Carb an; Sil). Tendency to abortion. Menorrhagia with sensation of string pulling from abdomen to back. Disposition to yawn and stretch.

Heart.--Cardiac weakness. Pulse soft and small, dichrotic. Wiry pulse, camp-like constriction of peripheral arteries.

Back.--Spinal cord sclerosed. Lightning-like pains; temporarily better by pressure. Paralysis of lower extremities.

Skin.--Yellow, dark-brown liver spots. Jaundice. Dry. Dilated veins of forearms and legs.

Extremities.--Paralysis of single muscles. Cannot raise or lift anything with the hand. Extension is difficult. Paralysis from overexertion of the extensor muscles in piano players (Curare). Pains in muscles of thighs; come in paroxysms. Wrist-drop. Cramps in calves. Stinging and tearing in limbs, also twitching and tingling, numbness, pain or tremor. Paralysis. Feet swollen. Pain in atrophied limbs alternates with colic. Loss of patellar reflex. Hands and feet cold. Pain in right big toe at night, very sensitive to touch.

Modalities.--Worse, at night, motion. Better, rubbing, hard pressure, physical exertion (Alumen).

Relationship.--Compare: Plumb acet (painful cramps in paralyzed limbs; severe pain and muscular cramps in gastric ulcer; locally, as an application (non-homeopathic) in moist eczema, and to dry up secretions from mucous surfaces. Care must be used, as sufficient lead can be absorbed to produce lead poison, one to two drams of the liquor plumbi subacetatis to the ounce of water; also in pruritus pudendi, equal parts of the liquor plumbi and glycerin). Plumb iodat (Has been used empirically in various forms of paralysis, sclerotic degenerations, especially of spinal cord, atrophies, arterio-sclerosis, pellagra. Indurations of mammary glands, especially when a tendency to become inflamed appears; sore and painful. Indurations of great hardness and associated with a very dry skin. Lancinating pains of Tabes). Compare: Alumina; Plat; Opium; Podoph; Merc; Thall. Plectranthus (paralysis, spastic, spinal form); Plumb chromicum (convulsions, with terrible pains; pupils greatly dilated; retracted abdomen;); Plumb phosph (loss of sexual power; locomotor ataxia).

Antidotes: Plat; Alum; Petrol.

Dose.--Third to thirtieth potency.

girilal

| **PLUMBUM Constituion/Personality** | By: girilal<br>New Jersey USA | September 22 2006 |
|---|---|---|

Plumbum is lead, a very heavy metal. In astrology we associate Plumbum with the planet Saturn, recognizable by its large rings. Saturn is the last planet in the solarsystem that can be seen with the bare eye; for the more distant planets we need a telescope. That way Saturn turns out to be a boundary-planet, and also the clear ring system refers to boundaries, borders, limits.

The Greek name of the planet spirit Saturn in Chronos: chronology, chronicle, time! Saturn/Chronos with his boundaries gives us the realization of being bound to time, and his heavy metal lead lets us know that we have to deal with gravity. In the symbolism of Satun spirit has descended completely to earth with its third dimensional restrictions of time and form. Astrologically seen Saturn is connected with 'heavy' matters like moral, conscience, law and order, organization, restriction, limitation, forms, contracts, structures, quality, dogma, tradition, social status, fixation, hardening, freezing, death, soberness and efficiency. Saturns contracting nature physically gives cramps and spasms, and emotionally leads to fears. In the body Saturn rules the skeleton (ofcourse: he's the man with the scythe), all hardening processes like athero-sclerosis and gall-stones, dryness, stiffness, coldness, slowness, contractions and the chronic diseases. On the emotional and mental plane Saturnal complaints are fear, feelings of guilt, melancholy and depression.

So after this explanation you know that people who need Plumbum don't joyfully jump around and sing all day. That's right: they are sad and melancholic, their mind works very slowly and they experience difficulty in expressing themselves. There is a grave weakness of memory and a slowness in understanding. They cannot remember certain words, but keep on trying to find them and exert themselves to give you a good answer anyway (remember the search for quality and perfection of Saturn). In a later stadium Plumbums can become depressed, apathic and suicidal. But this can be alternated with moments of anger and irritation.

These people feel better when they are alone. They are suspicious, afraid of being poisoned and afraid of being persecuted by friends, the police, the law, etc. They are often sleepless because of the constant exertion of thinking - or much talking at night. In their restlessness they keep on walking, and they find that time goes by very slowly.

A keynote for this remedy is a physical feeling of constriction, as if body-parts are drawn inwardly. Another typical symptom is a blue line on the gums just around the teeth.

Plumbum has many complaints with the nervous system. First there is a lot of trembling, especially in the arms and hands. This can result in difficulties bringing things to the mouth. Later on the muscles refuse to function any longer. Specific for Plumbum is lameness at the wrist, so that the hand is hanging down. Or one leg makes dragging movements. There is pain in the nerves and constricting pain in the muscles. Cramps in the intestines or organs (colic pains). Inactivity of the rectum leads to constipation, and constriction of the bladder leads to urine retention and stinking sweat on the feet. Usually these people have lost their sexual desire and potency; women can experience vaginism. The breasts can feel very hard.

Other Plumbum related complaints are athero-sclerosis, palpitations and high blood-pressure. Let's take a look at a lead poisoning, for instance in painters, because paint often contains lead: First you become pale because lead connects to the red blood-cells causing anemia, you lose vitality, tend to develop athero-sclerosis, your skin shrinks and show grey-blue discolorations, you grow old too fast. Later you get nervous complaints, spasms and lameness. The symptoms of this medicine picture develop slowly and therefore it will also take time before the remedy shows improvements.

Plumbum characters love eating fat and salt food. They aggravate by physical and mental exertion and at night. Strong pressure ameliorates.

PODOPHYLLINUM
May-apple
(PODOPHYLLUM)

Diarrhœa; stools profuse (drain the patient dry), offensive, < morning and during dentition.

Persistent gagging, without vomiting; rolling the head and moaning with half-closed eyes.

Great loquacity during the fever stage, especially with jaundiced skin.

Prolapsus of uteri; prolapse of rectum.

Is especially adapted to persons of bilious temperament. It affects chiefly the duodenum, small intestines, liver, and rectum The Podophyllum disease is a gastro-enteritis with colicky pain and bilious vomiting. Stool is watery with jelly-like mucus, painless, profuse. Gushing and offensive. Many troubles during pregnancy; pendulous abdomen after confinement; prolapsus uteri; painless cholera morbus. Torpidity of the liver; portal engorgement with a tendency to hæmorrhoids, hypogastric pain, fullness of superficial veins, jaundice.

Mind.--Loquacity and delirium from eating acid fruits. Depression of spirits.

Head.--Vertigo, with tendency to fall forward. Headache, dull pressure, worse morning, with heated face and bitter taste; alternating with diarrhœa. Rolling of head from side to side, moaning and vomiting and eyelids half closed. Child perspires on head during sleep.

Mouth.--Grinding the teeth at night; intense desire to press the gums together (Phytol). Difficult dentition. Tongue broad, large, moist. Foul, putrid taste. Burning sensation of tongue.

Stomach.--Hot, sour belching; nausea and vomiting. Thirst for large quantities of cold water (Bry). Vomiting of hot, frothy mucus. Heartburn; gagging or empty retching. Vomiting of milk.

Abdomen.--Distended; heat and emptiness. Sensation of weakness or sinking. Can lie comfortably only on stomach. Liver region painful, better rubbing part. Rumbling and shifting of flatus in ascending colon.

Rectum.--Cholera infantum and morbus. Diarrhœa of long standing; early in morning; during teething, with hot, glowing cheeks while being bathed or washed; in hot weather after acid fruits. Morning, painless diarrhœa when not due to venous stasis or intestinal ulceration. Green, watery, fetid, profuse, gushing. Prolapse of rectum before or with stool. Constipation; clay-colored, hard, dry, difficult. Constipation alternating with diarrhœa (Ant crud). Internal and external piles.

Female.--Pain in uterus and right ovary, with shifting noises along ascending colon. Suppressed menses, with pelvic tenesmus. Prolapsed uteri, especially after parturition. Hæmorrhoids, with prolapsus ani during pregnancy.

Extremities.--Pain between shoulders, under right scapula, in loins and lumbar region. Pain in right inguinal region; shoots down inner thigh to knees. Paralytic weakness on left side.

Fever.--Chill at 7 am, with pain in hypochondria, and knees, ankles, wrists, Great loquacity during fever. Profuse sweat.

Modalities.--Worse, in early morning, in hot weather, during dentition.

Relationship.--Compare: Mandragora-also called mandrake--(must not be confounded with Podoph. Great desire for sleep; exaggeration of sounds and enlarged vision. Bowels inactive; stools large, white and hard). Aloe; Chelid; Merc; Nux; Sulph. Prunella-Self-head--(Colitis).

Dose.--Tincture to sixth potency. The 200th and 1000th seem to do good work in cholera infantum, when indicated.

SHOULD NOT BE TAKEN AFTER SUNSET AS IT WILL AGGRAVATE.

Jayashree Kanoi

POLYGONUM HYDROPIPEROIDES
Hydropiper - Smartweed
(POLYGONUM PUNCTATUM)

Metrorrhagia, also Amenorrhœa in young girls. Varicosis; hæmorrhoids and rectal pockets. Burning in stomach followed by feeling of coldness in the pit of the stomach.

Abdomen.--Griping pain, with great rumbling, nausea, and liquid feces. Flatulent colic.

Rectum.--Interior of anus studded with itching eminence. Hæmorrhoids. Liquid feces.

Urinary.--Painful constriction at neck of bladder.

Female.--Aching pains in hips and loins. Sensation as if hips were being drawn together. Sensation of weight and tension within pelvis. Shooting pains through breasts. Amenorrhœa.

Skin.--Superficial ulcers and sores on lower extremities, especially in females at climacteric.

Relationship.--Compare: Carduus mar (ulcers); Hamam; Senecio; Polygonum persicaria (renal colic and calculi; gangrene); Polygonum sagitatum-arrow-leaved. Tear-thumb--(2x for pains of nephritic colic; suppurative nephritis; lancinating pains along spine; itching of hard palate; burning inner side of right foot and ankle. C. M. Boger); Polygonum aviculare-knot-grass--(in material doses of tincture, found useful in phthisis pulmonalis and intermittent fever, and especially in arterio-sclerosis. Erythema).

Dose.--Tincture.

Good wishes. Milap Singh

The Best Weight Loss Program For Women Over 40
Are you one of the many women over 40 who would like to lose weight? It is amazing how those pounds can creep on without your being aware of it-until the day your favorite pair of slacks does not fit! You really want to do something about it, but you are wondering-what is the best weight loss program for women over 40?
If you are like a lot of people -including me- you may have tried diets in the past that did not work. Well, as you continue reading this article, you will find that there is a diet plan that will work for you.
One thing a successful diet needs is motivation. Now you are a realistic person and you are probably not expecting to wear a thong bikini or look like a super model. But just picture this in your mind. You are trying on clothes, and the sales person says, "I think you need a smaller size." Your husband says, "Honey, you look great!" Your friends exclaim, "Wow, have you lost weight?" Would not that give your ego a nice big boost?

Another important factor is a goal. Decide how many pounds you want to lose. Avoid deadlines, such as "I want to lose 20 pounds by Christmas". If you fail to meet this deadline, you may be tempted to give up. Instead, let every pound you lose inspire you to keep going!
http://www.iwantlingerie.com/t/bikini-thong.html

Click picture for many more pictures

POLYPORUS PINICOLA
Pine Agaric

Useful in intermittent, remittent and bilious fevers, with headache, yellow tongue, constant nausea, faintness at epigastrium, and constipation. Similar to its botanical relative, Polyp officinalis, or Boletus laricis, q.v. Deep dull, severe pain in shin bones, preventing sleep.

Fever.--Great lassitude, congestion of head, with vertigo, face hot and flushed, prickling sensation all over; restless at night from pain in wrists and knee; rheumatic pains; profuse perspiration. Headache about 10 am, with pain in back, ankles and legs increasing until 3 pm, then gradually better.

Good wishes. Milap Singh

| **Re: POLYPORUS PINICOLA** | By: Joe De Livera<br>Sri Lanka | November 24 2009 |
|---|---|---|

I noticed the reference to Polyporus Pinicola in the box entitled "Picture of this second" and would like to record my experience with this remedy I first used about 3 years ago when Chikungunya (CKG) was an epidemic here in Sri Lanka.

I used the 200c potency in the Wet dose and observed that many patients were cured on the third day after taking this remedy.

I am copying a post I made on September 7 2007 where I gave a case history of this disease which affected my wife at which time I did not have the Polyporus Pinicola which I was able to get a few weeks later.

http://www.homeopathyandmore.com/forum/viewtopic.php?t=1303&highlight=ckg

I would like to record my experience in the treatment of Chikun Gunya (CKG) which was first reported in Sri Lanka and which my wife contacted. This is a record of my experience in the treatment of this dread disease at first hand, first in the case of my wife and later in the case of over 50 patients all of whom were resident in the vicinity of my residence in Colombo where CKG seemed to be spreading from door to door at an alarming rate up to last April.

The disease started in the case of my wife with an acute pain on her heel which she complained of late in the evening of November 16 2006 and which I investigated carefully to ascertain if there was some wound which was causing the pain. There was however no reason for this pain and she went to bed early and around 3.00AM she woke up as she had a rigor with violent shivering and a temperature of around 103F. She took 2 Paracetemol tablets and by morning she was in a bad way with the temperature rising higher and 104F was recorded when an ice bag was used. Her temperature was not responding to Paracetemol and I gave her Oscillococcinum 200 in the wet dose every 3 hours and this seemed to be more effective as the temperature dropped within about 3 hours and stabilized by midday.

She complained of acute pain in all her joints and her Arthritis which I had treated successfully earlier had returned with full force and she was unable to leave her bed without assistance. She did not have any appetite and I persuaded her to sip liquids both warm and cold and she complained of an awful bitter taste in her mouth. I used Hypericum 200 for the pain in her body and Rhus Tox 1M which I had used successfully earlier for her Arthritis, all in the wet dose.

On the third day there was perceptible swelling of her legs and her ankles which was alarming to behold and I gave her Apis 6 in the wet dose and to my surprise this remedy reduced the swelling in about 6 hours. I also used it to help reduce the swelling of many other patient's limbs and they all reported positive results. Apis 6 is taken thrice daily.

Her condition deteriorated for a week during which time she had to be helped out of bed as her whole body ached and her joints were very painful. Her temperature stabilized within about 4 days and she had lost her appetite. She was not able to climb down the stairs and was confined to the upper floor.

Since there was every possibility of my contacting her disease I decided to use the only anti viral remedy that I had used successfully to prevent colds and used Gelsemium 30 in the wet dose twice daily. I am happy to record that this remedy protected me from contacting this dread disease which at my advanced age of 78 would have set me back many years. It was also helpful in preventing the members of over 25 households with known CKG patients to be protected from contacting this disease. I have no doubt that Gelsemium 30 prevents this virus from infecting others in the same household as it was impossible to prevent mosquitos biting me and others and thereby spreading the virus.

I had ordered Polyporus Pinicola (PP) which my Homeopathic colleagues in India recommended and had used successfully for

CKG patients and received this remedy in the third week after my wife was infected. I then changed her medication over to PP 6 in the wet dose and she responded quickly to this remedy which was obviously more effective in treating CKG than the other remedies that I was using.

My wife was back to normal in a month although she had to be on the medication which comprised the following remedies for many months :

Arnica 30 Dose 1 teaspoonful twice daily
Polyporus Pinicola 6 Dose 1teaspoonful thrice daily

The acute pains that characterize this disease left her in a month but the chronic phase of this disease continued for about 6 months when she complained of pains which occurred in various parts of her extremities like pin prick like pain in her toes and in her fingers which did not show any outward signs of any injury but which her nervous system conveyed to her brain as being real. This phenomenon is unknown as far as I am aware in other diseases where the patient is cured in a given time and does not suffer from any residual after pain. This after pain has been reported by other patients whom I have treated for CKG. Occasional swelling of the ankles was noticed and her Arthritis bothered her from time to time. Today over 10 months after she was first infected, she still seems to suffer from the after effects of CKG and this is true of other patients that I have treated.

I would like to record that the remedy Polyporus Pinicola which I received 3 weeks after my wife was first infected with CKG was discovered to be far more effective for the treatment of this disease, judging by the response of patients to this remedy which in some cases was dramatic. I used it in the 200c potency for patients who presented within a week after they were infected when they are in the acute stage of this disease. I used the 6c potency for others who presented later with the chronic symptoms and found that this was more suitable to reduce the swelling and the joint pains. The 200c showed dramatic results as patients who were barely able to walk who had caught the disease a few days prior were able to resume their normal life within 48 hours of their being treated with the 200c.

It is my hope that the patients who suffer from this dread disease in Ravenna and Cervia in North Italy will see this post and use Polyporus Pinicola in the manner that I have detailed above. Those affected would have already discovered that the drugs which they would already have been prescribed would not have helped them as drugs like Steroids and Antibiotics which are used by the majority of doctors have no positive effect and in some cases have even made a bad situation far worse especially in the case of liberal usage of steroids to treat CKG. Analgesics would have helped to control the pain and fever but this too would only have been effective in the short term as they do not offer a cure. Rest is essential and food must be taken as soon as the appetite returns. The intake of liquids is paramount in spite of the aversion to them that patients will experience.

For the benefit of those who are not familiar with the Wet Dose which I have referred to above I would like to repeat the instructions on how this is made. I have observed that the wet dose is best made with the remedy in the original Ethanol format instead of with the pellets already activated with the remedy.

2 drops of the remedy in Ethanol or 3-4 pellets of the remedy are inserted into a 500ml bottle of spring water which is shaken hard in the hand with a twisting motion to produce bubbling and aeration of the water. If no bubbles are noticed this is due to insufficient air space at the top of the bottle and an inch of water is poured out when it will bubble when shaken. This bubbling and aeration is Homeopathic Succussion and this must be done every time before each dose which is a teaspoonful is sipped slowly to enable the remedy to be absorbed into the body through the mucous membranes in the mouth.

I would welcome information from members both Homeopaths and patients who have either treated or suffered from this dread disease as this information will be very valuable in the treatment of CKG with Homeopathy. It is accepted that modern medicine has not discovered up to date, any specific drug or vaccine to treat this dread disease, the likes of which have never been experienced throughout the world up to about 2 years ago.

POPULUS CANDICANS
Balm of Gilead

Seems to have a remarkable power over acute colds, especially when accompanied by a deep, hoarse voice, or even aphonia. General insensibility of surface (worse, back and abdomen); rubbing and pounding borne without pain, and is grateful on account of warmth produced. Finger-ends thickened, horny; insensible to pinching and pricking. Instantaneous voice-producer (Coca).

Head.--Discusses her symptoms with every one. Hot head with cold extremities. Cold-sores on lips (Nat mur). Tongue feels thick and numb. Burning irritation of eyes, nose, mouth, throat, and air passages.

Respiratory.--Acute hoarseness. Throat and nostrils burn. Sits bent forward with dry cough. Pharynx and larynx feel dry, and the voice weak and toneless. Rawness and soreness of chest and throat. Cough of children caused by naso-pharyngeal catarrh; mucus drops from posterior nares.

Doses.--Tincture.

Good wishes. Milap Singh

POPULUS TREMULOIDES
American Aspen

The gastric and urinary symptoms point to its usefulness in dyspepsia and catarrh of the bladder, especially in old people. Good remedy in vesical troubles after operations and in pregnancy. Cystitis. Fullness of head, and sensation of heat of the surfaces of the body. Night-sweats. Ague.

Stomach.--Indigestion, with flatulence and acidity. Nausea and vomiting.

Urine.--Severe tenesmus; painful scalding. Urine contains mucus and pus. Prostate enlarged. Pain behind pubis, at end of urination.

Relationship.--Compare: Nux; China; Cornus flor; Cannabis;

Cantharis.

Dose.--Tincture or Populin trit, 1x.

Good wishes. Milap Singh

PRIMULA OBCONICA
Primrose

The poison of the Primrose occurs in its glandular hairs, which break easily and discharge an irritating fluid which is absorbed into the skin.

But skin symptoms of poisoning appear in sensitive patients even without coming in direst contact with the plant, mere nearness being sufficient, just like Poison ivy. Intermittency of symptoms; worse right side. Pain in liver and spleen. Deep infiltration and tension of tissues; blisters. Paralyzed sensation. Weakness. Pharyngeal soreness alternates with diminished facial irritation.

Face.--Moist eczema. Papular eruption on chin. Burns at night. Urticaria-like eruption. Eyelids swollen.

Extremities.--Eczema on arms, wrists, forearms, hands, papular and excoriated. Rheumatic pain around shoulder. Palms dry and hot. Cracking over joints and fingers. Eruption between fingers. Purple blotches on back of hands, palmar surface stiff. Blisters on fingers.

Skin.--Great itching, worse at night, red and swollen like erysipelas. Tumefied. Small papules on a raised base. Skin symptoms accompanied by febrile symptoms.

Relationship.--Compare: Rhus; Fagopyrum (Antidotal). Humea Elegans, similar skin symptoms.

Good wishes. Milap Singh

Primula veris (Gulden sleutelbloem)
A. Biemans, 2002

PRIMULA VERIS
Cowslip

Cerebral congestion, with neuralgia; migraine; rheumatic and gouty pains.

Head.--Sensation of a band around head; cannot keen hat on (Carbol ac). Skin of forehead tense. Fear of falling when standing up. Violent vertigo, as if everything turned around. Buzzing in ears; better in open air.

Respiratory.--Cough, with burning and pricking in respiratory tracts. Weak voice.

Urinary.--Urine smells strongly of violets (Terebinth).

Extremities.--Right axillary muscles painful. Weight and lassitude in limbs, especially the shoulders. Burning in hollow of right hand. Drawing pain in thumb and big toe.

Relationship.--Compare: Cyclamen; Ranunc; Œnothera--

Evening Primrose--(exhausting, watery diarrhœa; cholera infantum; hydrocephaloid); Primula farinosa-the wild Primrose--(dermatitis, especially on index fingers and thumbs).

Dose.--Third potency.

Good wishes. Milap Singh

PROPYLAMINUM
Distilled Herring-brine
(PROPYLAMIN - TRIMETHYLAMINUM)

In acute rheumatism, dissipates fever and pain in a day or two. Rheumatic prosopalgia, and rheumatic metastases, especially heart lesions.

Extremities.--Pain in wrists and ankles; worse, slightest motion (Bry). Great restlessness and thirst. Rheumatism, needle held in fingers gets too heavy. Tingling and numbness of fingers. Pain in wrist and ankle, unable to stand.

Relationship.--(Chenopodium vulvaria. The plant has an odor of decaying fish and contains a large amount of Propylamine. Weakness is lumbar and lower dorsal region).

Dose.--Ten to fifteen drops, in about six ounces of water; teaspoonful doses every two hours.

Good wishes. Milap Singh

PRUNUS SPINOSA
Black-thorn

Special action on the urinary organs and head. Very valuable in certain neuralgias, anasarca, and especially œdema pedum. Ankle and foot feel sprained. Ciliary neuralgia (Spig).

Head.--Pressing-asunder pain beneath skull. Shooting from right frontal bone through brain to occiput. Pain in right eyeball, as if it would burst. Piercing toothache, as if teeth were pulled out; worse, taking anything warm.

Eyes.--Ciliary neuralgia. Bursting pain in right eyeball shooting like lightning through the brain to occiput. Sudden pain in left eye as if it would burst, better by lachrymation. Irido-choroiditis. Opacity of vitreous humor. Eyes feel as if bursting.

Barosma Crenulatum

Feb 5th - Mar 5th

Abdomen.--Ascites. Cramp-like pain in bladder region; worse, walking.

Rectum.--Hard, nodular stool, with rectal pain, as if angular body were pressed inward. Burning in anus after slimy diarrhœa.

Urine.--Tenesmus of bladder. Ineffectual effort to urinate. Hurriedly impelled to urinate; the urine seems to pass as far as glans, and then returns and causes pain in urethra. Neuralgic dysuria. Must press a long time before urine appears.

Respiratory.--Wheezing when walking. Oppression of chest; anxious, short respiration. Angina pectoris. Furious beating of heart; worse, slightest motion.

Skin.--Herpes zoster. Dropsy. Itching on tips of fingers, as if frozen.

Relationship.--Compare: Lauroc; Prumus padus-Bird--cherry--(sore throat, pressure behind sternum and sticking pain in rectum); Prunus Virginiana-Wild Cherry--(heart tonic; relieves the flagging and distended ventricle; irritable heart; dilatation of right heart; cough, worse at night on lying down; weak digestion, especially in elderly people; chronic bronchitis; increases muscular tone); Pyrus-Mountain Ash--(irritation of eyes; constriction around waist; spasmodic pains in uterus, bladder, heart, cold-water sensation in stomach, coldness extends up œsophagus; neuralgic and gouty pains).

Dose.--Third to sixth potency.

Good wishes. Milap Singh

Electron micrograph of scabies mite

Psorinum

Psorinum is closed allied to Sulphur. Very sad, hopeless, despondent; "bluest of the blue."
Great debility; sweats on slightest movement; wants to give up and lie down.
Eruptions on the skin, dry, or moist; or skin scaly and dry as parchment; dirty, the great unwashed, unwashable.
Intense itching of skin < in warmth of bed.
Discharges and exhalations exceedingly offensive.
Very sensitive to cold air; wears a fur cap in summer.
Modalities: < in cold air, < in warmth of bed (itching); sitting up or motion; > bringing arms down close to the body, > lying down (even the dyspnœa); wrapping up warm; psoric manifestations.
Great weakness and debility; from loss of fluids; remaining after acute diseases; without any organic lesion or apparent cause.
Cough and dry, scaly eruptions return every winter.
Quinsy; to eradicate the tendency.

* * * * *

The disease products are powerful remedies, and when used in the potentized form have made many wonderful cures. It is believed by some that in the potentized form they are so changed that they become homœopathic to the disease which produced them, especially in any other person than the one in whom the original disease existed.

Remarkable results have been seen in cases resembling, for instance, gonorrhœal, syphilitic or psoric troubles, without any history of pre-existing trouble of the kind. Eruptions on the skin resembling itch have been cured with Psorinum, rheumatic troubles that were very obstinate under our usual remedies with Medorrhinum and a long-standing case of caries of the spine with Syphilinum, but in not one of these cases had the patient, itch, gonorrhœa or syphilis. The experience of many others seems to be different. The each nosode seems capable of producing the same or similar symptoms when given by mouth in proving as when inoculated the usual way seems well proved in the case of Psorinum. Why the constitutional symptoms appearing after inoculations should nor be considered a proving as well as those following a bee sting, Cantharis blistering, or the local external poisoning of the varieties of Rhus. If Rhus, very high, will cure rhus poisoning, why should not Syphilinum, etc., cure syphilis? Who will answer?

All nosodes are as capable of curing as they are of poisoning. If not, why not? We must not let prejudice hinder honest investigation. As if in corroboration of the theory that the potentized disease product will cure the disease producing it, the provings of Psorinum indicate that the chief action and curative power of the poison is upon the skin. And is it not remarkable that Psorinum should so strongly resemble Sulphur, the old-time remedy for itch, and again that they follow or complement each other in curing skin troubles? Notice some of the leading skin symptoms.

"Itching when the body becomes warm."

"Itching, intolerable in warmth of bed." (Merc. sol.)

"Itching scratches until it bleeds."

"Itching between fingers and in bends of joints." (Sepia).

"Dry, scaly eruptions which disappear summers and return winters."

"Repeated outbreaks of eruptions."

"Skin has a dirty dingy look, as if the patient never washed, and the body has a filthy smell even after a bath." These and many other symptoms, too numerous to mention here, show what an invaluable remedy this should be in skin troubles, and abundant experience and observation corroborate the truth of our law of cure in the curative power of disease poisons, as it also does in vegetable, and mineral and insect or animal.

Psorinum is also found useful in the consequences of suppressed eruptions, and in such cases should never be forgotten when other anti-psoric fail. Dr. Wm. A. Hawley, of Syracuse, N. Y., once made a brilliant cure of a very bad case of dropsy in an old woman, being led to prescribe this remedy by the appearance of the skin. One dose of Fincke's 42m. potency, dry on the tongue, cured the whole case in a very short time. It was a case of long standing. Now, if we examine we will also find that this remedy resembles Graphites in many points. A close comparison will pay the earnest student of Materia Medica. Psorinum is very depressed in mind. "Greatest despondency, making his own life and that of those about him almost intolerable." This state of mind, following acute diseases, like typhus, is especially benefited by this remedy. When writing of Graphites we mentioned the resemblance of the two remedies in the "stools, dark-brown, watery, and of intolerably offensive odor." This is found in bad cases of cholera infantum or chronic diarrhœa. There is one valuable diagnostic difference between them, although the remedies are so much alike, and that is that the Graphites moisture from the eruption is glutinous or sticky and not markedly so with Psorinum.

Again, Psorinum is very useful for weakness or debility during convalescence from severe acute diseases. The patient sweats profusely when taking the least exercise. Notwithstanding, as a rule, the skin is generally dry, inactive, and rarely sweats. Here, again, as in the stool symptom, choice may have to be made between Psorinum and China. Loss of fluids, blood, suppuration, etc., would decide in favor of the latter and itching eruptions or tendency thereto, before or during the sickness, the former. One thing in connection with the offensive stool. "All excretions, diarrhœa, leucorrhœa, menstrual flow and perspiration, have a carrion-like smell, even the body has a filthy smell, notwithstanding frequent bathing." The Psorinum subject is very sensitive to cold air, or change of weather (Hepar), wants to wear a fur cap, overcoat or shawl, even in the hottest weather. Chronic complaints following or dating back for years to some imperfectly cured or suppressed acute disease. (Carbo veg.) Allen's "key-notes," has a very good rendering of the nosodes. So we see in Psorinum when proven a great remedy for very grave conditions.

Skin: The patient dreads to be washed. The skin over the body, especially of the face, looks filthy, though it has been well washed. A dingy, dirty, foul look, as if covered with dirt.

Skin rough and uneven, cracks easily, bleeding fissures; it becomes rough and scaly. He cannot wash it clean. The skin of the hands is rough, chaps easily, becomes thick and scaly, easily cracks; breaks out in little scaly, eruptions; looks unwashed; he always appears to have dirty hands.

Many of the complaints of the skin are worse from bathing and from the warmth of the bed. The skin itches when warm; itches when wearing woolens. Itching when warm in bed; he scratches until the part becomes raw, and then it becomes scabby. When healing takes place there is itching and then it becomes scabby. When healing takes place there is itching and then he has to scratch. Legs and arms raw and scabby from scratching. Violent itching from the warmth of the bed, even, without any eruption. The skin is unhealthy, looks dirty, dingy, studded with capillary blood vessels and enlarged veins. This is the state before the eruption appears. Scabs form from scratching and then comes the eruption.

Papules, pimples, crusts, boils, vesicles, and eruptions ooze a watery moisture. When the eruption has gone on for some time the crusty formation and vesicles mingle; the skin becomes thickened and indurated, and new crops come out under the old crusts; rawness, itching, tingling, crawling, bleeding eczema of the scalp and face; the crusts cover the scalp; the hair falls out; the oozing lifts up the crusts and exposes new vesicles; it looks like raw beef, and it tingles so that the child cannot keep its fingers off it; worse at night, worse from the warmth of the bed, worse from warm applications, anything that would keep the air away from it; ameliorated by cool air and worse from covering. This is the opposite of the general Psorinum state, which is aggravated from the open air. He has an aversion to open air. The eruption goes on, spreads, and the true skin becomes elevated, thickened, indurated, with an increased vascularity and redness. The oozing is offensive like carrion or decomposed meat; nauseating odor from the oozing fluid.

Offensiveness runs through Psorinum in such a characteristic way that is worth while mentioning it here; foetid odors, foetid breath discharges and oozing from the skin smelling like carrion; stool so offensive that the odor permeates the whole house, in diarrhea, summer complaint, cholera infantum; perspiration foetid; leucorrhoea abominably offensive; eructations taste as if be had eaten bard boiled eggs and they had spoiled, and they smell so to others; stool flatus, and eructations smell like spoiled eggs; offensive to sight and smell is the subject who needs this medicine.

The skin grows increasingly thick and bleeds, and the eruption spreads to other parts. Eruptions on the lips, on the genitals; very offensive; soreness and rawness about the anus; the vulva ulcerates and is very offensive; ulcers on the legs; on the tibia; on the backs of the hands; on the dorsum of the foot; behind the ears and upon the ears; over the scalp; over the cheek bones; on the wings of the nose and on the nose and eyelids.

Greasy skin. The eruption is accompanied by redness of the mucous membranes of the nose, mouth, lips and eyes. Eyelids thickened and turned out, like ectropion; granulation and induration of mucous membranes, so that they become like gristle; redness and ulceration. Ulceration of the cornea; lachrymation; turning out of the lids with loss of the eyelashes.

Eyes and nose: He looks frightful with his red eyes, eruption on the face, red skin oozing a thick yellow discharge. In the early stages the oozing is a whitish thin or whitish thick moisture. In old eruptions ulceration takes place beneath the crusts and there is a thick, yellow, purulent discharge. Yellow green discharge from the eyes and nose. Horribly offensive discharge from the nose; gluey discharge from the nose; offensive like

Merc., Sil., Calc. p., Hep.

Accumulation of foetid pus in the eyes. Coryza with thick, yellow discharge. Always taking cold. In the coryza, the nose dries up part of the time and runs part of the time; he must use the handkerchief continually; must blow the nose all the time.

In the early stages of the coryza he blows it all the time, but there is no discharge or relief. This state is so marked that some think of it as a continuous hay fever, which runs all the year and rippens up in the Fall.

It is closely related to hay fever; stuffing up of the nose in the Fall; catarrhal state of the eyes and nose. Hay fever is one of the most difficult conditions to fit a remedy to. It belongs to a low constitution which must be built up before the hay fever will cease.

It is an expression of psora which comes once a year, and the psoric miasm must be changed. In a few years most subjects can be changed, but not in one season, so do not be disappointed. In catarrhal states, hay fever often dates back to low fever improperly treated.

The Psorinum patient himself is one of debility. He wants to go home after a short walk. He is worse in the open air. He cannot breathe in the open air; cannot breathe while he is standing up; wants to go home and lie down so that he can breathe.

Asthma: or cardiac dyspnoea, when the patient wants to go home and lie down so that he can breathe. Usually this condition is relieved by sitting up and from the open air. Not so with Psorinum, he wants a warm place and to he down and to be let alone.

Psorinum is slowed down in all of its functions; a state of paretic weakness. He does not rally after a fever; his digestion is slow; the stool is normal, yet it requires a great effort to expel it; the bladder is full of urine, yet it passes slowly and he feels that some remains; he can never finish stool or urination; he has to go back several times. Although the stool is soft and perfectly normal it cannot be expelled at one sitting.

A psoric patient comes down with typhoid; the typhoid has been arrested or has run its course and it is time for convalescence. The fever has subsided, but the patient has no appetite; he does not convalesce; he wants to lie down and does no desire to, be moved; he is worse when sitting up, lies upon his back; he has troublesome breathing and lies with his arms abducted from his side, thrown across the bed; this relieves his breathing and allows the chest to operate properly; so tired and so weak; one dose of Psorinum will cause a reaction, stop his sweat, increase his appetite, cause better breathing.

The Psorinum complex of symptoms is one in which remedies cause improvement but a short time and then the symptoms change and another remedy must be selected. It is a state of feeble reaction.

Mind: The mental symptoms present some strong features. Sadness, hopeless; he sees no light breaking through the clouds above his head; all is dark about him.

He thinks his business is going to be a failure; that he is going to the poor house; that he has sinned away his day of grace. It is a fixed idea during the day and he dreams about it at night.

Overwhelming sadness; dejection; he takes no joy in his family; feels that these things are hot for him.

His business is prosperous, yet he feels as if he were going to the poor house. No joy or realization of benefit . Extremely irritable, wants to be alone. Does not want to be washed.

Full of anxiety, even of suicide. Despair of recovery his sick.

Though there is no eruption at night he is driven to despair by the continual itching. If he throws the covers off then he becomes chilly; if he covers up, then there is itching.

Sensitive to cold yet the skin is worse from heat. Tingling, itching, formication, crawling like ants running over the surface, as of insects in the skin.

Especially suited to broken down individuals, who have vertigo as soon as they go into the open air; become dizzy and want to go home. and lie down; afraid they will lose their breath.

Head: Old chronic periodical headaches with hunger, and often the hunger lasts during the whole headache; must get up at night for have something to eat.

The headache is sometimes improve by eating. If he goes without a meal he has a headache.

Violent rush of blood to the head, hot face, hair wet with the perspiration, hunger. Every one, two, or three weeks a recurrent headache. Every time the air blows on his head it slacks up the catarrh and a headache comes on.

Either coryza or headache from catching cold. Headache is violent, throbbing, pecking as of little hammer, red face, hot head-congestive at times sweat. Hungry headache in such as have a dry cough in winter. Dry, teasing, racking cough with no expectoration. If the cough ceases he has a periodic headache. So complaints alternate. Head ache goes and cough appears or eruption in winter alternating with headache.

Scalp cold; wears fur cap in summer; worse uncovering the head (Sil.), worse front getting the hair cut (Bell., Glon., Sep.). Hepar is also worse from cold.

Salt rheum, psoriasis in winter. Dry, cold weather, cold wet weather; washing in cold water; dish washing, aggravate the salt rheum.

"Hair dry, lusterless, tangles easily, glues together; must comb it continually."

Ears: Chronic offensive otorrheoa; thick, purulent, offensive, yellow discharge from the ears; smells like stinking meat; continuous discharge; eruptions about and behind ears. Discharge resulting from scarlet fever; abscess in middle ear; otitis media; rupture of drum; prolonged discharge from such all abscess; foetid discharge.

"Otorrheoa with headache; thin, ichorous and horribly offensive like spoiled meat; very offensive, purulent; brown, offensive from left ear, for almost four year."

Otorrheoa associated with watery, offensive diarrhea. Scurfs in ears, and humid scurfs behind cars.

Teeth and mouth: Rigg's disease; the teeth become loose; the gums settle away, spongy, bleed easily, humid, blue, the teeth fall out.

Ulcers about the tongue and mouth; ulcers as found in infancy; aphthae, thrush; ulcerated sore mouth, sore throat, chronic ulcers of throat. Chronic thickening and elongation of the uvula. Enlargement of tonsils, parotids and submaxillary glands; they become hard and tender to touch; swelling from taking cold. Glands of the neck sore.

Abdomen: Chronic abdominal affections with disturbances of stool.

He will strain to pass a soft stool (Nux moshata., Alumina).

Chronic diarrhea; horribly offensive; frequent stool day and night (unlike Sulphur, the remedy it most resembles). He must go several times to pass a normal stool.

Chronic vomiting; ulcer of the stomach, distension of stomach are commonly associated. Always sour belching, sour stomach. Vomiting of blood and bloody stools. This is not strange, because Psorinum has a tendency to hemorrhages, especially from the uterus.

Women: All sorts of menstrual disorders, especially a prolonged menstruation. When a woman has passed through an abortion and the placenta has come away, but every few days a little gush of fresh, bright red blood and clots, or going days and weeks with a little oozing of bright red blood; every time she gets on her feet there is a new start of the flow; no tendency to permanent recovery.

Two remedies that fit this state are Sulphur and Psorinum. A marked state of relaxation, sub-involution. The uterus does not go back to its normal size and there is this tendency to bleed; a state of inertia.

Soft stool, passed with difficult do not forget this. Obstinate constipation. Haemorrhage from the rectum.

Cholera infantum; often in the early days the stool is horribly offensive, slimy, undigested; there is vomiting and prolonged weakness and the whole child has an offensive odor; child dirty; nose sunken in (Ant. t.), sunken, countenance. Psorinum causes reaction and cures, or brings the child into such a condition that a simple remedy completes the cure.

It is not the sourness of Hepar; in spite of washing, the child smells so sour; like sour milk; the diaper, urine, and faeces and perspiration are sour. This is a strong general feature of Hepar.

The stool smells like spoiled eggs, so also the eructations and flatus. The offensiveness of the stool is horrible, but not so permeating as Bapt., which is thick and clay-like, while the Psorinum stool is watery, brown, gushing and may be bloody.

Chronic diarrhea, early morning, urgent. Hot flatus, burning the anus; smells of spoiled eggs, Arn. and Staph. Involuntary stool at night (China has a black, profuse, watery stool at night and after meals.)

In Psorinum, we find the haste of sulphur, the flatulence of

Olean. and Aloe, and difficulty of expelling a soft stool like Alumina, China and Nux mosch.

Men: There is prostration in some Psorinum cases; prostration of the genitals.

It is not such an unusual thing in the female to have aversion to sexual intercourse, but man is not often subject to the complaints that cause aversion to coition. Yet we have in man as well as in the woman actual aversion or a state of no enjoyment. He can perform the act and he has no difficulty in obtaining an erection, so it is not impotence, but there is no enjoyment. Impotence comes later.

"Absence of erections; parts flabby, torpid."

"Aversion to coition; impotence; want of emission during coitus."

"Prostatic fluid discharged before urinating."

Old gleet, painless discharge; the "last drop;" relaxed and cold genitals; a drop of white or yellow pus after a well selected remedy. (Sepia, Sulphur, Alumina, Psorinum.) Psorinum is indicated above all others if there is an unusually offensive state of the genitals, Thuya, if the odor is of a nauseating, sweet character; warts exposed by rolling back the foreskin; sweet odor in spite of washing.

Heart: Psorinum cures many heart complaints.

Palpitation from the least exertion, better lying. Stitching pain better lying. Cardiac murmurs of either side. Mitral regurgitant murmur. Pericarditis of rheumatic origin. Heart symptoms with general weakness, dusky face, dazed look.

Weak, irregular and rapid pulse. But mark the modalities. Aggravation in the open air, aggravation when sitting up, aggravation when sitting at the writing table; wants to rest the chest and breathing apparatus by lying down. Asthmatic dyspnoea ameliorated by lying down, and worse the nearer the arms are brought to the body. Such symptoms are found in very few remedies and in none so marked as in Psorinum.

Febrile state. Intermittent, bilious fever, fever from a cold. The patient is so hot that the hand under the covers feels as though in a steam bath and the sensation of heat causes one to draw it back.

It is not the dry heat of Belladonna, yet it is as intense. It is a steam. He is covered with a boiling sweat in fevers. Head and body hot and hot air or steam beneath the covers. (Opium has this, but it is in a violent congestion to the head, an apoplectic condition.) In intermit tents he is taken on the street with difficult breathing. He wants to go home; he is weak and exhausted, crawls up stairs on the hands and knees.

The chill is not marked, but the heat is intense and the sweat copious. He is almost in a stupor, befogged, bewildered, cannot answer questions; face red, puffed, mottled.

"Sweat profuse, cold, clammy from least exertion."

This is another form which comes on in the weak, broken down state. After typhoids, he sweats if he turns in bed, after the least exertion, and the sweat is cold. Profuse night sweats. Night sweats of phthisis; when there is that tremendous heat under the covers, a copious hot sweat; mental state as if dazed. Marasmus; shriveling of the skin; dirty skin; cannot wash it clean. Offensive discharge from the bowels; great emaciation; increased growth of hair on the face; a fuzz (Nat-mur., Psor., Sulph Calc.); horribly offensive in spite of washing; ravenous appetite yet grows thin. Foetid odors would lead one to think of Psorinum.

PTELEA TRIFOLIATA
Wafer-ash
(PTELEA)

Is a remarkable remedy in stomach and liver affections. The aching and heaviness in the region of the liver is greatly aggravated by lying on the left side. Atonic states of stomach. Asthma.

Head.--Feels dull and stupid. Pain from forehead to root of nose; pressing-outward pain. Frontal headache; worse, noise, motion, night, rubbing eyes, with acidity. Temples as if pressed together.

Mouth.--Excess of saliva, with dry bitter taste. Tongue coated white or yellow; feels rough, swollen. Papillæ red and prominent (Arg n). Coating may be brownish-yellow.

Ptelea Trifoliata

Ptelea trifoliata.

PULSATILLA PRATENSIS
Wind Flower
(PULSATILLA)

The weather-cock among remedies.

The disposition and mental state are the chief guiding symptoms to the selection of Pulsatilla. It is pre-eminently a female remedy, especially for mild, gentle, yielding disposition. Sad, crying readily; weeps when talking; changeable, contradictory. The patient seeks the open air; always feels better there, even though he is chilly. Mucous membranes are all affected. Discharges thick, bland, and yellowish-green. Often indicated after abuse of Iron tonics, and after badly-managed measles. Symptoms ever changing. Thirstless, peevish, and chilly. When first serious impairment of health is referred to age of puberty. Great sensitiveness. Wants the head high. Feels uncomfortable with only one pillow. Lies with hands above head.

Mind.--Weeps easily. Timid, irresolute. Fears in evening to be alone, dark, ghost. Likes sympathy. Children like fuss and caresses. Easily discouraged. Morbid dread of the opposite sex. Religious melancholy. Given to extremes of pleasure and pain. Highly emotional. Mentally, an April day.

Head.--Wandering stitches about head; pains extend to face and teeth; vertigo; better in open air. Frontal and supra-orbital pains. Neuralgic pains, commencing in right temporal region, with scalding lachrymation of affected side. Headache from overwork. Pressure on vertex.

Ears.--Sensation as if something were being forced outward. Hearing difficult, as if the ear were stuffed. Otorrhœa. Thick, bland discharge; offensive odor. External ear swollen and red. Catarrhal otitis. Otalgia, worse at night. Diminishes acuteness of hearing.

Eyes.--Thick, profuse, yellow, bland discharges. Itching and burning in eyes. Profuse lachrymation and secretion of mucus. Lids inflamed, agglutinated. Styes. Veins of fundus oculi greatly enlarged. Ophthalmia neonatorum. Subacute conjunctivitis, with dyspepsia; worse, in warm room.

Nose.--Coryza; stoppage of right nostril, pressing pain at root of nose. Loss of smell. Large green fetid scales in nose. Stoppage in evening. Yellow mucus; abundant in morning. Bad smells, as of old catarrh. Nasal bones sore.

Face.--Right-sided neuralgia, with profuse lachrymation. Swelling of lower lip, which is cracked in middle. Prosopalgia towards evening till midnight; chilly, with pain.

Mouth.--Greasy taste. Dry mouth, without thirst; wants it washed frequently. Frequently licks the dry lips. Crack in middle of lower lip. Yellow or white tongue, covered with a tenacious mucus. Toothache; relieved by holding cold water in mouth (Coff). Offensive odor from mouth (Merc; Aur). Food, especially bread, tastes bitter. Much sweet saliva. Alternations of taste, bitter, bilious, greasy, salty, foul. Loss of taste. Desire for tonics.

Stomach.--Averse to fat food, warm food, and drink. Eructations; taste of food remains a long time; after ices, fruits, pasty. Bitter taste, diminished taste of all food. Pain as from subcutaneous ulceration. Flatulence. Dislikes butter (Sang). Heartburn. Dyspepsia, with great tightness after a meal; must loosen clothing. Thirstlessness, with nearly all complaints. Vomiting of food eaten long before. Pain in stomach an hour after eating (Nux). Weight as from a stone, especially in morning on awakening. Gnawing, hungry feeling (Abies c). Perceptible pulsation in pit of stomach (Asaf). All-gone sensation, especially in tea drinkers. Waterbrash, with foul taste in the morning.

Abdomen.--Painful, distended; loud rumbling. Pressure as from a stone. Colic, with chilliness in evening.

Stool.--Rumbling, watery; worse, night No two stools alike. After fruit (Ars; Chin). Blind hæmorrhoids, with itching and sticking pains. Dysentery; mucus and blood, with chilliness (Merc; Rheum). Two or three normal stools daily.

Urine.--Increased desire; worse when lying down. Burning in orifice of urethra during and after micturition. Involuntary micturition at night, while coughing or passing flatus. After urinating, spasmodic pain in bladder.

Female.--Amenorrhœa (Cimicif; Senec; Polygon). Suppressed menses from wet feet, nervous debility, or chlorosis. Tardy menses. Too late, scanty, thick, dark, clotted, changeable, intermittent. Chilliness, nausea, downward pressure, painful, flow intermits. Leucorrhœa acrid, burning, creamy. Pain in back; tired feeling. Diarrhœa during or after menses.

Male.--Orchitis; pain from abdomen to testicles. Thick, yellow discharge from urethra; late stage of gonorrhœa. Stricture; urine passed only in drops, and stream interrupted (Clemat). Acute prostatitis. Pain and tenesmus in urinating, worse lying on back.

Respiratory.--Capricious hoarseness; comes and goes. Dry cough in evening and at night; must sit up in bed to get relief; and loose cough in the morning, with copious mucous expectoration. Pressure upon the chest and soreness. Great soreness of epigastrium. Urine emitted with cough (Caust). Pain as from ulcer in middle of chest. Expectoration bland, thick, bitter, greenish. Short breath, anxiety, and palpitation when lying on left side (Phos). Smothering sensation on lying down.

Sleep.--Wide awake in the evening; first sleep restless. Wakes languid, unrefreshed. Irresistible sleepiness in afternoon. Sleeps with hands over head.

Back.--Shooting pain in the nape and back, between shoulders; in sacrum after sitting.

Extremities.--Drawing, tensive pain in thighs and legs, with restlessness, sleeplessness and chilliness. Pain in limbs, shifting rapidly; tensive pain, letting up with a snap. Numbness around elbow. Hip-joint painful. Knees swollen, with tearing, drawing pains. Boring pain in heels toward evening; suffering worse from letting the affected limb hang down (Vipera). Veins in forearms and hands swollen. Feet red, inflamed, swollen. Legs feel heavy and weary.

Skin.--Urticaria, after rich food, with diarrhœa, from delayed menses, worse undressing. Measles. Acne at puberty. Varicose veins.

Fever.--Chilliness, even in warm room, without thirst. Chilly with pains, in spots, worse evening. Chill about 4 pm. Intolerable burning heat at night, with distended veins; heat in parts of body, coldness in other. One-sided sweat; pains during sweat. External heat is intolerable, veins are distended. During apyrexia, headache, diarrhœa, loss of appetite, nausea.

Modalities.--Worse, from heat, rich fat food, after eating, towards evening, warm room, lying on left or on painless side when allowing feet to hang down. Better, open air, motion, cold applications, cold food and drinks, though not thirsty.

Relationship.--Penthorum, often indicated after Pulsatilla in later colds. Ionesia Asoca-Saraca indica--(Amenorrhœa. Menorrhagia-acts powerfully on female organs. Abdominal pain). Atriplex (Uterine symptoms, amenorrhœa; hysteria, coldness between shoulders, dislike of warm food, craves strange foods, palpitation, sleeplessness). Pulsatilla Nuttaliana, identical effects.

Compare: Cyclamen; Kali bich; Kali sulph; Sulphur. Pimenta-Allspice--(one-sided neuralgias, parts of body hot and cold).

Anagyris (headache, amenorrhœa).

Complementary: Coffea; Chamom; Nux.

Dose.--Third to thirtieth attenuation.

| **Pulsatilla Patient** | By: girilal<br>New Jersey USA | September 18 2006 |
|---|---|---|

Pulsatilla

(Wants to talk, cries when telling)
1. Loves consolation.
2. Wants to talk
3. Cries when telling
4. Desires to be caressed and carried
5. Narrating symptoms aggravates.
6. Delusion that she is alone.
7. Mildness and yielding disposition
8. Forsaken feeling.
9. Fastidious (Excessively concerned with cleanliness)
10. Greedy, wants everything for himself.

Nux Vomica
Is not bargaining
Not weeping
Not feeling alone

Is not forsaken
Consolation aggravates

Pulsatilla
Is Bargaining
Weeping
Feeling alone
Feels forsaken
Loves to be consoled.

Belladonna
Wants to be treated fast.

Pulsatilla
Does not want to be treated fast; actually loves the consoling the doctor is giving her.

girilal

| **More about Pulsatilla Constituion/Personality** | By: girilal<br>New Jersey USA | September 22 2006 |
|---|---|---|

This is almost exclusively a remedy for women. It especially fits women with a soft, friendly and yielding character, who are easily in tears.

The remedy is made of the Anemone Pulsatilla, a dark purple flower of the Ranunculacea, which trims her sails according to the winds. Analogous to the constant moving flowers are the changeable moods and symptoms and the hormonal changes of the people that need the homoeopatic Pulsatilla.

Pulsatilla-characters are very emotional, having changeable moods. A keynote for this remedy is a forsaken feeling, the feeling of being left alone and denied. Pulsatilla's are very sensitive when it comes to relationships. They tend to be dependent on someone, to shape themselves according to the wishes and desires of a partner. They are kind and soft and easy to persuade; they are not really assertive. But when they feel let down or rejected they can be very irritable, sad and melancholic. They need attention and affection, some warm relational womb. These people are seeking for connection, it are peacemakers, caretakers of a warm atmosphere at home and they long for very close partnerships.

Pulsatilla's enjoy art and music and they will transform their house into a commodious nest. They can be fastidious. They dislike quarrels and discussions, they cannot choose between several options and they somehow hope that life itself will solve their problems. Pulsatilla's easily weep and crying relieves their pain. But don't be mistaken: also silent grief is possible in this remedy. Tears can also be used to achieve certain things.

With their strong need for attention and connection they easily fall in love. They can have many successive relationships, or more than one relationship at the same time. Choosing a specific partner is difficult ("I love them both!") but when they have made a final choice they are quite true. They can also show a fear or aversion to marriage. Pulsatilla-people have a strong sexual force. At the same time they can have rigid ideas about sex or religion, feeling guilty and sinful about their sexuality. Pulsatilla's fear being alone, darkness and ghosts. The homoeopathic Pulsatilla shares many characteristics with the astrological sign Libra.

Male Pulsatilla's are very soft men with a clearly developed female side.

Symptoms are often changeable and inconstant. Or they only affect one side of the body, or are moving to another part of the body. Many symptoms affect the mucous membranes. Characteristic are the yellowish-green secretions. The blood runs slowly, causing hemorrhoids, varicose veins and a heavy and swollen feeling in various parts of the body. It is not surprising that this remedy has many complaints concerning the female sexuality: PMS, menstruation problems, a late and irregular menstruation with dark blood, milk in the breasts of women without children, serious pain after giving birth. Men can have problems with the testicles or the prostate. Pulsatilla's often have swollen body-parts, like a swollen belly or swollen feet. Many intestine problems, gas, and a heavy feeling in the stomach. They dislike fat food. These people usually drink very little.

They sleep late at night and are very sleepy in the afternoon. They need more than one pillow to rest their head on. Sleeping on their left side aggravates their complaints.

Although Pulsatilla's are chilly, they dislike warm air and warm rooms. They prefer an open window, cold and being outdoors, exercising slow movements like walking. (Fast movements make them feel too warm and too tired.) They feel better after crying.

Pulsatilla seems like Pisces personality.

girilal

| **Re:Pulsatilla** | By: garcot<br>Bangalore | March 20 2010 |
|---|---|---|

Meena ( Moon sign) Man(Woman):

Meena (Pisces) man wants to enjoy the party but is uncomfortable when more attention is paid to him. He is very moody and is full of imagination. His dreams are simple ones desiring his own well being. He is quite harmless and if hurt by others he would lock himself and cry to his heart's content. One woman was in the habit of going alone to a beach and cry! If he has every thing in life, he would prefer the tragic songs (of course he is a good singer) otherwise, he prefers comedy. But, he is the one who does not read crime section in News Papers. He believes in humanity and argues that only little percentage is 'misguided' and the News Papers over play to make money!

Meena (Pisces) man jumps to the conclusions very fast often making mistakes. If he is not given a good friend or secretary, he will not come to any conclusions at all. He experiences a lot of difficulty to start the conversation even with his close friend after a gap of a month. He is very religious, does ; pooja, bhajans and visits temples but he does not like meditation - he is afraid of introspection, meditation and isolation He is orthodox in his thoughts but would like to dress in strange cloths to surprise others. One Sharma sported a religious cap on Ramzan! He is a jack of all and master of none. Yet, with a lot of dedication to a single subject, he could acquire good command.

He is timid and does not venture any thing alone. He is very much attached to his wife and children. Given an opportunity he does not mind to date with his secretary just for fun as well as to surprise others. He believes in personal freedom and such things happen only when the other party takes a lead. Suppose his wife turns up late on day from her office, he creates a lot fuss. He will shout at her, demand an apology and finally appeals to her not to do that again, as he intensely loves her with liters of tears in his eyes! He wants his wife to play a role of dominating person and reassure him. Without such reassurances again and again, he can not grow in his life. He depends on very much public opinion. If the teasing due to his adventure with secretary is too much, he takes transfer to some other place to start a new life.

Meena (Pisces) man is fond of history and romantic novels. He is not steady with his friends. He is not attached to any one except his family members. One divorcee had expressed with a mutual friend that she would have been happy had she married this Piscean. Meena born though he came to know about this and also he was undergoing some misunderstandings with his wife, stayed within the marriage.

He likes cool drinks and lacks self control and is carried by the company he has. He should not be in the company of alcoholics and should never try habit forming drugs. One young married lady had got into the habit of sniffing kerosene and she had to take medical help to quit!

Meena (Pisces) man knows many stories from mythology and can talk hours on. He lacks the analytical ability and so such stories may entertain as he is an expert in weaving stories. He can live with limited income, but if the pay is increased, he would spend it all. Due to this, he is persistently on small loans. He is very law abiding and god fearing.

Overall, he lacks self-confidence. In his early days, he used to skip his examinations pretending stomach pain. Unless required, he will not take up responsibilities at all - he is an escapist.

Being romantic, well before marriage he would have a fascination for a young girl. One rich boy had taken fascination for a lambadi (nomadic) basket maker. He wanted to run away with this girl but he never ever proposed. His father shifted to a new place. I met this man in his early 50s and he said, "Whenever it rains first time after summer, I remember my first love."

As a boss, this man totally depends on you. And before that he has hand picked the trustworthy people. You can not depend on this man when you get a memo from the headquarters, as the chicken-hearted man would be busy saving his skin! As an employee, he can do routine things to perfection but whenever some unforeseen challenge comes, he is baffled to his bones!

© Pukka Herbs 2008

Punarnava herb grows all over India and upto 3000 feet altitude. I have seen it growing on railway tracks on the stations. Saw it growing in Jammu and also in Kanyakumari.

Plant loves intense heat and sunlight and also some moisture. Probably that's why it is useful for all disorders where in laymen terms - heat has entered in the body. All disorders that affect kidney and liver. All kidney and liver patients feel some relief.

I have seen wonders done by this herb. I myself pluck about two leaves and eat them up. Taste is slightly peppery.

Herb is very easy to identify.

| **Re:Punarnava herb - Boerhavia diffusa** | By: garcot<br>Bangalore | August 4 2009 |
|---|---|---|

Hi Girilal,

Welcome back to the forum after a long layoff. I will comeback with more info on this herb very soon.

Regards
Garcot

"wisdom in your body is deeper than your deepest philosophy" (Nietszche)

| **Re:Punarnava herb - Boerhavia diffusa** | By: garcot<br>Bangalore | August 5 2009 |
|---|---|---|

Dear Girilal,

Sanskrit: Punarnava, Raktakanda, Shothaghni, Varshabhu

This plant is extensively used for medicinal purposes in Myanmar.

Part used and uses:

• Whole plant -- Diarrhoea; Heart disease; Carminative; Expectorant; Haemorrhoid; Cough; Inflammations; Oedema; Antidote for poisons; Gynaecological disease. Root powder -- Asthma; Unproductive cough; To allay thirst; Ascites; Intermittent fever; Gynaecological disease; Ringworm; Antidote for scorpion venom. Leaf -- Dysuria. -- KS-TMN

• Fresh or dried leaves. Used as possess very good diuretic properties and is used in cases of oedema and ascites i.e. those due to early cirrhosis and chronic peritonitis -- UHM

• Medicinal Uses: According to Ayurveda, Punarnava is bitter, cooling, astringent to bowels, useful in biliousness, blood impurities, leucorrhoea, anaemia, inflammations, heart diseases, asthma, alternatives etc. The leaves are useful in dyspepsia, tumours, spleen enlargement, abdominal pains. According to Unani system of medicine, the leaves are appetizer, alexiteric, useful in opthalmia, in joint pains. Seeds are tonic expectorant, carminative, useful in lumbago, scabies. The seeds are considered as promising blood purifier. -- www.hort.purdue.edu/newcrop/CropFactSheets/punanrnava.html

• Anti-inflammatory activity of various extracts of roots were studied in carrageenin induced oedema and formaldehyde-induced arthritis in albino rats. Acetone extract showed most potent anti inflammatory effect. Aqueous extract and alkaloid fractions significantly inhibited the increased serum aminotransferase activity in arthritic animals similar to hydrocortisone. Liver ATP (adenosine triphosphate), phosphohydrolase activity in arthritic animals was also increased by aqueous extract and the alkaloid. Comparative study for the anti-inflammatory effect of the various parts of the plant in carrageenin induced hindpaw oedema showed that the activity was significantly more in alcoholic extracts of roots and leaves as compared to stem and whole plant. Hypoxanthine-9-L-arabinofuranoside, the nucleoside isolated from the roots showed that like inosine and adenosine, it relaxes the isolated coronary artery of the goat contracted with potassium chloride. The action, similar to that of inosine, is thought to be a direct vasodilator effect, not involving vascular adenosine receptors. The diuretic action of the plant has been shown by various investigators, this effect being significantly higher in water insoluble alcoholic extract of roots and leaves as compared to that of stems and the whole plant.
Fresh juice of leaves is used in dropsy and chronic renal failure in a dose of 20 ml two to three times a day. Roots boiled with milk are used in a single daily dose for maintaining health. Topical use of roots has good anti-inflammatory effect. In a study of 15 patients with nephrotic syndrome treated with the decoction of the crude drug, six responded well, seven improved, while one patient deteriorated. The plant is well

tolerated, though in occasional patients mild laxation is observed. -- www.garrysun.com/punarnava.html

Ethnobotany (Worldwide use)
- Healing power and curative properties:

Obesity: The herb has been used in indigenous medicine from time immemorial. Punarnava is highly beneficial in the treatment of obesity as almost all anti-obesity herbal preparations contain it in one or the other form. It is beneficial in the treatment of several common ailments.

Dropsy (Edema): Punarnava increases the secretion and discharge of urine. It is effective in the treatment of dropsy, a disease marked by an excessive collection of a watery fluid in the tissues and cavities or natural hollows of the body. The fresh boiled herb should be given in the treatment of this disease. A liquid extract of the fresh or dry plant can also be given in doses of 4 to 6 gms.

Ascities: The herb is useful in the treatment of ascities, a disease characterised by accumulation of fluid inside the peritoneal cavity of the abdomen. Much more powerful effect on certain types of ascities that is caused due to the cirrhosis of the liver and chronic peritonitis.

Stomach disorders: The herb is useful in strengthening the stomach and promoting its action. It is beneficial in the treatment of several stomach disorders, particularly intestinal colic. A powder of the root is given in doses of 5 gms thrice a day. It is also useful in killing or expelling intestinal worms.

Asthma: Punarnava promotes the removal of catarrhal matter and phlegm from the bronchial tubes. It is, therefore, beneficial in the treatment of asthma. A powder of the root can be taken in small doses three times a day.

Fevers: Punarnava is beneficial in the treatment of fevers. It brings down temperature by inducing copious perspiration.

Other diseases: The root of the plant is useful in the treatment of several diseases - particularly of the kidney and heart as well as gonorrhoea. It is also valuable in oedema, anaemia, cough, pluerisy, nervous weakness, constipation and paralysis. Skin diseases: The root of the plant is an effective remedy for several skin diseases. A paste of the root can be applied beneficially as a dressing for oedematous swellings. A hot poultice of the root can be applied with gratifying results to ulcers, abscesses and similar skin diseases.

Constituents :

- 1. Alkaloid - punarnavine C17H22NO2 (15) -- UHM

- Root alkaloids (0.05%), triacontanol hentriacontane,ß-sitosterol, ursolic acid, 5,7-dihydroxy-3,4-dimethyoxy-6,8-dimethyl flavone, and an unidentified ketone (m p 86º). The roots contain the rotenoid boeravinones Al, Bl, C2 D, E and F besides the new dihydroisofurenoxanthin, borhavine and an antifibrinolytic agent, punarnavoside. Two lignans, liriodendrin and syringaresinol mono-ß-D-glucoside, have also been reported in the roots

Regards
Garcot

| **Re:Punarnava herb - Boerhavia diffusa** | By: girilal<br>New Jersey USA | August 13 2009 |

There are two almost similar plants exist side by side.

Best way to identify punarnava is that underside of the leaf is silvery or white and stem is thin and hardy. Leaves are also thin and papery and a bit rough. In the season (now is the season) tiny pink flowers too are there.

Both similar plants have almost similar medicinal characters but still identification is not really difficult if you follow these above written things. Plant is very obvious all over India expect on the mountains and grows only under the direct sun.

Ganesh Arcot has put a very appropriate character of the herb. It works like magic in heat related ailments. Taste is slightly peppery.

girilal

| **Re:Punarnava herb - Boerhavia diffusa** | By: girilal<br>New Jersey USA | August 13 2009 |
|---|---|---|

Yes of-course this is the best herb medicine for obesity.

It reduces the urge to eat constantly.

girilal

| **Re:Punarnava herb - Boerhavia diffusa** | By: girilal<br>New Jersey USA | January 11 2010 |
|---|---|---|

Most patients reported the cure of peptic ulcers with this raw herb. If one learns to identify it, it is a blessing.

girilal

| **Re:Punarnava herb - Boerhavia diffusa** | By: garcot<br>Bangalore | January 13 2010 |
|---|---|---|

Hi Giri,

Happy New Year. It is not difficult to identify this herb, as you showed me when you were in Bangalore. Shape of leaf distinguishes it from the rest easily.

Thanks for the update on its curative action on peptic ulcer. The dosage is 2.5gm to 4gm of the powder, twice a day till there is cure. And normally one can start to feel the relief after a couple of doses.

Warm regards
Ganesh

| **Re:Punarnava herb - Boerhavia diffusa** | By: user123 | January 13 2010 |

Punarnavadi Mandur is widely used in Ayurveda and it is available at all ayurvedic shops.

| | | |
|---|---|---|
| **Re:Punarnava herb - Boerhavia diffusa** | By: girilal<br>New Jersey USA | January 19 2010 |

Since it grows all over so why buy it from stores. Once should learn to identify it to reap most of its benefits.

girilal

Click picture for many more pictures

PYROGENIUM
Artificial Sepsin

This remedy was introduced by English Homeopathists, prepared from decomposed lean beef allowed to stand in the sun for two weeks and then potentized. The provings and most of the clinical experience have been obtained from this preparation. But, subsequently, Dr. Swan potentized some septic pus, which preparation has also been proved and clinically applied. There does not seem to be any marked difference in their effects. Pyrogen is the great remedy for septic states, with intense restlessness. "In septic fevers, especially puerperal, Pyrogen has demonstrated its great value as a homeopathic dynamic antiseptic. " (H. C. Allen). Hectic, typhoid, typhus, ptomaine poisoning, diphtheria, dissecting wounds, sewer-gas poisoning, chronic malaria, after-effects of miscarriage, all these conditions at times may present symptoms calling for this unique medicine. All discharges are horribly offensive-menstrual, lochial, diarrhœa, vomit, sweat, breath, etc. Great pain and violent burning in abscesses. Chronic complaints that date back to septic conditions. Threatening heart failure in zymotic and septic fevers. Influenza, typhoid symptoms.

Diseases originating in ptomaine or sewer gas infection.

The bed feels hard, parts lain on sore and bruised, must move to relieve the soreness.

Tongue: large, flabby, clean, smooth as if varnished; fiery red, cracked, difficult articulation; vomiting, persistent, brownish coffee ground, offensive, stercoraceous.

Diarrhœa; horribly offensive, brown or black; painless, involuntary.
Distinct consciousness of a heart; it feels tired; as if enlarged; purring, throbbing, pulsating, constant in ears, preventing sleep.

Mind.--Full of anxiety and insane notions. Loquacious. Thinks he is very wealthy. Restless. Feels if crowded with arms and legs. Cannot tell whether dreaming while awake or asleep.

Head.--Painless throbbing. Fan-like motion of alæ nasi (Lyc; Phos). Bursting headache with restlessness.

Mouth.--Tongue red and dry, clean, cracked, smooth, as though varnished. Throat dry, articulation difficult. Nausea and vomiting. Taste terribly fetid. Breath horrible.

Stomach.--Coffee-grounds vomiting. Vomits water, when it becomes warm in stomach.

Abdomen.--Intolerable tenesmus o both bladder and rectum. Bloated, sore, cutting pain.

Stool.--Diarrhœa; horribly offensive, brown-black, painless, involuntary. Constipation, with complete inertia (Opium); obstinate from impaction. Stools large, black, carrion-like, or small black balls.

Heart.--Tired feeling about heart. Palpitation. Sensation as if heart were too full. Always can hear her heart beat. Pulse abnormally rapid, out of proportion to the temperature pain in region of left nipple. Conscious of heart.

Female.--Puerperal peritonitis, with extreme fetor. Septicæmia following abortion. Menses horribly offensive. Uterine hæmorrhages. Fever at each menstrual period, consequent upon latent pelvic inflammation. Septic puerperal infection. Pelvic calculitis. Inflammatory exudate. Post-operative cases, with overwhelming sepsis.

Fever.--Coldness and chilliness. Septic fevers. Latent pyogenic condition. Chill begins in back. Temperature rises rapidly. Great heat with profuse hot sweat, but sweating does not cause a fall in temperature.

Extremities.--Throbbing in vessels of neck. Numbness of hands, arms, feet. Aching in all limbs and bones. Bed feels too hard (Arn). Great debility in the morning. Soreness; better by motion (Rhus). Rapid decubitus of septic origin.

Skin.--Small cut or injury becomes much swollen and inflamed-discolored. Dry.

Sleep.--Seems to be in semi-sleep. Dreams all night.

Modalities.--Relief from motion.

Relationship.--Compare: Streptoccin (anti-febrile action; septic symptoms in infectious diseases). Rapid in its action, especially in its effect on temperature; Staphyloccin in diseases where the staphylococcus is the chief bacterial factor, as acne, abscess, furuncle; empyæma, endocarditis, etc. ; Sepin-A toxin of Proteus vulgaris, prepared by Dr. Shedd, same symptoms as Pyrogen, of which it is the main constituent; Echinacea; Carbo; Ars; Lach; Rhus; Bapt.
Complementary: Bryon.

Dose.--Sixth to thirtieth and higher potencies.

Should not be repeated too frequently.

| **Re: PYROGENIUM** | By: sammy<br>Malaysia | November 12 2007 |
|---|---|---|

Can be substituted for Oscillococcinum.

http://www.homeopathyandmore.com/forum/viewtopic.php?t=1408

| **Re: PYROGENIUM** | By: girilal<br>New Jersey USA | November 13 2007 |
|---|---|---|

I used homemade Pyrogenium with great success.

Last year, I made this medicine and used it on slum children in Bangalore. Most children had infectious diseases. Most were susceptible to cold whenever cold winds started or rain brought down the temperature.

girilal

| **Re: PYROGENIUM** | By: Pat2006M | November 13 2007 |
|---|---|---|

girilal,

Did you make the medicine in the usual manner in a 2 liter bottle filled 1/2 ways?

how often did the children take the medicine and for how long?

© TopTropicals.com

QUASSIA AMARA
Quassia-wood
(QUASSIA - PICRAENA EXCELSA)

Acts on gastric organs as a tonic (Gentian; Hydr). Seems to possess marked action on eyes, producing amblyopia and cataract. Pain in right intercostal muscles above the liver. Pressure and stitches in liver, and sympathetically in spleen.

Stomach.--Atonic dyspepsia, with gas and acidity. Heart-burn and gastralgia. Regurgitation of food. Abdomen feels empty and retracted. Dyspepsia after infectious diseases; especially grip, dysentery. Tongue dry or with brown sticky coating. Cirrhosis of liver with ascites.

Urinary.--Excessive desire-impossible to retain urine; copious micturition day and night. As soon as the child wakes up the bed is drenched.

Extremities.--Inclination to yawn and stretch (Rhus). Sensation of coldness over back. Prostration, with hunger. Cold extremities, with sensation of internal coldness (Helo-derma).

Dose.--First to third potency, or spoonful doses of Aqua Quassiae.

Good wishes. Milap Singh

QUEBRACHO
Quebracho
(ASPIDOSPERMA)

The digitalis of the lungs (Hale). Removes temporary obstruction to the oxidation of the blood by stimulating respiratory centers, increasing oxidation and excretion of carbonic acid. Pulmonary stenosis. Thrombosis of pulmonary artery. Uræmic dyspnœa. An effective remedy in many cases of asthma. It stimulates the respiratory centers and increases the oxygen in the blood. "Want of breath" during exertion is the guiding symptom. Cardiac asthma.

Relationship.--Compare: Coca; Arsenic; Coffea-Catalpa (difficult respiration).

Dose.--First trituration of tincture, or Aspidospermin hydrochlorid 1 grain of 1x trit. Every

| QUERCUS E GLANDIBUS | By: Milap Singh<br>Bangalore, India | December 13 2006 |
|---|---|---|

Click picture for many more pictures

QUERCUS E GLANDIBUS
Spirit distilled from Tincture of Acorn Kernels
(QUERCUS GLANDIUM SPIRITUS)

Used first by Rademacher for chronic spleen affections; spleen-dropsy. Antidotes effects of Alcohol. Vertigo; deafness, with noises in head. Takes away craving for alcoholics; give dose as below for several months. Dropsy and liver affections. Useful in gout, old malarial cases with flatulence.

Relationship.--Compare: Angelica (in tincture, five drops, three times daily, produces disgust for liquor; also for atony of different organs, dyspepsia, nervous headache, etc; chronic bronchitis to increase expectoration). Ceanoth; Lach; Nat mur; Helianthus (spleen enlarged and painful).

Dose.--Ten drops to a teaspoonful of the distilled spirit three to four times a day. A passing diarrhœa often appears for a times a day. A passing diarrhœa often appears for a time when using it.

Curative effect. Quercus acts well in trituration of the acorn 3x in splenic cases, flatulence, old malaria and alcoholic history (Clark).

Good wishes. Milap Singh

Click picture for many more pictures

"STANDARD" RADIUM
SOLUTION FOR DRINKING
CONTAINING TWO MICROGRAMS RADIUM (ELEMENT)
DOSE: ENTIRE CONTENTS OF ONE BOTTLE AFTER EACH MEAL
GUARANTEED BY STANDARD CHEMICAL COMPANY PITTSBURGH PA. U.S.A.

RADIUM BROMATUM
Radium Bromide
(RADIUM)

An important addition to the Materia Medica, especially since the provings by Diffenbach have precisionized its use. Radium brom of 1,800,000 radio-activity was employed. Found effective in the treatment of rheumatism and gout, in skin affections generally, acne rosacea, nævi, moles, ulcers and cancers. Lowered blood pressure. Severe aching pains all over, with restlessness, better moving about. Chronic rheumatic arthritis. Lateness in appearance of symptoms. Ulcers due to Radium burns, take a long time to heal. Marked increase in the polymorphonuclear neutrophiles. Great weakness.

Mind.--Apprehensive, depressed; fear of being alone in the dark; great desire to be with people. Tired and irritable.

Head.--Vertigo, with pain in back of head, left when in bed. Occipital and vertex pain, accompanying severe lumbar aching. Severe pain over right eye, spreading back to occiput and to vertex, better in open air. Head feels heavy. Frontal headache. Both eyes ache. Itching and dryness of nasal cavities, better in open air. Aching pain in angle of right lower jaw. Violent trifacial neuralgia.

Mouth.--Dryness of mouth. Metallic taste. Prickling sensation on end of tongue.

Stomach.--Empty feeling in stomach. Warm sensation in stomach. Aversion to sweets, ice-cream. Nausea and sinking sensation, belching of gas.

Abdomen.--Pain, violent cramps, rumbling, full of gas; pain over McBurney's point, and at location of sigmoid flexure. Much flatulence. Alternating constipation and loose movements. Pruritus ani and piles.

Urinary.--Increased elimination of solids, particularly of chlorides. Renal irritation, albuminuria, granular and hyaline casts. Nephritis with rheumatic symptoms. Enuresis.

Female.--Pruritus vulvæ. Delayed and irregular menstruation and backache. Aching pains in abdomen over pubes when flow comes on. Right breast sore, relieved by hard rubbing.

Respiratory.--Persistent cough with tickling in suprasternal fossa. Dry, spasmodic cough. Throat dry, sore, chest constricted.

Back.--Aching in back of neck. Pain and lameness in cervical vertebræ, worse dropping head forward, better standing, or sitting erect. Lumbar and sacral backache, pain appears to be in bone, continued motion relieves. Backache between shoulders and lumbar-sacral region, better after walking.

Extremities.--Severe pain in all the limbs, joints, especially in knee and ankles, sharp pains in shoulders, arms, hands and fingers. Legs, arms and neck feel hard and brittle, as though they would break on moving. Arms feel heavy. Cracking in shoulder. Pain in toes, calves, hip-joint, popliteal spaces. Muscles of legs and hips sore. Arthritis, aching pains, worse at night. Dermatitis of the fingers. Trophic changes in the finger nails.

Skin.--Small pimples. Erythema and dermatitis, with itching, burning, swelling and redness. Necrosis and ulceration. Itching all over body, burning of skin, as if afire. Epithelioma.

Sleep.--Restless. Sleepiness with lethargy. Dreams vivid, busy. Dreams of fire.

Fever.--Cold sensation internally, with chattering of teeth until noon. Internal chilliness followed by heat of the skin, associated with bowel movements and flatulence.

Modalities.--Better, open air, continued motion, hot bath, lying down, pressure. Worse, getting up.

Relationship.--Compare: Anacardium (the ulceration produced by it is like Radium. It may appear elsewhere than on place of contact and appear late). Compare: X-Ray; Rhus; Sepia; Uranium; Ars; Pulsat; Caustic.

Antidotes: Rhus ven; Tellur.

Dose.--Thirtieth and twelfth trituration.

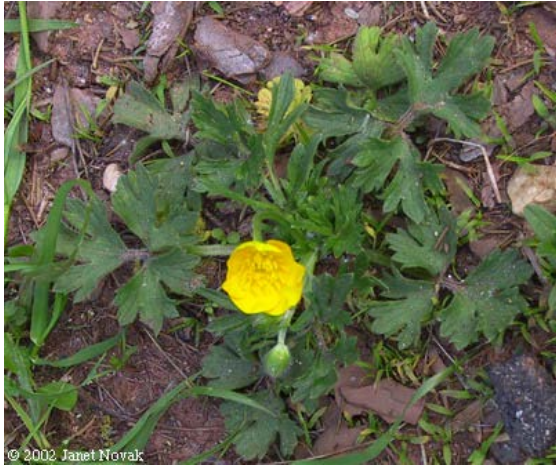
Click picture for many more pictures



Ranunculus Bulbosus

Generals: This buttercup gives off an acrid ethereal vapor very poisonous to such as are sensitive to it, and has been many times mistaken for Rhus poisoning.

This common field buttercup is not used as often as it is indicated, and it must be that it is not as well known as many other remedies. It is a rheumatic remedy of great usefulness when the chest muscles are involved. Pain in the spinal nerves, pleura and costal muscles always with extreme soreness. It is as sensitive to motion as Bryonia, and to the cold, damp weather as Dulcamara.

It has sudden weakness even to fainting, and it has cured epilepsy. It is extremely excitable, and resembles the much broken state of sensitive invalids; hence it has complaints from fright and vexation.

Its complaints are worse in the evening and after any change in the weather, especially from warm to cold. The evening aggravations are quite marked; the headache, ear pain, the nasal symptoms, the fever, soreness in the short ribs, dyspnœa, oppression of chest and heart, tightness of chest, increased pulsation, trembling, chilliness, are all worse in the evening. He is extremely sensitive to cold and cold, open air. Cold air brings on headaches, rheumatism, neuralgia of chest, spine and ovaries, vertigo.

Sudden exposure while overheated will bring on febrile symptoms, pleurisy or pneumonia. After exposure to cold air, his chest muscles are sore as if bruised. I)raft of cold air causes sore pains in many parts.

He is extremely sensitive to rainy and stormy weather. He is sore and bruised in many parts. Stitching pains in liver, ears, chest, abdomen, shoulder and other joints, spine, lumbar region to abdomen, between the shoulders in the back, stitching, burning pains radiating from the dorsal spine.

Burning pains in cardiac orifice of stomach; in pit of stomach, neck of bladder, in cornea; in eruptions; in ulcers. RANUNCULUS SCELERATUS
Marsh Buttercup

Is more irritating than others of this botanical family, as seen in the skin symptoms. Boring, gnawing pain very marked. Pemphigus. Periodical complaints. Fainting with pain in stomach.

Head.--Gnawing in one spot left of vertex. Frightful dreams about corpses, serpents, battles, etc. Fluent coryza, with sneezing and burning micturition.

Mouth.--Teeth and gums sensitive. Tongue mapped denuded patches. Mouth sore and raw. Burning and rawness of tongue.

Abdomen.--Sensation of a plug behind umbilicus. Pain over region of liver, with sensation as if diarrhœa would set it. Pressure as of a plug behind right false ribs; worse, deep inspiration.

Chest.--Integument sensitive. Bruised pain and weakness in the chest every evening. Sore burning behind xiphoid cartilage.

Skin.--Vesicular eruption, with tendency to form large blisters. Acrid exudation, which makes surrounding parts sore.

Extremities.--Boring pain. Sudden burning sticking in right toe. Corns, with burning and soreness, especially when feet hang down. Gout in fingers and toes.

Dose.--First to third potency.

RAPHANUS SATIVUS
Black Garden Radish
(RAPHANUS)

Produces pain and stitches in liver and spleen. Increases of bile and salivary secretion. Symptoms will not appear if salt is used with the Radish. Great accumulation and incarceration of flatulence. "Globus" symptoms. Seborrhœa, with greasy skin. Pemphigus. Hysteria; chilliness in back and arms. Sexual insomnia (Kali brom). Nymphomania. Post-operative gas pains.

Head.--Sadness, aversion to children, especially girls. Headache, brain feels tender and sore. Œdema of lower eyelids. Mucus in posterior nares.

Throat.--Hot-ball feeling from uterus to throat, stopping there. Heat and burning in throat.

Stomach.--Putrid eructations. Burning in epigastrium, followed by hot eructation.

Abdomen.--Retching and vomiting, loss of appetite. Distended, tympanitic, hard. No flatus emitted upward or downward. Griping about navel. Stool liquid, frothy, profuse, brown, with colic, and pad-like swelling of intestines. Vomiting of fecal matter.

Female.--Nervous irritation of genitals. Menses very profuse and long-lasting. Nymphomania, with aversion to her own sex and to children, and sexual insomnia.

Urine.--Turbid, with yeast-like sediment. Urine more copious, thick like milk.

Chest.--Pain in chest extends to back and to throat. Heavy lump and coldness in center of chest.

Relationship.--Compare: Momordica (worse, near splenic flexure); Carbo; Anarc; Arg nit; Brassica.

Dose.--Third to thirtieth potency.

Leguminosae
Krameria triandra Ruiz et Pavo
www.GUDJONS.com

RATANHIA PERUVIANA
Krameria-Mapato
(RATANHIA)

The rectal symptoms are most important, and have received much clinical confirmation. It has cured pterygium. Violent hiccough. Cracked nipples (Graph; Eup ar). Pin worms.

Head.--Bursting in head after stool, and when sitting with head bent forward. Sensation as if scalp from nose to vertex were stretched.

Stomach.--Pain like knives cutting the stomach.

Rectum.--Aches, as if full of broken glass. Anus aches and burns for hours after stool. Feels constricted. Dry heat at anus, with sudden knife-like stitches. Stools must be forced with great effort; protrusion of hæmorrhoids. Fissures of anus, with great constriction, burning like fire, as do the hæmorrhoids; temporarily relieved by cold water. Fetid, thin diarrhœa; stools burn; burning pains before and after stools. Oozing at anus. Pin-worms (Sant; Teuc; Spig). Itching of anus.

Relationship.--Compare: Paeon; Croton (rectal neuralgia); Sanguin nit (diseases of rectum); Macuna prurens-Dolichos-piles, with burning; hæmorrhoidal diathesis; Silico-sulphocalcite of Alumina; Stag-blast iron furnace cinder--(anal itching, piles, and constipation; housemaid's knee); abdominal flatulent distension and lumbago. Analogue to Lycopod.

Dose.--Third to sixth potency. Locally, the Cerate has proved invaluable in many rectal complaints.

| **Red Chestnut - [Bach Flower Remedy]** | By: girilal<br>New Jersey USA | December 13 2006 |
|---|---|---|

Click picture for many more pictures

Red Chestnut

...is for people who feel fear for the well-being of others: the husband afraid when his wife goes out alone after dark, the mother fretting over what may happen to her child at school. Red Chestnut fears are natural, normal concerns magnified to the point where they may have a negative effect on the person who is the object of concern, destroying confidence and undermining self-belief.

The remedy helps people in this state to send out calm, unworried thoughts to their loved ones, so that instead of making everyone anxious they are rocks of strength on whom others lean..

Dr Bach's description

For those who find it difficult not to be anxious for other people. Often they have ceased to worry about themselves, but for those of whom they are fond they may suffer much, frequently anticipating that some unfortunate thing may happen to them.

Click picture for many more pictures

RHAMNUS CALIFORNICA
California Coffee-tree

One of the most positive remedies for rheumatism and muscular pains. Pleurodynia, lumbago, gastralgia. Vesical tenesmus; dysmenorrhœa of myalgic origin; pain in head, neck, and face. Inflammatory rheumatism, joints swollen, painful; tendency to metastasis; profuse sweat. Rheumatic heart (Webster).

Provings of students. 2x potency.

Mind.--Nervous, restless, irritable. Lassitude; mentally dull and dazed; unable to concentrate mind on studies.

Head.--Dizzy full feeling. Heavy bruised sensation; better from pressure. Bursting feeling with every step. Soreness, especially in occiput and vertex, worse, bending over. Dull pain in left temple. Dull aching in frontal region (left), extending backwards and over forehead. Deep, right-sided frontal headache.

Twitching eyelids.

Ears.--Dullness of hearing. Soreness, deep under right tragus on swallowing.

Face.--Flushed, hot and glowing. Outward pressure from malar processes.

Mouth.--Canker sore between gums and lips. Tongue coated, with clean, pink central patch.

Throat.--Dry, rough. Soreness on right side and tonsil.

Bowels.--Constipation with some flatus. Tenesmus and dry stool. Flatulent diarrhœa.

Genito-urinary.--Increased urination. Tickling in anterior urethra, small morning drop (no previous gonorrhœa). Sexual desire increased.

Respiratory.--Substernal oppression. Tenderness on pressure of right intercostal muscles.

Heart.--Variation of pulse. Slow pulse.

Extremities.--Unable to control muscular action. Legs sore. Walked like a drunken man.

Modality.--Symptoms worse in evening.

Relationship.--Rhamnus cathartica or Rhamnus Frangula-European Buckthorn-a rheumatic remedy--(abdominal symptoms, colic, diarrhœa; hæmorrhoids, especially chronic). Rhamnus Purshiana-Cascara Sagrada--(palliative in constipation, as an intestinal tonic, and dyspepsia dependent thereon. 10-15 drops of tincture).

Dose.--Tincture in 15-drop doses every four hours.

Jayashree Kanoi

RHEUM PALMATUM
Rhubarb
(RHEUM)

Of frequent use in children with sour diarrhœa; difficult dentition. Whole child smells sour.

Mind.--Impatient and vehement; desires many things and cries (Cina).

Head.--Sweat on hairy scalp; constant and profuse. Cool sweat on the face, especially about mouth and nose.

Mouth.--Much saliva. Sensation of coolness in teeth. Difficult teething; restless and irritable. Breath smells sour (Cham).

Stomach.--Desire for various kinds of food, but soon tires of all. Throbbing in pit. Feels full.

Abdomen.--Colicky pain about navel. Colic when uncovering. Wind seems to rise up to chest.

Rectum.--Before stool, unsuccessful urging to urinate. Stools smell sour, pasty, with shivering and tenesmus, and burning in anus. Sour diarrhœa during dentition. Colicky, even ineffectual urging to evacuate altered fecal stools.

Modalities.--Worse, uncovering, after eating, moving about.

Relationship.--Compare: Mag phos; Hep; Pod; Cham; Ipec.

Antidotes: Camph; Cham.

Complementary: Mag carb.

Dose.--Third to sixth potency.

Can Herbal Medicines Work for Pets As Well As Humans?
Herbal medicines are made from plants or plant extracts, and

are used to treat all kinds of medical conditions, both serious and minor.
Many herbal medicines are well established as an effective treatment for certain ailments in human beings, either as a compliment to conventional medicine or on their own. This article looks at whether or not they can also have the same positive effects on domesticated animals like cats and dogs.
There have been all sorts of studies looking at the effectiveness of herbal treatments on people. Clinical evidence indicates that Echinacea can help to prevent or reduce the severity of colds, and ginger can relieve sickness and vomiting. Taken along with the vast anecdotal evidence on the positive effect of natural medicines, there is very good reason to believe that there are major health benefits to be derived from this kind of treatment.
But what about herbal remedies for pets?

Rhododendron

Pains: This is a very useful remedy in gouty patients who suffer from rheumatic pains, sometimes wandering from joint to joint, aggravated during rest, aggravated before and during storms, aggravated in cold, wet weather and ameliorated from warm wrapping.

These pains may be in the head or the limbs. It is a great palliative in old people who have suffered long from gout. Rheumatic swelling of joints. Pain in the aponevroses at night, during rest. He can always fortell a thunderstorm. There are tearing, shooting pains. Sore bruised pains. Stiffness of joints, neck and back. Extremely sensitive to cold weather, and aggravated from becoming cold. Paralytic Weakness during rest, yet be is weak from exertion.

Continued motion is his only relief. Painfully sensitive to windy cold weather. Chorea before a storm. General amelioration from motion, even when the painful part is aggravated from, moving the affected part.

Mind: Fear of thunder in nervous persons (Phos.), forgetful.

While talking he forgets what he was talking about. Leaves out words in writing. Aversion to his business. Easily affected by wine.

Head: Violent rheumatic headaches in morning in bed, ameliorated by moving about, by wrapping up the head; aggravated from drinking wine, aggravated in cold wet weather.

Headaches come on before a storm. Pain in temples and forehead. The head feels sore as if bruised. External heat ameliorates the head pains.

Pain in the eyes before a storm, ameliorated by heat and motion. Weakness of the internal recti muscles with stitching pains before a storm.

Violent pains in ear, sometimes tearing, aggravated before a storm. Ameliorated by heat. Roaring, ringing and buzzing in the ears.

Neuralgia of the face in gouty subjects, aggravated from motion, aggravated from cold wind; ameliorated by, applied heat. The patient is generally aggravated during rest; comes in stormy weather.

Pains ameliorated by eating, and warmth. Pain in the teeth before a storm. Pain in teeth with earache, ameliorated by heat; aggravated at night, from cold drinks.

Stomach and abdomen: Feels full after little food (Lyc.).

Empty eructations. Green bitter vomiting after drinking cold water. Sinking at the stomach. Pressure in the stomach after eating.

Pain as from flatulence high up in sides of abdomen. Stitching in spleen from walking fast. Rumbling in abdomen and fullness after eating.

Much straining to pass a soft stool. Undigested, thin, brownish stool. Diarrhea after eating, after fruit; from cold, wet weather, before a thunderstorm. Dysentery before a thunderstorm. Pulsating anus, drawing in anus extending to genitals.

Men: Drawing pain in bladder with frequent urging to urinate.

Orchitis with much swelling in rheumatic patients from taking cold, from sitting on a cold stone, from suppressed gonorrhea; the right most affected. Drawing pain in spermatic cord, during rest, ameliorated by heat and motion.

Great pain in testes, cord, and hips, ameliorated by motion and heat. It has cured hydrocele in boys. Much itching of the scrotum.

Women: Menses frequent and profuse.

Serous cysts in the vagina.

Chest: Rheumatic stitching pains in chest in stormy weather during rest.

Constriction of chest.

Pain in heart.

Back: Rheumatic pains stiffness in neck and back.

Pain in dorsal region extending to arms in cold, wet weather, aggravated during rest,

Tearing pains in neck and back driving out of bed.

Limbs: Rheumatic tearing pains in all the limbs in stormy weather, aggravated before a storm and during rest, aggravated at night; mostly in forearms and legs.

Wandering pains in the limbs and joints. Pain in bone and periosteum. Pains drive him out of bed. Paralytic pains in limbs. Cannot sleep unless legs are crossed. Sleepless after midnight. Pain in the shoulder joint so severe that the arm cannot be moved, but the patient and the pain are ameliorated by walking about.

# RHUS AROMATICA
## Fragrant Sumach

Renal and urinary affections, especially diabetes. Enuresis due to vesical atony; senile incontinence. Hæmaturia and cystitis come within the range of this remedy.

Urine.--Pale, albuminous. Incontinence. Severe pain at beginning or before urination, causing great agony in children. Constant dribbling. Diabetes, large quantities of urine of low specific gravity (Phos ac; Acet ac).

Dose.--Tincture, in rather material doses.

Jayashree Kanoi

RHUS GLABRA
Smooth Sumach

Epistaxis and occipital headache. Fetid flatus. Ulceration of mouth. Dreams of flying through the air (Sticta). Profuse perspiration arising from debility (China). It is claimed that this remedy will so disinfect the bowels that the flatus and stools will be free from odor. It acts well in putrescent conditions with tendency to ulceration.

Mouth.--Scurvy; nursing sore mouth (Veronica). Aphthous stomatitis.

Relationship.--Said to be antidotal to the action of Mercury, and has been employed in the treatment of secondary syphilis after mercurialization.

Dose.--Tincture. Usually locally to soft, spongy gums, aphthæ, pharyngitis, etc. Internally, first potency.

RHUS TOXICODENDRON
Poison-ivy

The effects on the skin, rheumatic pains, mucous membrane affections, and a typhoid type of fever, make this remedy frequently indicated. Rhus affects fibrous tissue markedly-joints, tendons, sheaths-aponeurosis, etc, producing pains and stiffness. Post-operative complications. Tearing asunder pains. Motion always "limbers up" the Rhus patient, and hence he feels better for a time from a change of position. Ailments from strains, overlifting, getting wet while perspiring. Septic conditions. Cellulitis and infections, carbuncles in early stages (Echinac). Rheumatism in the cold season. Septicæmia.

Mind.--Listless, sad. Thoughts of suicide. Extreme restlessness, with continued change of position. Delirium, with fear of being poisoned (Hyos). Sensorium becomes cloudy. Great apprehension at night, cannot remain in bed.

Head.--Feels as if a board were strapped on the forehead. Vertigo when rising. Heavy head. Brain feels loose and as if struck against skull on walking or rising. Scalp sensitive; worse on side lain on. Headache in occiput (Rhus rad); painful to touch. Pain in forehead and proceeds thence backward. Humid eruptions on scalp; itching greatly.

Eyes.--Swollen, red, œdematous; orbital cellulitis. Pustular inflammations. Photophobia; profuse flow of yellow pus. Œdema of lids, suppurative iritis. Lids inflamed, agglutinated swollen. Old injured eyes. Circumscribed corneal injection. Intensive ulceration of the cornea. Iritis, after exposure to cold and dampness, and of rheumatic origin. Eye painful on turning it or pressing, can hardly move it, as in acute retrobulbar neuritis. Profuse gush of hot, scalding tears upon opening lids.

Ears.--Pain in ears, with sensation as if something were in them. Lobules swollen. Discharge of bloody pus.

Nose.--Sneezing; coryza from getting wet. Tip of nose red, sore, ulcerated. Swelling of nose. Nosebleed on stooping.

Face.--Jaws crack when chewing. Easy dislocation of jaw (Ign; Petrol). Swollen face, erysipelas. Cheek bones sensitive to touch. Parotitis. Facial neuralgia, with chilliness; worse, evening. Crusta lactea (Calc; Viol tric).

Mouth.--Teeth feel loose and long; gums sore. Tongue red and cracked; coated, except red triangular space at the tip; dry and red at edges. Corners of mouth ulcerated; fever-blisters around mouth and chin (Nat mur). Pain in maxillary joint.

Throat.--Sore, with swollen glands. Sticking pain on swallowing. Parotitis; left side.

Stomach.--Want of appetite for any kind of food, with unquenchable thirst. Bitter taste (Cupr). Nausea, vertigo, and bloated abdomen after eating. Desire for milk. Great thirst, with dry mouth and throat. Pressure as from a stone. (Bry; Ars) Drowsy after eating.

Abdomen.--Violent pains, relieved by lying on abdomen. Swelling of inguinal glands. Pain in region of ascending colon. Colic, compelling to walk bent. Excessive distention after eating. Rumbling of flatus on first rising, but disappears with continued motion.

Rectum.--Diarrhœa of blood, slime, and reddish mucus. Dysentery, with tearing pains down thighs. Stools of cadaverous odor. Frothy, painless stools. Will often abort a beginning suppurative process near the rectum. Dysentery.

Urinary.--Dark, turbid, high-colored, scanty urine, with white sediment. Dysuria, with loss of blood.

Male.--Swelling of glands and prepuce-dark-red erysipelatous; scrotum thick, swollen, œdematous. Itching intense.

Female.--Swelling, with intense itching of vulva. Pelvic articulations stiff when beginning to move. Menses early, profuse, and prolonged, acrid. Lochia thin, protracted, offensive diminished (Puls; Secale), with shooting upwards in vagina (Sep).

Respiratory.--Tickling behind upper sternum. Dry, teasing cough from midnight until morning, during a chill, or when putting hands out of bed. Hæmoptysis from overexertion; blood bright red. Influenza, with aching in all bones (Eup perf). Hoarseness from overtraining voice (Arn). Oppression of the chest, cannot get breath with sticking pains. Bronchial coughs in old people, worse on awaking and with expectoration of small plugs of mucus.

Heart.--Hypertrophy from overexertion. Pulse quick, weak, irregular, intermittent, with numbness of left arm. Trembling and palpitation when sitting still.

Back.--Pain between shoulders on swallowing. Pain and stiffness in small of back; better, motion, or lying on something hard; worse, while sitting. Stiffness of the nape of the neck.

Extremities.--Hot, painful swelling of joints. Pains tearing in tendons, ligaments, and fasciæ. Rheumatic pains spread over a large surface at nape of neck, loins, and extremities; better motion (Agaric). Soreness of condyles of bones. Limbs stiff paralyzed. The cold fresh air is not tolerated; it makes the skin painful. Pain along ulnar nerve. Tearing down thighs. Sciatica; worse, cold, damp weather, at night. Numbness and formication, after overwork and exposure. Paralysis; trembling after exertion. Tenderness about knee-joint. Loss of power in forearm and fingers; crawling sensation in the tips of fingers. Tingling in feet.

Fever.--Adynamic; restless, trembling. Typhoid; tongue dry and brown; sordes; bowels loose; great restlessness. Intermittent; chill, with dry cough and restlessness. During heat, urticaria. Hydroa. Chilly, as if cold water were poured over him, followed by heat and inclination to stretch the limbs.

Skin.--Red, swollen; itching intense. Vesicles, herpes; urticaria; pemphigus; erysipelas; vesicular suppurative forms. Glands swollen. Cellulitis. Burning eczematous eruptions with tendency to scale formation.

Sleep.--Dreams of great exertion. Heavy sleep, as from stupor. Sleepless before midnight.

Modalities.--Worse, during sleep, cold, wet rainy weather and after rain; at night, during rest, drenching, when lying on back or right side. Better, warm, dry weather, motion; walking, change of position, rubbing, warm applications, from stretching out limbs.

Relationship.--Complementary: Bry; Calc fluor. Phytol (Rheumatism). In urticaria follow with Bovista.

Inimical: Apis.

Antidotes: Bathing with milk and Grindelia lotion very effective. Ampelopsis Trifolia-Three-leaf Woodbine--(Toxic dermatitis due to vegetable poisons-30 and 200. Very similar to Rhus poisoning). Desensitizing against Ivy poisoning by the use of descending doses of the tincture by mouth or by hypodermic injections is recommended by old school authorities, but is not as effective as the homeopathic remedies especially Rhus 30 and 200 and Anacard, etc. Anacard; Croton; Grindelia; Mezer; Cyprip; Plumbago (eczema of vulva); Graph.

Compare: Rhus radicans (almost identical action); characteristics are, burning in tongue, tip feels sore, pains are often semilateral and in various parts, often remote and successive. Many symptoms are better after a storm has thoroughly set in, especially after an electric storm. Has pronounced yearly aggravation (Laches). Rhus radicans has headache in occiput even pain in nape of neck and from there pains draw over the head forwards. Rhus diversiloba-California Poison-oak (antidote to Rhus; violent skin symptoms, with frightful itching; much swelling of face, hands and genitals; skin very sensitive; eczema and erysipelas, great nervous weakness, tired from least effort; goes to sleep from sheer exhaustion); Xerophyllum (dysmenorrhœa and skin symptoms). Compare, also; Arn; Bapt; Lach; Ars; Hyos; Op (stupefaction more profound). Mimosa-Sensitive Plant--(rheumatism, knee stiff, lancinating pains in back and limbs. Swelling of ankles Legs tremble).

Dose.--Sixth to thirtieth potency. The 200th and higher are antidotal to poisoning with the plant and tincture.

Rhus Toxicodendron

(No Logic)
1. His fears have no logic.

2. Wants immediate relief
3. Very superstitious

"Hey doctor last summer I had this problem, give me some medicine so again this summer I won't have this problem, I feel I am having the same problem. I want relief immediately otherwise my business will be ruined".

"I had a bad dream so some thing bad will happen to me today"
"Today a beggar cursed me that I will die; I am very scared of this thing"

Lady's husband drinks too much, lady thinks he will kill her or her in-laws are in conspiracy to murder her. She can't sleep in the fear and suspicion. She wakes up and again and again and checks all around her.

| **Re: RHUS TOXICODENDRON** | By: girilal<br>New Jersey USA | January 13 2008 |

My nature of work takes me to wilderness and I am always exposed to Rhus Tox.

Two years ago I thought I am just immune to this plant so I chewed a small leaf and forgot all about it.

In few days I had rashes around the eyes and white powdery flakes were felling all over. No itching at all. Then I had permanent eczema on my eyelids and behind the ears.

I tried many medicines in the hope that problem came due to Rhus Tox, will need some similum but not identical.

I consulted Dr. Deoshlok Sharma and he said to take Rhus Tox 1M. I was in Bangalore and bought 10 ml of Rhus Tox 30. Eczema stabilized.miraculously but still stayed but not so severe.

Lycopodium 6C finished the job. No more eczema. Later on I used Rhus Tox on all patients where red puffy and flaky rash was present.

| **Stiff fingers in night leading to awakening. Pl.help** | By: S V Kulkarni<br>Pune | August 8 2014 |

1. Age/Sex/Country/Climate:
60/Male/India/tropical

2. Current complaint - from how long:
1: Current complaint: stiffness and pain in forefingers during night. duration 2-3 months. 2. Chronic complaint- Nasal passage get blocked when sleeping (on-side, by habit), leading to waking up due to inadequate breath- many years

3. Current medicine you are taking:
Nil for stiff fingers. Otrivin nasal drops for nasal blockage almost daily.

4. Sign & Symptom of disease:
Waking up in night, stiff fingers, pains when moving/closing fingers. subsides in 5-10 minutes temporarily after forced movements

5. Brief medical history:
No BP No diabetis. Suffering from frozen shoulder since February 2014, which appears to be in recovery phase.

6. Family Back Ground:
Parents had no history of diabetis. father had developed low BP, where as mother had high BP developed after age 60-65. Both lived over 80 years active life.

7. Education and Nature of Profession of Patient:
Consulting Engineer, Predominately Office work with computer

8. Desires and aversion of food:
Like salty foods, curd. No aversions for any food (veg/non-veg)

9. Mind-behavior, anger, irritability, hurry..etc.:
Quick thinking and decision making, impatient to get work done. like to study and learn new things.

10. What makes it worse and what makes it better:
forced movement to free the stiffness require

11. Thirst/Tongue/diabetic...:
Nothing abnormal observed. non-diabetic

RHUS VENENATA
Poison-elder

The skin symptoms of this species of Rhus are most severe.

Mind.--Great melancholy; no desire to live, gloomy.

Head.--Heavy, frontal headache; worse, walking or stooping. Eyes nearly closed with great swelling. Vesicular inflammation of ears. Nose red and shiny. Face swollen.

Tongue.--Red at tip. Fissured in middle. Vesicles on under side.

Abdomen.--Profuse, watery, white stools in morning, 4 am, with colicky pains; expelled with force. Pain in hypogastrium before every stool.

Extremities.--Paralytic drawing in right arm, especially wrist, and extending to fingers.

Skin.--Itching; relieved by hot water. Vesicles. Erysipelas; skin dark red. Erythema nodosum, with nightly itching and pains in long bones.

Relationship.--Antidote: Clematis. The California Poison-oak (Rhus diversiloba) is identical with it. It antidotes Radium and follows it well. Compare: Anacard.

Dose.--Sixth to thirtieth potency.

Jayashree Kanoi

ROBINIA PSEUDACACIA
Yellow Locust
(ROBINIA)

The remedy for hperchlorhydria. In cases where albuminoid digestion is too rapid and starch digestion is perverted. The gastric symptoms with the most pronounced acidity are well authenticated, and are the guiding symptoms. The acidity of Robinia is accompanied by frontal headache. Intensely acrid eructations. Acrid and greenish vomiting, colic and flatulence, nightly burning pains in stomach and constipation with urgent desire.

Acidity of children. Stools and perspiration sour. Incarcerated flatus.

Head.--Dull, throbbing, frontal pain; worse, motion and reading.

Gastric headache with acid vomiting.

Stomach.--Dull, heavy aching. Nausea; sour, eructations; profuse vomiting of an intensely sour fluid (Sulph ac). Great distention of stomach and bowels. Flatulent colic (Cham; Diosc). Sour stools; child smells sour.

Female.--Nymphomania. Acrid, fetid leucorrhœa. Discharge of blood between menstrual periods. Herpes on vagina and vulva.

Relationship.--Magnes phos; Arg nit; Orexine tannate. (Hyperchlorhydria; deficient acid and slow digestion; 14 hourly doses)

Dose.--Third potency. Must be continued a long time.

**Rock Water - [Bach Flower Remedy]**
**Started by: girilal at December 13 2006**

Replies: 6 & Views: 7553 Font Bottom Of Page Page 1 of 1 Reply

| **Rock Water - [Bach Flower Remedy]** | By: girilal<br>New Jersey USA | December 13 2006 |
|---|---|---|

Click picture for many more pictures

Rock Water

...is the remedy for people who take self-repression and self-denial to extremes. They are very wrapped up in themselves, seeking always to perfect themselves in some way and setting themselves targets and being very unkind to themselves if they fail to live according to their own rules. If they seek to influence others it is not directly but by example only.

The Rock Water remedy does not stop people from having high ideals or from trying to meet them. But it does help ease the excesses of the Rock Water personality, so that people like this can show more flexibility when it is necessary, and are not so hard on themselves.

Dr Bach's description

Those who are very strict in their way of living; they deny themselves many of the joys and pleasures of life because they consider it might interfere with their work. They are hard masters to themselves. They wish to be well and strong and active, and will do anything which they believe will keep them so. They hope to be examples which will appeal to others who may then follow their ideas and be better as a result.

girilal

|---|---|---|

This is a nice post.......really.

| **Re: Rock Water - self-denial, rigidity and self-repression** | By: garcot<br>Bangalore | January 27 2007 |
|---|---|---|

I Visited couple of times to Jog falls near Shimoga. Both the times, We trekked down to the bottom of the falls and enjoyed the sprinkling water splashing on our faces. We used to hold handful of water and for fun, we used to drink it. After reading this post, I remember, I felt a pleasant comfortable feeling both the times after tasting this water. Unfortunately, that feeling lasted only for a couple of days.

Girilal, do we have to take Rock water as a medicine over a period of time, to feel the change in our personalities, for a cure?

Garcot

"wisdom in your body is deeper than your deepest philosophy" (Nietszche)

| **Re: Rock Water - self-denial, rigidity and self-repression** | By: udaya kumar<br>-- | January 28 2007 |
|---|---|---|

like the water trapped in between two rocks controlling its brute force. Dr bach describes it so well like giri does, and therefore, Rock water. Since you are in Bangalore, I think a dip in

Souparnika(Mookambika) has a similar exhilerting experience. It is like electric current enveloping you and then a release of all stress in one go. It lasts for many days, the sweetness of the water and the sweetness of the memory. with rgds.

| **Re: Rock Water - self-denial, rigidity and self-repression** | By: MAX VARMA<br>New Delhi and Vancouver | February 16 2007 |

Nice way to " rock " !

There is only one religion....called mankind.
There is only one law....the law of Karma
There is only one God....He is everywhere and with everyone and knows everything.

| | | |
|---|---|---|
| **Re: Rock Water - self-denial, rigidity and self-repression** | By: girilal<br>New Jersey USA | February 18 2007 |

Rock water can be taken from any mountain brook or water-fall. At other forum, I advised people to use water from mountain brooks in stead of Silicea in high potency. That water contains Silicea, Uranium and many more things. That's why Rock Water closely matches Silicea constituion.

girilal

| | | |
|---|---|---|
| **Re:Rock Water - [Bach Flower Remedy]** | By: Kaocchin<br>Japan | August 10 2011 |

I have a question whether Rock Water traits can lead to powerless feeling like that of Hornbeam? A feeling of mental fatigue and lethargy?

I sort of have strong Rock Water traits. But there are times when I'm very much on the go and when I felt very unwilling to do even a minimum thing that I have to do for a daily life. During such a down time Hornbeam doesn't work much and Rock Water somewhat works better. Doesn't it sound strange?

Any comment from you will be highly appreciated. Thank you.

Kaori

**Rudraksha beads for Hypertension and heart ailments**
**Started by: girilal at September 16 2007**

**Replies: 19 & Views: 16473** Font Bottom Of Page **Page 1 of 1** Reply

| **Rudraksha beads for Hypertension and heart ailments** | By: girilal<br>New Jersey USA | September 16 2007 |
|---|---|---|

Click picture for many more pictures

Rudraksha beads can be tried for heart ailment, hypertension and fevers.

Take about 2 beads and made sure that these are unpolished. Or remove polish by rubbing the beads. Soak the beads for about 3 days and then crush them and leave them in water for 2 weeks in referegerator or in some liquor. You can start taking a spoonful of that liquid as the seeds crushed beads are poured in the liquid.

To some people it is proved to be very effective remedy in heart ailments and enlarged prostrate.

Rudraksha bead contains Gold, Platinum and many other rare-earth elements but it is slow acting so keep taking the medicine for about 3 weeks before concluding the benifits.

| **Re: Rudraksha beads for Hypertension and heart ailments** | By: Thill | September 16 2007 |

Dear girilal

An another new invention? You always invent new remedies. Never heard that Rudraksha beads can be used to relieve heart troubles. Only seen Hindus wear around their neck, like one shown in this image, they call it "Rusraksha malai", a secret religious symbol.

Is their any story behind this finding?

Thillai

| | | |
|---|---|---|
| **Re: Rudraksha beads for Hypertension and heart ailments** | By: VAISHDW2<br>Akron, Oh, USa | September 16 2007 |

Please let us know the number of doses and how many days it has to be taken. Will it interfere with the other homeopathic/allopathic medicines ? Also will it work for high BP? Also do we need to take any precautions while taking it ?

If you have cases to inform where it has benefitted it would really help.

| | | |
|---|---|---|
| **Re: Rudraksha beads for Hypertension and heart ailments** | By: girilal<br>New Jersey USA | September 17 2007 |

I spent this May and June in a small mountain town called Ukhimuth. It is in Kedarnath Valley in Uttranchal. I spent lots of time in remote himalayas but this time I hit the jack-pot. People in that small town were all herbal wizards. Amusing thing was in the bottom of valley there was a Ayurveda Pharmacy college operated by Kedarnath-Badrinath-Mandir Simiti. Town folks gave me the information about Rudraksh's medicinal properties.

I spoke with many people who vouched about Rudraksh's use in blood pressure and hypertension. I haven't used it so far but yes - I studied a lot about Rudraksh. It only grows in the soils rich in Gold and other rare earth elements. In India it mostly comes from Indonesia. There people laugh at it and say -- "Why this nogood thing is used in India as necklaces etc". Unripe beads has bluish tint because of Gold compounds.

Soak the beads for few days and then when they are soft, crush them and make pulp. Don't discard the water but use it to make solution. Make sure the beads are not polished otherwise harmful effects of polish may be present in the solution. Store the solution in referegerator and take a sip of the water a couple of times a day.

girilal

| | | |
|---|---|---|
| **Re: Rudraksha beads for Hypertension and heart ailments** | By: VAISHDW2<br>Akron, Oh, USa | September 17 2007 |

Thanks for responding. Just one quick question. Do we crush the beads and take the water with the crushed beads in it or throw away the pulp and just sip the water. Thanks.

| | | |
|---|---|---|
| **Re: Rudraksha beads for Hypertension and heart ailments** | By: Thill | September 18 2007 |

Hi girilal

Very interesting. There are many medical mysteries, unknow to the outside world, present in and aroud Himalaya regions. You took the trouble to bring forward it into this forum. You deserve all the credits.

I thing it's worth trying it out. The trouble is finding the right, and matured Rudraksha beads.

| **Re: Rudraksha beads for Hypertension and heart ailments** | By: shuddha | September 18 2007 |
|---|---|---|

This is a great information. But this can rather be called as restating the existing truth, which, of course, is not known to many. The basic requirement for spiritual progress is patience, cool headedness which we can translate into present day terminology as correct BP. This was known to our ancestors, who lived thousands of years back. They wore Rudhraksha as a single bead or as a necklace with several of them. I am not sure whether crushing rudraksha is needed, but rudhraksha's contact with the body over a period of time was quite sufficient to produce this result.

In the ancient days, it was used as a symbol of celebacy. It would be cheap to think that a bead in the chest of a male would prevent and remaind him not to hug a female. It was also believed to enhance the potency of the wearing individual. Further more, they thought that such a male can give birth to an intelligent child, whose attitude would be noble.

But there are many rudrakshas. There is one with only one face, some with five face (face means divisions naturally created on these bead by their growth), and some with eight etc... Each is supposed to give different effect on the person wearing them. They are also believed to prevent diabetis and tumors. You have written scriptures for these informations, in India.

Girilal, What about "Sanku" Flower ? This is supposed to have a grandier effect on the house they are grown. Some companies in Ayurveda have marketed drugs prepared from Sanku flower. They advertise it for increasing the intelligence of children. There again, there is a full white one and the other with blue tinge on white back side. Both are believed to be very useful for increasing the IQ. I do not know the exact botonical name for these flowers. These are grown even in my own house at Chennai, India.

But scripts say that these do not directly increase the IQ by eating the flowers in some form. They have to grown at home and the air breezing through them should fall on the people at home.

By the way, Please tell me which type of Rudraksha gave the effect you described here ?
Shuddha

| **Re: Rudraksha beads for Hypertension and heart ailments** | By: girilal<br>New Jersey USA | September 19 2007 |
|---|---|---|

Shuddha: I don't know what is Sanku Flower, neither I was able to find it on google. You can tell us more about it or if you have any picture, please attach it here or put the url.

VAISHDW2: Rudraksh is very hard and heavier than water so in water they go to bottom. That's why you can just put the whole water in the blender and grind up the mixture. You must soak the beads in the water for at least a weeks to soften it up. Even then you must beat them up on some rock and add the pulp to the same water they were soaked in because that water has some character too.

Folk people at Ukhamuth use to soak the beads in water for several days and then they rub the bead on a clean piece of rock and wash that rock in the water and drink it daily. You can do that too but it may be missing the potentizing magic.

girilal

| **Re: Rudraksha beads for Hypertension and heart ailments** | By: shuddha | September 19 2007 |
|---|---|---|

Thank you very much for the reply. I shall take the picture of the Sanku flower (the name so described because it resembles conch, which is called shanku in Tamil and Sanskrit) and upload it in this forum at the earliest possibility.

Shuddha

Dear Girilal,
That is a wonderful pc of information.
No wonder Rudraksh is worshipped by the Hindus.
Best wishes

| **Re: Rudraksha beads for Hypertension and heart ailments** | By: garcot<br>Bangalore | October 24 2007 |
|---|---|---|

Hi !

Rudrakasha has a special physical property. It exhibits diamagnetic property and hence can be used for both low bp or high bp. It brings the bp back to normal. I have seen it bringing bp back to normal within hours. I have had excellent results with myself and my father and a few others in our family.

Though I haven't asked people to use it for bipolar mental disorders ( a torturing experience), it is expected to do magic.

Well as far as getting the real Rudraksh, is a problem in India, we can get the genuine ones in Nepal.

I have just used as a necklace and ensure I wear it at the time of bathing. But as Girilal said, potentizing ( upto 6x ) should give better results. A "group proving" would confirm its efficacy at higer potencies. I have also used " Vasanta kusmakar rus " which has gold in it which calms down and rejuvenates the body and also brings down the bp levels in the body.

Garcot

| **Re: Rudraksha beads for Hypertension and heart ailments** | By: Jayashree<br>Calcutta, India | November 13 2007 |
|---|---|---|

Dear Girilal,
I have found that soaking the rudraksha beads overnight in water and drinking the water on an empty stomach is just as helpful. The container should be made of glass or silver. Just a few ounces of filtered water will do.
please see the site http://aryabhatt.com/rudraksha/Rudraksha_about.asp for all sorts of info about it.

|---|---|---|

Where can I obtain these beads?

| **Re: Rudraksha beads for Hypertension and heart ailments** | By: MAX VARMA<br>New Delhi and Vancouver | February 23 2008 |
|---|---|---|

There are online sellers.
go to Google and type Rudraksha.

I also wear a Rudraksha mala as a necklace and find its impact useful.

|---|---|---|

Shankhu Pushpam (Shankhu Flower) (Clitoria Terneta Linn)

(Leguminose family)

Ayurveda sees this flower as having medicinal value in increasing memory power, intelligence and grasping power. Roots and flowers are used for medicines. Starch, Tanin and resin are contained in it. Other names: Deva kusuma(Sanskrit), Aparajitha(Bengali), Kuruvilai (Tamil), Dintan (telugu), Conch flower (English),Khajin, Khagin (Hindi).

With Brahmi it is used for Insanity and other mental derangements.
Roots with butter used for increasing intelligence.
Used also in epilepsy.
Used also for sexual rejuvenation.
White Shankhu flower is used for leucoderma
Blue Shankhu flower in honey three four times a day is good for uterine haemorrage.
White Shnakhu flower is said to have the power to relieve serpent poison.

RUDRAKHSHA(Elaeocarpus sphaericus) (Elaeocarpus ganitrus) (ROSERY NUT)

Grown in India : Assam, Behar, Bengal, Maharashtra, Madhya Pradesh, Uttar Pradesh, Himalayas and foothills.

Other countries: Nepal, Burma, Malaya, Indonesia, Bengladesh, New Zealand, Australia, New Guinea.

1 to 21 faces.

Alkhaloids in Rudraksha Tree:

1. Aloeleo Carpilin
2. Elaeo Carpidine
3. Elaeo Carpitine
4. Elaeo Carpine
5. Isoelaeocarpiline

6. Isoeoae Carpine
7. Pseudoeloea Alloelaeo Carpiline

The alkhaloids have capacity to destroy all the three doshas of Kapha, Pitha and Vata.

The most important quality of Rudrakhsha is its capacity to retain electromagnetic energies. The colour of Rudrakhsha is perhaps the clue. It is ferrous in hue and most important of the electro/ magnet conductors is Iron.. The Single face, three, five and Seven faces are said to have paramagnetic properties while two and four faced one possess diamagnetic properties and six, eight, nine, ten to fourteen have ferro magnetic properties. Their specific gravity varies from 1.2 to 1.6 and weight varies according to the contents of these magnetic forces in them. We should remember here the homeo medicines electricitas and magnetis poli ambo.. With its capacity to retain electrical impulses, it is absolutely clear that there can be no other better medicine than wearing a Rudrakhsha Mala as a pace maker which will control the rhythm and pace of the heart. The beautiful part is that the Rudrakhsha can not only retain electricity and magnetic energy in it but knows how to impart it slowly and as per requirement according to the property of the subject to which it relates itself or come in contact. This would answer many of the mysteries attached with Rudrakhsha how each mukha rudrakhsha has varying degree of capacity to change human beings into varying states of mental and physical health, thought, mind, prosperity, action and the like by controlling the rhythm of the heart and thereby the brain impulses and consequently all activities of the brain and commanded by the brain. With the right amount of blood flow to brain and impulses carried with it, it is likely that the brain opens up all its chambers for use and thereby the subject is endowed with the wisdom that a man of saintly disposition possesses. Giri’s recipe is towards this end and therefore no wonder the blood pressure is lowered, which is only a first step in the ladder of innumerable miraculous potentials of Rudrakhsha. This capacity is at its highest in the bigger variety of Rudrakhsha and therefore their bio medical implications.

The most least understood by science , system in our body anatomy is the endocrine glands. These are basically the energy centres and usually equated by many as equivalent to the Shadhadharas ( Chakras). Whether it be so or not, the area of main function of Rudrakhsha when they are worn are in harmonizing the functions of the endocrine glands. The different mukhas (faced Rudrakhshas) interact at varying degrees with different endorcrine glands and with varying results. This also physiologically speaking resonate the reasons for using Rudrakhsha on different parts of the body which I shall specify later.

There are many references in Shree Shivapuranam, Devi Bhagvatam, Balopanishad and other ancient books. Too many myths and mythology are related to its origin and use. Single faced rudrakhsha is said to be Rudra Incarnation. Shiva Puranam prescribes 101,50 or 32 rudrakhshas to be worn on neck. It is worn in different parts from waist to vertex, reminds that endocrine glands are situated only on these parts. It is also worn in lower parts of the body which are considered as abode of element of earth, though Brahma dwells in the foot, where by touching the foot as tradition seems to have evolved from paying ebullition to Brahma in the feet. Spiritually speaking it must be an adoration for Brahma the beginning while it adores the Rudra(at Anjana Chakra), Vishnu(at waist and heart region) and Sadshiva and Ishwara the most around the neck and upwards. Perhaps the mythology Rudra Akhsha or the tears of lord Rudra when fell on earth gave rise to the evolution of the tree of Rudrakhsha is answer to this riddle spiritually, while anatomically it is worn around the marmas which are hundreds in number and I shall relate later, while synergically speaking about marmas/ endocrine / major/minor/sub minor charkas there are three hundred major/minor charkas and 237 minor minor charkas which are energy centres and which are touched by the Rudrakhsha worn on various parts of the body and is in constant communion.

The relations of Rudrakhsha with the planets and their influence

on the human beings who wear Rudrakhsha have been a matter of reference is many astrological books. Sun is said to rule Single faced Rudrakhsha, two for moon and three for mars, four for Mercury, five for Jupitar, Six for Venus and Seven for Saturn. This would by turn be applicable for all 27 stars of the Astrology. And the qualities associated with the planet will rule the wearer. Like Mercury for education. Four faced therefore should be worn for increasing the memory or education and good for students and children etc. It could also be according to the month in which born or the Rasi/Koor in which he was born and Rudrakshas are worn for prosperity :
March 15 to April 14 - 3 & 5 faces
April 15 to May 14 4 & 7
May 15 to June 14 4 & 6
June 15 to July 14 3 & 2
July 15 to Aug 14 12- 3
Aug 15 to Sep 14 4-6
Sep 15 to Oct 14 6-7
Oct 15 to Nov 14 5-2
Nov 15 to Dec 14 5-12
Dec 15 to Jan 14 6-7
Jan 15 to Feb 14 6-7
Feb 15 to Mar 14 5-3

Rudraksha can also be worn for professional benefits :

Children - 4 face ; businessmen -5, 7; doctors – 1 face; Rulers -12 face; Judges -11 face; heart patients – 5 face; brain development 465 in that order on neck; philosophers; scientists, writers – 4 face; Industrialists and Manager -6 face; lovers -13 face; like that….

For believers, there are Mantras and Sanctities and Gods and Saints attached to each Rudraksha and has to be born after purification and the like ceremonies.

Girilal..you are great...our elders do everything with a hidden scientific backup. Rudraksha is one among them. My sister, who is yet to conceive, was recently advised by some one to put Rudraksha in water over night and drink it in the morning. Unfortunately, we are unable to get the real unpolished one.

Thank you Udaya Kumar for providing the scientific backup...

| | | |
|---|---|---|
| **Re: Rudraksha beads for Hypertension and heart ailments** | By: udaya kumar<br>-- | February 23 2008 |

For those who do not conceive the prescribed Rudraksha for the couple are 3 faced and 2 faced. Make sure that if at all you want them to drink the water, you put 3faced or 2 faced rudraksha so that the virbrations are in consonance.

Click picture for many more pictures

Rumex Crispus

Rumex, the yellow dock, is a neglected remedy, and one that has been only partially proved.

The mental symptoms have not been brought out, but the catarrhal symptoms have been well expressed by provers.

There is a state of sadness, low spirited; aversion to work; irritable mental excitability. This includes about all the mental state we know of this remedy, as the provings were made with the lower potencies and tincture.

The yellow dock has been used in domestic practice, as a blood medicine, to cure eruptions and boils. When used in this way it is a mild substance, and hence the provings are somewhat in this form.

The catarrhal tendency is very striking. The nose, eyes, chest and trachea, the whole respiratory tract, gives forth a copious flow, copious mucous discharge. I have seen it so copious from the nose that it seemed as one continuous flow; so copious from the trachea and bronchial tubes that the patient continually hawked up, by the mouthful, thin frothy, white mucus, so that in a little while as much as half a pint of thin mucus, as thin as water, would be in the cuspidor. It also has marked dryness of the larynx and trachea with hard, dry, spasmodic cough.

At times it has taken the form of grippe, with a copious mucous discharge; thin, watery, frothy expectoration by the mouthful. This is only the first stage. Following this the discharge becomes thick, yellow, tough or thick, white and tenacious; so ropy and stringy and tough that in spite of blowing the nose and coughing he fails to get it up. Completely exhausted from his efforts to expectorate the tough, stringy, tenacious even gluey mucus. This catarrhal state is commonly accompanied by a morning diarrhea, and these constitute the leading features.

"Catarrhal headache with great irritation of the larynx and trachea, clavicular pain and soreness behind sternum."

Catarrhal headaches are headaches that come on during spells of dryness, alternating with a copious flux. Extreme rawness in the larynx and trachea; burning and smarting; unable to endure pressure on the throat pit.

Tickling in the throat pit causing cough. Must sit without motion; cannot breathe deeply, hurriedly or irregularly because the burning is so much increased by any change in breathing.

If he steps into the open air a paroxysmal cough takes his breath away; or if he passes from the open air into a warm room the same paroxysmal cough comes on. The paroxysm is so violent that in the morning, when he has a loose stool, he will pass it involuntarily with the cough. The urine also passes away with the cough. The headache returns when the discharges slack up.

A striking feature is pain under the clavicle; a sense of rawness under the clavicle; as if the parts inside were raw; as if the air came directly under the clavicle, producing rawness and burning. Rawness and burning from the inhalation of air.

"Nose obstructed; dry sensation even in posterior nares."

Many times the coryza starts out by a marked dryness in the posterior nares, so that he is constantly hawking; the irritation is so great that he cannot let it alone. There is a sensation of thickening in the nasopharynx, and he produces a peculiar noise in trying to get rid of it.

"Sudden sharp tingling sensation in Schneiderian membrane."

This is intense; tingling, sometimes described as an itching extending from the end of the nose to the pharynx; sometimes forces sneezing, blowing the nose and this peculiar noise, and sometimes a hawking to get the mucus when it isi a little lower in the pharynx; hemming to get rid of it when in the larynx. The inflammation passes to the smallest bronchi, producing a capillary bronchitis and finally a pneumonia.

It suits acute and chronic catarrhal states. In old phthisical cases every time be takes a cold, he is so sensitive to cold air and change of air that he sleeps with the bed clothes over his mouth. Every breath of air causes a spasmodic cough.

The early expectoration is thin mucus, and then it becomes thicker and tenacious, and he cannot expectorate it; he hears the rattle, after many efforts which exhaust him; he expectorates a little with hardly any relief. This is a great remedy to do patch work with in phthisis. Soreness, rawness and burning, especially down the trachea and tinder the sternum.

"Violent sneezing, with fluent coryza, worse in the evening and at night."

Many symptoms are worse in the evening.

"Coryza, fluent, with sneezing, with headache, worse evening and night."

Some symptoms are worse in the early morning. Certain kinds of cough are worse at 11 P.M. Lachesis and Rumex furnish a puzzle in this cough and each has to be understood.

In Lachesis young children cough in their early sleep, but if kept awake they will not cough. Therefore in Lachesis the 11 P.M. cough is an aggravation from sleep. In Rumex the cough will come on at 11 o'clock whether the child is asleep or not.

"Accumulation of mucus in posterior nares."

"Yellow mucous discharge through posterior nares."

"Epistaxis, violent sneezing and painful irritation of nostrils."

"Influenza with violent catarrh, followed by bronchitis."

"Scraping in the throat;" whenever this catarrhal state goes into the larynx and trachea, there is this continual scraping in the throat.

Hoarse; cannot speak because the vocal cords are covered with tough mucus. Chronic cases have often been cured.

Phosphorus has this hoarseness, but especially aphonia relieved by hemming up a little mucus from the vocal cords. The Causticum hoarseness is due to a weakness of the vocal cords. Phosphorus has an inflammatory state and the continual accumulation of mucus impedes speech. Rumex has the accumulation of tough, gelatinous, gluey mucus, and he continually scrapes the larynx.

"Sensation of a lump in the throat, not relieved by hawking or swallowing, it descends on deglutition, but immediately returns"; this is also a strong feature in Lachesis.

"Aching in the pharynx, with collection of tough mucus in the fauces."

"Catarrhal affections of throat and fauces."

This remedy shows the various stages of severe cold, but is especially indicated in constitutions that are constantly taking cold worse from change of the weather; always shivering about the fire want much clothing, want even the head covered up.

Many complaints are worse in the evening, from a bath, from becoming cold, from inhaling cold air. Rheumatic complaints are common and are aggravated by cold. Every cold seems to affect the joints. This is a marked feature of Calcarea phos .; every change to cold is felt in the joints; from bathing and getting chilled afterwards.

"Tight, suffocative, heavy ache in epigastrium, through to back clothes seem too tight; weak feeling in epigastrium, all aggravated when talking; frequently takes a long breath."

"Shooting from pit of stomach to chest; sharp pain in left chest; slight nausea; dull aching in forehead."

"Aching and shooting in pit of stomach and above it on each side of sternum."

Stomach: The stomach will not digest food, or only the, simplest food; the mucous membrane of the stomach is affected by this remedy like other mucous membranes.

Various pains in the stomach; aching, shooting pains in the pit of the stomach.

"Aching pain in the pit of stomach gradually becoming very severe; sharp stitching pains in stomach extending into chest, and below a sensation of pressure like a lump in pit of stomach, sometimes rising up under sternum, greatly aggravated from motion and somewhat from taking a long breath; generally aggravated after eating, ameliorated by lying perfectly quiet."

It is strange how the stomach symptoms are aggravated by talking.

The stomach feels sore, aggravated by talking, walking, inhaling cold air; wants warm things. Very flatulent; full of flatulent pains; pains relieved (Carbo veg.) by belching and passing flatus. Stomach and abdominal pains aggravated by talking, irregular, breathing; must sit in a chair and breathe with perfect regularity. Irregular breathing will cause cough or suffocation.

In the morning hurried to stool like Sulphur.

"Stools, painless, offensive, profuse; brown or black, thin or watery; preceded by pain in abdomen; before stool sudden urging, driving him out of bed in morning."

"Morning diarrhea with cough from tickling in throat pit."

It is common for phthisical cases to have a morning diarrhoea, and many of them look like Sulphur. When the morning diarrhea is gushing, Rumex will palliate; it will allay the extreme sensibility of the lungs, will ward off the sensitiveness to cold and will patch him up.

Rumex is not so deep as Sulphur, but it is an antipsoric. It is limited however, to the early stages; will carry a chronic case so, far, but it will require to be followed by another antipsoric. Calcarea follows it well.

Rumex is as sensitive to cold, to baths and chilly surroundings as Rhus, but it is aggravated by motion. Bryonia may be confused with it in this aggravation from motion and from talking, but Bryonia is not so sensitive to cold air, is often relieved from cold air and worse in a warm room; the complaints subside if the room becomes cool. In Rumex the nerves are sensitive to the open air; a nervous sensitiveness to open air as marked as Nux.

"Brown, watery diarrhoea, chiefly in morning, having stools from 5 to 9 A.M."

"Serious attack of diarrhea in an old man of seventy, after failure of Sulphur".

The Sulphur patient with a cough, especially in phthisis, commonly wants cool air, cooling things; though the stomach symptoms are sometimes ameliorated from hot drinks, yet he wants cool, refreshing air.

"Aphonia after exposure to cold."

"Tenacious mucus in throat or larynx, constant desire. to hawk."

"Tickling in throat pit causing cough."

He fights off the cough as long as he can because of the burning and rawness. In the most violent coryza there is a lack of the febrile symptoms of Bryonia, Rhus and Aconite. It has not the constitutional symptoms, the aching of the limbs, the general soreness, the high fever and thirst. The condition seems to have localized itself.

"Hoarse, barking cough, in attacks, every night at 11 P.M. and at 2 and 5 A.M. (children)."

"Cough, with pain behind midsternum."

"The most violent cough occurs a few moments after lying down and at night, in some cases, complete aphonia".

"In women, every fit of coughing produces the passage of a few drops of urine."

Rumex is one of the most valuable palliatives in advanced phthisis it will often carry a case through another winter. With Rumex, Pulsatilla, Senega, Arsenic and Nux vomica you can patch up the last years of a phthisical patient.

I would caution you also about the diarrhea that occurs in most cases of phthisis.

You will see Acetic acid recommended for the diarrhoea in phthisis. You had better let such conditions alone, unless they are very marked. If the diarrhea is very exhausting use some simple medicine, like this one, to slack it up. But the phthisical patient is better off with a little diarrhea, a loose morning stool. It is the same with night sweats; if he does not have them he will have something more violent.

The allopath stops the diarrhea and night sweats, and then has to feed Morphine to his patient because of the consequent sufferings. The more you undertake to relieve these outward conditions, these vents, the more harm you will do the patient, and if you go on you will have to abandon your Homoeopathy and give Morphine, which is really a crime.

You will remove the sore, bruised, aching all over the body of a consumptive by Arnica, and it will suit the cough and gagging and retching, and make him sleep.

Later Pyrogen may be needed for the aching in the bones and distressing cough. You patch him up year after year; sometimes Arsenic is the remedy, and it has to be more frequently repeated; sometimes it is Lycopodium, Pulsatilla, Pyrogen or Arnica.

These medicines help him along and they have often to be changed, but finally the break down occurs, and these medicines are no longer suitable. An awful dyspnoea gradually creeps on the patient; there is craving for air; the breathing space is becoming diminished.

Dropsy comes on in the extremities. The heart gives out; there is emaciation; the hippocratic countenance is seen; there is cold sweat, blue face, sinking. Even now we can palliate with Tarantula Cubensis. Sometimes it has to be repeated. It will relieve for days and give an euthanasia, not a stupefaction as produced by Morphia, benumbing his senses, but an actual comforting.

| **Antidote for Rumex Crispus pls, Its urgent...** | By: santoshrampuram<br>Hyderabad, India | July 14 2007 |

Hi,
if anybody knows the antidote for Rumex Crispus Pls tell the medicine immediately as I am suffering from its provings. Took 6c in first dose and 30c in the next dose with a gap of 12hrs.

Regards,
Santosh.

## Ruta Graveolens

Ruta is another remedy often overlooked. It is sometimes overlooked and Rhus or Argentum nitricum given, or other remedies not fully related to the case are given because Ruta is not well known.

Many of its symptoms are difficult to classify in the Repertory. A knowledge of its nature must be obtained. It falls under a class of complaints that resemble Rhus, in that it is sensitive to cold, aggravated from cold, damp weather; aggravated from becoming cold, and the complaints are often brought on from straining the part; overstraining or overexertion of parts, but principally confined to parts that are of a tendinous character aponeurotic fibres; white fibrous tissue; the flexor tendons especially flexor tendons that are overstrained by exertion.

Rhus has something like this, but nothing like what is found in Ruta. Ruta often suits in various surgical conditions; periosteal troubles from injury. Periosteal trouble where the flesh is thin over the bone; over the tibia. Bruises go away slowly and leave a hardened spot; thickening of periosteum; a knotty, nodular condition; it remains sore; slow repair. A lump in the periosteum that has existed for months or years; sensitive and sore and nodular; as a result of a blow with a stick or a hammer, or from bumping the shin bone,

Bruises: In farmers, woodmen, mechanics, from holding a hammer or iron instrument; hard nodules form in the palm from clasping the hand over an iron instrument in projecting it forward, as from using a crowbar; a hardened mass of tissue in the tendons, like a bursa.

Tendency to the formation of deposits in the periosteum, in bone, in tendons, about joints. The especial location is in the wrist; bursae and nodules form in this part. Overstraining of tendons and in the place where it is likely to give out a nodule will form in the tendon; lumps, bunches, little tumors in the tendon. Gradually increasing contraction of flexors, so that the hands become permanently flexed; the foot becomes flexed so that the sole becomes increasingly concave, and the toes are drawn under from overstraining and violence to the flexors.

Eyes: Overstraining of the muscles of the eye.

These muscles are largely tendinous. Continual use until it becomes an overuse. Eyestrain followed by headache, and the effects are also; on the globe of the eye, and coating of the eye, so that the overstrained eye is red.

Pain in the eye, above and through the eye when he attempts to use the vision, that is, aggravation from the exertion of vision. From looking at fine print, fine sewing. This overexertion of vision brings about redness, pain and inability to concentrate vision on one point.

Headache follows. Here Argentum nitricum resembles Ruta.

Arg. nit. and Natrum mur are the two remedies most frequently used, but Onosmodium is a very frequently indicated remedy for headaches from eyestrain.

But they can be easily differentiated. Ruta is aggravated from cold, wants everything warm. Arg. nit. is aggravated from heat wants to be in a cool place. The patient must be considered.

There is general exhaustion in Ruta. The legs give out on rising from a chair, the patient totters and makes several efforts on rising from a seat. Routinists give Phosphorus and Conium for this. Ruta and Phosphorus both have violent, unquenchable thirst for ice-cold water. Compare Phos. and Con. because of the weakness through the hips and thighs.

Mind: The remedy has not been proved sufficiently to bring out the mental symptoms.

They are only common and belong to many other remedies.

"Inclination to contradict and quarrel."

"Dissatisfied with himself and others."

"Anxious and low-spirited, with mental dejection."

These symptoms are only common; they can be grouped in one of two classes. The patient can be irritable, or the opposite-good-natured. This remedy is classified among the irritable.

"Despondent," that is, the opposite of happy-another of two classes.

"Melancholy disposition toward evening."

The only thing here is that it is aggravated toward evening. When things are brought out so that they belong to one of two classes, they are important only in a mild degree.

Pains: Many of the complaints are worse lying down, especially the pains that are sharp, stinging, tearing in the nerves.

Ruta is a painful medicine, but is slow in producing symptoms, hence it of a chronic nature. Old neuralgias, stinging, tearing, burning pains, especially in the lower extremities, about the eyes; faceaches. It has all the pains, described by all the adjectives that apply to pain, but it is worse lying down and worse from cold.

Rending, tearing pains in the sciatic nerves. The severest forms of sciatica; pains commence in the back and go down the hips and thighs; tearing pains; comfortable during the day, but aggravated as soon as he lies down at night. Gnaphalium is a great sciatic remedy, and it also has this aggravation from lying down.

Eyes again:

"Eyes feel hot like balls of fire."

To use Ruta for a pure inflammation when the eyes feel hot would be a failure. Euphrasia, Belladonna and Aconite are used in simple inflammations from a cold, and the, antipsorics when the case is chronic. But if a woman strains her eyes from long sewing on fine work, and the balls feel like fire, she needs Ruta. Aconite if after exposure to cold winds, there is inflammation with lachrymation, and the eyes look like raw beef.

"Eyes burn, ache, feel strained; sight blurred; aggravated from using them in the evening,"

In part of the general aggravation in the evening. When, in copying, the manuscript is placed here, and the copy at a different distance, this necessitates a constant change of vision in looking from one to the other, and especially if the copying is done in a poor light, a headache will come on, which Ruta will cure.

After overusing the eyes in this way, if the patient rides in a cold wind, a paralytic weakness results, and this is a further indication for Ruta. Lachrymation from exposure to the wind or riding in the cold. Paralysis of certain muscles of the eye, even strabismus; all sorts of disturbances of accommodation.

"Loss of power over internal rectus."

"Asthenopia; irritability of every tissue of eye from overwork or from using eyes on fine pork; beat and aching in and over eyes; eyes feel like balls of fire at night; blurring of vision; letters seem to run together, lachrymation, etc."

Amplyopia, dependent upon overexertion of eyes, or anomalies of refraction; from writing by artificial light.; fine needlework, etc. in a weaver, could with difficulty distinguish one, thread from another, and could not read at all; mistiness of sight, with complete obscuration at a distance.

Anus and rectum: Constipation is a striking feature, with prolapsus of the rectum at stool.

"Frequent unsuccessful urging with prolapsus ani."

"Protrusion of rectum after confinement."

Pain in rectum when sitting. Great soreness in rectum as from ulceration. It is a useful remedy in piles and stricture of the rectum.

Back symptoms.

It is a decided rheumatic remedy. All those remedies which are susceptible to cold, aggravated by cold, wet, stormy weather, are described as rheumatic remedies.

Rheumatic symptoms of the back.

"Pains as if bruised in lumbar vertebrae."

"Pain in back or coccyx as from a fall or blow, or as if bruised."

"Hamstrings feel shortened and weak; knees give way going up or down stairs."

"Pain and lameness in the ankles after sprain or dislocation."

"Lameness after sprains, especially of the wrists and ankles."

Immediately after a, sprain, for the inflammatory state, you will most likely need to give Arnica, and Rhus will probably follow. But when nodules occur in the tendons as a result of the strain, Ruta is called for.

Ruta is a great remedy for a mere sprain; it has all the soreness and weakness of tendons. Arnica, Rhus and Calcarea are often necessary in a routine way when there is absence of all symptoms, except the strain alone.

Paralytic weakness in the lower extremities after a sprain of the back. Under the aggravation in the evening is melancholy disposition, burning in the eyes, green halo around the light; sight blurred; eyes ache; pain below right scapula.

Extreme restlessness like Rhus. So restless be can't keep still; a nervous restlessness.

"Bruised feeling all over as from a fall or blow, worse in the limbs and joints."

"Bruises and other mechanical injuries of bones and periosteum; sprains; periostitis; erysipelas."

Ruta is related to and is an antidote to Mercury.

Eruptions on the skin with itching, which changes place after scratching like Mezereum. Compare Phos. in the thirst for cold water and the weakness of the lower extremities. In the rheumatism distinguish Phytolacca.

Compare Rhus, Sepia, Silicea and Sulphur. Ruta is an antipsoric, but not so deep as Silicea and Sulphur.

Why Too Many Carbohydrates Prevent You From Losing Weight

Most people trying to lose weight have heard the recommendation to decrease their intake of high-carbohydrate foods, such as sugary foods, bread, cereal, pasta, etc., but a lot of people are not aware of why this recommendation is so critical to burning fat and losing weight. After all, even some doctors think that all calories are the same and the only thing necessary to lose weight is to eat fewer calories than you use up through exercise and daily activities. Due to certain hormones though, not all calories are handled the same way by the body, and the calories from carbohydrates are much more difficult to burn than the calories from other types of foods,and a high carbohydrate intake certainly makes one prone to storing fat and not burning it.

At the heart of the matter is the hormone insulin. The function of insulin is to stimulate the cells to take up sugar from the bloodstream (when blood sugar is high, as it typically is shortly after eating) and store it for reserve energy.

This extra blood sugar is first stored as a compound called glycogen in the muscles and liver. Glycogen can be quickly converted back to blood sugar when needed for energy to fuel sudden bursts of activity. The available storage space for glycogen is pretty limited, and when insulin has caused the glycogen storage to be filled up, the remaining excess blood sugar is stored as fat.

There is considerably more storage space in the body for fat than there is for glycogen. There are billions of fat cells in the body, each of which can enlarge to over 100 times it's original size to accommodate extra fat storage. As an aside, this is why it is possible to get fat again after liposuction - even if you remove many of the body's fat cells, those that remain can

enlarge considerably to store fat.

Sabadilla
Cevadilla Seed. Asagræa Officialis

Generals: The Sabadilla patient is a shivering patient, sensitive to the cold air, a cold room, cold food.
He wants to be well wrapped up; wants hot drinks to warm up his stomach. He is subject to catarrhal conditions, and in these he wants hot air. The catarrhal conditions of the throat require hot drinks and food. Warm things are grateful to him. It is difficult to swallow cold things; they increase the pain and difficulty in swallowing.
We often study remedies by contrast. This remedy travels from left to right, and at once a good prescriber connects it with Lachesis. The soreness, pain and inflarnmatory conditions of the throat commence on the left side and spread to the right in both Sabadilla and Lachesis. But warm things aggravate the pain in

Lachesis; they cause a spasmodic condition, with a sensation of choking, and therefore he wants cold things, which relieve; they are swallowed more easily and ameliorate the pain in the throat. Sabadilla on the other hand is relieved by heat, either outside or inside.

Nose: Catarrhal condition of the nose, with constant sneezing; sensation of great rawness in the nose; burning; stuffing up of the nose.

Discharge at first of thin mums and later thick mucus. It has all the appearance of a coryza. The coryza is ameliorated from inhaling hot air. He sits before an open grate or register, with the head close to it, inhaling the hot air. Especially useful when the catarrhal state of the nose is prolonged; a prolonged coryza, which does not yield to ordinary remedies; a lingering coryza, and the discharge is exaggerated by the odor of flowers. Even thinking of the odor of flowers makes him sneeze and increases the flow from the nose. So thinking of various things aggravates his complaints.

Many hay fever patients are sensitive to the odor of flowers, to the, odor of the hay field, to dying vegetable matter; so oversensitive to the odor of fruit are some that apples have to be removed from the house. Inhalation of odors that are beautiful, as that of the lavender, some hay fever patients cannot tolerate; such things may bring on an attack out of the season. Now Sabadilla is of this sort oversensitive to surroundings, to odors; these increase the catarrhal state of the throat and posterior nares.

Sneezing and a flow of mucus from the nose; goes on even to ulceration. Periodical attacks; a rose cold in June; in autumn about August 20 as a hay fever. Hay fever is often an easy thing to palliate with short acting remedies; they will cut short an attack in a few days. But the cure requires years, and the patient must be treated in the interim and according to his symptoms. When the hay fever symptoms are present he has no others; one group is manifested at one time, and another group at another time. But the patient is sick and all the symptoms must be gathered together and the case treated accordingly.

Mind: Many of the annoyances of this individual seem to be imaginary.
His mind is filled with strange things. Imaginations concerning persons or himself are strange. Imagines the body is withering, that the limbs are crooked, that the chin is elongated, and larger on one side than the other. She feels that this is so and believes it even in spite of her vision. It is a sensation which she believes, a delusion, an insanity.
"Erroneous impressions as to the state of his body."
"Imagines himself sick; imagines parts shrunken; that she is pregnant when she is merely swollen from flatus; that she has some horrible throat disease that will end fatally."

The imaginations are groundless; nothing is visible, and the suffering is greater than if there was something to be seen. These patients often get no sympathy; they should really have a remedy. Thuja has erroneous impressions as to the state of the body; thinks she is made of glass; the idea is not that of transparency, but rather of brittleness fears that she would break in pieces.

There are but a few remedies which have fixed ideas; these ideas may be concerning religion, politics, clothing, things of the family and life. I once had an insane patient who would get out of the street, ear if anyone entered who wore a certain color, because she had a fixed idea that this was of evil import to her.

The Pulsatilla mental state in a man is that a woman would be a detriment to his soul; it is a delusion, a fixed idea. Iodine is full of fixed ideas. Anacardium has a fixed idea that a devil is sitting on one shoulder talking into his ear, while an angel sits on the other shoulder talking into the other ear, and he halts between the two and says nothing.

"Delirium during intermittents."

"Mental exertion aggravates the headache and produces sleep."

A sleepiness comes on from thinking, meditating, reading. While meditating in a chair he falls asleep like Nux moschata and Phosphoric acid.

Head: Dizziness; vertigo.
He wakens up at night with vertigo. Vertigo, in the open air; under all sorts of circumstances. Full of headaches. Headaches on one side of the head. The meditation which drives him to sleep brings on headache.

Headache in school girls. Feeble children, who have to be taken from school because of headache, come home with strange imaginations concerning school and themselves. Headache stupefying and associated with coryza; in the frontal sinuses, above the eyes.

Fullness, bursting, stupefying, aggravated by jarring, sneezing, walking. Stupefying headaches with coryza. Often gets up with it in the morning, increases during the forenoon. Head covered with a cold sweat. Many of the symptoms are closely related to Veratrum, especially in the cold sweat on the forehead with complaints.

Hay fever when there is spasmodic sneezing, fluent coryza; nostrils stuffed up; inspirations through nose labored; snoring; itching in the nose; profuse bleeding from the nose; bright red blood comes from the posterior nares and is expectorated; very sensitive to the smell of garlic; coryza with severe frontal pains and redness of eyelids; violent sneezing; copious watery discharge from the nose.

A peculiar kind of itching coming on in some hay fevers is an itching in the roof of the mouth, on the soft palate, and for relief

the patient must draw the tongue back and forth over the soft palate, with this coryza, sneezing, etc. Wyethia will cut the attack short.
When the itching extends to the larynx and trachea, with great irritability and sensitive to cold: Nux vomica.
When the discharge burns a red streak over the upper lip and about the wings of the nose, with sneezing and profuse, watery nasal discharge: Arsenicum.

Copious acrid lachrymation, and copious bland flow from the nose with sneezing: Euphrasia.

Copious, bland, watery discharge from the eyes and copious, acrid, watery discharge from the nose: Allium cepa.

But these are not the constitutional remedies; they do not cure, but only palliate during the severe attacks. These symptoms are the outcome of the psoric constitution, and this constitution must be treated by antipsorics. Sometimes the hay fever is so severe that it seems to be the only manifestation of psora in the patient, but if it is restrained or stopped up by bad treatment he is not well during the whole year.

If let alone he has good health during the rest of the year. Many a time the hay fever goes through the whole winter and only by constitutional up building can it be mitigated. But with constitutional treatment each yearly attack is lighter, and at the end of treatment he is able to live in his own climate unaffected.

He must not go to the mountains to mitigate it. If to any place, he should go where the affection would be worse, so that all its manifestations would be apparent. The hay fever will only be cured if the patient is curable, but if not, if his constitution is so broken down that he is incurable, his hay fever will not be cured.

The most striking place of attack is the mucous membrane of the nose, throat, trachea and larynx. Violent acute inflammation of the mucous membrane of these parts.

Stomach: Great thirst for hot drinks.
The appetite is singular; it is commonly seen in pregnant women. She says she is never hungry; never wants anything to eat, and often there is an aversion to food; but when, from a matter of reason, she concludes to eat, and she takes a mouthful, it tastes good, it recalls the appetite, and she makes a good meal. At other times not only a loss of appetite, but a disgust and loathing of food.

"Disgust for all food, for meat, for sour things, for coffee, for garlic."

"Morbid hunger or loathing for food."

A routine remedy in pin worms, seat worms, all sorts of worms stomach and tape worms. A careful prescriber never thinks of prescribing for worms. He takes all the symptoms of the patient and these guide him to the remedy.

Sabadilla and Sinapis nigra are well adapted to cases in which pin worms are present. Often a remedy restores the patient to order in general and then all his particular parts are set in order. Female sexual organs.

"Nymphomania from ascarides."

"Cutting pains, as from knives, in ovary."

"Menses too late, with painful bearing down a few days previous; decreased, How by fits and. starts, sometimes stronger, sometimes weaker; blood bright red."

Hysterical patients; a patient with a strangely unbalanced mind, accompanied by various nervous manifestations.

"Twitchings, convulsive tremblings, or catalepsy from worms."
It is true that worms will not prosper in a perfectly healthy stomach, intestine or rectum. They can only thrive in the

unhealthy.
Turn the economy into order and the parasites go. The same applies to germs. They only exist as a result of disease. They have never been known to exist without the disease having first existed. If you ignore the worm, but select the remedy on the totality of the symptoms, the patient will be restored to health, and, so far as the worm is concerned, go without a symptom.

The worm becomes smaller, shrivels and finally departs. It is rarely the case for the worm to disappear inside of six weeks after the remedy. If, on the other hand, you eject the worm by violent means, the patient may go for years with troublesome symptoms, and you do not know why you fail to cure him.

Prescribe for the patient first. No results of disease should be removed until proper constitutional treatment has been resorted to, and be sure that it is proper.

Click picture for many more pictures

SABAL SERRULATA
Saw Palmetto

Sabal is homeopathic to irritability of the genito-urinary organs. General and sexual debility. Promotes nutrition and tissue building. Head, stomach, and ovarian symptoms marked. Of unquestioned value in prostatic enlargement, epididymitis, and urinary difficulties. Acts on membrano-prostatic portion of urethra. Iritis, with prostatic trouble. Valuable for undeveloped mammary glands. Fear of going to sleep. Languor, apathy and indifference.

Head.--Confused, full; dislikes sympathy; makes her angry. Vertigo, with headache. Neuralgia in feeble patients. Pain runs up from nose and centers in forehead.

Stomach.--Belching and acidity. Desire for milk (Rhus; Apis)

Urinary.--Constant desire to pass water at night. Enuresis; paresis of sphincter vesicæ. Chronic gonorrhœa. Difficult urination. Cystitis with prostatic hypertrophy.

Male.--Prostatic troubles; enlargement; discharge of prostatic fluid. Wasting of testes and loss of sexual power. Coitus painful at the time of emission. Sexual neurotics. Organs feel cold.

Female.--Ovaries tender and enlarged; breasts shrivel (Iod; Kali iod). Young female neurotics; suppressed or perverted sexual inclination.

Respiratory.--Copious expectoration, with catarrh of nose. Chronic bronchitis (Stann; Hep).

Relationship.--Compare: Phosph ac; Stigmata maydis; Santal; Apis. In prostatic symptoms: fer pic; Thuja; Picric acid (more sexual erethism). Populus tremul; (prostatic enlargement with cystitis).

Dose.--Mother tincture, ten to thirty drops. Third potency often better. The tincture must be prepared from the fresh berries to be effective.

| **Re: SABAL SERRULATA** | By: girilal<br>New Jersey USA | November 25 2006 |
|---|---|---|

Also called Fan Palm or Dearf Palm. In India it is found growing in pots but rarely gives much needed fruits.

Most fruits are imported from Florida USA where this grows all over. On my last visit to Florida we did Camping in Everglades. These plants and Crocodiles were everywhere. We had to burn dry seeds and leaves of Sabal to keep crocodiles and aligaters away.

Juice of fresh seeds is effective but most manufacturers do not use fresh fruits instead they use dry seeds that's people are deprived of this medicine in the best form.

SABINA
Savine

Has a special action on the uterus; also upon serous and fibrous membranes; hence its use in gout. Pain from sacrum to the pubis. Hæmorrhages, where blood is fluid and clots together. Tendency to miscarriage, especially at third month. Violent pulsations; wants windows open.

Mind.--Music is intolerable, produces nervousness.

Head.--Vertigo with suppressed menses. Bursting headache, suddenly coming and going slowly. Rush of blood to head and face. Drawing pains in masseter muscles. Teeth ache when chewing.

Stomach.--Heartburn. Desire for lemonade. Bitter taste (Rhus).

Lancinating pain from pit of stomach across back.

Abdomen.--Bearing-down, constrictive pain. Colic, mostly in hypogastric region. Tympanitic distention.

Rectum.--Sense of fullness. Constipation. Pain from back to pubis. Hæmorrhoids, with bright red blood; bleed copiously.

Urine.--Burning and throbbing in region of kidneys. Bloody urine; much urging. Bladder inflamed with throbbing all over. Inflammation of urethra.

Male.--Inflammatory gonorrhœa, with pus-like discharge. Sycotic excrescences. Burning, sore pain in glans. Prepuce painful with difficulty in retracting it. Increased desire.

Female.--Menses profuse, bright. Uterine pains extend into thighs. Threatened miscarriage. Sexual desire increased. Leucorrhœa after menses, corrosive, offensive. Discharge of blood between periods, with sexual excitement (Ambr). Retained placenta; intense after-pains. Menorrhagia in women who aborted readily. Inflammation of ovaries and uterus after abortion. Promotes expulsion of moles from uterus (Canth). Pain from sacrum to pubis, and from below upwards shooting up the vagina. Hæmorrhage; partly clotted; worse from least motion. Atony of uterus.

Back.--Pain between sacrum and pubis from one bone to another. Paralytic pain in small back.

Extremities.--Bruised pains in anterior portion of thighs. Shooting in heels and metatarsal bones. Arthritic pain in joints. Gout; worse, in heated room. Red, shining swelling. Gouty nodosities (Ammon phos).

Skin.--Fig-warts, with intolerable itching and burning. Exuberant granulations (Thuj; Nit ac). Warts. Black pores in skin.

Modalities.--Worse, from least motion, heat, warm air. Better, in cool fresh air.

Relationship.--Complementary: Thuja.

Compare: Sanguisorba (Venous congestion and passive hæmorrhages; varices of lower extremities; dysentery. Long lasting profuse menses with congestion to head and limbs in sensitive, irritable patients. Climacteric hæmorrhages. Use 2x attenuation). Sanguisuga.--The leech--(Hæmorrhages, especially bleeding from anus. Use 6x). Rosmarinus (menses too early; violent pains followed by uterine hæmorrhage. Head heavy, drowsy. Chilly with icy coldness of lower extremities without thirst, followed by heat. Memory deficient). Croc; Calc; Trill; Ipec; Millef; Erig.

Antidote: Puls.

Dose.--Locally, for warts, tincture. Internally, third to thirtieth potency.

Cane-sugar
(SUCROSE)

According to the great Dr. Hering, a large proportion of chronic diseases of women and children are developed by using too much sugar. Sugar is an antiseptic. Combats infection and putrefaction; has a solvent action on fibrin and stimulates secretion by the intense osmotic changes induced, thus rinsing out the wound with serum from within outward, favoring healing. Leg ulcers.

Sugar must be considered a sustainer and developer of the musculature of the heart and hence useful in failure of compensation and a variety of cardio-vascular troubles. Acts as a nutrient and tonic, in wasting disorders, anæmia, neurasthenia, etc, increasing weight and power.

Opacity of cornea. Dim sight. Acidity and anal itching. Cold expectoration. Myocardial degeneration.

Fat, bloated, large-limbed children, who are cross, peevish, whining; capricious; want dainty things, tidbits, and refuse substantial food. Œdema of feet. Headache every seven days

Relationship.--Compare: Saccharum lactis-Sugar of milk-lactose--(diuresis; amblyopia; cold pains, as if produced by fine, icy cold needle with tingling, as if frost bitten; great physical exhaustion. Sugar of milk in large doses to develop the Bacillus acidophilus to correct putrefactive intestinal conditions and also constipation).

Dose.--Thirtieth potency and higher. Locally in gangrene. One ounce of lump sugar morning and evening valuable adjunct in the treatment of obstinate cases of heart failure due to deficient heart muscle without valvular lesion. Epilepsy; blood with reduced sugar content irritates the nervous system with tending to convulsions.

Sugar as an oxytocic has its most suitable application towards the end of labor when there is no mechanical obstruction and delay is due to uterine inertia. 25 grammes dissolved in water, several times every half hour.

Compare: Saccharin (hinders both the salivary and peptic ferment actions with consequent dyspepsia. Prof. Lewin believes its action to be on the secretory cells themselves and it has caused pain (right hypogastrium), loss of appetite, diarrhœa and wasting).

Are Statin Cholesterol Medications Right For You?
You have changed the way you eat, opting for low saturated fat

choices, and even embracing that exercise routine you swore you would never do. You feel a bit better and the scale is rewarding you for your efforts, but your doctor is still pushing you to reduce those potentially dangerous LDL cholesterol levels even further. Both you and your doctor wanted to avoid adding a cholesterol medication, hoping diet modification and exercise would be enough. But it just hasn't been enough to knock down LDL cholesterol levels below 100. Your doctor has suggested a category of mediations called statins, but you would like to learn more before you make the plunge.

Statin drugs have rapidly become the treatment of choice for many doctor and their names frequent our television sets. Perhaps you recognize these names: Lipitor (atorvastatin), Zocor (simvastatin), Crestor (rosuvastatin), Pravachol (pravastatin), and Lescol (fluvastatin). These drugs work by interrupting the body's synthesis of cholesterol. The benefits of statin cholesterol drugs are wide ranging, such as reducing bad and raising good cholesterol levels, reducing the amount of plaque in your arteries, and reducing the risk of heart attack and stroke.
